Petro-Lewis Corp., Common Stock, $1 Par Value (File No. 7–6314)
Heizer Corporation, Common Stock, $.01 Par Value (File No. 7–6315)
Umet Properties Corporation (Delaware—New Holding Company), Common Stock, $1 Par Value (File No. 7–6316)
Dayco Corporation (Michigan), Common Stock, $1 Par Value (File No. 7–6317)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 12, 1982 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 19064, (SR–OCC–82–15)]

Options Clearing Corp.; Order Approving Proposed Rule Change

September 20, 1982.

Options Clearing Corporation ("OCC"), on July 6, 1982, submitted a proposed rule change, pursuant to Rule 19b–4 under the Securities Exchange Act of 1934, which allows OCC to eliminate certificates in respect of options contracts. Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 18944, August 9, 1982) and by publication in the **Federal Register** (47 FR 36346, August 19, 1982). No letters of comment were received by the Commission.

Article VI of OCC's By-Laws and Chapter VII of OCC's Rules currently provide for the issuance of physical certificates in respect of options contracts at the request of OCC participants. Certificates may be issued in respect of any option contract included in a long position in a customer's account.[1] A certificate merely evidences a clearing member's position as the holder of one or more options of a specified type (put or call) in a specified option series; it is nonnegotiable and confers no separate legal rights on the holder. Certificated options contracts may only be exercised or closed out upon the surrender of the physical certificate in accordance with OCC's Rules and Procedures.[2] In that regard, OCC's By-Laws and Rules provide that until the certificate is surrendered, any attempt by a clearing member to write a closing options transaction with respect to a corresponding long certificated options position is considered by OCC to be an opening transaction subject to OCC's margin requirements on short positions.[3] Furthermore, while the exercise of an unexpired, certificated option contract must be accompanied by the surrendered certificate,[4] a clearing member may exercise an expiring, certificated options contract without contemporaneously surrendering the certificate. In that situation, OCC's Rules only require that a clearing member surrender the certificate to OCC promptly following exercise;[5] that clearing member, however, must hold OCC harmless against any loss or expense sustained by OCC due to the member's failure to surrender the certificate on expiration.[6]

OCC's proposed rule change would eliminate all provisions in its current By-Laws and Rules providing for, or referring to, options certificates.[7] In addition, the proposed rule change would eliminate language referring to certificates in connection with OCC's various "new products," adopted or proposed.[8] Furthermore, the proposed rule change contains conforming technical amendments to several OCC Rules that relate to certificates.[9]

In its filing, OCC sets forth several reasons supporting the elimination of certificates. OCC states that, when the listed options market was initiated, OCC's originators preferred totally certificateless option trading, but provided for the issuance of certificates on request due to a concern that some States would require institutional investors to maintain physical custody of certificates. However, after contacting the marketing personnel of the options exchanges, staff of the National Association of Insurance Commissioners, attorneys for institutional investors and those OCC clearing members that have requested certificates, OCC now understands that institutional investors do not need and will not request certificates. OCC also failed to locate any State or local regulatory requirements that could preclude eliminating the certificates. Furthermore, the Commission did not receive any comments, including those relating to the existence of such statutory requirements, in response to its formal solicitation of comments in Securities Exchange Act Release No. 18999.

OCC believes that several benefits will accrue to its clearing members when certificates are eliminated. Certificates impose on clearing members administrative burdens and related costs that are greatly out of proportion to the volume of certificates actually issued.[10] For example, clearing members devote significant amounts of computer time and manpower in requesting, auditing, balancing, holding and redeeming certificates on behalf of customers, as well as in posting and monitoring margin on certain closing options transactions pursuant to OCC By-Law VI, Section 15 and OCC Rule 703.

Moreover, OCC incurs significant and disproportionate burdens and related costs. Not only must OCC issue, monitor, audit and redeem certificates, it also must systems test certificate processing whenever changes are made to its clearing system. OCC has indicated that these tests are costly and time consuming.

---

[1] OCC Rule 701. To identify the clearing member's customer for whose account the option is purchased, the clearing member inserts its customer's name in the appropriate space on the OCC certificate.

[2] OCC Rule 702.

[3] OCC By-Law, Article VI, Section 15, and OCC Rule 703.

[4] OCC Rule 801(a).

[5] OCC Rule 805(m).

[6] *Id.*

[7] Numerous OCC By-Law and Rule provisions are being amended or rescinded to bring about this result. The OCC By-Law central to certificate issuance, Article VI, Section 6, is being amended, and Chapter VII of OCC's Rules under the By-Law (*i.e.*, OCC Rules 701 through 706) are being rescinded.

[8] *See* OCC By-Laws Articles XII (GNMA Options); XIII (Treasury Securities Options); XIV (CD Options); and XV (foreign Currency Options).

[9] Other OCC Rules that will be technically amended to conform to the proposed rule change include: Rule 101(e), Definition of Certificate; Rule 205, Receipt of Documents; Rule 206, Submission (of documents) to OCC; Rule 401, Report of Matched Trades; Rule 801, Exercise of Options; and Rule 805, Expiration Date Exercise Procedure.

[10] OCC state in its filing that, in 1981, less than .1 percent of all outstanding options contracts were represented by physical certificates.

For the reasons stated below, the Commission believes that OCC has correctly assessed the costs and benefits of issuing certificates in respect of options contracts and the value inherent in eliminating those certificates.

Approval of the proposed rule change should benefit OCC clearing members in several ways. First, the elimination of options certificates will expedite both the close out and the exercise of clearing members' unexpired long options positions. Second, it will obviate the need for additional OCC margin in certain circumstances, allowing members to use those marginable assets for other productive purposes. Third, clearing members will be able to avoid the administrative costs and burdens associated with OCC's certificate program. Finally, the Commission believes that by implementing the proposed rule change, OCC will avoid costly administrative burdens associated with processing options certificates.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies, and in particular, the requirements of Section 17A of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authoirty.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Philadelphia Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity of Hearing

September 20, 1982.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Frontier Holdings, Inc. Common Stock, $.50 Par Value (File No. 7-6318)

Norfolk Southern Corporation Common Stock, $1 Par Value (Filed No. 7-6319)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 12, 1982 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunitiy for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

General Aviation District Office at Santa Monica, Calif., Air Carrier District Office at Los Angeles, Calif.,

Notice is hereby given that on or about October 1, 1982, Air Carrier District Office Number 31 at Los Angeles, California will be redesignated as Flight Standards District Office Number 62. Concurrently, General Aviation District Office Number 6 at Santa Monica, California will be redesignated as Flight Standards District Office Satellite Number 62S. Both offices will remain at their present locations, and services to the general public will continue without interruption. This information will be reflected in the FAA Organization Statement the next time it is reissued.

(Sec. 313(a), 72 Stat. 752; 49 U.S.C. 1354)

Issued in Los Angeles, CA, on September 16, 1982.

R. L. Devereaux,

Acting Director, Western-Pacific Region.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in August 1982. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5. Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
1479-X	DOT-E 1479	Rockwell International Corporation, Canoga Park, CA.	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification cargo tanks for transportation of liquefied fluorine and mixture of liquefied fluorine and liquefied oxygen. (Mode 1.)
1479-X	DOT-E 1479	U.S. Department of Defense, Washington, DC.	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification cargo tanks for transportation of liquefied fluorine and mixture of liquefied fluorine and liquefied oxygen. (Mode 1.)
2136-X	DOT-E 2136	U.S. Department of Defense, Washington, DC.	49 CFR 173.1, 173.3(a), 173.7(a), 174.10, 174.104, 174.3, 174.90(a), 177.801, 177.802.	To authorize shipment of radioactive materials with explosives in Department of Defense containers packaged and loaded by the Department of Defense without carrier inspection. (Modes 1, 2.)
2805-X	DOT-E 2805	Union Carbide Corporation, Danbury, CT.	49 CFR 172.101, 173.315(a)(1)	To become a party to Exemption 2805. (Mode 1.)
3126-X	DOT-E 3126	Hercules, Incorporated, Wilmington, DE.	49 CFR 173.62, 177.821, 177.822(b), 177.835(k).	To authorize packagings not provided for in the Hazardous Materials Regulations, for transportation of Class A explosives. (Mode 1.)
3142-X	DOT-E 3142	U.S. Department of Energy, Washington, DC.	49 CFR 173.24(a)(1)	To authorize shipment of nonflammable compressed gases in DOT Specification 3A1800 or 3A2000 cylinders, from which a controlled flow of gas is released to a leak calibration apparatus. (Modes 1, 2.)
3216-X	DOT-E 3216	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.314(e)	To authorize use of a proposed DOT Specification 110A300W tank car tank, for transportation of certain flammable compressed gases. (Modes 1, 3.)
4108-X	DOT-E 4108	Purity Cylinder Gases, Inc., Grand Rapids, MI.	49 CFR 173.315(a)	To authorize shipment of liquefied argon, nitrogen and oxygen in non-DOT specification cargo tanks. (Mode 1.)
4108-X	DOT-E 4108	Burdett Gas Products Company, Norristown, PA.	49 CFR 173.315(a)	To authorize shipment of liquefied argon, nitrogen and oxygen in non-DOT specification cargo tanks. (Mode 1.)
4453-X	DOT-E 4453	Mergraf Explosives, Inc., Rancho Cordova, CA.	49 CFR 173.114a(h)(3)	To authorize use of a non-DOT specification bulk, hopper-type tank for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixture. (Mode 1.)
4453-P	DOT-E 4453	Kentucky Anfo, Inc., Madisonville, KY	49 CFR 173.114a(h)(3)	To become a party to Exemption 4453. (Mode 1.)
4459-P	DOT-E 4459	Lif-O-Gen Div. of Allied Healthcare Prod., Inc., Cambridge, MD.	49 CFR 173.302(a)(1), 173.304(a)(1), 173.328(a)(2), 173.353(a)(3), 175.3, 178.37.	To become a party to Exemption 4459. (Modes 1, 2, 4.)
4497-X	DOT-E 4497	Red Ball Supply, Inc., Oklahoma City, OK.	49 CFR 172.101, 173.315(a)	To authorize use of non-DOT specification cargo tanks for transportation of certain nonflammable compressed gases. (Mode 1.)
4717-X	DOT-E 4717	Northern Petrochemical Company, Morris, IL.	49 CFR 172.101, 173.314(e)	To authorize shipment of ethylene or ethane in a non-DOT specification, insulated tank car tank. (Mode 2.)
4734-X	DOT-E 4734	General Electric Company, Waterford, NY.	49 CFR 173.135(a)(9), 173.136(a)(8), 173.260(a)(8).	To authorize use of modified DOT Specification MC-331 cargo tanks for transportation of certain flammable liquids and corrosive materials. (Mode 1.)
5232-X	DOT-E 5232	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.314(c) table	To authorize shipment of certain flammable and nonflammable liquefied compressed gases in AAR Specification 120A300W tank cars, and DOT Specification 105A500W tank cars. (Mode 2.)
6071-X	DOT-E 6071	Walter Kidde & Company Incorporated, Belleville, NJ.	49 CFR 173.304, 173.305, 175.3	To authorize use of non-DOT specification pressure vessels for transportation of nonflammable compressed gases. (Modes 1, 2, 4, 5.)
6080-X	DOT-E 6080	U.S. Department of Energy, Washington, DC.	49 CFR 173.301(d), 173.327(a) 173.337(a)(1).	To authorize use of manifolded cylinders for transportation of a Class A poison. (Mode 1.)
6113-X	DOT-E 6113	Trans Gas, Inc., Lowell, MA	49 CFR 172.101, 173.315(a)	To authorize use of a non-DOT specification cargo tank for shipment of certain flammable gases. (Mode 1.)
6121-X	DOT-E 6121	E. I. du Pont de Pont Nemours & Company, Inc., Wilmington, DE.	49 CFR 179.220-19(c)	To authorize use of DOT Specification 115A60W1 and 115A60W6 tank car tanks for transportation of a certain flammable liquid. (Mode 2.)
6197-P	DOT-E 6197	Transgas Inc., Lowell, MA	49 CFR 172.101, 173.315(a)(1)	To become a party to Exemption 6197. (Mode 1.)
6205-P	DOT-E6205	Beech Aircraft Corporation, Boulder, CO.	49 CFR 172.101, 173.315(a)(1)	To become a party to Exemption 6205. (Mode 1.)
6231-X	DOT-E 6231	Richmond Lox Equipment Company, Livermore, CA.	49 CFR 172.101, 173.314(c)	To authorize shipment of liquefied flammable gases in non-DOT specification vacuum insulated tank cars. (Mode 2.)
6334-X	DOT-E 6334	Allied Corporation, Morristown, NJ	49 CFR 172.101, 172.594	To authorize use of DOT Specification MC-312 cargo tanks for transportation of an oxidizer. (Mode 1.)
6349-X	DOT-E 6349	Airco Industrial Gases, Murray Hill, NJ	49 CFR 172.101, 173.315(a)	To authorize use of non-DOT specification portable tanks for shipment of certain flammable and nonflammable gases. (Modes 1, 2, 3.)
6349-X	DOT-E 6349	Union Carbide Corporation, Danbury, CT.	49 CFR 172.101, 173.315(a)	To authorize use of non-DOT specification portable tanks for shipment of certain flammable and nonflammable gases. (Modes 1, 2, 3.)
6392-X	DOT-E 6392	Stauffer Chemical Company, Westport, CT.	49 CFR 172.101, 173.314(c)	To authorize use of non-DOT specification vacuum insulated tank car tanks for transportation of a liquefied flammable compressed gas. (Mode 2.)
6464-P	DOT-E 6464	Transgas Inc., Lowell, MA	49 CFR 172.101, 173.315(a)	To become a party to Exemption 6464. (Mode 1.)
6472-X	DOT-E 6472	Thiokol Corporation, Odgen, UT	49 CFR 173.91	To authorize use of non-DOT specification polystyrene containers for transportation of certain Class B explosives. (Modes 1, 2, 3.)
6484-X	DOT-E 6484	International Minerals, and Chemical Corporation, Mundelein, IL.	49 CFR 172.101	To authorize transport of mixtures of nitromethane and various solvents in DOT Specification MC-307 or MC-312 tank motor vehicles. (Mode 1.)
6848-X	DOT-E6484	Dow Chemical Company, Midland, MI	49 CFR 172.101	To authorize transport of mixtures of nitromethane and various solvents in DOT Specification MC-307 or MC-312 tank motor vehicles. (Mode 1.)
6538-X	DOT-E6538	Aladdin Industries, Incorporated, Nashville, TN.	49 CFR 173.304(d)(3)(ii), 178.33	To authorize use of a non-DOT specification inside nonrefillable metal container, for transportation of a certain flammable gas. (Modes 1, 3.)
6538-X	DOT-E6538	Wonder Corporation of America, Norwalk, CT.	49 CFR 173.304(d)(3)(ii), 178.33	To authorize use of a non-DOT specification inside nonrefillable metal container, for transportation of a certain flammable gas. (Modes 1,3.)
6611-X	DOT-E6611	Cities Service Company, Tulsa, OK	49 CFR 172.101, 173.315(a)	To authorize use of a non-DOT specification vacuum insulated portable tank, for transportation of a nonflammable gas. (Modes 1, 3.)
6651-X	DOT-E6651	Park Chemical Company, Detroit, MI	49 CFR 173.28(h), 173.28(m)	To authorize one time reuse of the involved single-trip containers, for transportation of certain Class B poisonous solids. (Mode 1.)
6651-X	DOT-E6651	Heatbath Corporation, Chicago, IL	49 CFR 173.28(h), 173.28(m)	To authorize one time reuse of the involved single-trip containers, for transportation of certain Class B poisonous solids. (Mode 1.)
6658-X	DOT-E6658	U.S. Department of Defense, Washington, DC.	49 CFR 173.65	To become a party to Exemption 6658. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6670-X	DOT-E6670	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.301(d), 173.302	To authorize shipment of bromochloromethane in DOT Specification 3A2400, 3AA2400 and 3AAX2400 cylinders. (Mode 1.)
6760-X	DOT-E6760	Terra Chemicals International, Inc., Sioux City, IA.	49 CFR 173.358(a)(13), 173.359(a)(15)	To authorize use of DOT Specification 51 portable tanks equipped with bottom outlet for unloading, for transportation of certain Class B poisonous liquids. (Mode 1.)
6763-X	DOT-E6773	Pool Water Products, Garden Grove, CA.	49 CFR 173.2117(a)(8)	To authorize use of non-DOT specification single-wall, double face corrugated fiberboard boxes, for shipment of certain oxidizers. (Modes 1, 2, 3.)
6890-B	DOT-E6890	Explosive Technology, Inc., Fairfield, CA.	49 CFR 173.100(ee), 175.3	To become a party to Exemption 6890. (Modes 1, 2, 3, 4.)
6929-X	DOT-E6929	U.S. Department of Energy, Washington, DC.	49 CFR 173.88(e)(2)(ii), 173.92(b)	To authorize shipment of a Class B explosive in rocket motors in a propulsion state. (Modes 1, 3.)
6984-B	DOT-E6984	Hercules, Incorporated, Wilmington, DE	49 CFR 173.103(a), 173.66(g), 177.835(g)(2)(i).	To authorize packaging of 1000 or less electric blasting caps in inside pasteboard cartons or tubes, overpacked in an IME Standard 22 container. (Mode 1.)
6984-X	DOT-E6984	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.103(a), 173.66(g), 177.835(g)(2)(i).	To authorize packaging of 1000 or less electric blasting caps in inside pasteboard cartons or tubes, overpacked in an IME Standard 22 container. (Mode 1.)
7024-X	DOT-E 7024	Burlington Industries, Inc., Burlington, NC.	49 CFR 173.249(a)(7)	To authorize transport of an alkaline corrosive liquid in collapsible rubber containers identified as SEALDTAINRS. (Mode 1.)
7076-X	DOT-E 7076	LaMotte Chemical Products Company, Chestertown, MD.	49 CFR 173.266(b)	To authorize packaging not prescribed in the Hazardous Materials Regulations, for transportation of a certain corrosive liquid and flammable liquid. (Modes 1, 2, 3.)
7538-X	DOT-E 7538	Southern Chemical Products Company, Macon, GA.	49 CFR 178.19, Part 178, Subpart F	To authorize manufacture, marking and sale of non-DOT specification reusable rotationally molded polyethylene container, for transportation of corrosive liquids. (Modes 1, 2, 3.)
7640-X	DOT-E 7640	Mauser Packaging Limited, New York, NY.	49 CFR 173.266(a), 178.19	To authorize use of a DOT Specification 34 polyethylene container of 15 gallon capacity for shipment of hydrogen peroxide, 60%. (Modes 1, 2, 3.)
7680-X	DOT-E 7680	Sterling Drug, Inc., New York, NY	49 CFR 173.206a(a)(2)	To authorize shipment of a certain flammable solid in a reusable non-DOT specification stainless steel drum. (Mode 1.)
7744-X	DOT-E 7744	Dow Corning Corporation, Midland, MI	49 CFR 172.101, 173.315(a), 178.337-11(c).	To authorize shipment of liquefied anhydrous hydrogen chloride in DOT Specification MC-331 cargo tanks. (Mode 1.)
7753-X	DOT-E 7753	Stauffer Chemical Company, Westport, CT.	49 CFR 173.190(b)(2)	To authorize shipment of yellow phosphorous in a tight-head 55-gallon DOT Specification 17C drum. (Modes 1, 2, 3.)
7802-X	DOT-E 7802	Bennett Industries, Pacoima, CA	49 CFR 173 Subpart D, 173 Subpart F	To authorize shipment of liquid hazardous materials in non-DOT specification 3.5 or 5 gallon capacity removable head polyethylene drums. (Modes 1, 2, 3.)
7835-P	DOT-E 7835	Ideal Gas Products, Inc., Edison, NJ	49 CFR 177.848, Part 107 Appen. B(1)	To become a party to Exemption 7835. (Mode 1.).
7835-X	DOT-E 7835	Scientific Gas Products, Inc., South Plainfield, NJ.	49 CFR 177.848, Part 107 Appen. B(1)	To authorize transport of compressed gas cylinders bearing the flammable gas label, the oxidizer label, or the poison gas label and tank car tanks bearing the poison gas label on the same vehicle. (Mode 1.)
7091-X	DOT-E 7091	Union Pacific Railroad Company, Omaha, NE.	49 CFR Parts 100-177	To renew and to modify paragraph 8(d) pertaining to unattended flag kits. (Mode 1.)
8037-X	DOT-E 8037	Mauser Packaging, Ltd., New York, NY	49 CFR 173.127, 173.184, 178.224	To authorize use of a non-DOT specification fiberboard drum for shipment of wet nitrocellulose. (Modes 1, 2, 3.)
8238-X	DOT-E 8238	ASARCO Incorporated, New York, NY	49 CFR 173.366	To authorize shipment of arsenical flue dust in non-DOT specification reusable bags. (Mode 2.)
8247-X	DOT-E 8247	Container Corporation of America, Wilmington, DE.	49 CFR 173.272(g)	To authorize 5-gallon capacity polyethylene containers for shipment of sulfuric acid. (Modes 1, 2, 3.)
8357-X	DOT-E 8357	Industrial and municipal Engineering, Galva, IL.	49 CFR 173.119(a), (m), 173.245(a), 178.340-7, 49 CFR 173.266(e) 178.342-5, 178.343-5, 178.346(a).	To authorize manufacture, marking and sale of non-DOT Specification cargo tanks complying with DOT Specification MC-307/312 except for bottom outlet valve variation, for shipment of liquid and semi-solid waste material. (Mode 1.)
8361-X	DOT-E 8361	Mobay Chemical Corperation, Kansas City, MO.	49 CFR 173.3(c), 177.864(c)(2), 178.241.	To authorize use of a DOT Specification 44P bag as an overpack for containment of and return of DOT Specification 44D bags of certain Class B poisonous solids damaged in transit. (Modes 1,2.)
8387-X	DOT-E 8387	FMC Corporation, Philandelphia,PA	49 CFR 173.226(e)	To authorize transport of hydrogen peroxide in DOT Specification MC-312 cargo tank aboard cargo vessel. (Mode 3.)
8388-X	DOT-E 8388	B. W. Norton Manufacturing Co., Inc., Oakland, CA.	49 CFR 173 Subpart D, 173 Subpart F, 178.19.	To authorize shipment of liquid hazardous materials in a non-DOT specification five-gallon capacity removable head polyethylene drum. (Modes 1, 2, 3.)
8390-X	DOT-E 8390	Ashland Oil, Inc., Columbus, OH	49 CFR 173.272, 178.210, 178.24a	To authorize shipment of 95%-98% sulfuric acid in DOT Specification 2E polyethylene bottles overpacked in DOT Specification 12A60 fiberboard boxes. (Mode 1.)
8390-P	DOT-E 8390	Mallinckrodt, Inc., Paris, KY	49 CFR 173.272, 178.210, 178.24a	To become a party to Exemption 8390. (Mode 1.)
8395-X	DOT-E 8395	3M Company, St. Paul, MN	49 CFR 173.124(a)(3), 175.3	To authorize shipment of ethylene oxide in inside aluminum cartridges, contents not over 136 grams each, packed in DOT Specification 12B fiberboard boxes. (Modes 1, 2, 3, 4.)
8409-X	DOT-E 8409	ES Science, Division of EM Industries, Inc., Cincinnati, OH.	49 CFR 173.264(a)(1), 178.210	To authorize shipment of hydrofluoric acid solution no greater than 70% strength, in non-DOT specification polyethylene bottles, not exceeding a capacity of 6 liters, packed in DOT Specification 12A fiberboard boxes. (Modes 1, 3.)
8436-X	DOT-E 8436	Pennwalt Corporation, Buffalo, NY	49 CFR 173.119(m), 173.21	To authorize transport of a flammable liquid which is also an organic peroxide, in a DOT Specification MC-331 cargo tank. (Mode 1.)
8437-X	DOT-E 8437	Park Chemical Company, Detroit, MI	49 CFR 173.154, 178.241-4	To authorize shipment of a sodium nitrate mixture in non-DOT specification, nine mil plastic bags of 50 pounds net weight and which are stretch-wrapped 40 bags to a pallet. (Mode 1.)
8439-X	DOT-E 8439	Hydraulic Research Textron, Pacoima, CA.	49 CFR 173.302, 173.304, 175.3, 178.53.	To authorize manufacture, marking and sale of non-DOT specification cylinders complying with DOT Specification 4DS, with certain exceptions, for shipment of various nonflammable compressed gases. (Modes 1, 2, 3, 4, 5.)
8441-P	DOT-E 8441	GTE Products Corporation, Westborough, MA.	49 CFR 172.101	To become a party to Exemption 8441. (Mode 1.)
8457-P	DOT-E 8457	Duracell U.S.A., Tarrytown, NY	49 CFR Parts 100-177	To become a party to Exemption 8457. (Modes 1, 2, 3, 4, 5.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8456–X	DOT–E 8456	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.31(c) Table 1	To authorize conversion of DOT Specification 105A500W or 112A400W tank cars to a DOT Specification 111A100W2 tank car for transportation of certain corrosive materials and oxidizers. (Mode 2.)
8464–X	DOT–E 8464	Garrett Pneumatic Systems Division, Phoenix, AZ.	49 CFR 173.302(a)	To authorize manufacture, marking and sale of non-DOT specification nonreusable, nonrefillable toroidal pressure vessels, for transportation of nonflammable, nonliquefied gases. (Modes 1, 4, 5.)
8466–X	DOT–E 8466	Atlas Powder Company, Dallas, TX	49 CFR 173.114a	To authorize shipment of RXL481, classed as a blasting agent in specially designed non-DOT specification cargo tanks. (Mode 1.)
8476–X	DOT–E 8476	Warren Petroleum Company, Tulsa, OK	49 CFR 173.315(a)(1), 173.315(c)(1)	To authorize use of a non-vacuum insulated DOT Specification MC–331 cargo tank, for transportation of flammable gases. (Mode 1.)
8498–X	DOT–E 8498	Hunter Drums Limited, Burlington, Ontario.	49 CFR 178.19, Part 173 Subpart D, Part 173 Subpart F.	To authorize methanol classed as a flammable liquid as an additional commodity. (Modes 1, 2, 3.)
8499–X	DOT–E 8499	Hedwin Corporation, Baltimore, MD	49 CFR 173.119, 173.125, 173.154, 173.272, 173.286, 173.346.	To authorize manufacture, marking and sale of DOT Specification 34 polyethylene drums for shipment of certain flammable, corrosive, oxidizers and Poison B liquids. (Modes 1, 2, 3.)
8554–P	DOT–E 8554	Margraf Explosives, Inc., Rancho Cordova, CA.	49 CFR 173.114a, 173.93	To become a party to Exemption 8554. (Mode 1.)
8554–P	DOT–E 8554	Buckley Powder Co., Denver, CO	49 CFR 173.114a, 173.93	To become a party to Exemption 8554. (Mode 1.)
8570–X	DOT–E 8570	Snyder Industries, Inc., Lincoln, NB	49 CFR 173 Subpart F, 173.119, 173.266.	To authorize water as an additional mode of transportation. (Modes 1, 2.)
8650–X	DOT–E 8650	Ethyl Corporation, Baton Rouge, LA	49 CFR 173.354	To authorize a new design portable tank identical to those presently authorized except for use of a single large capacity relief valve in combination with a ruputure disc with no fusible device. (Modes 1, 2, 3.)
8747–P	DOT–E 8747	Rexnord Inc., Commerce City, CO	49 CFR 173.245, 173.249, 175.3	To become a party to Exemption 8747. (Modes 1, 2, 3, 4.)
8853–X	DOT–E 5923	Union Carbide Corporation, Danbury, CT	49 CFR 173.148(a)(4), 173.31(d)(9), 173.314.	To authorize transport of certain gases in DOT Specification 106A500X and 110A500W multi-unit tank-car tanks, allows the substitution of visual inspection for hydrostatic retesting. (Modes 1, 2, 3, 4.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8747–N	DOT–E 8747	Copps Industries, Inc., Menomonee Falls, WI.	49 CFR 173.245, 173.249, 175.3	To authorize shipment of certain alkaline corrosive liquids, n.o.s., in an unlined 28/26 gauge DOT Specification 37c80 steel drum of five gallon capacity. (Modes 1,2,3,4.)
8782–N	DOT–E 8782	Sherwin Williams Company, Cleveland, OH.	49 CFR 173.119(a)(23)	To authorize shipment of various flammable liquids in specially-treated DOT Specification 2E polyethylene bottles of one-gallon capacity, packed no more than four to a non-DOT specification corrugated fiberboard box. (Modes 1, 2.)
8789–N	DOT–E 8789	Cleanweld Products, Inc., Irwindale, CA	49 CFR 173.304, 175.3	To authorize manufacture, marking and sale of non-DOT specification small, low pressure cylinders with certain exceptions, for transportation of flammable gases. (Mode 1.)
8808–N	DOT–E 8808	Monitor Labs, Incorporated, San Diego, CA.	49CFR 173.336	To authorize shipment of limited quantities of nitrogen dioxide in a non-DOT specification container, overpacked in a DOT Specification 15A wooden box. (Mode 4.)
8809–N	DOT–E 8809	Continental Forest Industries, Lombard, IL.	49 CFR 178.225, Part 173	To authorize manufacture, marking and sale non-DOT specification fibre drum overpacks for 15-gal capacity inner polyethylene container, similar to DOT–21P/2U except top head is molded polyolefin polymer secured to drum by wire stiches for shipment of commodities authorized in DOT–21P/2U composite. (Modes 1, 2, 3.)
8812–N	DOT–E 8812	The Protectoseal Company, Bensenville, IL.	49 CFR 173.119, 178.89	To authorize manufacture, marking and sale of non-DOT specification steel drums of 5-gallon capacity and comparable to DOT Specification 6L, for shipment of gasoline and gasohol, classed as flammable liquids. (Mode 1.)
8823–N	DOT–E 8823	International Air Transport, Anchorage, AK.	49 CFR 172.101, 173.119, 175.3	To authorize carriage of fuel, aviation turbine engine, classed as a flammable liquid, in DOT Specification 34 polyethylene drums of 15-gallon capacity, loaded in cargo compartments of helicopters. (Mode 4.)
8831–N	DOT–E 8831	Teledyne Energy Systems, Timonium, MD.	49 CFR 172.400, 173.249, 175.3	To authorize transport of small amount of potassium hydroxide solution, in non-DOT specification containers, overpacked in a strong woden case. (Modes 1, 4.)
8841–N	DOT–E 8841	Valmont Oilfield Products Co., Springer, OK.	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340–7, 178.342–5, 178.343–5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC–307/312 except for bottom outlet valve variations for shipment of liquid or semi-solid waste materials. (Mode 1.)
8844–N	DOT–E 8844	Beall, Inc., Billings, MT	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340–7, 178.342–5, 178.343–5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks designed and constructed in full compliance with DOT Specification MC–307 or MC–312 with certain exceptions, for transportation of certain hazardous materials. (Mode 1.)
8860–N	DOT–E 8860	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.31(e), Retest Table 1	T o authorize extended periods in the retest frequency of DOT Specifications 103CW and 103EW tank cars in chlorosulfonic acid and nitric acid service. (Mode 2.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 8816–N	DOT–E 8816	McDonnell Douglas Astronautics Company, St. Louis, MO.	49 CFR 173.53(p)	To authorize shipment of completely assembled liquid and solid fueled missiles in packaging prescribed in 173.57(a). (Mode 1.)
EE 8892–N	DOT–E 8892	Flying Tiger Line, Los Angeles, CA	49 CFR 172.101 column 6(b), 175.30	To authorize transport of a Class A explosive in an aircraft of United States registry. (Mode 4.)

EMERGENCY EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 8907-N	DOT-E 8907	U.S. Department of Defense, Washington, DC.	49 CFR 172.101(6)(b), 175.3, 175.30	To authorize air transport of Class A, B and C explosives that are packed, marked, labeled and loaded in accordance with 49 CFR Part 173 or AFR 71-4. (Mode 4.)

WITHDRAWALS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8353-X	Thiokol Corporation, Huntsville, AL	49 CFR 178.252-2(b)	To authorize an alternate closure device in a DOT Specification 56 portable tank for the transportation of ammonium perchlorate. (Mode 2.)
8705-X	General Electric Company, San Jose, CA	49 CFR 173.395(b)(2), Part 172 Subpart D,E	To authorize shipment of type B quantities of radioactive materials in a certain form contained in other than type B packagings. (Mode 1.)

Denials

8821-N Request by Rocket Research Company, Redmond, WA to authorize shipment of a gas mixture in a non-DOT specification inflator assemply equipped with a burst disk/detonator assembly denied August 30, 1982.

Issued in Washington, DC, on September 17, 1982.

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 427; Ref: ATF O 1100.77D]

Authority To Affix the Seal of the Department of the Treasury

PURPOSE: This order sets forth delegation of authority to affix the seal of the Department of the Treasury.

CANCELLATION: ATF O 1100.77C, Delegation Order—Authority to Affix the Seal of the Department of the Treasury, dated May 14, 1980, is canceled.

DELEGATION:

a. Pursuant to the authority delegated to the Director, Bureau of Alcohol, Tobacco and Firearms by Treasury Department Order 101-12, dated October 12, 1979, those officials listed below are hereby redelegated authority to affix the seal of the Department of the Treasury in the authentication of originals and copies of books, records, papers, writing, and documents of the Bureau, for all purposes, including the purposes authorized by 28 U.S.C. 1733(b):

(1) Assistant Director (Regulatory Enforcement)
(2) Chief, Trade and Consumer Affairs Division
(3) Chief, Commodity Classification Branch
(4) Chief, Regulations and Procedures Division
(5) Chief, Research and Regulations Branch
(6) Regional Regulatory Administrators
(7) Chief, Investigations Division
(8) Assistant Director (Administration)
(9) Chief, Administrative Programs Division
(10) Chief, Protective Programs and Services Branch
(11) Manager, ATF Distribution Center
(12) Regional Administrative Officers
(13) Assistant Director (Technical and Scientific Services)
(14) Chief, Technical Services Division
(15) Chief, National Firearms Act Branch

b. This authority may not be redelegated.

FOR INFORMATION CONTACT: Robert G. Hardt, Procedures Branch, 1200 Pennsylvania Avenue, NW, Washington, D.C. 20226.

EFFECTIVE DATE: This delegation order becomes effective on September 27, 1982.

Approved: September 10, 1982.

Stephen E. Higgins,

Acting Director.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459) and Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), I hereby determine that the objects in four exhibits (included in the lists[1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to agreements between the foreign lenders and the National Gallery of Art, Washington, D.C. The titles of the exhibits and their dates of exhibition at the National Gallery of Art are the following: "Claude Lorrain: A Tercentenary Exhibition" (October 17, 1982 to January 2, 1983); "Braque: The Collages" (October 31, 1982 to January 16, 1983); "David Smith" (November 7,

[1] An itemized list of objects included in the exhibit is filed as part of the original document.

1982 to April 26, 1983); and "Manet and Modern Paris" (December 5, 1982 to March 6, 1983). I also determine that the temporary exhibition or display of the listed exhibit objects at the National Gallery of Art on or about the periods indicated is in the national interest.

Public notice of this determination is ordered to be published in the **Federal Register.**

Dated: September 21, 1982.

Charles Z. Wick,

Director.

Part II

Department of the Interior

Fish and Wildlife Service

Late Seasons, and Bag and Possession Limits for Certain Migratory Game Birds in the United States

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Late Seasons, and Bag and Possession Limits for Certain Migratory Game Birds in the United States.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes the late open seasons, hunting hours, hunting areas, and daily bag and possession limits for general waterfowl seasons; special seasons for scaup and goldeneyes; extra scaup and teal in regular seasons; additional sandhill crane seasons in the Central Flyway and in Arizona; coots, gallinules, and snipe in the Pacific Flyway; and additional falconry seasons. Taking of the designated species of migratory birds is prohibited unless open hunting seasons are specifically provided. The rules will permit taking of the designated species during the 1982–83 season within specified periods of time beginning as early as October 1, as has been the case in past years, and benefit the public by opening the seasons which are presently closed.

EFFECTIVE DATE: September 27, 1982.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C., telephone 202–254–3207.

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), as amended, authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory birds, to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported, or transported.

On April 19, 1982, the U.S. Fish and Wildlife Service (hereinafter the Service) published for public comment in the **Federal Register** (47 FR 16718) a proposal to amend 50 CFR Part 20, with comment periods ending June 23, July 16, and August 23 (later extended to August 30), 1982, respectively, for the 1982–83 hunting season frameworks proposed for Alaska, Puerto Rico, and the Virgin Islands; other early seasons; and the late seasons. That document dealt with the establishment of hunting seasons, hours, areas, and limits for migratory game birds under §§ 20.101 through 20.107 and 20.109 of Subpart K. On June 15, 1982, the Service published in the **Federal Register** (47 FR 25922) a second document consisting of a supplemental proposed rulemaking dealing with both the early and late season frameworks. On July 12, 1982, the Service published for public comment in the **Federal Register** (47 FR 30162) a third document consisting of a proposed rulemaking dealing specifically with frameworks for early season migratory bird hunting regulations. On July 19, 1982, the Service published in the **Federal Register** (47 FR 31282) a fourth document consisting of final frameworks for Alaska, Puerto Rico, and the Virgin Islands. On August 9, 1982, the Service published a fifth document (47 FR 34498) consisting of a final rulemaking for the early season frameworks for migratory bird hunting regulations from which State wildlife conservation agency officials selected early season hunting dates, hours, areas, and limits for the 1982–83 season. On August 20, 1982, the Service published for public comment in the **Federal Register** (47 FR 36578) a sixth document consisting of a proposed rulemaking dealing specifically with frameworks for late season migratory bird hunting regulations. On August 30, 1982, the Service published in the **Federal Register** (47 FR 38246) a seventh document consisting of a final rule amending Subpart K of 50 CFR 20 to set hunting seasons, hours, areas, and limits for mourning doves, white-winged doves, band-tailed pigeons, rails, woodcock, snipe, and gallinules; September teal seasons; sea ducks in certain defined areas of the Atlantic Flyway; ducks in September in Florida, Iowa, Kentucky, and Tennessee; sandhill cranes in the Central Flyway and Arizona; sandhill cranes and Canada geese in southwestern Wyoming; migratory game birds in Alaska, Hawaii, Puerto Rico, and the Virgin Islands; and special falconry season. On September 17, 1982, the Service published in the **Federal Register** an eighth document (47 FR 41252) consisting of a final rulemaking for the late season frameworks for migratory game bird hunting regulations from which State wildlife conservation agency officials selected late season hunting dates, hours, areas, and limits for the 1982–83 season. The final rule described here is the ninth in a series of proposed, supplemental, and final rulemaking documents for migratory game bird hunting regulations and deals specifically with amending Subpart K of 50 CFR 20 to set hunting seasons, hours, areas, and limits for species subject to late hunting regulations. These regulations will take effect immediately upon publication.

These regulations contain no information collections subject to Office of Management and Budget review under the Paperwork Reduction Act of 1980.

Nontoxic Shot Regulations

On August 13, 1981, the Service published in the **Federal Register** (46 FR 40879) final rules describing nontoxic shot zones for waterfowl hunting. When eaten by waterfowl, spent lead pellets can have a toxic effect. Nontoxic shot zones reduce availability of lead pellets in selected waterfowl feeding areas.

Amendments to these regulations were published in the **Federal Register** (47 FR 32546; July 28, 1982). These amendments relate to changes in Maine, Massachusetts, Indiana, and Nebraska. Texas, South Dakota, and Colorado have regulations requiring steel shot for waterfowl hunting in areas not included in the Federal regulations published in the **Federal Register** on August 13, 1981 (46 FR 40879). Zones in other States will remain as they were described on August 13, 1981 (46 FR 40879).

Some national wildlife refuges require use of steel shot on hunting areas within their boundaries, and these rules are published with other regulations regarding public use of the refuges (Title 50 CFR Part 32—Hunting).

Waterfowl hunters are advised to become familiar with State and local regulations regarding the use of nontoxic shot for waterfowl hunting.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975 (40 FR 24241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement. The 1975 FES is now out of print but copies of the environmental assessments are available from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

The Service recently issued a supplement to the environmental assessment titled Proposed Hunting Regulations on Black Ducks, issued in

August 1976. Copies of the supplement are available upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Endangered Species Act Consideration

Compliance with Section 7 of the Endangered Species Act, insofar as late season regulations frameworks are concerned, was described in the **Federal Register** dated August 30, 1982 (47 FR 38246). As a result of intra-Service Section 7 consultation, Mr. John L. Spinks, Chief, Office of Endangered Species, concluded in a biological opinion dated July 1, 1982:

> Therefore, it is my biological opinion that your action, as proposed, is not likely to jeopardize the continued existence of the above listed species or result in the destruction or adverse modification of the American peregrine falcon, whooping crane, or Everglade kite Critical Habitat.

The Service wishes to reiterate that delays or closures of migratory bird hunting seasons will be considered and invoked when justified, for the protection of endangered species.

As in the past, hunting regulations this year are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species.

The Service's biological opinion resulting from its consultation under Section 7 is considered a public document and is available for public inspection in or available from the Office of Endangered Species and the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Regulatory Flexibility Act and Executive Order 12291

In the **Federal Register** dated April 19, 1982 (at 47 FR 16722), the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing a Determination of Effects and an updated Final Regulatory Impact Analysis, and publication of a summary of the latter. These regulations have been determined to be major under Executive Order 12291 and they have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act. This determination is detailed in the aforementioned documents which are available upon request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

Authorship

The primary author of this final rule is Henry M. Reeves, Office of Migratory Bird Management, working under the direction of John P. Rogers, Chief.

Memorandum of Law

The Service Published its Memorandum of Law, required by Section 4 of Executive Order 12291, in the **Federal Register** dated July 19, 1982 (at 47 FR 31283).

Regulations Promulgation

After analysis of the migratory game bird survey data obtained through investigations conducted by the Service, State conservation agencies, and other sources, and consideration of all comments received on the late season proposals (47 FR 16718), April 19, 1982; 47 FR 25922, June 15, 1982; and 47 FR 36578, August 20, 1982), the Service published in the **Federal Register** on September 17, 1982 (47 FR 41252) final late season frameworks. Copies of the final frameworks were also sent to the officials of the State conservation agencies who were invited to submit recommendations for hunting seasons which complied with the season times and lengths, hours, areas, and limits specified in the frameworks.

The taking of the designated species of migratory birds is prohibited unless open hunting seasons are specifically provided. The following amendments will permit taking of the designated species within specified time periods beginning as early as October 1, as has been the case in past years, and benefit the public by relieving existing restrictions.

The rulemaking process for migratory game bird hunting, must, by its nature, operate under severe time constraints. However, the Service intends that the public be given the greatest possible opportunity to comment on the regulations. Thus, when proposed rulemakings were published on April 19, June 15, and August 20, 1982, the Service established what it believed were the longest periods possible for public comment. In doing this, the Service recognized that when the comment period closed time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, the States would have insufficient time to select their season dates, shooting hours, hunting areas, and limits; to communicate those selections to the Service; and to establish and publicize the necessary regulations and procedures to implement their decisions. The Service therefore finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) (Administrative Procedure Act), and these regulations will, therefore, take effect immediately upon publication.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Transportation, Wildlife.

Dated: September 21, 1982.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

PART 20—MIGRATORY BIRD HUNTING

Accordingly, each State conservation agency having had an opportunity to participate in selecting the hunting seasons desired for its State on those species of migratory birds for which open seasons are now to be prescribed, and consideration having been given to all other relevant matters presented, certain sections of Title 50, Chapter I, Subchapter B, Part 20, Subpart K, are hereby amended.

The late hunting season regulations will not be included in the annual codification of Title 50 CFR, Wildlife and Fisheries, inasmuch as most seasons will have terminated by the time that the annual codification is issued.

BILLING CODE 4310-55-M

Section 20.104 is revised to read as follows:

§20.104 Seasons, limits, and shooting hours for rails, woodcock, and common snipe.

Subject to the applicable provisions of the preceding sections of this part, the areas open to hunting, the respective open seasons (dates inclusive), the shooting and hawking hours, and the daily bag and possession limits on the species designated in this section are as follows:

	Rails (Sora & Virginia)	Rails (Clapper & King)	Woodcock	Common Snipe
Daily bag limit.....	25 (1)	See footnote (2).	5	8
Possession limit.....	25 (1)	See footnote (2).	10	16

Shooting Hours: One-half hour before sunrise until sunset daily on all species, except as noted otherwise.

(1) The bag and possession limits for sora and Virginia rails apply singly or in the aggregate of these two species.

(2) In addition to the limits on sora and Virginia rails, in Connecticut, Delaware, Maryland, New Jersey, and Rhode Island, there is a daily bag limit of 10 and possession limit of 20 clapper and king rails, singly or in the aggregate of these two species, except that the season is closed on king rails in New Jersey by State regulation. In Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, Texas, and Virginia, there is a daily bag limit of 15 and possession limit of 30 clapper and king rails, singly or in the aggregate of these two species.

(3) Limits are 2 daily and 4 in possession.

(4) For description of zones or management units within a State, see State regulations.

(5) In Iowa, shooting hours are sunrise to sunset. Rail limits are 15 daily and 25 in possession.

(6) In Michigan, in all or portions of the counties of Aranac, Bay, Huron, Macomb, Monroe, St. Clair, Tuscola and Wayne, and adjacent Great Lakes and connecting waters, the rail and snipe seasons shall open concurrently with the duck season and run continuously in all areas through November 14. See State regulations.

(7) The Central Flyway portion consists of: Colorado and Wyoming — the area lying east of the Continental Divide; Montana — the area lying east of Hill, Chouteau, Cascade, Meagher, and Park Counties; New Mexico — the area lying east of the Continental Divide but outside the Jicarilla Apache Indian Reservation. The remaining portions of these States are in the Pacific Flyway.

(8) In Nebraska the rail limits are 10 daily and in possession.

(9) In South Dakota, the snipe limits are 8 daily and 16 in possession.

(10) In Utah and Eastern Washington, on the first day, the season opens at 12 noons and in Western Washington, on the first day, the season opens at 8 a.m.

Section 20.105 is amended to read as follows:

§20.105 Seasons, limits, and shooting hours for waterfowl, coots, and gallinules.

Subject to the applicable provisions of the preceding sections of this part, the areas open to hunting, the respective open seasons (dates inclusive), the shooting and hawking hours, and the daily bag and possession limits on the species designated in this section are prescribed as follows:

(a) Sea Ducks.

(1) An open season for taking scoter, eider, and oldsquaw ducks is prescribed according to the following table during the period between September 15, 1982, and January 20, 1983, in all coastal waters and all waters of rivers and streams seaward from the first upstream bridge in Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut; in those coastal waters of New York lying in Long Island and Block Island Sounds and associated bays eastward from a line running between Missogue Point in the Town of Riverhead to Red Cedar Point in the Town of Southampton, including any ocean waters of New York lying south of Long Island; in any waters of the Atlantic Ocean and, in addition, in any tidal waters of any bay which are separated by at least one mile of open water from any shore, island, and emergent vegetation in New Jersey, South Carolina, and Georgia; and in any waters of the Atlantic Ocean and/or in any tidal waters of any bay which are separated by at least 800 yards of open water from any shore, island, and emergent vegetation in Delaware, Maryland, North Carolina, and Virginia; and provided that any such areas have been described, delineated, and designated as special sea duck hunting areas under the hunting regulations adopted by the respective States. In all other areas of these States and in all other States in the Atlantic Flyway, sea ducks may be taken only during the regular open season for ducks.

(2) The daily bag limit is 7 and the possession limit is 14, singly or in the aggregate of these species. During the regular duck season in the Atlantic Flyway, States may set, in addition to the regular limits, a daily bag limit of 7 and a possession limit of 14 scoter, eider, and oldsquaw ducks, singly or in the aggregate of these species.

(3) Shooting hours are one-half hour before sunrise until sunset daily.

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS.

Seasons in	
Connecticut	Sept. 25–Jan. 8.
Delaware	Sept. 25–Jan. 8.
Georgia	Nov. 24–Jan. 20.

Remainder of State	Oct. 9–Jan. 9.
New Mexico (4)	Oct. 9–Jan. 2.
All other States	Closed.

Note: See footnotes to waterfowl tables for descriptions of zones.

(1) The gallinule season in Florida applies to the common gallinule only. There is no open season on the purple gallinule in Florida.

(2) On the first day the season opens at 12 noon.

(3) Seasons apply to Central Flyway portion of State only.

(4) Season and limits apply to Pacific Flyway portion of State only.

(d) Waterfowl and coots in Atlantic, Mississippi, Central, and Pacific Flyways.

ATLANTIC FLYWAY

Flywaywide Restrictions.

Shooting (including hawking) hours: One-half hour before sunrise to sunset daily except as otherwise restricted.

Wood ducks — No more than 2 wood ducks may be taken daily nor more than 4 wood ducks may be possessed. Exceptions: during duck seasons prior to October 16, 1981, in Georgia, North Carolina, and South Carolina, under conventional regulations, no special restrictions within the regular daily bag and possession limits shall apply to wood ducks; in Virginia, under the point system, the point value of wood ducks shall be 25. The daily bag and possession limit in Vermont and Massachusetts is 1 and 2 birds, respectively.

Hooded mergansers — In States selecting conventional regulations, no more than 1 hooded merganser may be taken daily nor more than 2 hooded mergansers may be possessed.

Canvasbacks and redheads — Except in closed areas, the limit on canvasbacks is 1 daily and 1 in possession. The limit on redheads throughout the flyway is 2 daily, except that in areas open to canvasback harvest the daily bag limit is 2 redheads, or 1 redhead and 1 canvasback. The canvasback possession limit is equal to the daily bag limit. The possession limit on redheads is twice the daily bag limit under conventional regulations. Under the point system, canvasbacks (except in closed areas) count 100 points each and redheads flywaywide count 70 points each. Areas closed to canvasback hunting are:

New York — Upper Niagara River between the Peace Bridge at Buffalo, New York, and the Niagara Falls. All waters of Lake Cayuga.

New Jersey — Those portions of Monmouth County and Ocean County lying east of the Garden State Parkway.

North Carolina — Those portions of the State lying east of U.S. Highway 1.

Maryland and Virginia — The entire State.

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS AND DELINEATIONS OF GEOGRAPHICAL AREAS. SPECIAL RESTRICTIONS MAY APPLY ON FEDERAL AND STATE PUBLIC HUNTING AREAS.

The season dates for mergansers and coots are the same as those for ducks in the following tables:

	Season Dates	Limits: Bag	Limits: Possession
Connecticut

(1) In Connecticut, the North Zone is that portion of the State north of Interstate 95. The South Zone is that portion of the State south of Interstate 95.

(2) No special daily bag and possession limit restrictions apply to wood ducks in Georgia during October 9-October 12, in South Carolina during October 7-October 9, and in North Carolina during October 1-October 2, and in Virginia during October 6-October 9. In North Carolina the sea duck season is closed during the period October 1 through October 3.

(3) In Maryland, the Delmarva Peninsula includes the counties of Caroline, Cecil, Dorchester, Kent, Queen Annes, Somerset, Talbot, Wicomico, and Worcester.

(4) In New Jersey, the Coastal Zone is that portion of the State seaward of a continuous line beginning at the New York State boundary line in Raritan Bay; then west along the New York boundary line to its intersection with Route 440 at Perth Amboy; then west on Route 440 to its intersection with the Garden State Parkway; then south on the Garden State Parkway to the shoreline at Cape May City and continuing to the Delaware boundary in Delaware Bay. The North Zone is that portion of the State west of the Coastal Zone and north of a boundary formed by Route 70, west to the New Jersey Turnpike, north on the turnpike to Route 206, north on Route 206 to Route 1, Trenton, west on Route 1 to the Pennsylvania State boundary in the Delaware River. The South Zone is that portion of the State not within the North Zone or the Coastal Zone.

(5) In New Jersey, the green-winged teal is assigned 25 points.

(6) In New York, the Western Zone is that portion of Upstate New York lying west of a line commencing at the north shore of the Salmon River and its junction with Lake Ontario and extending easterly along the north shore of the Salmon River to its intersection with Interstate Highway 81, then southerly along Interstate Highway 81 to the Pennsylvania border. The Northeastern and Southeastern Zones are bordered on the west by the boundary described above and are separated from each other as follows: starting at the intersection of Interstate Highway 81 and State Route 49 and extending easterly along State Route 49 to its junction with State Route 365 at Rome, then easterly along State Route 365 to its junction with State Route 28 at Trenton; then easterly along State Route 28 to its junction with State Route 29 at Middleville, then easterly along State Route 29 to its intersection with Interstate Highway 87 at Saratoga Springs, then northerly along Interstate Highway 87 to its junction with State Route 9, then northerly along State Route 9 to its junction with State Route 149, then easterly along State Route 149 to its junction with State Route 4 at Fort Ann, then northerly along State Route 4 to its intersection with the New York/Vermont boundary.

(7) In Pennsylvania, the Lake Erie Zone includes the Lake Erie waters of Pennsylvania and a shoreline margin along Lake Erie from New York on the east to Ohio on the west extending 150 yards inland, but including all of Presque Isle Peninsula. The North Zone includes that portion of the State north of I-80 from the New Jersey State line west to the junction of State Route 147, then north on State Route 147 to the junction of Route 220, then west and/or south on Route 220 to the junction of I-80, then west on I-80 to its junction with the Allegheny River, and then north along but not including the Allegheny River to the New York border. The Northwest Zone includes that portion of the State bounded on the north by the Lake Erie Zone and the New York line, on the east by and including the Allegheny River, on the south by Interstate Highway I-80, and on the west by the Ohio line. The South Zone is the remaining portion of the State.

(8) In Pennsylvania, on the first day, the waterfowl season in the North, and Northwest Duck Zones opens at 8 a.m.

(9) In Pennsylvania, in Butler, Crawford, Erie, and Mercer Counties, and in the controlled shooting sections of the Pymatuning and Middle Creek Wildlife Management Areas, the Canada goose daily bag limit is 1 and the possession limit is 2.

(10) In Pennsylvania, the Southeastern Zone (for Canada geese only) is that portion of the State lying east and south of a boundary beginning at Interstate Highway 83 at the Maryland border and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border.

(11) The season is closed on black ducks in Georgetown, Charleston, and Colleton Counties.

(12) In Vermont and in the Lake Champlain Zone of New York, on opening day, October 2, shooting hours are from 8 a.m. to 4 p.m. During October 3-October 6, the hours are one-half hour before sunrise to 4 p.m. The remaining days are one-half hour before sunrise to sunset.

(13) See State regulations for further limit restrictions for Dead Creek Area, Addison County, Vermont.

(14) In Virginia, the wood duck is assigned 25 points during the October 6-October 9 season.

(15) In Virginia, the Back Bay Area is defined for Canada geese as those portions of the cities of Virginia Beach and Chesapeake lying east of U.S. Highway 17 and Interstate 64.

(16) In Virginia, the Back Bay Area is defined for snow (including blue) geese as the waters of Back Bay and its tributaries and the marshes adjacent thereto, and on the land and marshes between Back Bay and the Atlantic Ocean from Sandbridge to the North Carolina line, and on and along the shore of North Landing River and the marshes adjacent thereto, and on and along the shores of Lake Tecumseh and Red Wing Lake and the marshes adjacent thereto.

(17) In West Virginia the Allegheny Mountain Upland Zone (Zone 2 in State regulations) is contained within the following circumscribed boundaries. The north boundary is the State line adjacent to Pennsylvania and Maryland. The eastern boundary extends south along U.S. Route 220 through Keyser, West Virginia, to the intersection of U.S. Route 50, and follows U.S. Route 50 to the intersection with State Route 93. The boundary follows State Route 93 south to the intersection with State Route 42 and continues south on State Route 42 to Petersburg. At Petersburg, the boundary follows State Route 28 south to Minnehaha Springs, and then follows State Route 39 west to U.S. Route 219 and follows 219 south to the intersection of Interstate 64. The southern boundary follows I-64 west to the intersection with U.S. Route 60, and follows Route 60 west to the intersection of U.S. Route 19. The western boundary follows Route 19 north to the intersection of I-79, and follows I-79 north to the Pennsylvania State line. The Remainder of the State (Zone 1 in State regulations) is that portion outside the above boundaries.

MISSISSIPPI FLYWAY

Shooting hours: One-half hour before sunrise to sunset daily except as otherwise restricted.

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS AND DELINEATIONS OF GEOGRAPHICAL AREAS. SPECIAL RESTRICTIONS MAY APPLY ON FEDERAL AND STATE PUBLIC HUNTING AREAS.

The season dates for mergansers and coots are the same as those for ducks in the following tables.

	Season Dates	Limits Bag	Limits Possession

Pymatuning Area (12), (16):	Oct. 9–Oct. 16 & Oct. 25–Dec. 4.	4	8
Ducks:			
Limits include no more than:			
Black ducks		2	4
Wood ducks		2	4
Canvasbacks		1	1
Redheads		2	4
Canvasbacks and redheads combined		2	4
Coots		15	30
Mergansers (except hooded)		5	10
Hooded mergansers		1	2

Geese:	Oct. 16-Dec. 16.		
Limits include no more than:			
Canada		2	6
Snow (including blue)		2	8
Remainder of State:			
Ducks (1):		2	10
North Zone (17)	Oct. 15-Nov. 27 & Dec. 27-Jan. 1.		
South Zone (17)	Oct. 22-Oct. 30 & Nov. 22-Jan. 1.		
Limits include no more than:			
Mallards (no more than 2 female mallards daily or 4 in possession		2	6
Black ducks		1	2
Wood ducks		2	4
Canvasbacks (except in closed areas)		1	2
Redheads		1	2
Coots		15	30
Geese	Oct. 15-Nov. 27 & Dec. 7-Jan. 1.	5	10
Limits include no more than:			
Canada:			
Ashtabula, Auglaize, Erie, Lucas, Marion, Mercer, Ottawa, Sandusky, Trumbull, and Wyandot Counties		1	2
Remainder of State		2	4
White-fronted		2	4
Snow (including blue) and brant		5	10
Tennessee			
Ducks (1)	Dec. 2-Jan. 20.	Point system.	
Coots		15	30
Geese:		5	10
Canada (18):			
Northwest Goose Zone	Dec. 12-Jan. 20.		
Southwest Goose Zone	Closed.	-	-
Remainder of State	Nov. 12-Jan. 20.		
Other geese:			
Northwest Goose Zone	Dec. 12-Jan. 20.		
Remainder of State	Nov. 12-Jan. 20.		
Limits include no more than:			
Canada:			
West of State Highway 13		2	4
Remainder of State		1	2
White-fronted		2	4
Snow (including blue) and brant		5	10
Wisconsin			
Ducks (1)	Oct. 1 (19)-Oct. 10 & Oct. 16-Nov. 24.	Point system (20).	
Coots		15	30
Geese (12):		5	10
Canada:			
Horicon and Central Zones	Oct. 1 (19)-Oct. 10 & Oct. 20-Nov. 18.	1	1
Mississippi River Zone	Oct. 1 (19)-Oct. 10 & Oct. 16-Nov. 24.	1	2
	Nov. 25-Dec. 10.	2	4
Rock Prairie Zone	Oct. 1 (19)-Oct. 6 & Nov. 1-Nov. 24.	1	2
Remainder of State	Oct. 1 (19)-Oct. 6 & Oct. 20-Nov. 12.	1	2
Other geese:			
Mississippi River Zone	Oct. 1 (19)-Oct. 10 & Oct. 16-Dec. 16.		
Remainder of State	Oct. 1 (19)-Oct. 10 & Oct. 16-Nov. 24.		
Limits include no more than:			
White-fronted		2	4
Snow (including blue) and brant		5	10

(i) The areas closed to canvasback hunting are:

Mississippi River — Entire River, both sides, from Alton Dam upstream to Prescott, Wisconsin, at confluence of St. Croix River.

Alabama — Baldwin and Mobile Counties.

Louisiana — Caddo, St. Charles, and St. Mary Parishes; that portion of Ward 1 formerly designated as Ward 6 of St. Martin Parish; and Catahoula Lake in LaSalle and Rapides Parishes.

Michigan — Arenac, Bay, Huron, Macomb, Monroe, St. Clair, Tuscola, and Wayne Counties, and those adjacent waters of Saginaw Bay south of a line extending from Point au Gres in Sec. 6, T18N, R7E (Arenac County) to Sand Point in Sec. 11, T17N, R9E (Huron County), the St. Clair River, Lake St. Clair, the Detroit River and Lake Erie, under the jurisdiction of the State of Michigan.

Minnesota — Douglas, Mahnomen, Polk, Pope, and Sibley Counties. Where the county line of any of the above counties crosses any portion of a lake, that entire lake is closed. In addition, all land in Sec. 12, T138N, R31W (i.e., land between Lake Christina and Pelican Lake) is closed.

Ohio — Land and water areas comprising Erie, Ottawa, and Sandusky Counties.

Tennessee — Kentucky Lake lying north of Interstate Highway 40.

Wisconsin — In the Mississippi River Zone, all that portion of Wisconsin west of the Burlington-Northern Railroad in Grant, Crawford, Vernon, LaCrosse, Trempealeau, Buffalo, Pepin, and Pierce Counties. Also, the following lakes and waters, including a strip of land 100 yards wide adjacent to the shorelines thereof: Lake Poygan in Winnebago and Waushara Counties and Lakes Winneconne and Butte des Morts, including the connecting waters thereof, in Winnebago County.

(2) In Alabama, the South Zone consists of Mobile and Baldwin Counties. The North Zone consists of the remainder of Alabama.

(3) In Illinois, the North Zone is that portion of the State north of a line running east from the Iowa border along Illinois Highway 17 to I-74, north along I-74 to I-80, then east along I-80 to the Indiana border. The Central Zone is that portion of the State between the North and South Zone boundaries. The South Zone is that portion of the State south of a line running east from the Missouri border along Illinois Highway 150 to Illinois Highway 4, north along Illinois Highway 4 to Illinois Highway 15, east along Illinois Highway 15 to I-57, north along I-57 to I-70, then east along I-70 to the Indiana border.

(4) Geese taken in Illinois and Missouri and in the Kentucky counties of Ballard, Hickman, Fulton, and Carlisle may not be transported, shipped or delivered for transportation or shipment by common carrier, the Postal Service, or by any person except as the personal baggage of licensed waterfowl hunters, provided that no hunter shall possess or transport more than the legally-prescribed possession limit of geese. Geese possessed or transported by persons other than the taker must be labeled with the name and address of the taker and the date taken.

(5) Harvests of Canada geese will be limited as follows:
Illinois: Southern Illinois Quota Zone—17,500; Tri-County Area—700; Remainder of State—9,500.
Wisconsin: Statewide—18,000.
Missouri: Swan Lake Zone—20,000.
Minnesota: Lac Qui Parle Zone—5,500.
When it is determined by the Director, U.S. Fish and Wildlife Service, that the quota of Canada geese allotted to the Southern Illinois Quota Zone, the Tri-County Area in southern Illinois, and the Swan Lake Zone in Missouri will have been filled, the season for taking all geese in the Southern Illinois Quota Zone and the season for taking Canada geese in the Tri-County Area in Illinois and the Swan Lake Zone in Missouri will be closed by the Director upon giving public notice through local information media at least 48 hours in advance of the date and time of closing.

(6) In Illinois, the Tri-County Area consists of all of Knox County; in Fulton County the townships of Buckhart, Canton, Cass, Deerfield, Fairview, Farmington, Joshua, Orion, Putnam, and that portion of Banner Township bounded on the north by Illinois Route 9 and on the east by U.S. 24; and in Henry County the townships of Alba, Annawan, Atkinson, and Cornwall.

(7) Shooting hours for geese are sunrise until 3 p.m.

(8) In Indiana, the North Zone consists of that portion of the State north of State Highway 18. The South Zone consists of the remainder of Indiana.

(9) In Kentucky, the Western Zone consists of the area west of the following boundary: starting at the Kentucky-Tennessee border at Fulton, Kentucky, extending northerly along the Purchase Parkway to I-24, east on I-24 to U.S. 641; northerly on U.S. 641 to U.S. 60; northeasterly on U.S. 60 to U.S. 41; and then northerly on U.S. 41 to the Kentucky-Indiana border.

(10) In Louisiana, the West Zone is described as follows: that portion of Louisiana west of a boundary beginning at the Arkansas-Louisiana border on Louisiana Highway 3; then south along Louisiana Highway 3 to Bossier City; then east along Interstate 20 to Minden; then south along Louisiana Highway 7 to Ringgold; then east along Louisiana Highway 4 to Jonesboro; then south along U.S. Highway 167 to Lafayette; then southeast along U.S. Highway 90 to Houma; then south along the Houma Navigation Channel to the Gulf of Mexico through Cat Island Pass. The East Zone consists of the remainder of Louisiana.

(11) In Michigan, the North Zone is that portion of the State north of a line extending east from the mouth of the Manistee River along the south bank to the U.S. 31 bridge, south on U.S. 31 to East Prouse Road, east on East Prouse Road to Huer Road, north on Huer Road to County 591 in Stronach, east on County 591 to M-55, east on M-55 to M-37, south on M-37 to M-82, east on M-82 to U.S. 131, north on U.S. 131, then east on M-46 to Port Sanilac. The South Zone is the remainder of Michigan.

(12) See State regulations for zone/area descriptions.

(13) In Minnesota, the shooting hours for waterfowl vary as follows: October 2 — 12 noon to 4 p.m.; October 3 through October 22 — 1/2 hour before sunrise to 4 p.m.; and October 23 through December 10 — 1/2 hour before sunrise to sunset.

(14) In Missouri, the North Zone is that portion of the State north of a line running east from the Kansas border along U.S. Highway 54 to U.S. Highway 65, south along U.S. Highway 65 to State Highway 32, east along State Highway 32 to State Highway 72, east along State Highway 72 to State Highway 34, then east along State Highway 34 to the Illinois border. The South Zone is the remainder of the State.

(15) In the Swan Lake Zone of Missouri, through November 21, the Canada goose limits are 1 daily and 4 in possession. After November 21, the limits are 2 daily and 4 in possession.

(16) Shooting hours are 1/2 hour before sunrise to sunset, except on the first day shooting begins at 8 a.m.

(17) In Ohio, the North Zone consists of the counties of Darke, Miami, Clark, Champaign, Union, Delaware, Licking, Muskingum, Guernsey, Harrison, and Jefferson and all counties north thereof. In addition, the North Zone also includes that portion of the Buckeye Lake area in Fairfield and Perry Counties bounded on the west by State Highway 37, on the south by State Highway 204, and on the east by State Highway 13. The South Zone consists of the remainder of the State.

(18) In Tennessee, the Northwest Goose Zone includes Lake, Obion, Weakley, and Carroll Counties, and those portions of Gibson and Dyer Counties north and east of a line formed by State Highways 20 and 104 from the Mississippi River to Trenton and U.S. Highway 45W from Trenton to Humboldt. The Southwest Goose Zone is that portion of Tennessee bounded on the north by State Highways 20 and 104, and on the east by U.S. Highways 45W and 45. The season on Canada geese is also more restrictive or closed in other specific areas. See State regulations.

(19) On the first day the season opens at 12 noon.

(20) In Wisconsin, point values for some species change during the season. See State regulations.

CENTRAL FLYWAY

The Central Flyway consists of Colorado (east of the Continental Divide), Kansas, Montana (east of Hill, Chouteau, Cascade, Meagher, and Park Counties), Nebraska, New Mexico (east of the Continental Divide and outside the Jicarilla Apache Indian Reservation), North Dakota, Oklahoma, South Dakota, Texas, and Wyoming (east of the Continental Divide).

Geese include all species of geese and brant.
Dark Geese include Canada geese, white-fronted geese, and "black" brant.
Light Geese include all other species.

Flyway-wide Restrictions

Shooting (including hawking) hours: One-half hour before sunrise to sunset daily except as otherwise noted.

Mergansers — All mergansers are to be included within the daily bag and possession limits under conventional and point system regulations.

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS AND DELINEATIONS OF GEOGRAPHICAL AREAS WITHIN STATES. SPECIAL RESTRICTIONS MAY APPLY ON FEDERAL AND STATE PUBLIC HUNTING AREAS.

The season dates for coots are the same as those for ducks in the following tables:

	Season Dates	Limits: Bag	Limits: Possession
Colorado			
Ducks	Oct. 2–Oct. 17 & Oct. 30–Nov. 28 & Dec. 11–Jan. 16.	Point system.	
Coots		15	30
Geese (1):		2	4
North Central Unit	Oct. 30–Jan. 16.		
South Park Unit	Nov. 6–Dec. 31.		
San Luis Valley Unit	Nov. 6–Dec. 31.		
Arkansas Valley Unit (2)	Nov. 6–Jan. 16.		
Remainder of State in Central Flyway	Nov. 6–Jan. 16.		
Kansas			
Ducks:		Point system.	
High Plains Area	Oct. 9–Dec. 5 & Dec. 11–Jan. 4.		
Low Plains Area	Oct. 16–Oct. 26 & Nov. 6–Dec. 12 & Dec. 25–Jan. 5.		
Coots		15	30
Dark geese (3)		2	4
Canada	Oct. 23–Nov. 28.	2	4
Canada and white-fronted	Oct. 23–Nov. 28.	2	4
Canada and white-fronted	Nov. 29–Jan. 2.	1	2
Light geese	Oct. 23–Jan. 16.	5	10
Montana			
Ducks			
Zone 1 (4)	Oct. 2–Nov. 30 & Dec. 11–Jan. 2.	Point system.	
Zone 2 (4)	Oct. 2–Oct. 24 & Nov. 4–Jan. 2.		
Coots		15	30
Geese:	Oct. 2–Jan. 2.		
Sheridan County		2	4
Remainder of State in Central Flyway		3	6
Nebraska			
Ducks		Point system.	
High Plains Area	Oct. 2–Oct. 10 & Oct. 16–Oct. 17 & Oct. 23–Jan. 2.		
Low Plains Area			
Zones 1 and 2 (4)	Oct. 23–Dec. 21.		
Zones 3 and 4 (4)	Oct. 2–Nov. 30.		
Coots		15	30
Dark geese		2	4
Unit 1 (5)			
Canada	Oct. 9–Nov. 12.	1	2
White-fronted	Oct. 9–Nov. 12.	1	2
Canada	Nov. 13–Dec. 26.	2	4
Canada and white-fronted combined		2	4
Unit 2 (5)			
Canada	Oct. 2–Oct. 3 & Oct. 13–Nov. 21.	2	4
Canada and white-fronted combined		2	4
Canada	Nov. 22–Dec. 21.	1	2
White-fronted		1	2
Unit 3 (5)			
Canada	Oct. 16–Nov. 21.	2	4
Canada and white-fronted combined		2	4
Canada	Nov. 22–Dec. 26.	1	2
White-fronted		1	2
Light Geese	Oct. 2–Dec. 26.	5	10
New Mexico			
Ducks:		Point system.	
Zone 1 (4)	Oct. 19–Jan. 9.		
Zone 2 (4)	Nov. 2–Jan. 23.		
Coots		15	30
Geese:			
In Bernalillo, Sandoval, Sierra, Valencia, and Socorro Counties (6):			
Dark geese	Jan. 15–Jan. 23	1	1
Light geese	Nov. 13–Jan. 5 & Jan. 16–Feb. 13.	5	10
Remainder of State in Central Flyway:			
Dark geese	Oct. 23–Jan. 23.	2	6
Light geese	Nov. 13–Feb. 13.	5	10
North Dakota			
Ducks (7):	Oct. 2–Nov. 28 & Dec. 4–Dec. 5.	5	10
including no more than:			
Female mallards		1	2
Canvasbacks (except in closed area)		1	1
Redheads		1	2
Wood ducks		2	4
Hooded mergansers		1	2
Additional teal	Oct. 2–Oct. 10.	2	4
Coots	Oct. 2–Nov. 28 & Dec. 4–Dec. 5.	15	30
Dark geese (8)	Oct. 2–Nov. 14.	2	4
including no more than:			
Canada	Oct. 2–Oct. 31.	1	2
Light geese	Oct. 2–Dec. 5.	5	10
Oklahoma			
Ducks:		Point system.	
High Plains Area	Oct. 16–Jan. 6.		
Low Plains			
Zone 1 (4)	Oct. 16–Nov. 28 & Dec. 18–Jan. 2.		
Zone 2 (4)	Oct. 30–Nov. 28 & Dec. 18–Jan. 16.		
Coots		15	30
Dark geese (11)		2	4
Unit 1 (9)	Nov. 13–Jan. 23.		
Unit 2 (9)	Oct. 16–Nov. 28 & Dec. 20–Jan. 16.		
Light geese	Oct. 9–Nov. 28 & Dec. 18–Jan. 21.	5	10

Zone 3 (4)	Oct. 2-Jan. 2.		
Zone 4 (4)	Oct. 9-Jan. 9.		

(1) Colorado Goose Hunting Units: North Central Unit: That portion of Colorado bounded on the north by the State line; on the east by U.S. Highway 85 to Interstate 76, Interstate 76 to Interstate 25, and Interstate 25 to Interstate 70; on the south by Interstate 70; and on the west by the Continental Divide. South Park Unit: Chaffee, Fremont, Lake, Park, and Teller Counties. Hunting by permit only; limits, 2 geese daily, 2 per season, geese must be tagged. San Luis Valley Unit: Alamosa, Conejos, Costilla, and Rio Grande Counties and those portions of Hinsdale, Mineral, and Saguache Counties east of the Continental Divide. Hunting by permit only; limits, 1 goose daily, 1 per season, goose must be tagged. Arkansas Valley Unit: Bent, Cheyenne, Crowley, Kiowa, Otero, and Pueblo Counties, that portion of Prowers County north of U.S. Highway 50, and that portion of Kit Carson County south of U.S. Highway 24. See State regulations.

(2) Special hunting hours: Nov. 6-Nov. 30, 1/2 hour before sunrise to noon; Dec. 1, 1982-Jan. 16, 1983, 1/2 hour before sunrise to sunset.

(3) In Kansas, the following area surrounding and including the Marais des Cygnes Wildlife Management Area is closed to the taking of dark geese (Canada and white-fronted geese) during the regular dark goose season: That part of Kansas bounded by a line from the Missouri-Kansas boundary west on K-68 to its junction with U.S. 169, then southwest on U.S. 169 to the junction of K-7, then southeast on K-7 to the junction of K-31, then east on K-31 to the junciton of U.S. 69, then north on U.S. 69 to the junciton of -239, then east on K-239 to the Missouri-Kansas boundary, then north on the Missouri-Kansas boundary to its junction with K-68.

(4) Duck season zones are described as follows:
Montana — Zone 1: The counties of Bighorn, Blaine, Carbon, Daniels, Fergus, Garfield, Golden Valley, Judith Basin, McCone, Musselshell, Petroleum, Phillips, Richland, Roosevelt, Sheridan, Stillwater, Sweetgrass, Valley, Wheatland, and Yellowstone. Zone 2: The counties of Carter, Custer, Dawson, Fallon, Powder River, Prairie, Rosebud, Treasure, and Wibaux.
Nebraska — Zone 1: Keya Paha County east of U.S. Highway 183 and all of Boyd, Knox, Cedar, and Dixon Counties, including the adjacent waters of the Niobrara River. Zone 2: The Low Plains portions of Dawson, Gosper, Frontier, and Furnas Counties and all of Buffalo, Phelps, Harlan, Hall, Kearney, Franklin, Merrick, Hamilton, Platte, Polk, Colfax, Butler, Dodge, Saunders, Douglas, Boone, Nance, Washington, and Wheeler Counties, including the adjacent waters of the Platte River. Zone 3: The Low Plains portions of Brown, Blaine, and Custer Counties and all of Rock, Holt, Loup, Garfield, Valley, Greeley, Sherman, Howard, Antelope, Pierce, Madison, Wayne, Stanton, Cuming, Dakota, Thurston, and Burt Counties. Zone 4: Adams, Webster, Clay, Nuckolls, York, Fillmore, Thayer, Seward, Saline, Jefferson, Lancaster, Gage, Sarpy, Cass, Otoe, Johnson, Nemaha, Pawnee, and Richardson Counties.
New Mexico — Zone 1: That portion of northern New Mexico east of the Continental Divide and the Jicarilla Apache Indian Reservation and north of Interstate Highway 40 and U.S. Highway 64. Zone 2: The remainder of the Central Flyway portion of New Mexico.
Oklahoma — Low Plains: Zone 1 - That portion of northwestern Oklahoma, except the Panhandle, bounded by the following highways: starting at the Texas-Oklahoma border, OK 33 to OK 47, OK 47 to U.S. 183, U.S. 183 to I-40, I-40 to U.S. 177, U.S. 177 to OK 51, OK 51 to I-35, I-35 to U.S. 60, U.S. 60 to U.S. 64, U.S. 64 to OK 132, and OK 132 to the Oklahoma-Kansas state line. Zone 2 - The remainder of the Low Plains portion of Oklahoma.
South Dakota — South Zone: Bon Homme, Charles Mix, Clay, Gregory, Union, and Yankton Counties. North Zone: The remainder of the Low Plains portion of South Dakota.
Wyoming — Zone 1: Sheridan, Johnson, Natrona, Campbell, Crook, Weston, Converse, and Niobrara Counties. Zone 2: Platte, Goshen, and Laramie Counties. Zone 3: Carbon and Albany Counties. Zone 4: Park, Big Horn, Hot Springs, Washakie, and Fremont Counties. These zones also apply to goose seasons.

(5) Nebraska Goose Management Units. Unit 1 is comprised of Boyd, Cedar (west of U.S. Highway 81), Keya Paha (east of U.S. Highway 183), and Knox Counties. Unit 2 is the remainder of Nebraska east of U.S. Highway 183. Unit 3 is the remainder of Nebraska west of U.S. Highway 183. In the Special Sandhills Canada Goose Restoration Area (see State regulations for description), the season is Oct. 30-Nov.30, and the limit is 1 Canada goose per season. Permits and tags required; see State regulations.

(6) See State regulations and other Federal regulations for special restrictions on Bosque del Apache National Wildlife Refuge, for geese.

(7) The areas closed to canvasback hunting are:
North Dakota — That portion lying east of State Highway 3, including all or portions of 27 counties.
South Dakota — All of Marshall County; that portion of Day County east of State Highway 25; that portion of Codington County south of State Highway 20 and west of U.S. Highway 81; that portion of Hamlin County west of U.S. Highway 81; and that portion of Kingsbury County east of State Highway 25 and north of U.S. Highway 14.

(8) The Dark Goose season opening is delayed until October 4 in the area west and south of the following: Starting at South Dakota border where U.S. Highway 281 enters North Dakota, north and west on U.S. Highway 281 to Carrington, then west and north on Highway 200 to the Montana border.

(9) Oklahoma Goose Management Units. Unit 1 is that portion of Oklahoma west of U.S. Highways 77 and 177, the Indian Nation Turnpike, and U.S. Highway 271. Unit 2 is the remainder of Oklahoma.

(10) In Wyoming, coots are assigned 10 points.

PACIFIC FLYWAY

The Pacific Flyway includes the States of Arizona, California, Idaho, Nevada, Oregon, Utah, Washington, those portions of Colorado, Wyoming (including the Great Divide Basin), and New Mexico (including the Jicarilla Apache Indian Reservation) lying west of the Continental Divide, and that portion of Montana including and to the west of Hill, Chouteau, Cascade, Meagher, and Park Counties.

Flywaywide Restrictions

Shooting (including hawking) hours: One-half hour before sunrise to sunset daily.
Aleutian Canada Geese: The season is closed on Aleutian Canada geese throughout the Flyway.
Canvasbacks and Redheads: No more than 1 canvasback or 1 redhead or 1 of each may be taken daily nor more than 4 singly or in the aggregate may be possessed.
Mergansers: All mergansers are to be included within the daily bag and possession limits for other ducks.
Dark Geese and White Geese: Unless otherwise noted, limits for dark geese are for Canada and white-fronted geese, either singly or in the aggregate; and limits for white geese are for lesser snow, including blue, and Ross' geese, either singly or in the aggregate.

CHECK STATE REGULATIONS FOR ADDITIONAL RESTRICTIONS AND DELINEATION OF GEOGRAPHICAL AREAS OR ZONES WITHIN STATES. SPECIAL RESTRICTIONS MAY APPLY ON FEDERAL AND STATE PUBLIC HUNTING AREAS.

Season Dates	Limits Bag	Possession
Arizona (1)		
Ducks	Oct. 9-Nov. 3 & Nov. 19-Jan. 23.	7 14
Geese:	Nov. 19-Jan. 23.	6 6
Including no more than:		
Dark (no more than 2 Canada geese)		3 3
White		3 3
Coots and gallinules (singly or in the aggregate)	Same as for ducks.	25 25
Common snipe	Same as for ducks.	8 16
Sandhill cranes (only in Game Management Units 30A, 30B, 31, and 32)	Nov. 12, 13, & 14.	Only by permit; 2 cranes per season.
California		
Ducks:		
Northeastern Zone	Oct. 16-Jan. 16.	7 14
Colorado River Zone	Oct. 9-Nov. 3 & Nov. 19-Jan. 23.	7 14

(1) The Imperial, Cibola, and Havasu National Wildlife Refuges, Arizona, are open to waterfowl hunting except for posted portions. Ashurst Lake in Game Management Unit 5B is closed to all waterfowl and snipe hunting. Unit 1, Unit 27, that portion of Unit 25B lying east of Highway 273 and all of Units 3A and 3B lying east of Highways 77 and 260 are closed to the taking of Canada geese and its subspecies.

(2) The Sacramento Valley Area is bounded by a line beginning at Willows in Glenn County proceeding south on Interstate Highway 5 to the junction with Hahn Road north of Arbuckle in Colusa County; then easterly on Hahn Road and the Grimes-Arbuckle Road to Grimes on the Sacramento River, then southerly on the Sacramento River to the Tisdale By-pass; then easterly on the Tisdale By-pass to where it meets O'Banion Road; then easterly on O'Banion Road to State Highway 99; then northerly on State Highway 99 to its junction with the Gridley-Colusa Highway in Gridley in Butte County; then westerly on the Gridley-Colusa Highway to its junction with the River Road; then northerly on the River Road to the Princeton Ferry; then westerly across the Sacramento River to State Highway 45; then northerly on State Highway 45 to its junction with State Highway 162; then continuing northerly on State Highway 45-162 to Glenn; then westerly on State Highway 162 to the point of beginning in Willows.

(3) The San Joaquin Valley Area is bounded by a line beginning at Modesto in Stanislaus County proceeding west on State Highway 132 to the junction of Interstate 5; then southerly on Interstate 5 to the junction of State Highway 152 in Merced County; then easterly on State Highway 152 to the junction of State Highway 59; then northerly on State Highway 59 to the junction of State Highway 99 at Merced; then northerly and westerly to the point of beginning in Modesto.

(4) Numerous local restrictions and closures. See State regulations.

(5) Waterfowl may not be taken in the Kootenai County Waterfowl Closure-Thompson Lake, Hells Canyon Waterfowl Closure, Mormon Reservoir Waterfowl Closure, Black Canyon Reservoir-Payette River Waterfowl Closure, Ada County Waterfowl Closure, Fort Hall Indian Reservation Closure, and Hagerman Wildlife Management Area. Geese may not be hunted in the Canyon County Goose Closure, Minidoka-Cassia Goose Closure, or Hagerman Valley Goose Closure. See State regulations for descriptions of these areas.

(6) In Benewah, Bonner, Boundary, Kootenai, and Shoshone Counties, no more than 2 wood ducks may be taken daily nor more than 2 may be possessed.

(7) The season on white geese is closed in that portion of Jefferson County lying north of State Highway 33 and east of Interstate Highway 15, and in all of Clark, Fremont, Madison, and Teton Counties.

(8) Exceptions to the general season on geese are the following goose management areas (see State regulations for descriptions of areas): Shooting hours in the Canyon Ferry Goose Zone are from one-half hour before sunrise to 12 noon daily; the goose season in the Flathead Goose Zone is Oct. 2-Nov. 28; the goose season in the Deer Lodge Goose Zone is Oct. 16-Jan. 2; and the season on dark geese in the Benton Lake Goose Zone is Oct. 30-Jan. 2.

(9) Columbia Basin counties are Wasco, Sherman, Gilliam, Morrow, and Umatilla Counties. Western Oregon consists of all counties west of the summit of the Cascades excluding Klamath and Hood River Counties. Those portions of Coos and Curry Counties lying west of U.S. Highway 101 and that portion of Tillamook County lying south of an east-west line passing through the most westerly point of Cape Lookout are closed to all goose hunting.

(10) Shooting hours are from 12 noon through sunset on the first day of the season.

(11) Goose hunting is prohibited within the boundaries of the Desert Lake Waterfowl Management Area in Emery County, Fish Springs National Wildlife Refuge in Juab County, and Ouray National Wildlife Refuge in Uintah County.

(12) In Western Washington the shooting hours are from 8 a.m. through sunset on the opening day, and in Eastern Washington the shooting hours are from 12 noon through sunset the opening day.

(13) Geese may be hunted only on Saturdays, Sundays, and Wednesdays, and on November 11, 25, and 26, and December 25. Geese may be hunted only on Saturdays, Sundays, and Wednesdays, and on November 11, 25, and 26, 1982, and January 10 through 16, 1983, in Adams, Benton, Douglas, Franklin, Grant, Lincoln, and Walla Walla Counties and east of Satus Pass (U.S. Highway 97) in Klickitat County.

(14) Brant may be hunted only on Saturdays, Sundays, and Wednesdays. It shall be unlawful to hunt brant from a moving boat or any free-floating device that is not in a fixed position.

(e) Point system — Ducks, mergansers, and coots. The States selecting the point system bag limits on designated species are listed in the table under §20.105(d).

(1) The point values assigned to the species and sexes are as follows:

Atlantic Flyway

100 points	70 points	10 points	25 points
Canvasback (except where closed)	Female mallard	Pintail	Male mallard and all other species of ducks.
Florida only: Fulvous tree duck.	Black duck	Blue-winged teal	
	Mottled duck	Green-winged teal (2)	
	Wood duck (1)	Shoveler	
	Redhead	Gadwall	
	Hooded merganser.	Wigeon	
		Scaup	
		Sea ducks (3)	
		Mergansers (except hooded).	

(1) In Virginia during October 7 through October 10, the wood duck counts 25 points.

(2) In New Jersey the point value for green-winged teal is 25 by State regulation.

(3) Sea ducks count 10 points each during the point-system season, but during any part of the regular sea duck season falling outside the point-system season, sea duck daily bag and possession limits of 7 and 14, respectively, apply.

Mississippi Flyway (1)

100 points	70 points	10 points	25 points
Canvasback (except where closed)	Female mallard	Pintail	Male mallard and all other species of ducks.
	Black duck	Blue-winged teal	
	Wood duck	Green-winged teal	
	Redhead	Cinnamon teal	
	Hooded merganser.	Wigeon	Scaup (Michigan only)
		Shoveler	
		Gadwall	
		Scaup (except Michigan)	
		Mergansers (except hooded).	

(1) In Wisconsin, point values for some species change during the season. See State regulations. Also, species listed in the 10-category above are assigned 15 points in Wisconsin.

Central Flyway

100 points	70 points	10 points	20 points
Canvasback (except where closed).	Female mallard	Pintail	Male mallard and all other species of ducks.
	Mexican-like duck	Blue-winged teal	
	Wood duck	Green-winged teal	
	Redhead	Cinnamon teal	
	Hooded merganser.	Shoveler	
	Texas only:	Gadwall	
	Mottled duck	Wigeon	
	Black duck	Scaup	
		Merganser (except hooded.	

(1) In Wyoming the coot is assigned 10 points.

Coots have no point value (except in Wyoming) but conventional bag limits of 15 daily and 30 in possession apply.

Pacific Flyway: There is no point system in the Pacific Flyway.

(2) The daily bag limit is reached when the point value of the last bird taken added to the sum of the point values of the other birds already taken during that day reaches or exceeds 100 points. The possession limit is the maximum number of birds of species and sex which could have legally been taken in 3 days. The shooting (including hawking) hours are one-half hour before sunrise until sunset daily unless otherwise indicated.

(f) Scaup only season. A special hunting season for scaup only is prescribed according to the following table in those areas which are described, delineated, and designated in the hunting regulations of the respective States.

Daily bag limit..... 5
Possession limit..... 10
Shooting (including hawking) hours: One-half hour before sunrise to sunset daily.

Vermont	Nov. 26-Dec. 11.

Section 20.106 is amended to read as follows:

§20.106 Seasons, limits, and shooting hours for sandhill cranes.

Central Flyway: Subject to the applicable provisions of the preceding sections of this part, open seasons are prescribed for taking sandhill cranes with a daily bag limit of 3 and a possession limit of 6 (3 in New Mexico experimental season area) cranes, and with shooting (including hawking) hours from one-half hour before sunrise until sunset, in the following areas for the dates indicated:

(a) In Colorado (the Central Flyway portion except the San Luis Valley, North Park, and Prewitt Reservoir areas) the inclusive season dates are October 2 through November 28, 1982.

(b) In the New Mexico counties of Chaves, Curry, De Baca, Eddy, Lea, Quay, and Roosevelt, and in that portion of Texas west of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, along U.S. Highway 87 (and including all of Howard and Lynn Counties) to U.S. Highway 277 at San Angelo, and along U.S. Highway 277 to the International Toll Bridge in Del Rio, season dates in the New Mexico portion are October 31, 1982, through January 31, 1983, and in the Texas portion, October 30, 1982, through January 30, 1983.

In the New Mexico experimental sandhill crane season hunt areas, the bag and possession limits may not exceed 3 cranes, each of which must be tagged upon taking. In Area 1 (those portions of Dona Ana, Luna, and Sierra Counties west of Interstate Highway 25, north of Interstate Highway 10, east of New Mexico Highways 26 and 27 between Deming and Hillsboro, and south of New Mexico Highway 90), and Area 2 (that portion of Luna County south of Interstate Highway 10), the inclusive season dates are October 30 through November 1, 1982; December 4 through December 6, 1982; and January 15 through January 17, 1983. Each person participating in the experimental season must obtain and have in his possession while hunting, a valid special permit issued by New Mexico.

(c) In Oklahoma (that portion west of I-35), and in that portion of Texas east of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, then along U.S. Highway 87 to San Angelo, and west of a line running north from San Angelo along U.S. Highway 277 to Abilene, along State Highway 351 to Albany, along U.S. Highway 283 to Vernon, and then along U.S. Highway 183 east to the Oklahoma border, season dates in the Oklahoma portion are October 23, 1982, through January 23, 1983, and in the Texas portion, December 4, 1982, through January 30, 1983.

(d) In North Dakota, in Benson, Burleigh, Emmons, Kidder, Logan, McHenry, Pierce, and Stutsman Counties, the inclusive season dates are September 4 through September 12 and in McLean and Sheridan Counties, the inclusive season dates are September 4 through September 19, 1982. In South Dakota, the inclusive season dates are October 2 through November 7, 1982.

(e) In Montana (the Central Flyway portion except that area south of I-90 and west of the Bighorn River), the inclusive season dates are October 2 through November 28, 1982.

(f) In Wyoming, in Campbell, Converse, Crook, Goshen, Laramie, Niobrara, Platte, and Weston Counties, the inclusive season dates are September 25 through November 21, 1982.

In the Wyoming experimental sandhill crane-Canada goose hunt areas (Bear River drainage and Star Valley of Lincoln County), hunting is by State permit only with limits of 2 sandhill cranes and 3 Canada geese per season. The inclusive season dates are September 1 through September 14, 1982.

(g) Each hunter participating in the regular sandhill crane hunting season must obtain and carry in his possession while hunting sandhill cranes a Federal sandhill crane hunting permit available without cost from conservation agencies in the States where crane hunting seasons are allowed. The permit must be displayed to an authorized law enforcement official upon request.

Pacific Flyway: In Arizona (within Game Management Units 30A, 30B, 31, and 32), the inclusive season dates are November 13 through 14, 1982. Hunting will be by special permit to be issued by the State. Each permittee may take 2 sandhill cranes per season.

* * * * *

Section 20.107 is revised as follows.

§20.107 Seasons, limits, and shooting hours for whistling swans.

Whistling swans may be taken only by State-issued permit. Permittees may take only one whistling swan per season. Successful permittees must immediately validate their harvest by that method required by State law. Shooting hours are from one-half hour before sunrise to sunset daily. Seasons are:

(a) In Montana, whistling swans may be hunted only in Teton and Cascade Counties and from October 2, 1982, through January 2, 1983;

(b) In Nevada, whistling swans may be hunted only in Churchill County and from October 23, 1982, through January 9, 1983; and

(c) In Utah, whistling swans may be hunted from October 2, 1982, through January 2, 1983.

(d) The appropriate State agency must issue permits, obtain harvest and hunter participation data, and require successful hunters to immediately validate their harvests.

Section 20.109 is revised as follows:

§20.109 Extended seasons, limits, and hours for taking migratory game birds by falconry.

Subject to the applicable provisions of this part, the areas open to hunting, the respective open seasons (dates inclusive), the hawking hours, and the daily bag and possession limits on the species designated in this section are prescribed as follows:

Daily bag limit	3 singly or in the aggregate.
Possession limit	6 singly or in the aggregate.

These limits apply during both regular hunting seasons and extended falconry seasons.

Hawking hours: One-half hour before sunrise until sunset daily.

DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Last Listing September 23, 1982

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202–275–3030).

S.J. Res. 250 / Pub. L. 97–262 To provide for resolution of the single outstanding issue in the current railway labor-management dispute, and for other purposes. (September 22, 1982; 96 Stat. 1130) Price: $1.75.

Slip Laws

Subscriptions Now Being Accepted

97th Congress, 2nd Session, 1982

Separate prints of Public Laws, published immediately after enactment, with marginal annotations, legislative history references, and future Statutes volume page numbers.

Subscription Price: **$165.00 per session**

(Individual laws also may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Prices vary. See Reminder Section of the Federal Register for announcements of newly enacted laws and prices).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Presidential Determination No. 82-16 of May 27, 1982

Economic Support Fund Assistance for Liberia

Memorandum for the Honorable Alexander M. Haig, Jr., the Secretary of State

By virtue of the authority vested in me by the Foreign Assistance Act of 1961, as amended (the Act), I hereby:

(1) determine under Section 614(a)(1) of the Act that the furnishing of up to $14.9 million in assistance for Liberia under chapter 4 of part II of the Act from funds earmarked under Section 539 of the Act, and without regard to the provisions of Section 539, is important to the security interests of the United States; and

(2) authorize the furnishing of such assistance.

You are requested to report this determination to the Congress immediately in accordance with the requirements of the Act, and none of the assistance provided for herein shall be furnished until after such report has been made.

This determination shall be published in the **Federal Register**.

Proclamation 4976 of September 24, 1982

National Sewing Month

By the President of the United States of America

A Proclamation

Tens of millions of Americans sew at home. Their efforts demonstrate the industry, the skill and the self-reliance which are so characteristic of this Nation.

In recognition of the importance of home sewing to our economy the Congress has, by Senate Joint Resolution 205, designated September, 1982, as National Sewing Month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim September, 1982, as National Sewing Month. I call upon the people of the United States to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 24th day of September, in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Proclamation 4977 of September 24, 1982

National Cystic Fibrosis Week, 1982

By The President of the United States of America

A Proclamation

In our country today there are approximately 20,000 to 30,000 young people afflicted with cystic fibrosis—a genetic disease that will prevent most of them from reaching full adulthood. Cystic fibrosis is the most common fatal genetic disease that strikes American children; its cause and cure are still a mystery, and its effects pose formidable obstacles to normal activity throughout its victims' brief lives.

In the past twenty-five years, medical research has achieved measurable success in treating the symptoms of cystic fibrosis and in extending the lives of children born with the disease. The promise of further advances and the courage demonstrated each day by the suffering victims spur intensified research efforts.

With continuing attention to the many scientific questions yet to be answered and improved public awareness of the benefits of early diagnosis of this disease, there is good cause for optimism that cystic fibrosis can be overcome. The combined efforts of dedicated researchers and volunteers committed to the challenge of cystic fibrosis are a wellspring of hope for patients and their families, and the millions of Americans who may unknowingly carry the genetic trait that produces cystic fibrosis.

Acknowledging the progress of the last twenty-five years, and recognizing the compelling need to expand on past efforts to combat this fatal disorder, the Congress has, by Senate Joint Resolution 186, designated September 19 through 25, 1982, as National Cystic Fibrosis Week, declaring it as a time to consider the profound impact of the disease and the growing sense of hopefulness for the future of cystic fibrosis victims.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning September 19, 1982, as National Cystic Fibrosis Week and call upon the people of the United States to observe that week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 24th day of September, in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Proclamation 4978 of September 24, 1982

Lupus Awareness Week, 1982

By the President of the United States of America

A Proclamation

Systemic lupus erythematosus (lupus) is a serious disorder that can affect many different parts of the body, including the skin, joints, kidneys, heart, central nervous system, and other internal organs. While no one person has all symptoms, and they may occur in varying combinations, there are recognizable patterns of illness that identify patients with lupus.

It is estimated that 500,000 Americans have lupus—most of them young women. Fortunately, because of the progress that has been made in recent years toward better understanding and increased public awareness of the disease, there is more hope for its victims. Although research has yet to find the cure for lupus, the outlook for patients has improved greatly. Through advances in medical research, including better diagnosis and more effective drug treatment and medical management, many patients with lupus can now look forward to living more productive and happier lives. It is my fervent hope that continuing advances in medical research will improve the quality of life for all lupus patients and eventually lead to the prevention and cure of this serious and distressing disease.

By Senate Joint Resolution 183, the Congress of the United States has requested the President to designate the week beginning October 17, 1982, as Lupus Awareness Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning October 17, 1982, as Lupus Awareness Week, and I call upon the people of the United States to observe this week by learning more about this disease.

IN WITNESS WHEREOF, I have hereunto set my hand this 24th day of Sept., in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Rules and Regulations

Federal Register
Vol. 47, No. 188
Tuesday, September 28, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 530

Pay Rates and Systems (General): Effect of General Pay Increases on Special Salary Rates

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management is revising the regulation that determines the relationship of a special rate schedule to the pay schedule of the pay system for which the special rate schedule is authorized. Section 303 of Executive Order 11721 requires that each special schedule be reviewed at least annually and adjustments made as warranted by then current labor market and staffing conditions. OPM's regulation provides that, pending the annual review, special rate schedules will be automatically aligned when the regular pay schedule is adjusted. Beginning this year, however, OPM will make all adjustments to special rates effective on the date of the general pay adjustment in October; consequently, it is no longer necessary to align the special rates with the new regular schedule and OPM is revising the regulation governing this alignment.

EFFECTIVE DATE: September 28, 1982.

FOR FURTHER INFORMATION CONTACT: Richard J. Carney, Chief, Allowances and Special Rates Division, (202) 632–8742.

SUPPLEMENTARY INFORMATION: A proposed regulation was published in the Federal Register on August 4, 1982 (47 FR 33713), for a public comment period of 30 days. The Office of Personnel Management received written comments from one agency and two employee organizations.

The Federal agency and one of the employee organization's recommendations concerned the addition of language to the regulation to require that special rate adjustments, where warranted, be effective on the date of the general pay adjustment. While it is OPM's intent to effect warranted adjustments at the same time as the general pay adjustment, to require a same time effective date in the regulation would unduly restrict OPM's ability to make adjustments at times other than the effective date of the general pay adjustment. For example, if in a given year, the President and Congress decide that there will be no general pay adjustment, special rate adjustments could not be effected. For this reason, these recommendations are not being adopted.

The other employee organization questioned OPM's authority to "disconnect" special rate employees from the statutory pay system and deny them the regular pay schedule increase.

Employees covered by special rate schedules are not entitled to the full regular schedule adjustments under the existing regulation; but, instead, an adjustment to the new minimum rate of the new regular schedule. This adjustment was not statutorily required, but was an administrative determination. OPM is changing this administrative determination and eliminating the automatic adjustment. Special rate schedules will now be adjusted, where warranted, effective at the time of the regular schedule adjustment.

I find that good cause exists for waiving the delay of effectiveness usually required by 5 U.S.C. 553(d). The delay of effectiveness is waived because of the program benefits to be gained by effecting this change prior to this October's general pay adjustment.

E.O. 12291, Federal Regulation

OPM has determined that this is not a major rule as defined under Section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it applies only to pay systems affecting Federal employees.

List of Subjects in 5 CFR Part 530

Government employees, Wages.

U.S. Office of Personnel Management.
Donald J. Devine,
Director.

PART 530—PAY RATES AND SYSTEMS (GENERAL)

Accordingly, § 530.307 paragraph (a) of 5 CFR is revisd to read as follows:

§ 530.307 Effect of general pay increase on special salary rate schedules.

(a) A general revision of the regular pay schedule of the pay system for which special salary rates are authorized under section 5303 to title 5, United States Code, will have no effect on special salary rate schedules. Special salary rate schedules will be reviewed at least annually and adjusted, if warranted, by the Office of Personnel Management.

BILLING CODE 6325-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 908, 910, 924, 926, 927, 929, 931, and 932

Expenses and Rates of Assessment for Specified Marketing Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses of the committees functioning under Marketing Orders 908, 910, 924, 927, 929, 931, and 932. Funds to administer these programs are derived from assessments on handlers of the fruits regulated under the orders.

EFFECTIVE DATES: November 1, 1979–October 31, 1980 (§ 908.219); April 1, 1982–March 31, 1983 (§ 924.222, § 926.222); July 1, 1982–June 30, 1983 (§ 927.222, § 931.217); August 1, 1982–July 31, 1983 (§ 910.220); September 1, 1982–December 31, 1983 (§ 932.217); September 1, 1982–August 31, 1983 (§ 929.223).

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's

Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it would not significantly affect costs for the directly regulated handlers.

These marketing orders are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). These actions are based upon the recommendations and information submitted by each committee, established under the respective marketing order, and upon other information. It found that the expenses and rates of assessment, as hereinafter provided, will tend to effectuate the declared policy of the Act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rulemaking, and good cause exists for not postponing the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553). Each order requires that the rate of assessment for a particular fiscal period shalll apply to all assessable commodities handled from the beginning of such period. To enable the committees to meet current fiscal obligations, approval of the expenses is necessary without delay. It is necessary to effectuate the declared policy of the Act to make these provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Parts 908–932

Marketing agreements and orders, Oranges (Valencia), Lemons, Prunes, Grapes, Pears, Cranberries, Olives, California, Arizona, Washington, and Oregon.

Sections 908.219 (45 FR 14199) and 924.222 (47 FR 34351) are revised and §§ 910.219, 926.221, 927.221, 929.222, 931.216, and 932.216 are removed and new sections are added as follows (the following sections prescribe annual expenses and assessment rates and will not be published in the annual Code of Federal Regulations):

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA.

Section 908.219 paragraph (a) is revised to read as follows:

§ 908.219 Expenses, rate of assessment and carryover of unexpended funds.

(a) Expenses that are reasonable and likely to be incurred by the Valencia Orange Administrative Committee during the period November 1, 1979 through October 31, 1980, will amount to $376, 900.

* * * * *

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Section 910.220 is added to read as follows:

§ 910.220 Expenses and assessment rate.

Expenses of $591,070 by the Lemon Administrative Committee are authorized, and an assessment rate of $0.047 per carton of lemons is established for the fiscal year ending July 31, 1983; and unexpended assessment funds may be carried over from the fiscal year ended July 31, 1982.

PART 924—FRESH PRUNES GROWN IN DESIGNATED COUNTIES IN WASHINGTON AND IN UMATILLA COUNTY, OREGON

Section 924.222 is added to read as follows:

§ 924.222 Expenses and assessment rate.

Expenses of $30,549.50 by the Washington-Oregon Fresh Prune Marketing Committee are authorized, and an assessment rate of $2.20 per ton of prunes is established for the fiscal year ending March 31, 1983; and unexpended funds from the fiscal year ended March 31, 1982 shall be carried over as a reserve.

PART 926—TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIFORNIA

Section 926.222 is added to read as follows:

§ 926.222 Expenses and assessment rate.

Expenses of $211,506 by the Industry Committee are authorized, and an assessment rate of $0.11 per 23-pound lug of grapes is established for the fiscal year ending March 31, 1983. Unexpended funds may be carried over as a reserve.

PART 927—BUERRE D'ANJOU, BUERRE BOSC, WINTER NELIS, DOYENNE DU COMICE, BUERRE EASTER, AND BUERRE CLAIRGEAU VARIETIES OF PEARS GROWN IN OREGON, WASHINGTON, AND CALIFORNIA

Section 927.222 is added to read as follows:

§ 927.222 Expenses and assessment rate.

Expenses of $213,527 by the Control Committee are authorized, and an assessment rate of $0.02 per standard western pear box of pears is established for the fiscal year ending June 30, 1983. Unexpended funds may be carried over as a reserve.

PART 929—CRANBERRIES GROWN IN STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

Section 909.223 is added to read as follows:

§ 929.223 Expenses and assessment rate.

Expenses of $92,805 by the Cranberry Marketing Committee are authorized, and an assessment rate of $0.035 per barrel (100 pounds) of cranberries is established for the fiscal year ending August 31, 1983. Unexpended funds may be carried over as a reserve.

PART 931—FRESH BARTLETT PEARS GROWN IN OREGON AND WASHINGTON

Section 931.217 is added to read as follows:

§ 931.217 Expenses and assessment rate.

Expenses of $38,351 by the Northwest Fresh Bartlett Pear Marketing Committee are authorized, and an assessment rate of $0.0125 per standard western pear box of pears is established for the fiscal year ending June 30, 1983. Unexpended funds may be carried over as a reserve.

PART 932—OLIVES GROWN IN CALIFORNIA

Section 932.217 is added to read as follows:

§ 932.217 Expenses and assessment rate.

Expenses of $357,098 by the California Olive Committee are authorized for the period ending December 31, 1983. Unexpended funds may be carried over as a reserve.

(Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674)

Dated: September 22, 1982.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

CIVIL AERONAUTICS BOARD

14 CFR Part 302

Rules of Practice in Board Proceedings

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order waiving certain notice requirements.

SUMMARY: The Board in Order 82-9-97 has waived the service requirements of § 302.1705 of its Regulations for the applicant in this proceeding and has extended this waiver to all prospective applicants for charter authority under section 401 of the Federal Aviation Act. Henceforth, charter applicants need only serve the Board and such other additional parties as the Board specifically directs during its processing of the application.

FOR FURTHER INFORMATION CONTACT: Nicholas Lowry, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673-5345.

SUPPLEMENTARY INFORMATION: The complete text of Order 82-9-97 is available from our Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 82-9-97 to that address.

By the Civil Aeronautics Board: September 23, 1982.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket 9123]

Litton Industries, Inc., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: The Federal Trade Commission, in accordance with the decision and judgment of the Ninth Circuit Court of Appeals, has deleted references to "test" data from its order issued on January 5, 1981 to Litton Industries, Inc., (46 FR 8445). Among other things, the modified order prohibits respondent from misrepresenting survey results in its advertising of microwave ovens and other consumer products.

DATES: Final order issued Jan. 5, 1981. Modifying order issued Sept. 10, 1982.

FOR FURTHER INFORMATION CONTACT: FTC/GE, Jerold D. Cummins, Washington, D.C. 20580. (202) 523-1928.

SUPPLEMENTARY INFORMATION: In the matter of Litton Industries, Inc., a corporation and Litton Systems, Inc., a corporation. Codification appearing at 46 FR 8445 is modified as follows: Delete the following entries—Subpart—Advertising Falsely or Misleadingly: § 13.265 Tests and investigations. Subpart—Misrepresenting Oneself and Goods—Goods: § 13.1762 Tests, purported.

List of Subjects in 16 CFR Part 13

Advertising, Microwave ovens, and Surveys.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46, Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

The Modified Order To Cease and Desist is as follows:

Commissioners: James C. Miller III, Chairman; David A. Clanton, Michael Pertschuk, Patricia P. Bailey.

In the matter of Litton Industries, Inc., a corporation, and Litton Systems, Inc., a corporation, Docket No. 9123.

Modified Order To Cease and Desist

Respondents having filed in the United States Court of Appeals for the Ninth Circuit a petition for review of the Commission's order issued herein on January 5, 1981; and the Court having on May 3, 1982, rendered its decision modifying the Commission's order and, as so modified, affirming and enforcing the order; and the time for filing a petition for certiorari having expired and no petition having been filed:

Now, therefore, it is hereby ordered that the aforesaid order to cease and desist be, and it hereby is, modified in accordance with the decision and judgment of the Court of Appeals to read:

Order

I

It is ordered that respondents Litton Industries, Inc., a corporation, Litton Systems, Inc., a corporation, and their successors, assigns, officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising for sale, sale, or distribution of microwave ovens (either for commercial or consumer use), in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do cease and desist from:

1. Representing, directly or by implication, that any commercial microwave oven or consumer microwave oven:

(a) Is able to perform in any respect, or has any characteristic, feature, attribute, or benefit; or

(b) Is superior in any respect to any or all competing products; or

(c) Is recommended, used, chosen, or otherwise preferred in any respect more often than any or all competing products,

unless and only to the extent that respondents possess and rely upon a reasonable basis for such representation at the time of its initial and each subsequent dissemination. Such reasonable basis shall consist of competent and reliable surveys and/or other competent and reliable evidence which substantiates the representation. A competent and reliable survey means one in which persons qualified to do so conduct the survey and evaluate its results in an objective manner, using procedures that insure accurate and reliable results.

2. Failing to maintain accurate records:

(a) Of all materials that were relied upon in disseminating any representation covered by paragraph I(1) of this order, insofar as the text of such representation is prepared, authorized, or approved by any person who is an officer or employee of respondents, or of any division, subdivision or subsidiary of respondents, or by any advertising agency engaged for such purposes by respondents, or by any of its divisions or subsidiaries;

(b) Of all studies, surveys, or demonstrations that contradict any representation made by respondents that is covered by paragraph I(1) of this order.

Such records shall be retained by respondents for three years from the date that the representations to which they pertain are last disseminated, and may be inspected by the staff of the Commission upon reasonable notice.

II

It is further ordered that respondents Litton Industries, Inc., a corporation, Litton Systems, Inc., a corporation, and their successors, assigns, officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising for sale, sale, or distribution of microwave ovens (either for commercial or consumer use) and any other product normally sold to members of the general public for their personal or household use in or affecting commerce as "commerce" is defined in the Federal Trade Commission Act, do cease and desist from:

1. Misrepresenting in any manner, directly or by implication, the purpose, sample, content, reliability, results or conclusions of any survey.

2. Advertising the results of a survey unless the respondents in such survey are a census or a representative sample of the population referred to in the advertisement, directly or by implication. A representative sample need not be a probability sample so long as when the ad is first disseminated respondents have a reasonable basis to expect the sampling method used would not produce biased results.

3. Representing, directly or by implication, that experts were surveyed, unless reasonable care was taken to insure that the survey respondents possessed sufficient expertise to qualify as respondents for the survey and to answer the survey questions. For purposes of this order, an "expert" is an

individual, group or institution held out as possessing, as a result of experience, study or training, knowledge of a particular subject, which knowledge is superior to that generally acquired by ordinary individuals.

It is further ordered that the respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing, setting forth in detail the manner and form in which they have complied with this order.

It is further ordered that the respondents shall forthwith distribute a copy of this order to each of their operating divisions.

It is further ordered that the respondents shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of this order.

By the Commission. Commissioner Bailey did not participate.

Issued: September 10, 1982.

Carol M. Thomas,

Secretary.

16 CFR Part 13

[Docket 8909]

Xerox Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying Order.

SUMMARY: This order reopens the proceeding and modifies Paragraph XVII of the Commission's order issued on July 29, 1975 to the Xerox Corporation, (40 FR 42203) by revising the annual notice that Xerox must print in the Official Gazette of the United States Patent and Trademark Office. The modification eliminates the requirement for repitious annual printing of domestic and foreign copier patents available for licensing, and requires that only new patents and deletion of expired patents be published.

DATES: Final Order issued July 29, 1975. Modifying Order issued Sept. 10, 1982.

FOR FURTHER INFORMATION CONTACT: FTC/CC, Elliot Feinberg, Washington, D.C. 20580. (202) 634-4604.

SUPPLEMENTARY INFORMATION: In the Matter of Xerox Corporation, a corporation. Codification appearing at 40 FR 42203 remains unchanged.

List of Subjects in 16 CFR Part 13

Copying equipment, Patents.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

The Order Modifying Cease and Desist Order Issued July 29, 1975 is as follows:

Commissioners: James C. Miller III, Chairman; David A. Clanton, Michael Pertschuk, Patricia P. Bailey.

In the matter of Xerox Corporation, a corporation, Docket No. 8909.

Order Modifying Cease and Desist Order Issued July 29, 1975

The Federal Trade Commission having considered respondent Xerox Corporation's petition filed on June 11, 1982, to reopen this matter and to modify the consent order to cease and desist issued by the Commission on July 29, 1975, and having determined that reopening and modification of the order is warranted:

It is ordered that this matter be, and it hereby is reopened and that Paragraph XVII of the Commission's order be and it is hereby modified to read as follows:

XVII

It is further ordered that annually, until the expiration of all future patents, Xerox shall submit for publication in the Official Gazette of the United States Patent and Trademark Office a notice:

(1) Identifying by number, title, date of issue and category of subject matter (to an extent acceptable to the Commission) all United States patents which it is empowered to license, together with all foreign patents based on the patent application from which each United States patent originates, issued since the publication of the last such notice;

(2) Stating that Xerox shall grant licenses under (a) its order patents to make, have made, use and vend office copier products under the terms of this order, and (b) patents required to be licensed pursuant to the terms of Paragraph X of this order, if any;

(3) Stating that (a) a copy of this order, (b) a list of patents licensed to Xerox which are subject to the provisions of Paragraph II and IV(C)(9) of this order, if any, and (c) a list of all patents subject to this order which have been previously published are available from Xerox upon written request; and

(4) Citing the issues of the Official Gazette since 1961 in which previous notices have been published. Until the expiration of all Xerox future patents, Xerox shall send a copy of this order and a complete list of patents subject to this order to each person who inquires as to the availability of a license for office copier products, or to whom Xerox has offered such a license at any time since January 1, 1970.

By the Commission.

BILLING CODE 6750-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1000

Revisions to Statement of Organization and Functions

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Consumer Product Safety Commission is revising its Statement of Organization and Functions to reflect reassignment of responsibilities for public participation and advisory committee management, and abolition of the Interagency Regulatory Liaison Group.

EFFECTIVE DATE: September 28, 1982.

FOR FURTHER INFORMATION CONTACT: Joseph F. Rosenthal, Office of General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207. Telephone (301) 492-6980.

SUPPLEMENTARY INFORMATION: The statement of functions of the Commission's Office of the Secretary, set forth in 16 CFR 1000.16, provides, among other matters, that "It also administers the Commission's public participation activities, including provisions for the financial compensation of participants, and manages activities of the Commission's advisory committees". The Commission has reassigned the public participation function to the Office of Public Affairs. The advisory committee management function for the Commission's remaining committees has been reassigned to the Directorate for Health Sciences. In addition, the Interagency Regulatory Liaison Group, referred to in section 1000.28, has been abolished. Therefore, section 1000.18 as well as section 1000.17, dealing with the Office of Public Affairs and section 1000.28, dealing with the Directorate for Health Sciences, are revised by this rule to reflect these organizational changes.

Since this rule relates solely to internal agency organization and management, the Administrative Procedure Act (APA) (5 U.S.C. 553) does not require the Commission to apply the notice and comment provisions of the APA. Further, this action is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612, and thus is exempt from the provisions of that Act.

List of Subjects in 16 CFR Part 1000

Organization and functions (Government agencies).

Accordingly, Part 1000 of Title 16 of the Code of Federal Regulations is amended as shown.

PART 1000—COMMISSION ORGANIZATION AND FUNCTIONS

1. The authority citation for Part 1000 reads as follows:

Authority: 5 U.S.C. 552(a).

2. Section 1000.17 is revised to read as follows:

§ 1000.17 Office of Public Affairs.

The Office of Public Affairs is responsible for the development, implementation, and evaluation of a comprehensive national public affairs program designed to promote product safety. The Office develops and maintains relations with a wide range of national groups including: Consumer organizations; business groups; trade associations; state and local government organizations; labor organizations; medical, legal, scientific, and other professional associations; national print and broadcast media; and other Federal health, safety, and consumer affairs agencies. It also administers the Commission's public participation activities, including provisions for the financial compensation of participants.

3. Section 1000.18 is revised to read as follows:

§ 1000.18 Office of the Secretary.

The Office of the Secretary prepares the Commission's agenda, schedules and coordinates Commission business at official meetings, and records, issues, and stores the official records of Commission actions. The Office prepares and publishes the Public Calendar under the Commission's Meetings Policy. The Office exercises joint responsibility with the Office of the General Counsel for the interpretation and application of the Privacy Act, Freedom of Information Act, Federal Advisory Committee Act, and the Government in the Sunshine Act, and prepares or coordinates reports required by these acts. It issues Commission decisions, orders, rules, and other official documents, including **Federal Register** notices, for and on behalf of the Commission and controls the use of the Commission seal. The Office supervises and administers the dockets of adjudicative proceedings before the Commission. The Office also supervises and administers the public reading room.

4. Section 1000.28 is revised to read as follows:

§ 1000.28 Directorate for Health Sciences.

The Associate Executive Director for Health Sciences manages the Directorate for Health Sciences, which is responsible for management of the Commission's chronic hazards program, development and evaluation of the scientific content of product safety standards and test methods based on the chemical, biological and medical sciences, and the conduct and evaluation of specific product testing to support general agency regulatory activity. The Directorate provides scientific expertise to the Commission and it develops and evaluates performance criteria, design specifications, and quality control standards for certain consumer products. It conducts and evaluates scientific tests and test methods, participates in the scientific development of product safety standards, and provides advice on proposed standards. It collects scientific and technical data, reviews and evaluates toxicological and chemical hazards, and determines exposure, uptake and metabolism, including indentification of the toxicological and psychological bases which cause some population segments to be at special risk. It performs risk assessments for chemical and physical hazards in consumer products. It performs or monitors research, and conducts studies of the safety of or of improving the safety of consumer products. It provides the Commission's primary source of expertise for implementation of the Poison Prevention Packaging Act. It provides the Commission's expertise on manufacturing practices and quality assurance for chemical consumer products and it provides technical supervision to agency field chemistry laboratories and other chemical or toxicological testing facilities. It provides scientific and technical support to all commission organizations, activities, and programs. The Directorate provides technical liaison with the National Toxicological Program, the National Cancer Institute, the Environmental Protection Agency and other federal programs and organizations concerned with reducing the risks to consumers from exposure to chemical hazards. It also manages activities of the Commission's advisory committees. These committees are the Toxicological Advisory Board and the Chronic Hazard Advisory Panels.

Dated: September 20, 1982.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-12678; S7-907]

Adoption of Permanent Exemptions From Certain Provisions of the Investment Company Act of 1940 for Registered Separate Accounts and Other Persons

AGENCY: Securities and Exchange Commission.

ACTION: Final rule adoption and technical rule amendments.

SUMMARY: The Commission is adopting a permanent rule providing registered separate accounts and other persons with exemptive relief from certain provisions of the Investment Company Act of 1940 and the rules thereunder to the extent necessary to permit them to organize new separate accounts and new portfolio investment companies and to engage in certain related transactions in response to Revenue Ruling 81-225. The Commission is also adopting related technical amendments to one of the general rules under the Act.

EFFECTIVE DATE: September 21, 1982.

FOR FURTHER INFORMATION CONTACT: Thomas P. Lemke, Acting Special Counsel (202-272-2061), or Mary K. Crook, Attorney (202-272-3010), Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission today announced the adoption, on a permanent basis, of rule 6c-6 [17 CFR 270.6c-6] ("permanent rule" or "rule") under the Investment Company Act of 1940 [15 U.S.C. 80a-1 *et seq.*] ("Act"). The permanent rule is similar to rule 6c-6(T) [17 CFR 270.6c-6(T)], proposed by the Commission and adopted on an interim basis on October 2, 1981 (sometimes referred to herein as the "proposed rule") [1] in response to

[1] Investment Company Act Release No. 11970 (Oct. 2, 1981) [46 FR 49580] ("Release No. 11970"). Persons interested in a more detailed discussion of rule 6c-6(T) should refer to the Commission's prior release.

Revenue Ruling 81–225, 1981–41 I.R.B. (October 13, 1981) ("Revenue Ruling 81–225" or "Revenue Ruling"), although the permanent rule expands somewhat the scope of the exemptive relief provided by the proposed rule. The permanent rule provides registered insurance company separate accounts and other persons with exemptive relief from certain provisions of the Act and rules thereunder to the extent necessary to permit them: (i) to organize a new portfolio company and to substitute the shares of that company for the shares of an existing portfolio company or to make an exchange offer to contractowners whose securities are funded by the existing portfolio company; and (ii) to organize a new separate account and to make an exchange offer to contractowners of the existing separate account.[3] Additionally, the Commission is adopting related technical amendments to rule 0–1(e) [17 CFR 270.0–1(e)] of the General Rules and Regulations under the Act to make applicable to rule 6c–6 the definition of separate account and conditions for availablity of exemptions set forth in rule 0–1(e).

Background

On September 25, 1981, the Internal Revenue Service ("IRS") issued Revenue Ruling 81–225, which discusses the federal income tax status of earnings and gains derived from the shares of open-end investment companies [5] which are used to fund certain variable annuity contracts offered through insurance company separate accounts [4] organized and registered under the Act as unit investment trusts.[5] The IRS concluded that prior to the annuity starting date, the variable annuity contractowner, rather than the insurance company, will be deemed to be the owner of the shares of the open-end investment company for federal income tax purposes—and thus the earnings and gains from the shares are includible in the contractowner's gross income—where the contractowner has "investment control" over the shares and possesses sufficient other incidents of ownership of the shares.

The IRS deemed the contractowner to have "investment control" over the shares of the underlying investment company in those situations where the shares were available for purchase not only by prospective contractowners through their variable annuity contracts but also by other members of the general public. This treatment was appropriate, the IRS stated, because under these circumstances the contractowner's position "is substantially identical to what his or her position would have been" had the shares of the investment company been purchased directly. On the other hand, the IRS deemed the insurance company, rather than the contractowner, to have investment control where the shares of the investment company were not sold directly to the general public and were available for purchase by the public only through the purchase of a annuity contract. Under those circumstances, the IRS stated, the investment company "is nothing more than the alter ego" of the insurance company and the situation is equivalent, for federal income tax purposes, to a direct purchase by the contractowner of the assets of the underlying investment company. The IRS determined to apply the holding of the Revenue Ruling only to payments made into separate accounts after December 31, 1980, and excluded from the holding certain annuity contracts described in sections 403 (a) and (b) or 408(b) of the Internal Revenue Code provided that certain conditions were satisfied.[6]

Shortly after issuance of the Revenue Ruling, the Commission, recognizing that many separate accounts might deem it necessary to modify their operations in response to the Revenue Ruling and that such modifications might require exemptions from various provisions of the Act and rules thereunder, proposed for comment rule 6c–6 and adopted that rule on an interim basis as temporary rule 6c–6(T). The rule provided registered separate accounts and other persons with temporary exemptive relief to the extent necessary to permit them to organize a new portfolio investment company—the shares of which presumably would not be available for purchase other than through an annuity contract—and to substitute the shares of that portfolio investment company for the shares of an existing portfolio company.[7] The purpose of the temporary rule, the Commission explained, was to provide exemptive relief to registered separate accounts and other persons to the extent necessary to permit them to take certain actions to facilitate the continuation of investment plans which might otherwise be disrupted by the impact of the Revenue Ruling.

Discussion

In Investment Company Act Release No. 11970 (October 2, 1981) [46 FR 49500] ("Release No. 11970"), the Commission requested comments generally on proposed rule 6c–6 and specifically on whether any additional or different exemptive relief was necessary or appropriate for inclusion in the proposed rule prior to its adoption on a permanent basis. In response, the Commission received letters from seven commentators. None of the commentators disapproved of the concept underlying the proposal, although three commentators expressed specific objections to one or more provisions of the proposed rule and all seven commentators suggested that the scope of the exemptive relief granted by

---

[3] The terms "existing separate account," "new separate account," "existing portfolio company," and "new portfolio company" are defined in paragraph (a) of rule 6c–6. *See* notes 22–26, *infra*.

[5] Section 3 of the Act [15 U.S.C. 80a–3], in relevant part, defines "investment company" as any issuer which is or holds itself out as being engaged primarily, or proposes to engage primarily, in the business of investing, reinvesting, or trading in securities. An "open-end company" is defined by section 5(a)(1) of the Act [15 U.S.C. 80a–5(a)(1)] as a management company which is offering for sale or has outstanding any redeemable security of which it is the issuer. Section 4(3) of the Act [15 U.S.C. 80a–4(3)] defines a "management company" as any investment company other than a face-amount certificate company or a unit investment trust.

[4] A "separate account" is defined in section 2(a)(37) of the Act [15 U.S.C. 80a–2(a)(37)] as an account established and maintained by an insurance company pursuant to the laws of any state or other governmental entity of the United States or Canada under which income, gains, or losses, whether or not realized, from the assets of such account are, in accordance with the terms of the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company. A substantially identical definition of "separate account," as that term is used in various rules under the Act, is contained in rule 0–1(e)(1) under the Act [17 CFR 270.0–1(e)(1)].

[5] A "unit investment trust" is defined by section 4(2) of the Act [15 U.S.C. 80a–4(2)] as an investment company which (1) is organized under a trust indenture, contract of custodianship or agency, or similar instrument, (2) does not have a board of directors, and (3) issues only redeemable securities, each of which represents an undivided interest in a unit of specified voting securities, but does not include a voting trust.

[6] On February 3, 1982, the IRS, in response to problems encountered by issuers of certain annuities attempting to comply with the reporting requirements imposed by the Revenue Ruling, issued Announcement 82–36, 1982–9 I.R.B. (March 1, 1982), which extended the time period for certain filings necessitated by Revenue Ruling 81–225 and, with respect to capital gains, dividends, and unrealized appreciation earned in connection with certain annuity contracts, limited the applicability of the holding of Revenue Ruling 81–225 to such amounts realized or existing after December 31, 1981.

[7] Release No. 11970, *supra*. Previously, the Commission had issued a general statement of policy of its Division of Investment Management concerning the effects and implications of the Revenue Ruling under the federal securities laws which, among other things, recognized that the sponsors of variable annuity separate accounts whose contractowners were affected by the Revenue Ruling might need to modify their methods of operation and that, in this regard, emergency exemptive relief might be appropriate. Investment Company Act Release No. 11960 (Sept. 28, 1981) [46 FR 48240].

the proposed rule should be expanded in various regards. Based on those suggestions and upon its reconsideration of several provisions of the proposed rule, the Commission has determined to adopt a modified version of the rule,[8] as discussed *infra*.[9] The main points raised by the commentators and the aspects of the rule reconsidered by the Commission are discussed below.

1. *Scope of Exemptive Relief.* The proposed rule provided exemptive relief only with respect to the organization of a new portfolio company to fund an existing separate account, where the new portfolio company was designed to minimize the impact of the Revenue Ruling. Several commentators suggested that the proposed rule be expanded to include the relief necessary to permit an insurance company to create a new separate account, either as a new registered investment company or as part of an existing registered investment company, and to allow such new separate account to make an offer to the contractowners of the existing separate account to exchange their securities for securities of the new separate account. These commentators believed that because of ambiguities in the Revenue Ruling, it may be necessary to create not only a new portfolio company but also a new separate account in order to prevent contractowners from being deemed the owners, for Federal income tax purposes, of the securities of the underlying investment company.

In response to these comments, the Commission has expanded the scope of the exemptive relief granted by the rule to include the relief necessary to permit an insurance company to organize a new separate account and to permit that separate account to make an exchange offer to contractowners of the existing separate account. In order to qualify for the exemptive relief, the separate account would have to be substantially identical in all material respects to the existing separate account which is operating pursuant to an effective registration statement and which has secured all necessary exemptive relief.[10] Similarly, the Commission believes that it may be appropriate for such a new separate account to make an exchange offer to contractowners of the existing separate account, provided generally that the offer is made on the basis of the relative net asset values of the securities to be exchanged without the imposition of any fees or charges.[11] The exemptive relief necessary to permit insurance companies to proceed in the manner described above has been added as paragraphs (c) and (k) of the permanent rule. As it did in Release No. 11970, *supra*, however, the Commission emphasizes that it is not expressing any views on the legal or Federal income tax implications, or the appropriateness as a business matter, of engaging in the above described transactions or of any other actions which might be taken by registered separate accounts in response to the Revenue Ruling.[12]

One commentator suggested that the proposed rule be expanded to provide the exemptive relief necessary to permit an existing separate account organized as a unit investment trust to organize a new separate account in the form of a management investment company that would otherwise qualify as a "new portfolio company" under the rule. The Commission has considered this suggestion, but believes that it is appropriate to limit the availability of the rule's exemptive relief to situations where the new separate account, or new portfolio company, is substantially identical in all material respects, including its classification under the Act, to a predecessor entity that had obtained all necessary exemptive relief.[13] Although the Commission has decided not to amend the rule in this regard, it will, of course, entertain applications for exemptive relief necessary to permit an insurance company to proceed in the manner described by the commentator.

2. *Substitution of Securities.* Two commentators objected to the requirement of paragraph (f)(3) of the proposed rule that if securities of a new portfolio company were substituted for securities of an existing portfolio company and the substitution was exempted from section 26(b) of the Act[14] pursuant to paragraph (f)(3), contractowners of the registered separate account who would otherwise have the right to redeem their contracts must be given the right, for a period of at least 30 days, to redeem their contracts without the imposition of any withdrawal charge or contingent deferred sales load (hereinafter the "thirty day requirement"). According to these commentators, the thirty day requirement brings federal securities regulation into conflict with state insurance company regulation because this requirement impairs the surplus of the insurance company. After consideration of this comment the Commission continues to believe that the thirty day requirement is necessary and appropriate, and it has been retained in paragraph (h)(3) of the permanent rule. Because of the involuntary nature, from the contractowner's perspective, of a substitution effected in reliance on the rule, the Commission believes that the imposition of a withdrawal charge or contingent deferred sales load would be inappropriate in a situation where, for example, a contractowner determines to redeem his contract because he believes that a substitution effected in response to the Revenue Ruling has diminished the value of his contract. Moreover, it is unclear whether there is any real possibility that the thirty day requirement would, in fact, impair surplus, and, even assuming the validity of the commentators' claim, the Commission notes that the procedure contemplated in paragraph (h)(3)—that is, a substitution of securities pursuant to section 26(b) of the Act—is not compulsory nor is it the sole means of providing contractowners with an

---

[8] On March 18, 1982, the IRS announced Revenue Rulings 82–54 and 82–55, 1982–14 I.R.B. (April 5, 1982), two additional rulings concerning the ownership, for federal income tax purposes, of the shares of an underlying investment company held by an insurance company in connection with certain variable annuity contracts. The Commission does not believe that those rulings affect the appropriateness of adopting rule 6c–6.

[9] Concurrent with its adoption of the permanent rule, the Commission is withdrawing rule 6c–6(T). Of course, any transactions consummated in reliance on rule 6c–6(T) are still valid even if the same transaction would not, pursuant to the permanent rule, be exempted from the Act and the rules thereunder. For example, if a new portfolio company was organized pursuant to rule 6c–6(T), orders of the existing separate account will remain in full force and effect even if the disclosure required by paragraph (b)(4) of the permanent rule is not included in Part II of the existing separate account's Registration Statement under the Securities Act of 1933 (*see* discussion in text accompanying note 19, *infra*), provided that the requirements of paragraph (b) of the temporary rule were satisfied.

[10] The necessary relief would include, for example, the various "start-up" exemptions from sections 26(a) and 27(c)(2) of the Act [15 U.S.C. 80a–26(a) and 80a–27(c)(2)] concerning the payment of fees and charges from the assets of the separate account and custodianship activities.

[11] A more complete discussion of the conditions which must be satisfied by a new separate account desiring to make an exchange offer in reliance upon the rule is set forth in the text accompanying notes 31–33, *infra*.

[12] The Commission also is not expressing any views on the possible effect of Revenue Rulings 82–54 and 82–55 on such transactions or other action.

[13] In the situation described by the commentator, the separate account organized as a management company would require exemptions from sections 26(a) and 27(c)(2) of the Act to permit the withdrawal of the management fee from the assets of the separate account. The existing separate account would not have obtained such relief because, being a unit investment trust, it would not have imposed a management fee.

[14] 15 U.S.C. 80a–26(b). Section 26(b) of the Act provides, in part, that: "It shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved the substitution."

alternative funding medium. Other methods are available, such as an offer of exchange under section 11 of the Act, which would not require the insurance company to permit contract redemptions without the imposition of a withdrawal charge or a contingent deferred sales load.

In this regard, the Commission has determined that it is appropriate to expand the scope of the exemptive relief included in the permanent rule to provide the relief necessary to permit a separate account to make an exchange offer and thereby avoid the thirty day requirement. Accordingly, the Commission, in paragraph (j) of the permanent rule, has included an exemption from section 11 of the Act [15] to the extent necessary to permit an existing separate account to offer its contractowners the right to exchange a security funded by the existing portfolio company for a security of the same separate account funded by a new portfolio company without the terms of that offer having first been submitted to and approved by the Commission, provided that the exchange is made on the basis of the relative net asset values of the securities to be exchanged without the imposition of any fees or charges.[16] Since any such exchange would be voluntary on the part of the contractholder, the Commission believes that under these circumstances the thirty day requirement would be unnecessary. Comparable exemptive relief from section 11 with respect to an exchange offer by a new separate account to the contractowners of an existing separate account has been included in paragraph (k) of the rule, as discussed *infra*.

One commentator suggested that a registered separate account making a substitution of securities after a specified time period, such as, for example, from six months to one year from the issuance date of the Revenue Ruling, should not be required to comply with the thirty day requirement. The Commission believes that the mere passage of time will not alleviate the possibly detrimental impact on contractowners of an involuntary substitution, and, accordingly, no change in this regard has been made in the rule.

Another commentator, arguing that section 26(b) of the Act requires Commission approval of a substitution of securities involving a unit investment trust only where the trust holds securities of a single issuer, recommended that the Commission take the position that the substitution of securities of a new portfolio company for securities of an existing portfolio company, without prior Commission approval, would violate section 26(b) of the Act only where such existing company's securities are the only securities held by the separate account. However, the Commission has determined not to reexamine at this time its position that prior Commission approval is required for a substitition of securities in any subaccount of a registered separate account.

Finally, one commentator urged the Commission to expand its interpretation, as set forth in Release No. 11970, *supra*, of changes that it would not consider "material" for purposes of paragraph (b)(1) of the rule, and suggested several examples.[17] The Commission has examined this comment and believes that solely for the purposes of paragraphs (b)(1) and (c)(1) of rule 6c–6, the following changes, in addition to the change recited in Release No. 11970, *supra*, are not "material": the replacement of the existing portfolio company's investment adviser with the sponsoring insurance company or an affiliated person thereof; the fact that an investment adviser of a new portfolio company has an agreement with a sub-adviser for the new portfolio company, the elimination of any exchange or transfer rights; and the cessation of sales to the public of securities of the existing portfolio investment company other than through the purchase of an annuity contract.

3. *Other Comments.* One commentator interpreted paragraph (c) of the proposed rule and related discussion in Release No. 11970, *supra*, as an assertion by the Commission that any affiliated person of an existing portfolio company who participates in the creation of a new portfolio company is, merely by virtue of such participation, in violation of section 17(d) of the Act and rule 17d–1 thereunder.[18] As the proposing release makes clear, however, the term "organization," as used in the proposed rule, contemplated not merely the creation of a new portfolio company, as indicated by the commentator, but both the creation of such a company and the substitution of the shares of that company for the shares of an existing portfolio company. Furthermore, the Commission did not take the position that such transactions would require exemptive orders in all cases; the Commission merely stated that exemptive relief might be required, depending upon the individual circumstances involved. Accordingly, the relevant terminology has been retained in paragraph (d) of the rule.

The same commentator, believing that the definition of "new portfolio company" in the proposed rule could be interpreted to require that such a company must be one that is created subsequent to the issuance of the Revenue Ruling, also recommended that the Commission clarify in the permanent rule that a pre-existing registered investment company could qualify as a new portfolio company. In response to this comment and in order to clarify the point, the Commission has modified the definition of "new portfolio company" set forth in paragraph (a)(4) of the rule to provide that a new portfolio company shall mean any registered open-end management company the shares of which will be sold to one or more registered separate accounts for the purpose of minimizing the impact of the Revenue Ruling, rather than an investment company "designed" to minimize the impact of that ruling as was provided in paragraph (a)(4) of the proposed rule.

4. *Other Modifications.* Upon reconsideration of several provisions of

---

[15] 15 U.S.C 80a–11. Section 11(a) of the Act [15 U.S.C. 80a–11(a)] makes it unlawful for any registered open-end company or any principal underwriter for such a company to make or cause to be made an offer to the holder of a security of such company or of any other open-end company to exchange his security of such company for a security of the same or another such company on any basis other than the relative net asset values of the securities to be exchanged, unless the terms of the offer have first been approved by the Commission. Section 11(c) of the Act [15 U.S.C. 80a–11(c)] provides, among other things, that an offer of exchange involving a security of a registered unit investment trust is subject to the provisions of section 11(a) irrespective of the basis of the exchange.

[16] Under paragraph (b) of the proposed rule, separate accounts that had previously obtained exemptive orders from section 11 of the Act would have been permitted to make such exchanges without prior Commission approval. Paragraph (j) of the permanent rule will provide exemptive relief for such exchange offers irrespective of whether prior Commission approval has been obtained.

[17] In Release No. 11970, *supra*, the Commission expressed its view that the fact that an insurance company or an affiliated person thereof (rather than the investment adviser to an existing portfolio company) serves as the new portfolio company's investment adviser would not be deemed a material change for purposes of paragraph (b) of the proposed rule.

[18] 15 U.S.C. 80a–17(d) and 17 CFR 270.17d–1. Section 17(d) of the Act and rule 17d–1 thereunder provide, in part, that it shall be unlawful for any affiliated person of or principal underwriter for a registered investment company, or any affiliated person of such a person or principal underwriter, acting as principal to effect any transaction in which such registered company, or a company controlled by such registered company, is a joint or a joint and several participants unless an application regarding such joint enterprise or arrangement has been filed with, and an appropriate order has been granted by, the Commission.

the proposed rule, the Commission has determined to make five modifications in addition to those described above. The first such modification relates to the manner in which certain information must be filed with the Commission in order for an existing separate account to rely on rule 6c–6 and the nature of the information to be provided in that filing. Paragraph (b)(4) of the permanent rule has been modified to require a list of the Investment Company Act release numbers of any Commission orders upon which the existing separate account intends to rely, rather than a description of the new portfolio company as required by the proposed rule; and, that this information, along with the other information required by the proposed rule, be included in Part II of the existing separate account's Registration Statement under the Securities Act of 1933,[19] rather than in a letter to be placed in the Commission's public files as required by the proposed rule. The Commission believes that the former change will facilitate its administration of the permanent rule, while the latter change will reduce compliance costs for separate accounts by eliminating the necessity of preparing and transmitting a separate document to the Commission and will make the required information, which will become part of the Commission's permanent record, more accessible both to the general public and to the Commission's staff. With regard to the latter change, the Commission believes that compliance with paragraph (b)(4) of the rule would not require a special filing by the existing separate account but rather that the required information may be included in the separate account's next post-effective amendment.

The second modification specifies the period of time within which actions in reliance on the rule must be taken. While the proposed rule contained no express limitation on the time period within which actions in reliance thereon must be taken, implicit in that rule is the notion that any actions taken in reliance on the exemptive relief provided therein, because they would be in response to the extraordinary circumstances created by the Revenue Ruling, would be taken within a reasonable time period after the issuance of the Revenue Ruling. In order to clarify any doubt regarding this point, the Commission, in paragraph (1) of the rule, has specified that the exemptive relief provided by the rule with respect to the organization of new portfolio companies and new separate accounts shall be available only to those entities that are registered under the Act prior to September 21, 1983—one year from the effective date of rule 6c–6.[20] This time period also is applicable to the exemptive relief provided to certain related persons with respect to a substitution of securities of a new portfolio company for securities of an existing portfolio company effected in reliance on the rule.

The third modification includes the addition in paragraph (f) of the rule of exemptive relief from section 17(a) of the Act[21] and rule 18f–1[22] to the extent necessary to permit transactions involving the transfer of part of the assets of an existing portfolio company to a new portfolio company. While the proposed rule did not specifically provide the relief necessary to permit an insurance company sponsor to redeem in kind from the existing company only those assets attributable to variable annuity contracts affected by the Revenue Ruling and subsequently to use those assets to purchase the shares of the new portfolio company, it has come to the Commission's attention that at least one insurance company believes that such a transfer is within the spirit of rule 6c–6(T). Since the Commission believes that such a transfer would be an appropriate response to the Revenue Ruling, particularly in light of the fact that this type of transfer would eliminate brokerage commissions and thereby benefit contractowners, it has included in paragraph (f) of the rule explicit relief from section 17(a) which, absent an order pursuant to section 17(b) [15 U.S.C. 80a–17(b)], may prohibit some or all of the transactions attendant upon such a transfer. In addition, the Commission has included in paragraph (f) exemptive relief from rule 18f–1 to the extent necessary to permit existing portfolio companies that have elected pursuant to that rule to pay certain redemptions in cash to revoke that election and make a redemption in kind.

The relief provided by paragraph (f) is conditioned in four respects. First, the transfer must be made without the imposition of any fees or charges. Second, the board of directors of the existing portfolio company must determine that the assets to be transferred are selected in a manner that is fair and reasonable to all shareholders of the company. Third, any securities involved must be valued by the existing portfolio company, for purposes of the transfer, in accordance with its valuation practices for determining net asset value per share. Finally, with respect to rule 18f–1, the existing portfolio company can redeem in kind those of its shares held by the existing separate account only if such a redemption is requested by the separate account.

Fourth, the Commission has deleted from the rule the requirement of paragraph (c)(2) of the proposed rule that determinations by the boards of directors of both the existing and the new portfolio company that any expenses borne by their respective companies in connection with the organization of one or more new portfolio companies are necessary and appropriate and allocated fairly, and the bases upon which these determinations were made, must be recorded in the minute books of the respective companies and disclosed in the existing portfolio company's prospectus. While the Commission believes that these determinations, and the bases upon which they were made, may be material for disclosure purposes and may be appropriate for inclusion in the minute books, the boards of directors of the respective companies are responsible for making these decisions in the context of their individual circumstances.

Finally, the Commission has made a number of technical changes to the proposed rule. For example, the term "existing separate account" has been substituted for "registered separate account" in order to distinguish more clearly such a separate account from a "new separate account" under the rule. Various other non-substantive changes have been made in order to clarify the rule.

---

[19] Similar informational requirements have been incorporated into paragraphs (c) and (g) of the permanent rule, relating to reliance by new separate accounts and new portfolio companies on Commission orders granting exemptive relief to existing separate accounts and existing portfolio companies.

[20] Although the exemptive relief provided by the rule will not be available to any such entities registered after September 21, 1983, it will, of course, continue in effect subsequent to that date for entities which registered prior to that date and which relied on the rule.

[21] 15 U.S.C. 80a–17(a). Section 17(a) of the Act provides, in relevant part, that it shall be unlawful for any affiliated person or promoter of or principal underwriter for a registered investment company, or any affiliated person of such person, promoter, or principal underwriter, acting as principal knowingly to sell any security or other property to such registered company or to any company controlled by such registered company, except under certain circumstances, and makes it unlawful for such persons knowingly to purchase from such registered company or from any company controlled by such company, any security or other property.

[22] 17 CFR 270.18f–1. Rule 18f–1 provides an exemption from certain requirements of section 18(f)(1) of the Act [15 U.S.C. 80a–18(f)(1)] for registered open-end investment companies which have the right to redeem in kind. *See* Investment Company Act Release No. 6561 (June 14, 1971) [36 FR 11919].

Final Rulemaking

1. *Rule 6c–6.* Rule 6c–6 provides separate accounts and certain other persons with permanent exemptive relief from various provisions of the Act and rules thereunder to the extent necessary to permit them to: (1) Organize a new portfolio company and to substitute shares of that company for the shares of an existing portfolio company or to make an exchange offer to contractowners whose securities are funded by the existing portfolio company; and (2) organize a new separate account and to make an exchange offer to contractowners of the existing separate account. Paragraph (a) of the rule defines various terms used in the rule.

Paragraph (b) of the rule provides that any existing order of the Commission under the Act, granted to an existing separate account [23] on or before September 25, 1981—the issuance date of the Revenue Ruling—shall remain in full force and effect notwithstanding that the existing separate account invests in one or more new portfolio companies [24] in lieu of, or in addition to, investing in one or more existing portfolio companies [25] provided, generally, that no material changes have occurred in the facts, undertakings, or conditions upon which the order was based and that certain information is included in Part II of the existing separate account's Registration Statement. Paragraph (c) of the rule provides similar relief with respect to any existing order of the Commission under the Act granted to an existing separate account as that order shall apply to the new separate account [26] and the depositor of and principal underwriter for such account.

Paragraph (d) of the rule (paragraph (c) of the proposed rule) provides certain affiliated persons of an existing portfolio company and a new portfolio company with an exemption from section 17(d) of the Act and rule 17d–1 thereunder to the extent necessary to permit them to bear certain expenses in connection with the organization of one or more new portfolio companies. This exemptive relief is conditioned upon any such expenses being necessary and appropriate and allocated in a manner that is fair and reasonable to all of the shareholders of these companies.[27] As noted *supra*, the permanent rule, unlike the proposed rule, does not specifically require that any determinations by the boards of directors of the respective companies with respect to the bearing of these expenses must be included in the companies' minute books and, in the case of the existing separate account, disclosed in its prospectus.

Paragraph (e) of the rule (paragraph (d) of the proposed rule) provides certain affiliated persons of the new or existing separate account, including the sponsoring insurance company, with exemptive relief from section 17(d) and rule 17d–1 thereunder to the extent necessary to permit them to bear any reasonable expenses arising out of the organization of one or more new portfolio companies or the new separate account. Paragraph (f), as discussed *supra*, provides exemptive relief from section 17(a) of the Act and rule 18f–1 of the Act to the extent necessary to permit transactions involving the transfer of part of the assets of an existing portfolio company to a new portfolio company.

Paragraph (g) of the rule (paragraph (e) of the proposed rule) provides a new portfolio company with an exemption from section 2(a)(41) of the Act and rules 2a–4 and 22c–1 under the Act [28] to the extent necessary to permit it to use the same method of valuation for the purpose of pricing its shares for sale, redemption, and repurchase as that used by the existing portfolio company, provided that certain conditions are satisfied. This relief is conditioned, generally, upon the new portfolio company agreeing to all the representations, undertakings, and conditions made or agreed to by the existing portfolio company in connection with any pricing order it has obtained.

Paragraph (h) of the rule (paragraph (f) of the proposed rule) exempts the depositor or trustee of an existing separate account from section 26(b) of the Act to the extent necessary to permit the substitution of securities of the new portfolio company for securities of the existing portfolio company provided that, within thirty days of the substitution, certain conditions are met. First, the existing separate account must notify all contractowners of the substitution of securities [29] and of any determinations of the board of directors of the new portfolio company required to be made by paragraph (d) of the rule. Second, all contractowners must receive a copy of the new portfolio company's prospectus. Finally, the existing separate account must comply with the thirty day requirement, as discussed *supra*.[30]

---

[23] An "existing separate account" is defined in paragraph (a)(2) of the rule as a separate account which is, or is a part of, a unit investment trust registered under the Act, and which was engaged in a continuous offering of its securities on September 25, 1981.

[24] A "new portfolio company" is defined in paragraph (a)(4) as a registered open-end management investment company the shares of which will be sold to one or more registered separate accounts for the purpose of minimizing the impact of the Revenue Ruling on contractowners of an existing separate account and which has the same investment objectives, fundamental policies, and voting rights as the existing portfolio company, and has an advisory fee schedule including expenses assumed by the adviser, that is at least as advantageous to the new portfolio company as was the fee schedule of the existing portfolio company.

[25] An "existing portfolio company" is defined in paragraph (a)(3) as a registered open-end management investment company that was engaged in a continuous offering of its securities on September 25, 1981, all or part of whose securities were owned by an existing separate account on that date.

[26] A "new separate account" is defined in paragraph (a)(5) as a separate account which (i) is, or is a part of, a unit investment trust registered under the Act, (ii) is intended to minimize the impact of the Revenue Ruling on the contractowners of an existing separate account, (iii) invests solely in one or more new portfolio companies, (iv) has the same sales loads, depositor, and custodial arrangements as the existing separate account, and (v) has asset charges and administrative and other fees (not including taxes) that correspond only to fees and charges of the existing separate account and are no greater than those corresponding fees and charges.

[27] Expenses of organizing the new portfolio company include, among other things, expenses associated with the redemption of the existing separate account's interests in the existing portfolio company and, if the redemption is in cash, expenses associated with the initial investment of the assets of the new portfolio company.

[28] 15 U.S.C. 80a–2(a)(41) and 17 CFR 270.2a–4 and 270.22c–1. Section 2(a)(41) and rules 2a–4 and 22c–1 specify certain procedures for registered investment companies to follow in pricing their shares for sale, redemption, and repurchase. These procedures, as interpreted in Investment Company Act Release Nos. 5847 (Oct. 21, 1969) [35 FR 19989], 6295 (Dec. 23, 1970) [35 FR 19986], and 9786 (May 31, 1977) [42 FR 28999], require portfolio securities to be valued at current market value and the price per share to be computed to within one-tenth of one percent. On numerous occasions the Commission has granted exemptive relief from this section and these rules in order to permit certain investment companies, subject to certain conditions, to use methods of valuation, such as amortized cost or "penny-rounding," that do not conform to these procedures.

[29] Although paragraph (h) of the rule allows an existing separate account up to thirty days in which to notify contractowners of a substitution of securities, an existing separate account that is otherwise required by the terms of its trust indenture or other agreement to provide such notice within a shorter period of time would still be required to do so. *See* section 26(a)(4)(B) of the Act [15 U.S.C. 80a–26(a)(4)(B)]. However, the Commission has included exemptive relief from this provision in paragraph (i) of the rule to the extent necessary to permit an existing separate account to rely on paragraph (h) of the rule, provided, of course, that applicable state law would permit the separate account to modify its trust indenture or other agreement in such a manner.

[30] *See* discussion in text accompanying note 14, *supra*. Since the elimination of any contingent deferred sales load might be deemed to violate section 22(d) of the Act [15 U.S.C. 80a–22(d)], which prohibits the sale of any security of a registered investment company to the public at a price other than the current public offering price described in the company's prospectus, paragraph (i) of the rule (paragraph (g) of the proposed rule) exempts an existing separate account from section 22(d) to the extent necessary to permit it to comply with paragraph (h) of the rule.

Paragraph (j) of the rule provides that, notwithstanding section 11 of the Act, an existing separate account and certain related persons may make an offer to contractowners to exchange a security funded by an existing portfolio company for a security funded by a new portfolio company without the terms of that offer having first been submitted to and approved by the Commission, provided that the exchange is to be made on the basis of the relative net asset values of the securities being exchanged without the imposition of any fees or charges.

Paragraph (k) and subparagraph (k)(1) of the rule provide similar relief with respect to offers to exchange securities of a new separate account for securities of an existing one, provided, again, that the exchange is to be made on the basis of the relative net asset values of the securities to be exchanged without the imposition of any fees or charges. While this proviso would, of course, prevent a withdrawal charge or contingent deferred sales load from being imposed upon redemption of securities in the existing separate account, paragraph (k)(2) permits a contingent deferred sales load to be imposed upon redemption of securities in the new separate account, to the extent that these securities were transferred from the existing separate account, subject to certain conditions. First, if the computation of the sales load is based on the amount of time the contractowner has been a holder of a security of the new separate account, paragraph (k)(2)(i)(A) provides that a contractowner must be treated as if he was a contractowner of the new separate account as of the date he became a contractowner of the existing separate account.[31] Similarly, if the computation of the contingent deferred sales load is based on the period of time that the contractowner's purchase payments have been invested in the new separate account, paragraph (k)(2)(i)(B) provides that amounts attributable to purchase payments made to the existing separate account must be treated as if they were made to the new separate account as of the date they were made to the existing separate account.[32]

Paragraph (k)(2)(i) is intended to codify Commission orders in this area and is designed to insure that, for purposes of computing a contingent deferred sales load, a contractowner is not adversely affected by an exchange. Second, irrespective of the manner in which the contingent deferred sales load is computed, paragraph (k)(2)(ii) provides that the total sales load must not exceed 9 percent of the sum of the purchase payments made to the new separate account and that portion of the purchase payments made to the existing separate account attributable to the securities exchanged.[33] This second condition is intended to limit the sales load that might be imposed on appreciation in both the existing separate account and the new separate account.

Finally, paragraph (l) as discussed *supra*, specifies that the exemptive relief granted by the rule with respect to the organization of any new separate account or new portfolio company or to certain persons related to those entities, and to any substitution of securities effected in reliance on the rule, is available only to such entities registered or substitutions effected prior to September 21, 1983.

2. *Amendments to rule 0–1(e).* Rule 0–1 of the General Rules and Regulations under the Act defines various terms used in those rules and regulations. Rule 0–1(e) defines the term "separate account" and sets forth the conditions for availability of exemptive relief for separate accounts pursuant to various of those rules. The Commission is amending rule 0–1(e) to include rule 6c–6 as one of the rules listed therein.

Procedural Matters—Rule 0–1(e)

The Commission considers the foregoing amendments to rule 0–1(e) under the Act to be technical, rather than substantive, modifications of that rule. Accordingly, the Commission, pursuant to section 4(b) of the Administrative Procedure Act [5 U.S.C. 553(b)], for good cause, finds that prior notice and comment on the amendments to rule 0–1(e) are unnecessary. In addition, the Commission, pursuant to section 4(d) of the Administrative Procedure Act [5 U.S.C. 553(d)], finds good cause to adopt those amendments, effective immediately, because they are technical in nature.

List of Subjects in Part 270

Investment companies, Reporting requirements, Securities.

Text of Rule 6c–6 and Amendments to Rule 0–1(e)

PART 270—FORMS AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

Part 270 of Chapter II of Title 17 of the Code of Federal Regulations is amended as follows:

1. By revising paragraphs (e) introductory text and (e)(2) of § 270.0–1 to read as follows:

§ 270.0–1 Definition of terms used in the rules and regulations.

* * * * *

(e) Definition of separate account and conditions for availability of exemptions under §§ 270.6c–6, 270.14a–2, 270.15a–3, 270.16a–1, 270.22d–3, 270.22e–1, 270.27a–1, 270.27a–2, 270.27a–3, 270.27c–1, and 270.32a–2, of this chapter.

* * * * *

(2) As conditions to the availability of exemptive Rules 6c–6, 14a–2, 15a–3, 16a–1, 22d–3, 22e–1, 27a–1, 27a–2, 27a–3, 27c–1, and 32a–2, the separate account shall be legally segregated, the assets of the separate account shall, at the time during the year that adjustments in the reserves are made, have a value at least equal to the reserves and other contract liabilities with respect to such account, and at all other times, shall have a value approximately equal to or in excess of such reserves and liabilities; and that portion of such assets having a value equal to, or approximately equal to, such reserves and contract liabilities shall not be chargeable with liabilities arising out of any other business which the insurance company may conduct.

* * * * *

§ 270.6c–6(T) [Removed]

2. By removing §270.6c–6(T).

3. By adding § 270.6c–6 to read as follows:

§ 270.6c–6 Exemption for certain registered separate accounts and other persons.

(a) As used in this section,

(1) "Revenue Ruling" shall mean Revenue Ruling 81–225, 1981–41 I.R.B. (October 13, 1981), issued by the Internal Revenue Service on September 25, 1981.

(2) "Existing separate account" shall mean a separate account which is, or is

---

[31] Under this paragraph, for example, if the new separate account imposes a contingent deferred sales load on all redemptions made in the first five contract years and does not impose a sales load on redemptions after the fifth contract year, no sales load could be imposed on acquired securities redeemed by a contractowner more than five contract years after he became a contractowner of the existing separate account, even if he became a contractowner of the new separate account less than five contract years prior to redemption.

[32] Under this paragraph, for example, if the new separate account imposes a contingent deferred sales load on all redemptions attributable to purchase payments made to the new separate account within five years of the redemption request, no sales load could be imposed on amounts redeemed by a contractowner from the new separate account that are attributable to purchase payments made to the existing separate account more than five years prior to the redemption, even if the amounts had been invested in the new separate account for fewer than five years.

[33] Of course, for the purpose of this subsection, the amount transferred from the existing separate account to the new separate account in connection with the exchange is not a "purchase payment made to the new separate account."

a part of, a unit investment trust registered under the Act, engaged in a continuous offering of its securities on September 25, 1981.

(3) "Existing portfolio company" shall mean a registered open-end management investment company, engaged in a continuous offering of its securities on September 25, 1981, all or part of whose securities were owned by an existing separate account on September 25, 1981.

(4) "New portfolio company" shall mean any registered open-end management investment company the shares of which will be sold to one or more registered separate accounts for the purpose of minimizing the impact of the Revenue Ruling on the contractowners of an existing separate account, which new portfolio company has the same:

(i) Investment objectives,

(ii) Fundamental policies, and

(iii) Voting rights as the existing portfolio company and has an advisory fee schedule, including expenses assumed by the adviser, that is at least as advantageous to the new portfolio company as was the fee schedule of the existing portfolio company.

(5) "New separate account" shall mean a separate account which

(i) Is, or is a part of, a unit investment trust registered under the Act;

(ii) Is intended to minimize the impact of the Revenue Ruling on the contractowners of an existing separate account;

(iii) Invests solely in one or more new portfolio companies;

(iv) Has the same

(A) Sales loads,

(B) Depositor, and

(C) Custodial arrangements

As the existing separate account; and

(v) Has

(A) Asset charges,

(B) Administrative fees, and

(C) Any other fees and charges (not including taxes) that correspond only to fees of the existing separate account and are no greater than those corresponding fees.

(b) Any order of the Commission under the Act, granted to an existing separate account on or before September 25, 1981, shall remain in full force and effect notwithstanding that the existing separate account invests in one or more new portfolio companies in lieu of, or in addition to, investing in one or more existing portfolio companies; *Provided,* That:

(1) No material changes in the facts upon which the order was based have occurred;

(2) All representations, undertakings, and conditions made or agreed to by the existing separate account, and any other person or persons, other than any existing portfolio company, in connection with the issuance of the order are, and continue to be, applicable to the existing separate account and any such other person or persons, unless modified in accordance with this section;

(3) All representations, undertakings, and conditions made or agreed to by the existing portfolio company in conection with the issuance of the order are made or agreed to by the new portfolio company, unless modified in accordance with this section; and

(4) Part II of the Registration Statement under the Securities Act of 1933 of the existing separate account

(i) Indicates that the existing separate account is relying upon paragraph (b) of this section,

(ii) Lists the Investment Company Act release numbers of any orders upon which the existing separate account intends to rely, and

(iii) Contains a representation that the provisions of this paragraph (b) have been complied with.

(c) Any order of the Commission under the Act, granted to an existing separate account on or before September 25, 1981, shall apply with full force and effect to a new separate account and the depositor of and principal underwriter for the new separate account notwithstanding that the new separate account invests in one or more new portfolio companies; *Provided,* That:

(1) No material changes in the facts upon which the order was based have occurred;

(2) All representations, undertakings, and conditions made or agreed to by the depositor, principal underwriter, and any other person or persons other than the existing separate account or any existing portfolio companies, in connection with the issuance of the order are, and continue to be, applicable to such depositor, principal underwriter, and other person or persons, unless modified in accordance with this section;

(3) All representations, undertakings and conditions made or agreed to by the existing separate account in connection with the issuance of the order are made or agreed to by the new separate account, unless modified in accordance with this section;

(4) All representations, undertakings, and conditions made or agreed to by an existing portfolio company in connection with the issuance of the order are made or agreed to by the new portfolio company, unless modified in accordance with this section; and

(5) Part II of the Registration Statement under the Securities Act of 1933 of the new separate account.

(i) Indicates that the new separate account is relying upon paragraph (c) of this section,

(ii) Lists the Investment Company Act release numbers of any orders upon which the new separate account intends to rely, and

(iii) Contains a representation that the provisions of this paragraph (c) have been complied with.

(d) Any affiliated person or depositor of or principal underwriter for a new or existing separate account or any affiliated person of or principal underwriter for a new or existing portfolio company, and any affiliated person of such persons, principal underwriters, or depositor shall be exempt from section 17(d) of the Act [15 U.S.C 80a–17(d)] and rule 17d–1 thereunder [17 CFR 270.17d–1] to the extent necessary to permit the organization of one or more new portfolio companies; *Provided,* That, any expense borne by the existing portfolio company or the new portfolio company in connection with such organization are necessary and appropriate and are allocated in a manner that is fair and reasonable to all of the shareholders of these companies.

(e) Any affiliated person or depositor of or principal underwriter for a new or existing separate account and any affiliated persons of such a person, principal underwriter, or depositor shall be exempt from section 17(d) of the Act and rule 17d–1 thereunder to the extent necessary to permit such person to bear any reasonable expenses arising out of the organization of one or more new portfolio companies or the new separate account.

(f) Any affiliated persons or depositor of or principal underwriter for a new or existing separate account or any affiliated person of or principal underwriter for a new or existing portfolio company, and any affiliated person of such persons, principal underwriters, or depositor shall be exempt from section 17(a) [15 U.S.C. 80a–17(a)], and any existing portfolio company which has made an election pursuant to rule 18f–1 [17 CFR 270.18f–1] shall be permitted to revoke that election to the extent necessary to permit transactions involving the transfer of assets from the existing portfolio company to a new portfolio company; *Provided,* That:

(1) Such assets are transferred without the imposition of any fees or charges;

(2) The board of directors of the existing portfolio company, including a majority of the directors of the company who are not interested persons of such company, determines that the transfer of assets is fair and reasonable to all shareholders of the company and such determination, and the basis upon which it was made, is recorded in the minute book of the existing portfolio company;

(3) Any securities involved are valued by the existing portfolio company for purposes of the transfer in accordance with its valuation practices for determining net asset value per share; and

(4) With respect to rule 18f–1, the existing separate account requests that the existing portfolio company redeem in kind the shares of the portfolio company held by the separate account.

(g) The new portfolio company shall be exempt from section 2(a)(41)[15 U.S.C. 80a–2(a)(41)] of the Act and rules 2a–4 [17 CFR 270.2a–4] and 22c–1 [17 CFR 270.22c–1] under the Act to the extent necessary to permit it to use the same method of valuation for the purpose of pricing its shares for sale, redemption, and repurchase, as the existing portfolio company; *Provided,* That:

(1) The existing portfolio company had on September 25, 1981, an order of the Commission exempting it, for the purposes of pricing its shares for sale, redemption, and repurchase, from

(i) Section 2(a)(41) of the Act and rules 2a–4 and 22c–1 under the Act to the extent necessary to permit it to use the amortized cost valuation method or

(ii) Rules 2a–4 and 22c–1 under the Act to the extent necessary to permit it to calculate its net asset value per share to the nearest one cent on share values of $1.00;

(2) All representations, undertakings, and conditions made or agreed to by the existing portfolio company in connection with the order are made or agreed to by the new portfolio company unless modified in accordance with this section; and

(3) Part II of the Registration Statement under the Securities Act of 1933 of the new portfolio company

(i) Indicates that the new portfolio company is relying upon paragraph (g) of this section,

(ii) Lists the Investment Company Act release numbers of any orders upon which the new portfolio company intends to rely, and

(iii) Contains a representation that the provisions of paragraph (g) have been complied with.

(h) The depositor or trustee of an existing separate account shall be exempt from section 26(b) of the Act [15 U.S.C. 80a–26(b)] to the extent necessary to permit the substitution of securities of the new portfolio company for securities of the existing portfolio company; *Provided;* That, within thirty days of such substitution:

(1) The existing separate account notifies all contractowners of the substitution of securities and any determinations of the board of directors of the new portfolio company required by paragraph (d) of this section;

(2) The existing separate account delivers a copy of the prospectus of the new portfolio company to all contractowners; and

(3) The existing separate account, concurrently with the notification referred to in paragraph (h)(1) of this section or the delivery of the prospectus of the new portfolio company referred to in paragraph (h)(2) of this section, whichever is later, offers to those contract-owners who would otherwise have surrender rights under their contracts the right, for a period of at least thirty days from the receipt of this offer, to surrender their contracts without the imposition of any withdrawal charge or contingent deferred sales load, and any surrendering contractowner receives the price next determined after the request for surrender is received by the insurance company.

(i) The existing separate account shall be exempt from section 22(d) of the Act [15 U.S.C. 80a–22(d)] to the extent necessary to permit it to comply with paragraph (h) of this section and the principal underwriter for or depositor of the existing separate account shall be exempt from section 26(a)(4)(B) of the Act [15 U.S.C. 80a–26(a)(4)(B)] to the extent necessary to permit them to rely on paragraph (h) of this section.

(j) Notwithstanding section 11 of the Act [15 U.S.C. 80a–11], the existing separate account or any principal underwriter for the existing separate account may make or cause to be made to the contractowners of the existing separate account an offer to exchange a security funded by an existing portfolio company for a security funded by a new portfolio company without the terms of that offer having first been submitted to and approved by the Commission; *Provided,* That the exchange is to be made on the basis of the relative net asset values of the securities to be exchanged without the imposition of any fees or charges.

(k) Notwithstanding section 11 of the Act, the new separate account or any principal underwriter for the new separate account may make or cause to be made an offer to the contractowners of the existing separate account to exchange their securities for securities of the new separate account without the terms of that offer having first been submitted to and approved by the Commission;

Provided, That:

(1) The exchange is to be made on the basis of the relative net asset values of the securities to be exchanged without the imposition of any fees or charges; and

(2) If the new separate account imposes a contingent deferred sales load ("sales load") on the securities to be acquired in the exchange

(i) At the time this sales load is imposed, it is calculated as if

(A) The contractowner had been a contractowner of the new separate account from the date on which he became a contractowner of the existing separate account, in the case of a sales load based on the amount of time the contractowner has been invested in the new separate account, and

(B) Amounts attributable to purchase payments made to the existing separate account had been made to the new separate account on the date on which they were made to the existing separate account, in the case of a sales load based on the amount of time purchase payments have been invested in the new separate account, and

(ii) The total sales load imposed does not exceed 9 percent of the sum of the purchase payments made to the new separate account and that portion of purchase payments made to the existing separate account attributable to the securities exchanged.

(l) Notwithstanding the foregoing, the provisions of this section will be available to a new separate account or new portfolio company, or to any affiliated person or depositor of or principal underwriter for such a new separate account, to any affiliated person of or principal underwriter for such a new portfolio company, to any affiliated person of such persons, depositor, or principal underwriters, or to any substitution of securities effected

in reliance on this section, only if such new separate account or new portfolio company is registered under the Act or such substitution is effected prior to September 21, 1983.

Paperwork Reduction Act

The information collection required by this rule has been cleared by the Office of Management and Budget and given clearance number 3235-0140.

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Chairman of the Commission has certified that rule 6c-6 will not have a significant economic impact on a substantial number of small entities. This certification, including the reasons therefor, is attached to this release.

Statutory Authority

The Commission hereby adopts rule 6c-6 pursuant to the provisions of section 6(c) [15 U.S.C. 80a-6(c)], section 11(a) [15 U.S.C. 80a-11(a)], and section 38(a) [15 U.S.C. 80a-37(a)] of the Act. Further, the Commission hereby amends rule 0-1(e) pursuant to the provisions of section 38(a) [15 U.S.C. 80a-37(a)] of the Act.

By the Commission.

George A. Fitzsimmons,

Secretary.

September 21, 1982.

Regulatory Flexibility Act Certification

I, John S. R. Shad, Chairman of the Securities and Exchange Commission, hereby certify pursuant to 5 U.S.C. 605(b) that rule 6c-6 under the Investment Company Act of 1940 ("Act") will not have a significant economic impact on a substantial number of small entities. The reason for this certification is that although the rule may have a significant economic impact on a substantial number of registered insurance company separate accounts, there are no separate accounts likely to be affected by the rule that qualify as "small entities," as that term has been defined by the Commission's rules.

Dated: September 21, 1982.

John S.R. Shad,

Chairman.

High-Cost Gas Produced From Tight Formations; Correction

September 22, 1982.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule concerning high-cost gas produced from tight formations, Colorado, in Docket No, RM79-76-123 (Colorado-26) that appeared in the **Federal Register** on September 3, 1982 (47 FR 38879). This action corrects an acreage description error.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, Office of General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357-8511.

The following correction replaces the acreage description in FR Doc. 82-24358, appearing on page 38879. On page 38880, § 271.703(d)(105)(i) should read as follows:

* * * * *

(d) * * *

(i) *Delineation of formation.* The Dakota-Lakota Formation is located in Boulder County, Colorado, in Township 1 North, Range 69 West, 6th P.M., Sections 25 through 36; Township 1 South, Range 69 West, 6th P.M., Sections 3 through 10, 15 through 22, and 27 through 34; Township 1 South, Range 70 West, 6th P.M., Sections 1 through 3, 10 through 15, 22 through 27 and 34 through 36.

BILLING CODE 6717-01-M

18 CFR Part 282

[Doc. No. RM79-14]

Order of the Director, OPPR of Publication of Incremental Pricing Acquisition Cost Thresholds Under Title II of the NGPA

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Prescribing Incremental Pricing Thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: October 1, 1982.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Federal Energy Regulatory Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, (202) 357-8500.

Office of the Director, OPPR

Issued: September 22, 1982.

In the matter of publication of prescribed incremental pricing acquisition cost threshold of the NGPA of 1978, Docket No. RM79-14.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to § 375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of October 1982 is issued by the publication of a price table for the applicable month.

List of Subjects in 18 CFR Part 282

Natural gas.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 74 and 81

[Docket No. 82N-0292]

FD&C Blue No. 1

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is permanently listing FD&C Blue No. 1 for use in externally applied drugs and for general use in cosmetics excluding use in the area of the eye. This action is in response to a petition filed by the Cosmetic, Toiletry, and Fragrance Association, Inc. This rule will remove FD&C Blue No. 1 from the provisional list of color additives.

DATES: Effective October 29, 1982.

Objections by October 28, 1982.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael E. Kashtock, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of August 6, 1973 (38 FR 21199), FDA announced that a petition (CAP 9C0095) for the permanent listing of FD&C Blue No. 1 as a color additive for use in externally applied drugs and cosmetics, including lipsticks, had been filed by the Cosmetic, Toiletry, and Fragrance Association, Inc. (CTFA), c/o Hazelton Laboratories, Inc., P.O. Box 30, Falls Church, VA 22046 (now 9200 Leesburg Turnpike, Vienna, VA 22180).

The petition was filed under section 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376). A subsequent notice published in the Federal Register of March 5, 1976 (41 FR 9584) amended the notice of filing of the petition to include the use of FD&C Blue No. 1 in all types of cosmetics that are subject to ingestion and the additional use of FD&C Blue No. 1 in cosmetics intended for use in the area of the eye (Docket No. 76C-0044).

The color additive FD&C Blue No. 1 is permanently listed for use in food in § 74.101 (21 CFR 74.101) and for use in ingested drugs in § 74.1101 (21 CFR 74.1101) (34 FR 7445; May 6, 1969). FDA permanently listed the color additive for these uses on the basis of available toxicological data from animal feeding studies. The agency found in 1969 that the data, which were derived from feeding studies that conformed to then existing toxicological testing standards, were sufficient to establish the safety of these uses involving ingestion. Because the agency felt that dermal toxicity studies were necessary before it could permanently list FD&C Blue No. 1 for general use in cosmetics and externally applied drugs (both currently listed under 21 CFR Parts 81 and 82), based upon existing toxicological data, FDA decided to continue the provisional listing of the color additive for these uses pending the completion of the dermal studies.

Toxicological Testing of FD&C Blue No. 1

In the Federal Register of September 23, 1976 (41 FR 41360) (Docket No. 76N-0366), FDA stated that it no longer considered existing toxicological studies to be adequate to support the continued provisional listing of several color additives including FD&C Blue No. 1. The agency explained that the studies were deficient in the following respects:

1. Many of the studies were conducted using groups of animals, i.e., control and those fed the color additive, that were too small to permit conclusions to be drawn today on the chronic toxicity or carcinogenic potential of the color additives tested. The small number of animals used does not in and of itself cause this result, but when considered together with the other deficiencies described in this document, does do so. By and large, the studies used 25 animals in each group; today FDA recommends using at least 50 animals per group.

2. In a number of the studies, the number of animals surviving to a meaningful age was inadequate to permit conclusions to be drawn today on the chronic toxicity or carcinogenic potential of the color additives tested.

3. In a number of the studies, an insufficient number of animals was reviewed histologically.

4. In a number of the studies, an insufficient number of tissues was examined in those animals selected for pathology.

5. In a number of the studies, lesions or tumors detected under gross examination were not examined microscopically.

The agency proposed that the continued provisional listing of several color additives, including FD&C Blue No. 1, be conditioned upon at least one petitioner's undertaking new chronic feeding studies for each of these color additives.

Regarding FD&C Blue No. 1, FDA intended that the required chronic studies would provide important evidence upon which to determine whether to list the color additive. Additionally, the agency noted that these studies would serve to replace the generally anticipated and deficient studies that supported the listing regulations then in effect for the color additive.

When the petitioner agreed to sponsor the required chronic toxicity studies for the color additive, FDA postponed the closing date for the provisional listing of FD&C Blue No. 1 to January 31, 1981, in a notice published in the **Federal Register** of February 4, 1977 (42 FR 6992).

FDA later again extended the closing date for completing the chronic toxicity studies and submitting data. In a proposal in the **Federal Register** of November 14, 1980 (45 FR 75226), the agency outlined the reasons for the need to postpone the closing dates for 23 provisionally listed color additives under test, including FD&C Blue No. 1, beyond January 31, 1981. The current closing date for the provisional listing of the color additive is October 30, 1982 (46 FR 18958; March 27, 1981).

Analysis of Data

The agency has completed its evaluation of the color additive petition for FD&C Blue No. 1, including two new chronic toxicity studies in rats and mice. These new studies represent current state-of-the-art toxicological testing. The protocols for these studies have benefitted from knowledge of deficiencies in previously conducted carcinogenesis bioassays and other chronic toxicity studies. The use of large numbers of animals of both sexes, pilot studies to determine maximum tolerated dosages, two control groups (thereby effectively doubling the number of controls), and in utero exposure in one of the two species tested (the rat) significantly increase the power of these tests for detecting dose-related effects. The studies were designed and conducted in full compliance with the good laboratory practice regulations and were subject to FDA inspection while the studies were conducted.

Based on the evaluation of the results of the two new chronic toxicity studies, the agency has determined that FD&C Blue No. 1 is not carcinogenic to Charles River albino rats or Charles River CD–1 mice after lifetime dietary exposures of 2.0 percent and 5.0 percent, respectively. Using appropriate safety factors (see 21 CFR 70.40), the agency has also estimated a maximum acceptable daily intake for humans of approximately 12.0 milligrams per kilogram of body weight per day.

The agency has also completed its evaluation of other animal studies submitted by the petitioner for the purpose of establishing the safety of FD&C Blue No. 1 for use in externally applied drugs and externally applied cosmetics. The data from these studies indicate that, with respect to dermal safety, FD&C Blue No. 1 is nonirritating when applied daily to either intact or abraded skin. Furthermore, FD&C Blue No. 1 was not found to be carcinogenic upon bi-weekly application to the skin of mice over their lifetimes.

During the safety review, the agency considered the possibility that derivatives of benzidine, a known carcinogen, occur in FD&C Blue No. 1 as byproducts of its manufacture. However, the presence of such contaminants can only be postulated. The existing analytical data on this subject and the relevant scientific literature provide no evidence indicating that benzidine or its derivatives have actually been found to be present in samples of FD&C Blue No. 1. Upon careful consideration of this matter, the agency has determined that the postulated presence of benzidine derivatives in FD&C Blue No. 1 is too speculative to require the petitioner to undertake further investigation of the presence of such material, and that the suitability of the color additive for permanent listing may appropriately be determined based upon the animal studies and other data submitted by the petitioner.

The agency has determined that the specifications for FD&C Blue No. 1 in § 74.101(b) are sufficient for the certification of the color additive for the new permanently listed uses, and they are cited by reference in the amended regulations.

The agency concludes that it is necessary to include in the listing regulation for D&C Blue No. 1 a brief description of the manufacturing process to ensure the safety of the color additives. The agency is concerned that the color additives may contain potentially toxic impurities dependent upon the manufacturing process used to produce the color additives. The agency is not able at this time to set specifications that would control the presence of these impurities. The agency has contracted the National Academy of Sciences/National Research Council (NAS/NRC) to develop appropriate specifications for color additives for use in food as part of the Food Chemicals Codex. Similarly, appropriate specifications for color additives for use in drugs and cosmetics will be developed following the general guidelines used by NAS/NRC in its evaluation of color additives used in food. The agency concludes that specifying, through a general description, the manufacturing process in the regulations for these color additives will provide an adequate assurance of safety until suitable specifications can be developed. Production of the color additive by the specified method will assure qualitatively similar batches and thus adequately assure the absence of unanticipated potentially toxic impurities.

The agency is including a description of the manufacturing procedure in § 74.2101(a) and is incorporating it by reference in § 74.1101(a)(1) for externally applied drugs. In the near future, FDA will propose to amend the identity requirements for FD&C Blue No. 1 in § 74.101(a), and by reference, for ingested drugs, to include a description of the manufacturing procedures.

Conclusions

The agency concludes that FD&C Blue No. 1 is safe under the conditions of use set forth below for general use in cosmetics and for use in externally applied drugs, and that certification is necessary for the protection of the public health. The final chronic toxicity study reports, interim reports, reports on dermal testing, and the agency's toxicology evaluations of these studies supporting the safety of the color additive for uses involving ingestion and dermal application are on file at the Dockets Management Branch (address above). They may be reviewed there between 9 a.m. and 4 p.m., Monday through Friday.

FD&C Blue No. 1 Lakes

To simplify the regulations pertaining to the FD&C Blue No. 1 Lake, the agency is removing the specific entry for the FD&C Blue No. 1 Lake from the table in § 81.1(a) (21 CFR 81.1(a)) because it is redundant. The FD&C Blue No. 1 lake previously has been specifically cited as provisionally listed for use in foods in the first entry in the table in § 81.1(a). This specific entry was added to the table when FDA permanently listed the straight color additive for food and ingested drug use (34 FR 11542; July 12, 1969). Before that time, FDA provisionally listed the lakes of

regulated FD&C colors for use in food, drugs, and cosmetics under the entry "Lakes (FD&C)" in the same table in § 81.1(a) (formerly § 8.501(a)). By including the separate entry for the FD&C Blue No. 1 lake in the table, FDA intended to emphasize that while it had permanently listed the straight color additive for food use, the lake was still provisionally listed for that use. Upon the deletion of the separate entry for the FD&C Blue No. 1 lake, the lake use of the color additive will remain provisionally listed under the general entry for FD&C lakes in § 81.1(a). The agency has announced its intention to establish permanent regulations for lakes of color additives and is currently assembling the information that is needed to achieve that end (44 FR 36411; June 22, 1979).

Eye Area Use

FDA notified the petitioner by letters (May 14, 1976, August 15, 1977, and August 4, 1978) of the need for data to support the use of FD&C Blue No. 1 in cosmetics intended for use in the area of the eye. In a fourth letter, dated October 24, 1978, FDA advised the petitioner to consider withdrawing that portion of its petition that sought approval of the use of FD&C Blue No. 1 in cosmetics intended for use in the area of the eye because the required data from eye area studies apparently were not available.

The petitioner has not submitted the required data for eye area use. Therefore, FDA now considers that portion of the petition that was amended by the filing on March 5, 1976 (Docket No. 76C–0044) to include the permanent listing of FD&C Blue No. 1 for eye area use to be withdrawn without prejudice in accordance with the provisions of § 71.4 (21 CFR 71.4). Section 71.4 requires that such requested information be submitted within 180 days after filing of the petition or the petition will be considered withdrawn without prejudice. Use of FD&C Blue No. 1 in the area of the eye has never been covered by provisional listing. Future consideration by FDA of the permanent listing of FD&C Blue No. 1 for eye area use will require the submission of a new color additive petition for that use. The agency's listing of a color additive for general use in cosmetics and for use in externally applied drugs does not encompass eye area use.

The agency has determined pursuant to 21 CFR 25.24(b)(12) and (d)(5) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Color additives, Color additives subject to certification, Cosmetics, Drugs.

21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 706(b), (c), and (d), 74 Stat. 399–403 (21 U.S.C. 376(b), (c), and (d))) and the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618, sec. 203, 74 Stat. 404–407 (21 U.S.C. 376, note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Parts 74 and 81 are amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. Part 74 is amended:

a. By revising § 74.1101, to read as follows:

§ 74.1101 FD&C Blue No. 1

(a) *Identity.* (1) For ingested drugs, the color additive FD&C Blue No. 1 shall conform in identity to the requirements of § 74.101(a)(1).

(2) For externally applied drugs, the color additive FD&C Blue No. 1 shall conform in identity to the requirements of § 74.2101(a).

(3) Color additive mixtures for drug use made with FD&C Blue No. 1 may contain only those diluents that are suitable and that are listed in Part 73 of this chapter as safe for use in color additive mixtures for coloring drugs.

(b) *Specifications.* The color additive FD&C Blue No. 1 for use in coloring drugs generally shall conform in specifications to the requirements of § 74.101(b).

(c) *Uses and restrictions.* The color additive FD&C Blue No. 1 may be safely used for coloring drugs generally in amounts consistent with current good manufacturing practice.

(d) *Labeling.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of FD&C Blue No. 1 shall be certified in accordance with regulations in Part 80 of this chapter.

b. By adding new § 74.2101, to read as follows:

§ 74.2101 FD&C Blue No. 1.

(a) *Identity.* The color additive FD&C Blue No. 1 is principally the disodium salt of ethyl[4-[*p*-[ethyl(*m*-sulfobenzyl)amino]-α-(*o*-sulfophenyl)benzylidene]-2,5-cyclohexadien-1-ylidene](*m*-sulfobenzyl)ammonium hydroxide inner salt with smaller amounts of the isomeric disodium salts of ethyl[4-[*p*-[ethyl(*p*-sulfobenzyl)amino]-α-(*o*-sulfophenyl)benzylidene]-2,5-cyclohexadien-1-ylidene](*p*-sulfobenzyl)ammonium hydroxide inner salt and ethyl[4-[*p*-[ethyl(*o*-sulfobenzyl)amino]-α-(*o*-sulfophenyl)benzylidene]-2,5-cyclohexadien-1-ylidene](*o*-sulfobenzyl)ammonium hydroxide inner salt. Additionally, FD&C Blue No. 1 is manufactured by the acid catalyzed condensation of one molecule of sodium 2-formylbenzene-sulfonate with two molecules from a mixture consisting principally of 3-[(ethyl-phenylamino)methyl]benzenesulfonic acid, and smaller amounts of 4-[(ethylphenylamino)methyl] benzenesulfonic acid and 2-[(ethyl-phenylamino)methyl]benzenesulfonic acid to form the leuco base. The leuco base is then oxidized with lead dioxide and acid, or with dichromate and acid to form the dye. The intermediate sodium 2-formylbenzenesulfonate is prepared from 2-chlorobenzaldehyde and sodium sulfite.

(b) *Specifications.* The color additive FD&C Blue No. 1 shall conform in specifications to the requirements of § 74.101(b).

(c) *Uses and restrictions.* FD&C Blue No. 1 may be safely used for coloring cosmetics generally in amounts consistent with current good manufacturing practice.

(d) *Labeling.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of FD&C Blue No. 1 shall be certified in accordance with regulations in Part 80 of this chapter.

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

2. Part 81 is amended:

§ 81.1 [Amended]

a. In § 81.1 *Provisional lists of color additives*, by removing the entry for "FD&C Blue No. 1" from the table in paragraph (a).

§ 81.27 [Amended]

b. In § 81.27 *Conditions of provisional listing*, by removing the entry for "FD&C Blue No. 1" from the table in paragraph (d).

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 28, 1982 file with the Dockets Management Branch (address above) written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provision of the regulation deemed objectionable, and state the grounds for the objections. Objections shall be filed in accordance with the requirements of 21 CFR 71.30. If a hearing is requested, the objections shall state the issues for the hearing and shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Three copies of all documents shall be filed and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective October 29, 1982 except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be announced by publication in the **Federal Register**.

(Sec. 706(b), (c), and (d), 74 Stat. 399–403 (21 U.S.C. 376(b), (c), and (d); sec. 203, Pub. L. 86–618, 74 Stat. 404–407 (21 U.S.C. 376, note))

Dated: September 23, 1982.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

---

21 CFR Parts 74, 81, and 82

[Docket No. 82N-0307]

D&C Red No. 27 and D&C Red No. 28

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is permanently listing D&C Red No. 27 and D&C Red No. 28 for general use in drugs and cosmetics. This action is in response to a petition filed by the Cosmetic, Toiletry and Fragrance Association. This rule will remove D&C Red No. 27 and D&C Red No. 28 from the provisional list of color additives for general use in drugs and cosmetics.

DATES: Effective October 29, 1982; objections by October 28, 1982.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary W. Lipien, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 6, 1973 (38 FR 21199), FDA announced that a petition (CAP 8C0044) for the permanent listing of D&C Red No. 27 and D&C Red No. 28 as color additives for general use in drugs and cosmetics had been filed by the Toilet Goods Association, Inc. (now the Cosmetic, Toiletry and Fragrance Association (CTFA)), c/o Hazleton Laboratories, Inc., P.O. Box 30, Falls Church, VA 22046 (now 9200 Leesburg Turnpike, Vienna, VA 22180).

The petition was filed under section 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 376). A later notice (41 FR 9584; March 5, 1976) amended the notice of filing of the petition to include the use of D&C Red No. 27 in cosmetics intended for use in the area of the eye (Docket No. 76C–0044).

Toxicological Testing of D&C Red No. 27 and D&C Red No. 28

The provisional regulations published in the **Federal Register** of February 4, 1977 (42 FR 6992) required new chronic toxicity studies for D&C Red No. 27 and D&C Red No. 28 as a condition of their continued provisional listing for ingested uses. FDA placed these requirements on 31 color additives because the toxicity studies the petitioners had submitted to support the safe use of these color additives were deficient in several respects. FDA described these deficiencies in the **Federal Register** of September 23, 1976 (41 FR 41863) (Docket No. 76N–0366):

1. Many of the studies were conducted using groups of animals, i.e., control and those fed the color additive, that are too small to permit conclusions to be drawn today on the chronic toxicity or carcinogenic potential of the color. The small number of animals used does not, in and of itself, cause this result, but when considered together with the other deficiencies in this listing, does do so. By and large, the studies used 25 animals in each group; today FDA recommends using at least 50 animals per group.

2. In a number of the studies, the number of animals surviving to a meaningful age was inadequate to permit conclusions to be drawn today on the chronic toxicity or carcinogenic potential of the color additives tested.

3. In a number of the studies, an insufficient number of animals was reviewed histologically.

4. In a number of the studies, an insufficient number of tissues was examined in those animals selected for pathology.

5. In a number of the studies, lesions or tumors detected under gross examination were not examined microscopically.

The closing date for the provisional listing of the color additives was postponed until January 31, 1981, for the completion of required chronic toxicity studies. FDA later extended the closing date for completing the chronic toxicity studies and submitting data. In a proposal in the **Federal Register** of November 14, 1980 (45 FR 75226), the agency outlined the reasons for the need to postpone the closing dates for 23 provisionally listed color additives under test, including D&C Red No. 27 and D&C Red No. 28, beyond January 31, 1981. In the **Federal Register** of March 27, 1981 (46 FR 18958), FDA issued the final rule establishing new closing dates for D&C Red No. 27 and D&C Red No. 28 and the other color additives. Therefore, the current closing date for the provisional listing of D&C Red No. 27 and D&C Red No. 28 is October 30, 1982. The provisional listings in § 81.1(b) (21 CFR 81.1(b)) of D&C Red No. 27 and D&C Red No. 28 for use in drugs and cosmetics will be removed when this order becomes effective on October 29, 1982, unless this order is stayed by the timely filing of objections.

Analysis of Data

The agency has completed its evaluation of the color additive petition for D&C Red No. 27 and D&C Red No. 28, including two new chronic toxicity studies in rats and mice. These new long-term chronic studies represent current state-of-the-art toxicological testing. The protocols for these studies have benefited from knowledge of deficiencies in previously conducted carcinogenesis bioassays and other chronic toxicity protocols. The use of large numbers of animals of both sexes, pilot studies to determine maximum tolerated dosages, two control groups (thereby effectively doubling the number of controls), and in utero exposure in one of the two species tested

significantly increases the power of these tests to detect dose-related effects. The studies were designed and conducted in full compliance with the current good laboratory practice regulations and were subject to inspections by FDA officials during their course.

The test material in the recent chronic rat and mouse studies was D&C Red No. 27. Because D&C Red No. 28 is the disodium salt of D&C Red No. 27, the agency considers the two color additives to be toxicologically equivalent. Thus, any safety conclusion drawn from studies of D&C Red No. 27 applies equally to D&C Red No. 28.

Based on the evaluation of the results of the two new chronic toxicity studies, the agency has determined that D&C Red No. 27 and D&C Red No. 28 are not carcinogenic in Charles River Sprague-Dawley CD rats or CD–1 mice after lifetime dietary exposure of 2.0 percent and 1.0 percent, respectively. Using appropriate safety factors (see 21 CFR 70.40), the agency has also estimated a maximum acceptable daily intake for humans—1.25 milligrams per kilogram of body weight per day.

Conclusion on Safety

The agency concludes that D&C Red No. 27 and D&C Red No. 28 are safe under conditions of use set forth below for general use in drugs and cosmetics, and that certification is necessary for the protection of the public health. The final toxicity study reports, interim reports, and the agency's toxicology evaluations of these studies are on file at the Dockets Management Branch (address above) and may be reviewed there between 9 a.m. and 4 p.m., Monday through Friday.

FDA notified the petitioners by letters dated May 14, 1976, August 15, 1977, August 4, 1978, and October 24, 1978, of the need for data to support the use of D&C Red No. 27 in cosmetics intended for use in the area of the eye. In the fourth letter, dated October 24, 1978, FDA advised the petitioner to consider withdrawing that portion of its petition that sought approval of use of D&C Red No. 27 in cosmetics intended for use in the area of the eye because the required data for eye-area studies apparently were not readily available.

The petitioner has not submitted the required data for eye-area use. Therefore, FDA now considers that portion of the petition that was amended by the filing on March 5, 1976 (Docket No. 76C–0044) to include the permanent listing of D&C Red No. 27 for eye-area use to be withdrawn without prejudice in accordance with the provisions of § 71.4 (21 CFR 71.4). Section 71.4 requires that such requested information be submitted within 180 days after filing of the petition, or the petition will be considered withdrawn without prejudice. Use of D&C Red No. 27 in the area of the eye has never been covered by provisional listing. Future consideration by FDA of the permanent listing of D&C Red No. 27 for eye-area use will require the submission of a new color additive petition for that use. The agency's listing of a color additive for general use in drugs and cosmetics does not encompass eye-area use.

The agency is establishing new chemical specifications that identify the color additives more precisely than those specifications currently in Part 82. Also, the chemical names for the two color additives in the new listings under 21 CFR Part 74 are different from the names currently listed under 21 CFR Part 82 and from the Chemical Abstracts designations. The agency has decided to follow the nomenclature commonly used in the chemical literature where these color additives are referred to as fluorescein derivatives.

The agency concludes that it is necessary to include in the listing regulations for D&C Red No. 27 and D&C Red No. 28 a brief description of the manufacturing process to ensure the safety of the color additives. The agency is concerned that the color additives may contain potentially toxic impurities dependent upon the manufacturing process used to produce the color additive. The agency is not able at this time to set specifications that would control the presence of these impurities. The agency has contracted the National Academy of Sciences-National Research Council (NAS/NRC) to develop appropriate specifications for color additives for use in food as part of the Food Chemicals Codex. Similarly, appropriate specifications for color additives for use in drugs and cosmetics will be developed following the general guidelines used by NAS/NRC in its evaluation of color additives used in food. The agency concludes that specifying, through a general description, the manufacturing process in the regulations for these color additives will provide an adequate assurance of safety until suitable specifications can be developed. Production of the color additive by the specified method will assure qualitatively similar batches and thus adequately assure the absence of unanticipated potentially toxic impurities.

The agency has determined under 21 CFR 25.24 (b)(12) and (d)(5) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 74

Color additives, Color additives subject to certification, Cosmetics, Drugs.

21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

21 CFR Part 82

Color additives, Color additives lakes, Color additives provisional list, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec 706 (d), (c), and (d), 74 Stat. 399–403 (21 U.S.C. 376 (b), (c), and (d))) and the Transitional Provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618, sec. 203, 74 Stat. 404–407 (21 U.S.C. 376, note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Parts 74, 81, and 82 are amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. Part 74 is amended:

a. By adding new § 74.1327 to Subpart B, to read as follows:

§ 74.1327 D&C Red No. 27.

(a) *Identity.* (1) The color additive D&C Red No. 27 is principally 2',4',5',7'-tetrabromo-4,5,6,7-tetrachlorofluorescein (CAS Reg. No. 13473-26-2). The color additive is manufactured by brominating 4,5,6,7-tetrachlorofluorescein with elemental bromine. The 4,5,6,7-tetrachlorofluorescein is manufactured by the acid condensation of resorcinol and tetrachlorophthalic acid or its anhydride. The 4,5,6,7-tetrachlorofluorescein is isolated and partially purified prior to bromination.

(2) Color additive mixtures for drug use made with D&C Red No. 27 may contain only those diluents that are suitable and that are listed in Part 73 of this chapter as safe for use in color additive mixtures for coloring drugs.

(b) *Specifications.* D&C Red No. 27 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such impurities may be avoided by current good manufacturing practice:

Sum of volatile matter (at 135° C) and halides and sulfates (calculated as sodium salts), not more than 10 percent.
Insoluble matter (alkaline solution), not more than 0.5 percent.
Tetrachlorophthalic acid, not more than 1.2 percent.
Brominated resorcinol, not more than 0.4 percent.
2,3,4,5-Tetrachloro-6-(3,5-dibromo-2,4-dihydroxybenzoyl) benzoic acid, not more than 0.7 percent.
2',4',5',7'-Tetrabromo-4,5,6,7-tetrachlorofluorescein, ethyl ester, not more than 2 percent.
Lower halogenated subsidiary colors, not more than 4 percent.
Lead (as Pb), not more than 20 parts per million.
Arsenic (as As), not more than 3 parts per million.
Mercufy (as Hg), not more than 1 part per million.
Total color, not less than 90 percent.

(c) *Uses and restrictions.* R&C Red No. 27 may be safely used for coloring drugs generally in amounts consistent with current good manufacturing practice.

(d) *Labeling.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of D&C Red No. 27 shall be certified in accordance with regulations in Part 80 of this chapter.

b. By adding new § 74.1328 to Subpart B, to read as follows:

§ 74.1328 D&C Red No. 28.

(a) *Identity.* (1) The color additive D&C Red No. 28 is principally the disodium salt of 2',4',5',7'-tetrabromo-4,5,6,7-tetrachlorofluorescein [CAS Reg. No. 18472–87–2] formed by alkaline hydrolysis of the parent tetrabromotetrachlorofluorescein.

(2) Color additive mixtures for drug use made with D&C Red No. 28 may contain only those diluents that are suitable and that are listed in Part 73 of this chapter as safe for use in color additive mixtures for coloring drugs.

(b) *Specifications.* D&C Red No. 28 shall conform to the following specifications and shall be free from impurities other than those named to the extent that such impurities may be avoided by current good manufacturing practice:

Sum of volatile matter (at 135° C) and halides and sulfates (calculated as sodium salts), not more than 15 percent.
Insoluble matter (alkaline solution), not more than 0.5 percent.
Tetrachlorophthalic acid, not more than 1.2 percent.
Brominated resorcinol, not more than 0.4 percent.
2,3,4,5-Tetrachloro-6-(3,5-dibromo-2,4-dihydroxybenzoyl)benzoic acid, not more than 0.7 percent.
2',4',5',7'-Tetrabromo-4,5,6,7-tetrachlorofluorescein, ethyl ester, not more than 2 percent.
Lower halogenated subsidiary colors, not more than 4 percent.
Lead (as Pb), not more than 20 parts per million.
Arsenic (as As), not more than 3 parts per million.
Mercury (as Hg), not more than 1 part per million.
Total color, not less than 85 percent.

(c) *Uses and restrictions.* D&C Red No. 28 may be safely used for coloring drugs generally in amounts consistent with current good manufacturing practice.

(d) *Labeling.* The label of the color additive and any mixtures prepared therefrom intended solely or in part for coloring purposes shall conform to the requirements of § 70.25 of this chapter.

(e) *Certification.* All batches of D&C Red No. 28 shall be certified in accordance with regulations in Part 80 of this chapter.

c. By adding new § 74.2327 to Subpart C, to read as follows:

§ 74.2327 D&C Red No. 27.

(a) *Identity and specifications.* The color additive D&C Red No. 27 shall conform in identity and specifications to the requirements of § 74.1327 (a)(1) and (b).

(b) *Uses and restrictions.* D&C Red No. 27 may be safely used for coloring cosmetics generally in amounts consistent with current good manufacturing practice.

(c) *Labeling requirements.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Red No. 27 shall be certified in accordance with regulations in Part 80 of this chapter.

d. By adding new § 74.2328 to Subpart C, to read as follows:

§ 74.2328 D&C Red No. 28.

(a) *Identity and specifications.* The color additive D&C Red No. 28 shall conform in identity and specifications to the requirements of § 74.1328 (a)(1) and (b).

(b) *Uses and restrictions.* D&C Red No. 28 may be safely used for coloring cosmetics generally in amounts consistent with current good manufacturing practice.

(c) *Labeling requirements.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Red No. 28 shall be certified in accordance with regulations in Part 80 of this chapter.

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

2. Part 81 is amended:

§ 81.1 [Amended]

a. In § 81.1 *Provisional lists of color additives* in paragraph (b) by removing the entries for "D&C Red No. 27" and "D&C Red No. 28".

§ 81.27 [Amended]

b. In § 81.27 *Conditions of provisional listing* in paragraph (d) by removing the entries for "D&C Red No. 27" and "D&C Red No. 28".

PART 82—LISTING OF CERTIFIED PROVISIONALLY LISTED COLORS AND SPECIFICATIONS

3. Part 82 is amended:

a. By revising § 82.1327, to read as follows:

§ 82.1327 D&C Red No. 27.

The color additive D&C Red No. 27 shall conform in identity and specifications to the requirements of § 74.1327 (a)(1) and (b) of this chapter.

b. By revising § 82.1328, to read as follows:

§ 82.1328 D&C Red No. 28.

The color additive D&C Red No. 28 shall conform in identity and specifications to the requirements of § 74.1328 (a)(1) and (b) of this chapter.

Any person who will be adversely affected by the foregoing regulation may at any time on or before October 28, 1982 file with the Dockets Management Branch (address above) written objections thereto. Objections shall show wherein the person filing will be adversely affected by the regulation, specify with particularity the provisions of the regulation deemed objectionable, and state the grounds for the objections. Objections shall be filed in accordance with the requirements of 21 CFR 71.30. If a hearing is requested, the objections shall state the issues for the hearing and shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event

that a hearing is held. Three copies of all documents shall be filed and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch, between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective October 29, 1982 except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be announced by publication in the **Federal Register.**

(Sec. 706 (b), (c), and (d), 74 Stat. 399–403 (21 U.S.C. 376 (b), (c), and (d)); sec. 203, Pub. L. 86–618, 74 Stat. 404–407 (21 U.S.C. 376, note))

NATIONAL LABOR RELATIONS BOARD

29 CFR Part 102

Procedural Rules; Amendment, Clarification, and Restatement; Correction

AGENCY: National Labor Relations Board.

ACTION: Final rule; correction.

SUMMARY: FR Document 82–25270, filed September 14, 1982, and published at 47 FR 40770–40773, September 15, 1982, is hereby corrected by restating rule section 102.69(c) as set forth in that document to reflect changes to that section previously made by FR Document 81–26823, filed September 14, 1981, and published at 46 FR 45922–45924, September 15, 1981, but inadvertently not fully incorporated into the newly published restatement of that rule section. The corrections made are: (1) Section 102.69(c)(1) is corrected to include the word "timely" on the first line of the section, after "If" and before "objections"; (2) the section is corrected to include § 102.69(c)(4), which was omitted from the document; and (3) the reference in the last sentence of the statement of Supplementary Information referring to "three numbered paragraphs" is corrected to read "four numbered paragraphs."

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, 1717 Pennsylvania Avenue, NW., Room 701, Washington, D.C. 20570, Telephone: (202) 254–9430.

Correction of Publication

In FR Document 82–25270, appearing in the Wednesday, September 15, 1982, issue of the **Federal Register**, 47 FR 40770, *et seq.*, make the following changes:

1. Delete all references to § 102.69(c)' having been separated into three parts.

2. § Paragraph (c)(1) § 102.69 should read as follows:

§ 102.69 [Corrected]

* * * * *

(c)(1) If timely objections are filed to the conduct of the election or to conduct affecting the results of the election, or if the challenged ballots are sufficient in number to affect the results of the election, the regional director shall, consistent with the provisions of section 102.69(d), initiate an investigation, as required, of such objections or challenges.

3. Immediately after paragraph (c)(3) of section 102.69 insert the following paragraph (c)(4):

* * * * *

(c) * * *

(4) If the regional director issues a report on objections and challenges, the parties shall have the rights set forth in paragraph (c)(2) of this section and in § 102.69(f); if the regional director issues a decision, the parties shall have the rights set forth in § 102.67 to the extent consistent herewith, including the right to submit documents supporting the request for review or opposition thereto as permitted by § 102.69(g)(3).

Dated, Washington, D.C., September 23, 1982.

By Direction of the Board.

National Labor Relations Board.

John C. Truesdale,

Executive Secretary.

Oil and Gas Operating Regulations; Operating Regulations for Exploration, Development, and Production

AGENCY: Minerals Management Service, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking amends the existing operating regulations for oil and gas and for exploration, development, and production of solid minerals other than coal, to facilitate operations for tar sands development under the Combined Hydrocarbon Leasing Act of 1981. The objective is to provide procedures for a wide variety of operational methods with the least regulatory burden.

EFFECTIVE DATE: This regulation is effective October 28, 1982.

ADDRESS: Acting Associate Director, Onshore Minerals Operations, Minerals Management Service, 12203 Sunrise Valley Drive, Mail Stop 656, Reston, Virginia 22091.

FOR FURTHER INFORMATION CONTACT:

Mr. Gerald R. Daniels, (703) 860–7535, (FTS) 928–7535,

Mr. Tom Leshendok, (703) 860–7506, (FTS) 928–7506,

or

Mr. Stephen H. Spector, (703) 860–7969, (FTS) 928–7969.

SUPPLEMENTARY INFORMATION: The proposed rulemaking on Oil and Gas Operating Regulations and Operating Regulations for Exploration, Development, and Production for solid minerals other than coal was published in the **Federal Register** on May 12, 1982 (47 FR 20324), with a 30-day comment period provided. This final rulemaking differs from the proposed rulemaking only in that the ability to prescribe orders and notices relating to tar sands development has been specifically provided for.

Six written comments were received on the proposed rulemaking. These six comments were received from the following sources: four from industry, one from an industry association, and one from a Federal Agency.

The proposed rulemaking included a request for comments on the decision not to promulgate regulations governing tar sands operations as a separate part but rather include tar sands operations under existing 30 CFR Parts 221 and 231. Two commenters were in favor of the decision and two opposed it. Both commenters in opposition stated that, because tar sands development is in an embryonic and economically unproven state, additional support would be derived from separate regulations, which would provide a focal point for tar sands concerns. After due consideration of these expressions of interest, we have decided to implement our original approach for the following reasons: (1) Parts 221 and 231 contain the necessary flexibility to focus on tar sands concerns without adding to the volume of regulations and increasing the overall regulatory burden; (2) all oil and gas leases issued after the passage of the Combined Hydrocarbon Leasing Act of 1981 grant the right to extract tar

sands; and (3) the slight changes introduced in our final rulemaking facilitate the establishment of specific guidelines for tar sands operations, if additional general guidance proves necessary.

Two of the commenters focused on the method of setting royalty rates for tar sands products, stating that the provisions of existing Parts 221 and 231 did not seem adequate to allow due consideration of the factors affecting tar sands development. We feel the existing regulations will allow the Minerals Management Service (MMS) enough flexibility to address the loyalty concerns. The MMS expects to issue necessary guidelines in the near future.

One commenter suggested that because tar sands development may have different environmental impacts than oil and gas development, the MMS should inform potential combined hydrocarbon leaseholders that information beyond that typically requested to evaluate oil and gas operations may be needed. Our reference to an ability to publish orders and notices relating to tar sands development provides a vehicle by which we may request any desired information that is deemed necessary.

The principal authors of this final rulemaking are Mr. Gerald Daniels, Acting Chief, Oil, Gas, and Geothermal Division; Mr. James W. Hager, Office of the Deputy Minerals Manager, Oil Shale, Grand Junction, Colorado; and Mr. Stephen H. Spector, Branch of Technical Services, Oil, Gas, and Geothermal Division, assisted by the Office of the Solicitor.

Executive Order 12291

The Department has determined that this rule is not a major action and does not require the preparation of a regulatory analysis under Executive Order 12291 because the rule will have a positive effect on the development of tar sands and the use of existing procedures will be far less costly to industry than the development of a separate tar sands rule.

Regulatory Flexibility Act

The Department has also certified that this rulemaking will not have a significant economic impact on a substantial number of small entities; thus a small entity flexibility analysis under the Regulatory Flexibility Act (P.L. 96-354) is not required. Although small business entities are not expected to be financially able to participate directly in lease operations, they are expected to participate through contracts for support work to operators and lessees who will be primarily responsible for compliance with the provisions.

National Environmental Policy Act of 1969

It is hereby determined that this final rule does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (43 U.S.C. 4332(2)(C)) is required.

Paperwork Reduction Act of 1980

There are no changes in the information collection requirements of the parts of Title 30 amended. All reporting locations, forms, and content are unchanged.

List of Subjects

30 CFR Part 221

Government contracts, Mineral royalties, Oil and gas exploration, Public lands-mineral resources, Reporting and recordkeeping requirements.

30 CFR Part 231

Environmental protection, Government contracts, Mineral royalties, Public lands-mineral resources, Mines, Reporting and recordkeeping requirements.

Under the authority of the Act of February 25, 1920 (30 U.S.C. 189), and the Act of November 16, 1981, Pub. L. 97-78 (95 Stat. 1070), Parts 221 and 231, Chapter II, Title 30 of the Code of Federal Regulations are amended as set forth below.

Dated: September 3, 1982.

Garrey E. Carruthers,

Acting Secretary.

PART 221—OIL AND GAS OPERATING REGULATIONS

1. Part 221 is amended by amending the Authority citation to include the following additional citation:

Authority: * * *; and the Combined Hydrocarbon Leasing Act of November 16, 1981 (Pub. L. 97-78, 95 Stat. 1070).

2. Section 221.2 is amended by revising paragraph (p) to read as follows:

§ 221.2 Definitions.

* * * * *

(p) *Oil.* Any nongaseous hydrocarbon substance other than those substances leasable as coal, oil shale, or gilsonite (including all vein-type solid hydrocarbons). For royalty rate consideration in special tar sand areas, any hydrocarbon substance with a gas-free viscosity, at original reservoir temperature, greater than 10,000 centipoise is termed tar sand. Hydrocarbon extraction from tar sand is also governed by the regulation at 30 CFR Part 231 and applicable orders and notices.

PART 231—OPERATING REGULATIONS FOR EXPLORATION, DEVELOPMENT, AND PRODUCTION

3. Part 231 is amended by amending the Authority citation to include the following additional citation:

* * * * *

Authority: * * *; and the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97-78, 95 Stat. 1070).

4. Section 231.1 is amended by revising paragraph (a) and the cross reference at the end of the section to read as follows:

§ 231.1 Scope and purpose.

(a) The regulations in this part shall govern operations for the discovery, testing, development, mining, and processing of all minerals under leases or permits issued for Federal lands pursuant to the regulations in 43 CFR Group 3500 or Part 3140 and of all minerals (except coal, oil, and gas) on tribal and allotted Indian lands leased pursuant to the regulations in 25 CFR Parts 171, 172, 173, 174, and 176. For operations involving the extraction of hydrocarbon from tar sand or oil shale by in situ methods utilizing boreholes or wells the regulations in 30 CFR Part 221 and applicable orders and notices also apply.

* * * * *

Cross Reference: See Part 211 of this chapter for regulations governing operations under coal permits and leases. See Part 221 of this chapter for regulations governing operations under oil and gas, or combined hydrocarbon leases and operations for the extraction of hydrocarbon from tar sand and oil shale by in situ or other methods utilizing boreholes or wells.

BILLING CODE 4310-MR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 199

[DoD Regulation 6010.8-R, Amdt. No. 17]

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Durable Medical Equipment

AGENCY: Office of the Secretary, DoD.

ACTION: Amendment of final rule.

SUMMARY: This final rule amends DoD Regulation 6010.8–R (32 CFR 199) to remove a restriction under the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) Basic Program that durable medical equipment may only be rented or obtained under a lease/purchase arrangement, regardless of the cost advantages of outright purchase if lease/purchase is not available or if prolonged rental will be necessary. Amendment to allow outright purchase in cases of prolonged need will permit cost savings for the Government and for beneficiaries, and is consistent with major government and private health benefit plans.

EFFECTIVE DATE: This amendment is effective September 28, 1982.

FOR FURTHER INFORMATION CONTACT: Charles E. Guidice, Policy Branch, OCHAMPUS, telephone (303) 361–8608.

SUPPLEMENTARY INFORMATION: In FR Doc. 77–7834, appearing in the **Federal Register** on April 4, 1977, (42 FR 17972), the Office of the Secretary of Defense published its regulation, DoD 6010.8–R, "Implementation of the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)," as Part 199 of this title.

In FR Doc. 82–11596 appearing in the **Federal Register** on April 28, 1982 (47 FR 18149), the Office of the Secretary of Defense published a proposed amendment to rule regarding a revision to the language of the CHAMPUS Regulation to allow outright purchase of durable medical equipment when lease/purchase is not available or prolonged rental is necessary. Public comments were to have been submitted by June 28, 1982.

Other than comments supporting the proposed rulemaking, only three comments were received that proposed changes of the language of the proposed rule.

The first comment recommended that the effective date not be made retroactive to October 1, 1980. This recommendation was accepted. We felt making the recommendation retroactive would cause numerous problems with attempting to backfit eligibility determination. This final rule establishes the effective date as the date of publication.

The second comment suggested deletion of the criterion concerning the usefulness of durable medical equipment to another person in the absence of an illness or injury. This recommendation was accepted and the provision has been deleted.

The third comment suggested that the factors to be considered in the reimbursement process include a statement on the time value of money. This recommendation was accepted and has been added to § 199.10, paragraph (d)(3)(ii)(*b*).

In addition, we have made minor technical changes in § 199.10, paragraph (d), to simplify language for clarity. Section 199.10 paragraph (d)(3)(ii) of this part states that CHAMPUS benefits are payable under the Basic Program for the rental or lease/purchase of durable medical equipment, but does not provide for outright purchase of such equipment even if such purchase would be cost-advantageous to the Government.

The Program has encountered a number of situations where there has been or is expected to be a prolonged period of medical treatment requiring the use of the durable medical equipment, where a lease/purchase arrangement is not possible, or where the equipment is not available for rent.

Following a review of the applicable statute, the Department has concluded that there is no statutory bar to CHAMPUS sharing in the cost of purchase of durable medical equipment when such purchase is more cost-advantageous to the Government or where the equipment cannot be rented.

The amendment does not change the current definition or coverage criteria for durable medical equipment. Instead, it provides an additional alternative for acquisition which offers potential cost savings both to the Government and to beneficiaries.

List of Subjects in 32 CFR Part 199

Health insurance, Military personnel, Handicapped.

Accordingly, 32 CFR, Chapter I, Part 199, is amended to read as follows:

PART 199—IMPLEMENTATION OF THE CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES

1. Section 199.10 is amended by revising paragraph (d)(3)(ii) to read as follows:

§ 199.10 Basic program benefits.

* * * * *

(d) * * *

(3) * * *

(ii) *Durable Medical Equipment—(a) Coverage Criteria.* Durable medical equipment (DME) for the specific use of the beneficiary is covered, provided such equipment meets the following criteria:

(*1*) It must be medically necessary for the treatment of an illness or injury.

(*2*) It must improve the function of a malformed, diseased or injured body part or retard further deterioration of the patient's physical condition.

(*3*) It must be primarily and customarily used to serve a medical purpose, rather than primarily for transportation, comfort or convenience.

Note.—A wheelchair (or Program-approved alternative) is not considered transportation in the sense of paragraph (d)(3)(ii)(*a*)(*4*) of this section. It is qualified as durable medical equipment under paragraph (d)(3)(ii)(*a*)(*2*) of this section above, because by providing basic mobility, it retards further deterioration of the patient's physical condition. Mobility beyond that basic mobility provided by a wheelchair (or a Program-approved alternative) is considered to be primarily transportation.

(*4*) It must withstand repeated use, and will be provided on a one-at-a-time basis only, based on the anticipated lifetime of the specific item of equipment.

(*5*) It must be other than spectacles, eyeglasses, contact lenses or other optical devices and other than hearing aids or other communciation devices.

(*6*) It cannot be beyond the medically appropriate level of performance and quality required under the circumstances (i.e., non-luxury, non-deluxe). However, this criterion is not intended to preclude the special fitting of equipment to accommodate a particular disability, such as fitting a wheelchair for a one-armed individual.

(*7*) It cannot be for a patient in a facility which can provide or ordinarily provides such equipment.

(*8*) It is not available for loan from any local Uniformed Service Medical Treatment Facility.

(*9*) The reasonable charge for the item must be more than $100.

(*b*) *Payment Alternatives.* Generally, CHAMPUS reimbursement for durable medical equipment will be limited to the most cost-advantageous methods to the Government. These methods can include rental, lease/purchase and outright purchase. Factors to be considered in the reimbursement process include the reasonable charge for purchase of the equipment, the reasonable monthly rental charge for the equipment, the estimated duration of medical necessity for the use of the equipment, and the availability of rental equipment. In addition, the cost analysis must include a provision for the time value of money at the rate established quarterly and published in United States Treasury Federal Regulations Manual bulletins and the **Federal Register**. Regardless of the method of reimbursement to be used, all equipment must first meet the coverage criteria in paragraph (d)(3)(ii)(*a*) of this section above.

BILLING CODE 3810-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-9-FRL 2203-5]

Approval and Promulgation of Implementation Plans; Arizona State Implementation Plan Revision

AGENCY: Environmental Protection Agency.

ACTION: Notice of final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve changes to the Arizona Department of Health Services (ADHS) rules and regulations for air pollution control submitted by the Director of the ADHS as revisions to the Arizona State Implementation Plan (SIP). These revisions are administrative and retain the previous emission control requirements. EPA reviewed these rules with respect to the Clean Air Act and determined that they should be approved.

DATE: This action is effective November 29, 1982.

ADDRESSES: Copies of the revisions are available for public inspection during normal business hours at the EPA Region 9 office and at the following locations:

Public Information Reference Unit, Environmental Protection Agency, Library, 401 "M" Street SW., Room 2404, Washington, D.C. 20460

Library, Office of the Federal Register, 1100 "L" Street, NW., Room 8401, Washington, D.C. 20460

Arizona Department of Health Services, 1740 West Adams Street, Phoenix, AZ 85007

FOR FURTHER INFORMATION CONTACT: Douglas Grano, Chief, State Implementation Plan Section, Air Programs Branch, Air Management Division, Environmental Protection Agency, Region 9, 215 Fremont Street, San Francisco, CA 94105, (415) 974-7641.

SUPPLEMENTARY INFORMATION: The ADHS submitted as SIP revisions the following rules on June 3, 1982:

R9-3-101 Definitions
R9-3-219 Air pollution emergency episodes
R9-3-502 Unclassified sources
R9-3-505 Standards of performance for existing cement plants
R9-3-508 Standards of performance for existing asphalt concrete plants
R9-3-511 Standards of performance for existing secondary lead smelters
R9-3-513 Standards of performance for existing iron and steel plants
R9-3-516 Standards of performance for existing coal preparation plants
R9-3-517 Standards of performance for steel plants: existing electric arc furnaces (EAF)
R9-3-518 Standards of performance for existing kraft pulp mills
R9-3-520 Standards of performance for existing lime manufacturing plants
R9-3-521 Standards of performance for existing nonferrous metals industry sources
R9-3-522 Standards of performance for existing gravel or crushed stone processing plants
Appendix 8 Procedures for utilizing the sulfur balance method for determining sulfur emissions

As described below, these rules revisions are administrative and do not significantly impact current emission control requirements.

In rule R9-3-101 a number of definitions have been revised to provide clarification and improve the enforceability of the SIP. Revisions in rule R9-3-219 specify ozone rather than photochemical oxidant as the criteria pollutant. The wording of rules R9-3-502 to R9-3-522 has been adjusted to reflect the change in the names and boundaries of the Arizona Air Quality Control Regions. And, in Appendix 8 the citation for the test method has been updated.

Under Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, EPA is required to approve or disapprove these regulations as SIP revisions. All rules submitted have been evaluated and found to be in accordance with EPA policy and 40 CFR Part 51. EPA's detailed evaluation of the submitted rules is available at the EPA Library in Washington, D.C., and the Region 9 office.

It is the purpose of this notice to approve all the rule revisions listed above and to incorporate them into the Arizona SIP. This is being done without prior proposal because the revisions are noncontroversial, have limited impact, and no comments are anticipated. The public should be advised that this action will be effective 60 days from the date of this Federal Register notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, the approval will be withdrawn and a subsequent notice will be published before the effective date. The subsequent notice will indefinitely postpone the effective date, modify the final action to a proposed action, and establish a comment period.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.) The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under the Clean Air Act, any petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements.

Incorporation by reference of the State Implementation Plan for the State of Arizona was approved by the Director of the Federal Register on July 1, 1982.

(Sections 110 and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410, 7502 and 7601(a)))

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, and Intergovernmental relations.

Dated: September 21, 1982.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Subpart D of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

1. Section 52.120, paragraph (c) is amended by adding subparagraph (54)(i)(C) to read as follows:

§ 52.120 Identification of plan.

* * * * *

(c) * * *

(54) * * *

(i) * * *

(C) New or amended rules R9-3-101 (Nos. 4 to 6, 9 to 16, 22 to 28, 30 to 33, 36, 38 to 55, 57 to 60, 64 to 67, 70 to 74, 76, 80 to 87, 92 to 97, 100, 102 to 116, 118 to 121, 123 to 128, 130 to 132, 134, 135, 137 to 141, 142 to 145, 147 to 150, and 156 are renumbered only); R9-3-219; R9-3-502 (paragraph A to A.1 and A.2); R9-3-505 (paragraph B to B.1, B.2, B.3, and B.4); R9-3-508 (paragraph B to B.1, B.2, and B.5); R9-3-511 (paragraph A to A.1 and A.2); R9-3-513 (paragraph A to A.1 and A.2); R9-3-516 (paragraph A to A.1 and

A.2); R9–3–517 (paragraph A to A.1); R9–3–518 (paragraph A to A.1 and A.2); R9–3–520 (paragraph A to A.1 and A.2); R9–3–521 (paragraph A to A.1 and A.2); R9–3–522 (paragraph A to A.1 and A.2); and Appendix 8 (Sections A8.3.1 and A8.3.2).

BILLING CODE 6560-50-M

---

40 CFR Part 52

[A-8-FRL 2166-5]

Approval and Promulgation of State Implementation Plans; Colorado

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is approving revisions to the Colorado State Implemention Plan (SIP). The revisions establish plans for achieving and maintaining the National Ambient Air Quality Standard (NAAQS) for lead in Denver, Grand Junction, and Pueblo in accordance with Section 110 of the Clean Air Act (the Act). The Governor of Colorado submitted the revisions to the EPA on April 12, 1982, following Public Hearing and adoption by the Colorado Air Quality Control Commission, both on February 25, 1982.

DATES: This action will be effective on November 29, 1982 unless notice is received by October 28, 1982, that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of the revision are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, 1860 Lincoln Street, Denver, Colorado 80295.

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street SW., Washington, D.C. 20460.

The Office of the Federal Register, 110 L. Street NW., Room 8401, Washington, D.C. 20408.

FOR FURTHER INFORMATION CONTACT: Paula R. Machlin, Air Programs Branch, Environmental Protection Agency, 1860 Lincoln Street, Denver, Colorado 80295, (303) 837–6131.

SUPPLEMENTARY INFORMATION: On October 5, 1978, the EPA established an NAAQS for lead in accordance with Section 109 of the Act 43 FR 46246 (1978). Under Section 110 of the Act, each State must submit to EPA a plan to attain and maintain the NAAQS. The Act also directs EPA to review the State plan to determine whether it meets requirements established under Section 110 of the Act. If requirements are met, the EPA can approve the plan. Requirements for an adequate lead SIP are established in the 40 CFR Part 51 Subpart E—Control Strategy for Lead. Based on those requirements, the EPA finds that the subject plan to achieve the lead NAAQS for Colorado is approvable.

Analysis of air quality data collected by the State of Colorado for 1974 through 1979 showed violations of the lead NAAQS in three areas: Denver, Grand Junction, and Pueblo. The EPA hired a consulting firm (ETA Engineering, Inc.) to prepare a technical analysis that identified lead emission sources and predicted future ambient concentrations. The State was expected to prepare the lead SIP based on that technical analysis.

The analysis found that, in Denver and Grand Junction, motor vehicle emissions were largely responsible for the monitored standards violations; in Pueblo, both motor vehicle emissions and lead particulate emissions from the CF&I Steel Mill were responsible for the monitored violations. However, modeling by the contractor showed that each area would meet the lead NAAQS by 1982 at the latest, based on implementation of programs that were already planned. Therefore, no additional control strategies were needed in the SIP to provide attainment. As required under 40 CFR Subpart E, the state has adopted regulations that control lead emissions. Although not described in the subject submittal, the EPA considered these regulations as part of the lead SIP.

In Denver and Grand Junction, the following factors result in the emissions reductions needed to meet the lead NAAQS: the federal program to improve fuel economy, the federal program to decrease the average lead content of gasoline, and an increase in the proportion of catalyst cars (which use unleaded gas) over noncatalyst cars (which use leaded gas) due to normal fleet turnover. In Pueblo, air pollution control equipment installed at CF&I subsequent to the year in which violations were measured reduced lead emissions from the plant substantially. In fact, no violations have been measured since 1974. The emissions reductions at CF&I and those expected from federal programs and fleet turnover achieve the reductions needed to maintain the lead NAAQS.

The EPA has reviewed the technical analysis in the SIP Revision and found that the analysis is appropriate. The SIP was submitted to EPA following Public Hearing as required under 40 CFR Part 52. Consequently, we find that the Colorado lead SIP Revision are approvable.

EPA is today approving these revisions. The public is advised that this action will be effective (60 days). However, if we receive written notice by (30 days) that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw this final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Under Section 307(b)(1) of the Clean Air Act, petitions for review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 29, 1982. This action may not be challenged later in proceedings to enforce its requirements (See 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, and Hydrocarbons, Intergovernmental relations.

This rulemaking is issued under the authority of Section 110 of the Clean Air Act (42 USC 7410).

Dated: August 24, 1982.

John W. Hernandez, Jr.,

Acting Administrator.

Note: Incorporation by reference of the State Implementation Plan for the State of Colorado was approved by the Director of the Federal Register on July 1, 1982

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION

1. Section 52.320 paragraph (c) (27) and (28) are added as follows:

§ 52.320 Identification of plan.

* * * * *

(c) * * *

(27) On April 12, 1982, the Governor submitted the plan revisions to show attainment of the lead National Ambient Air Quality Standard.

(28) Regulation Number 7 is part of the plan.

[FR Doc. 82-26575 Filed 9-27-82; 8:45 am]
BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Office of Hearings and Appeals

43 CFR Part 4

Department Hearings and Appeals Procedures

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Revocation of regulations.

SUMMARY: Subpart H of this title was issued to prescribe procedures for hearings and appeals under Exec. Order No. 11246, *as amended* by Exec. Order No. 11375. These functions were transferred to the Department of Labor by Exec. Order No. 12086, thus making 43 CFR Part 4, Subpart H, obsolete and requiring its revocation. A proposal to revoke this rule was published for public comment on May 27, 1980 (45 FR 35351). No comments were received. Subpart K of this title was issued to prescribe procedures for hearings and appeals of disenrollment contests for Alaska Natives under the Alaska Native Claims Settlement Act, 43 U.S.C. 1604. The deadline to file disenrollment contests (October 1, 1978) has passed (*see* 25 CFR 43h.15(h)) and all contests have been concluded in the administrative and judicial forums, thus making 43 CFR Part 4, Subpart K, obsolete and requiring its revocation. A proposal to revoke this rule was published for public comment on May 27, 1980 (45 FR 35351). No comments were received.

EFFECTIVE DATE: September 28, 1982.

FOR FURTHER INFORMATION CONTACT: Kathryn Lynn, Attorney-Adviser, Office of Hearings and Appeals, (703) 235-3816.

SUPPLEMENTARY INFORMATION: The Department of the Interior has determined that this document is not a significant rule as defined in Exec. Order No. 12291, and does not require a regulatory analysis under the regulatory Flexibility Act (Pub. L. 96-354). Furthermore, the Department has determined that the revocation of these rules will not adversely affect the human environment within the meaning of the National Environmental Policy Act of 1969, *as amended* (42 U.S.C. 4321-4361 (1976)).

PART 4—DEPARTMENT HEARINGS AND APPEALS PROCEDURES

Subpart H—§§ 4.750-4.792 [Reserved]

Subpart K—§§ 4.1000-4.1011 [Reserved]

Under the authority of the Secretary of the Interior contained in 5 U.S.C. 301, 43 CFR Part 4, Subparts H and K are hereby revoked and reserved.

Dated: August 31, 1982.

Donald Paul Hodel,

Under Secretary.

43 CFR Part 2820

[Circular No. 2515]

Roads and Highways; Revocation of Regulations Concerning Roads and Highways

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking revokes the existing regulations concerning the granting of right-of-way to State agencies by the Bureau of Land Management in coordination with the Federal Highway Administration. These regulations are burdensome, counterproductive and are no longer needed. They will be replaced by an interagency agreement between the Department of the Interior and the Department of Transportation as authorized by section 307 of the Federal Land Policy and Management Act.

EFFECTIVE DATE: October 28, 1982.

ADDRESS: Any suggestions or inquiries should be sent to: Director (330), Bureau of Land Management, 1800 C Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Leon Kabat, (202) 343-5441.

SUPPLEMENTARY INFORMATION: The proposed rulemaking deleting the existing regulations on Highways and Roads—43 CFR 2820—was published in the **Federal Register** on May 10, 1982 (47 FR 20009). Comments were invited for a 30-day period during which time three comments were received. Two of the comments were from States and the third comment come from a Federal agency. All of the comments have been reviewed and given careful consideration as part of the decisionmaking process on the final rulemaking.

The comments expressed the view that the process now used for granting of rights-of-way under the existing regulations, while it may be burdensome and counterproductive, is understood by those involved in the process and is less burdensome than similar processes used by other Federal agencies under a memorandum of understanding. In responses to the suggestions made in the comments, the Department of the Interior is working with the Department of Transportation in the development of an interagency agreement that will simplify the procedure for granting rights-of-way across Bureau of Land Management lands for State highways and roads. The process will be designed to provide the States with rights-of-way in the least burdensome manner possible, while providing adequate protection for the public lands. The Bureau of Land Management will continue its efforts in working with the States and the Federal Highway Administration to give the quickest possible service on applications for rights-of-way for State highways and roads crossing lands under its jurisdiction.

After careful consideration of the views expressed in the comments, the decision has been made to proceed with the revocation of the regulations in 43 CFR Part 2820 as proposed in the proposed rulemaking and finalized in the final rulemaking.

The principal author of this final rulemaking is Leon Kabat, Division of Rights-of-Way, Bureau of Land Management, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

Under the authority of sections 107(d) and 317 of Title 23 of the United States Code (72 Stat. 885, 892 and 916) and section 307 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1737), Group 2800, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations is amended as follows:

List of Subjects in 43 CFR Part 2800

Highways and roads, Public lands—rights-of-way.

Dated September 8, 1982.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

PART 2820—ROADS AND HIGHWAYS [REMOVED]

1. Part 2820 is removed in its entirety.

Proposed Rules

Federal Register
Vol. 47, No. 188
Tuesday, September 28, 1982

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 800

Proposed Changes to Sampling Provisions by Kind of Movement

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Grain Inspection Service (FGIS or Service) is proposing to revise the regulations under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*), (Act) to provide that each official sample-lot inspection for grade, factors, or other criteria on (1) domestic cargo shipments (barges) of bulk or sacked grain, (2) export land carrier shipments (railcars and trucks) of bulk or sacked grain, and (3) export cargo shipments of sacked grain be based on official samples obtained from the grain by any sampling method approved by FGIS without a statement being added to the certificate qualifying it as to the sampling method used. Under present regulations, a diverter-type (D/T) mechanical sampler must be used on these kinds of movements after January 1, 1983. Otherwise, a statement will be added to the inspection certificate indicating the samples may not be as representative as those obtained with a D/T mechanical sampler.

DATE: Comments must be submitted on or before October 28, 1982.

ADDRESS: Comments must be submitted in writing, in duplicate, to Lewis Lebakken, Jr., Regulations and Directives Management, USDA, FGIS, Room 1636 South Building, 14th and Independence Avenue, SW., Washington, D.C. 20250, telephone (202) 382–0231. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., (address as above) telephone (202) 382–0231.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed rule has been issued in conformance with Executive Order 12291 and Secretary's Memorandum 1512–1. The action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

Kenneth A. Gilles, Administrator, FGIS, has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The effect of the proposed rule is to reduce the extent of regulatory control to which many entities, including some small entities, would be subjected.

Proposed Action

FGIS is proposing to revise § 800.18 and § 800.83 (7 CFR 800.18, 800.83) of the regulations to provide that each official sample-lot inspection for grade, factors, or other criteria on (1) domestic cargo shipments (barges) of bulk or sacked grain, (2) export land carrier shipments (railcars and trucks) of bulk or sacked grain, and (3) export cargo shipments of sacked grain be based on official samples obtained from the grain by any sampling method approved by FGIS without a statement being added to the inspection certificate indicating the samples may not be as representative as those obtained with a D/T mechanical sampler.

The sampling methods currently approved by FGIS are the D/T mechanical sampler, probe, Ellis cup, pelican, and Woodside sampler, when used according to the procedures in instructions. Each certificate issued for an official sample-lot inspection on any domestic shipment of grain and on all export shipments of grain in railcars and trucks currently specifies the sampling method used. If this proposal is adopted, the sampling method would continue to be specified. Under the present regulations, when the D/T mechanical sampler is not used as required after January 1, 1983, the certificate will show the following additional statement: "The lot of grain represented by this certificate was sampled by means of (*type of approved sampling methods*). Samples obtained by this method may not be as representative as those obtained by approved diverter-type mechanical samplers."

The requirements to base official inspection results for domestic barge shipments of grain and export shipments of grain (except bulk export cargo shipments) on official samples obtained with a D/T mechanical sampler was originally scheduled to become effective January 1, 1982, as published in the March 11, 1980, Federal Register (45 FR 15802–15873). FGIS published an emergency final rule on December 1, 1981 (46 FR 58277), delaying the January 1, 1982, effective date for the required use of D/T mechanical samplers to January 1, 1983.

This requirement was enacted because a D/T mechanical sampler, which is designed to sample grain on line (i.e., during a continuous loading or unloading operation), can obtain a more uniform and representative sample from large volumes of grain being loaded at high speed than can the other sampling methods currently approved by FGIS for sampling grain during the loading operation.

Recently, FGIS has received numerous letters from grain merchandising companies and elevator operators who did not submit comments when the requirement was initially proposed. The letters provide information that indicates the requirement to use the D/T mechanical sampler on domestic barge shipments and export railcar and truck shipments does not provide the flexibility needed in the grain marketing system because the D/T mechanical sampler cannot be used for sampling grain at rest in a carrier. The information provided by these companies notes that, since the certificate specifies the sampling method used, there is no need to qualify the certificate with a statement as to the ability of the sampling method to obtain representative samples. After evaluating the information provided and considering the recommendation of the FGIS Advisory Committee to eliminate the requirement, FGIS is publishing this proposal.

Further, the information received indicates the requirement to use the D/T mechanical sampler on domestic barge shipments of bulk and sacked grain may be incompatible with established barge

trading rules and practices. Barges are often loaded well in advance of the bill of lading date because of uncertain weather conditions, the availability of barges, the need to transfer grain from a full warehouse to accept new receipts, and the desire to load several barges over a period of time and ship them together at a later date. The barges are then sampled shortly before the bill of lading date while the grain is at rest in the barge. This is to comply with the barge trading rules, which require the official inspection certificate be dated within 3 calendar days of the bill of lading date. In these cases, the requirement does not provide the industry flexibility to market the barges when desired because the D/T mechanical sampler is practical for sampling grain only at the time the carrier is loaded.

Information recently provided to FGIS also indicates an increase in the use of online "over the bank" barge loading systems, which are essentially a truck dump with a conveyor to the barge. Installation of a D/T mechanical sampler on such loading systems would be difficult and costly or, in some cases, impossible.

The comments received on this regulation when it was proposed stressed the cost of installing and tending the D/T mechanical sampler, the possibility of mechanical breakdowns, the problems with scheduling barges and official inspection personnel, and general satisfaction with other approved sampling methods as reasons for opposing the requirement. The issue of potential incompatibility of the regulation with industry trading rules and practices did not surface at that time.

Questions have also been raised regarding the extent to which the requirement to use D/T mechanical sampler on export shipments in railcars and trucks will provide the flexibility needed in the grain marketing system. Because the volume of grain exported to Canada and Mexico in railcars and trucks has increased substantially in recent years, the requirement to use the D/T mechanical sampler for these kinds of movements may affect the ability of some companies to merchandise grain. Many companies shipping railcars and trucks to Canada and Mexico are small entities, shipping a relatively low volume of grain. The volume each such entity exports is often small compared to the volume shipped in domestic movements. The D/T mechanical sampler is not required for domestic railcar and truck movements, and these companies could be excluded from the export market if required to install D/T mechanical samplers only for this kind of movement. Moreover, each certificate issued for export shipments of grain in railcars and trucks specifies the sampling method used and, under this proposal, would continue to specify the sampling method used.

The requirement to use the D/T mechanical sampler for export cargo shipments of sacked grain should be eliminated if the requirement is eliminated for domestic cargo shipments (barges) of sacked grain, as proposed. While an unqualified inspection certificate would be issued for domestic shipments of sacked grain to an export port location regardless of the method of sampling used, after January 1, 1983, the exporter would be required to unsack the grain, reelevate it, sample it with a D/T mechanical sampler, and resack it to receive an unqualified export inspection certificate. This process would be extremely time consuming and costly. Moreover, current instructions provide that, under certain conditions, official inspection certificates issued for a domestic shipment of sacked grain to an export port location can be exchanged for an unqualified export inspection certificate when the sacks are loaded aboard the export carrier. If the D/T mechancial sampler is required for export cargo shipments of sacked grain but not for domestic shipments of sacked grain, this accepted procedure would, in effect, no longer be available. If this proposal is adopted, this procedure would continue unchanged. Further, under this proposal, unqualified inspection certificates would be issued for export cargo shipments of grain sacked at the export port location, regardless of the method of sampling used.

Under this proposal, export cargo shipments of bulk grain are the only kind of movement that would be required to have official sample-lot inspections based on official samples obtained with a D/T mechanical sampler as a condition for issuing a certificate without a qualifying statement. This requirement has been in effect since May 1, 1976, for bulk cargo shipments of grain exported from the United States and since March 31, 1981, for shipments exported from Canada. It will remain in effect for export cargo shipments of bulk grain because, in view of the large volume of grain in this kind of movement and the speed at which it is loaded, a D/T mechanical sampler can obtain a more uniform and representative sample than can other sampling methods approved by FGIS for sampling grain on line or at rest in the carrier. Moreover, FGIS has no information which would question the propriety of this requirement. If another sampling method is used for an official sample-lot inspection on this kind of movement, the certificate issued will continue to show the following statement: "The lot of grain represented by this certificate was sampled by means of (*type of approved sampling method*). Samples obtained by this method may not be as representative as those obtained by approved diverter-type mechanical samplers."

Although the effect of this proposal is to change the sampling requirement only for (1) domestic cargo shipments (barges) of bulk or sacked grain, (2) export land carrier shipments (railcars and trucks) of bulk or sacked grain, and (3) export cargo shipments of sacked grain, the text of § 800.83 of the regulations would be revised in its entirety by classifying the kinds of movements as bulk export cargo movements, sacked export cargo movements, and other movements, instead of "In," "Out," en route, and "LOCAL" movements, to reflect the revised sampling requirements in a more simplified context. Other appropriate changes have been made in the text so as to accomplish the purpose of this proposal.

Based on the foregoing, the Administrator of FGIS is proposing to revise § 800.18 and § 800.83 to provide that each official sample-lot inspection for grade, factors, or other criteria on (1) domestic cargo shipments (barges) of bulk or sacked grain, (2) export land carrier shipments (railcars and trucks) of bulk or sacked grain, and (3) export cargo shipments of sacked grain be based on official samples obtained from the grain by any sampling method approved by FGIS without the inspection certificate being qualified as to the method of sampling used.

In order to inform grain merchandising companies, elevator operators, and other affected parties of the status of the regulation at the earliest possible date, a 30-day comment period is deemed adequate. All interested persons are encouraged to carefully review this proposal and submit written comments.

Specifically, § 800.18 would be amended by revising subdivision (1) of paragraph (a). Section 800.83 would be amended in its entirety by revising paragraphs (a) through (e) and relettering them as (a) and (b). In addition, § 800.161 would be amended by changing the reference to "§ 800.83(e)" in paragraph (b)(11) to "§ 800.83(a)."

List of Subjects in 7 CFR Part 800

Administrative practices and procedures, Export, and Grain.

PART 800—GENERAL REGULATIONS

Accordingly, it is proposed that § 800.18, § 800.83, and § 800.161 (7 CFR 800.18, 800.83, and § 800.161) of the regulations under the Act be amended as follows:

1. Section 800.18(a)(1) is revised to read:

§ 800.18 Special inspection and weighing requirements for sacked export grain.

(a) *General.* Subject to the provisions of § 800.19, sacked export grain shall be (1) officially inspected based on official samples obtained from the grain by any sampling method approved by the Service and operated in accordance with the instructions, (2) * * *

2. Section 800.83 (a) and (b) are revised to read:

§ 800.83 Sampling provisions by kind of movement.

(a) *Export cargo movements.*—(1) *Bulk grain.* Except as may be approved by the Administrator on a shipment-by-shipment basis in an emergency, each lot inspection for official grade, official factor, or official criteria on an export cargo shipment of bulk grain shall be based on official samples obtained from the grain (i) as the grain is being loaded aboard the final carrier; (ii) after the final elevation of the grain prior to loading and as near to the final loading spout as is physically practicable (except as approved by the Administrator when representive samples can be obtained before the grain reaches the final loading spout); and (iii) by means of a diverter-type mechanical sampler approved by the Service and operated in accordance with instructions. If an approved diverter-type mechanical sampler is not properly installed at an elevator or facility as required, each certificate issued at that elevator or facility for an export cargo shipment of bulk grain shall show the following statement: "The lot of grain represented by this certificate was sampled by means of *(type of approved sampling method).* Samples obtained by this method may not be as representative as those obtained by approved diverter-type mechanical samplers."

(2) *Sacked grain.* Each lot inspection for offical grade, official factor, or official criteria on an export cargo shipment of sacked grain shall be based on official samples obtained from the grain by any sampling method approved by the Service and operated in accordance with the instructions.

(b) *Other movements.* Each lot inspection for offical grade, offical factor, or official criteria on a domestic cargo movement ("In," "Out," or en route barge movement), a movement in a land carrier (any movement in a railcar, truck, trailer, truck/trailer combination, or container), or a "LOCAL" movement of bulk or sacked grain shall be based on official samples obtained from the grain by any sampling method approved by the Service and operated in accordance with the instructions.

* * * * *

§ 800.161 [Amended]

3. Section 800.161 is amended by changing the reference to "§ 800.83(e)" in paragraph 800.161(b)(11) to "§ 800.83(a)."

(Sec. 18, Pub. L. 94-582, 90 Stat. 2884 (7 U.S.C. 87e))

Dated: September 10, 1982.

BILLING CODE 3410-EN-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-12679, File No. S7-944]

Exemption From All Provisions of the Investment Company Act of 1940 for Certain Finance Subsidiaries of United States and Foreign Private Issuers.

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Commission today is proposing for public comment a comprehensive revision of rule 6c–1 under the Investment Company Act of 1940 that would exempt certain finance subsidiaries of United States and foreign private issuers from all provisions of that Act, subject to certain conditions. The proposed rule would obviate the necessity for such companies to apply for, and the Commission to issue, individual orders of exemption.

DATE: Comments must be received by November 5, 1982.

ADDRESS: Interested persons wishing to submit their views and comments on the proposed rule should file four copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifgh Street NW., Washington, D.C., 20549. All submissions should refer to File No. S7-944 and will be made available for public inspection at the Commission's Public Reference Section, Room 1024, 450 Fifth Street NW., Washington, D.C., 20549.

FOR FURTHER INFORMATION CONTACT: Bruce Mendelsohn, Esq., (202) 272-2048, or Lewis B. Reich, Esq., (202) 272-3017, Investment Company Act Study, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is publishing for public comment a proposed comprehensive revision of rule 6c–1 [17 CFR 270.6c–1] under the Investment Company Act of 1940 (the "Act") [15 U.S.C. 80a–1 *et seq.*]. The proposed revision would exempt from all provisions of the Act, subject to certain conditions, various finance subsidiaries of United States and foreign private issuers.

I. Background

For a variety of tax and other regulatory reasons, corporations in certain circumstances may, rather than issue their own debt securities directly, prefer to borrow funds by guaranteeing debt issued by wholly-owned subsidiaries formed primarily for that purpose.[1]

[1] Among other things, a U.S. corporation planning a Eurobond financing usually will want to make sure that interest payments to holders of the securities are not subject to U.S. withholding tax. While the Commission expresses no opinion as to the tax consequences of any particular arrangement, it appears that U.S. corporations have created domestic finance subsidiaries so that interest payments on their debt obligations purchased by nonresidents may be exempt from U.S. withholding tax. In this regard, section 861 of the Internal Revenue Code provides that U.S. sources are exempt from U.S. withholding on interest paid to non-residents. Thus, a domestic finance subsidiary is a common technique for U.S. corporations wishing to raise capital in the Euromarket for investment in foreign subsidiaries or affiliates.

If a substantial part of the proceeds of a Eurobond financing is to be invested in a U.S. corporation's domestic operations, the finance subsidiary is unlikely to meet the requirements of section 861. In this situation the preferred technique appears to be a foreign finance subsidiary that can relend the proceeds to the U.S. parent or affiliates. Such foreign subsidiaries have been established in countries having tax treaties with the U.S. which provide, among other things, that interest paid on the subsidiaries' debt is exempt from U.S. tax unless the recipient is a U.S. person. *See* Newburg, "Financing in the Euromarket by U.S. Companies: A Survey of the Legal and Regulatory Framework," 33 *The Business Lawyer* 2171 at 2189–2191 and 2194 (July 1978); *See also,* von Clem, "United States Companies Raising Capital Abroad," 3 *Journal of Comparative Corporate Law and Securities Regulation* 320–329 (1981).

In addition, as discussed in greater detail below, a foreign issuer offering debt securities in the U.S. may use a U.S. finance subsidiary so that the

Such finance subsidiaries would, in most cases, be deemed investment companies under section 3(a)(3) of the Act [15 U.S.C. 80a–3(a)(3)], which defines the term to include "any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of such issuer's total assets . . . on an unconsolidated basis." [2] When the proceeds of its issue of debt are invested in or loaned to the parent or one of the parent's subsidiaries, the finance subsidiary would receive acknowledgements of the investment or evidence of indebtedness that would be considered investment securities under the Act. If these amounted to more than 40% of its total assets, the subsidiary would be required either to register as an investment company [3] or apply for an order of the Commission pursuant to section 6(c) of the Act [15 U.S.C. 80a–6(c)] exempting it from all provisions of the Act.[4]

The Commission, as discussed below, has on several occasions considered the status of such companies under the Act. In March 1966, the Commission adopted rule 6c–1 under the Act [17 CFR 270.6c–1], which exempted from all provisions of the Act, in specified circumstances, U.S. securities organized to finance the foreign operations of U.S. companies by selling the subsidiaries' debt securities to foreign nationals.[5] Such finance subsidiaries had been designed and created to comply with a voluntary cooperation program instituted by the President in February 1965. Their role in that program was to raise capital for the foreign operations of U.S. companies in a manner that would not adversely affect the balance of payments position of the United States.[6] They accomplished this by raising funds in foreign capital markets to finance the foreign operations of their U.S. parents, enabling the parents to refrain from exporting U.S. capital.

As discussed above, the finance subsidiaries fell within the definition of "investment company" in section 3(a) of the Act. However, since, in general, they were investing in and loaning funds only to their parents and affiliates of their parents,[7] it was determined that they were not engaging in the kind of business the Act was intended to regulate. The subsidiaries served merely as conduits for financing the parents' foreign operations. Their debt was fully guaranteed by their parents, and purchasers of the subsidiaries' debt looked to the parents for their assurance of repayment. Thus, upon application to the Commission, such finance subsidiaries routinely had been granted orders pursuant to section 6(c) of the Act exempting them, subject to certain conditions, from all provisions of the Act. The rationale for the exemptions was that as a consequence of the parent company's guarantee and the limited activities of the finance subsidiary, the debt securities of the finance subsidiary were in effect debt of its parent company, and there would have been no issue under the Act had the parent issued its own debt directly.

In March 1968, after processing the applications of 39 such finance subsidiaries [8] and reviewing the reports they had been required to make under their individual orders of exemption, the Commission decided that it was appropriate to codify existing policies and no longer necessary to follow the application procedure. Accordingly, the Commission promulgated rule 6c–1 which included a number of conditions designed to limit narrowly the exemption it granted to the special purpose subsidiaries organized under the President's voluntary cooperation program.

One of those conditions, embodied in paragraph (c)(1) of the rule, requires that, at the time of their issuance, securities of the finance subsidiaries be subject to the Interest Equalization Tax ("I.E.T."). [9] The rule further states in paragraph (c)(2) that upon expiration of the I.E.T., covered finance subsidiaries may issue securities only upon order of the Commission. Since the I.E.T. expired in 1974, finance subsidiaries covered by the rule have been unable to issue securities relying on the rule alone.[10]

II. Discussion

The proposed amendment would

---

securities issued would qualify as legal investments under state laws regulating insurance companies and other institutions.

[2] Section 3(a)(3) defines "investment securities" to include all securities except (A) Government securities, (B) securities issued by employees' securities companies, and (C) securities issued by majority-owned subsidiaries of the owner which are not investment companies.

Section 2(a)(36) of the Act defines "security" to include any . . . bond, debenture, evidence of indebtedness, . . . or any . . . receipt for, guarantee of, or warrant or right to subscribe to or purchase any of the foregoing. [15 U.S.C. 80a–2(a)(36)].

[3] A domestic finance subsidiary which would be deemed to be an investment company under section 3(a)(3) of the Act is required by section 7(a) [15 U.S.C. 80a–7(a)] to register with the Commission if it proposes, *inter alia*, to "offer for sale, sell, or deliver after sale, by the use of the mails or any means or instrumentality of interstate commerce, any security or any interest in a security". A foreign finance subsidiary which would be deemed to be an investment company under section 3(a)(3) is required by section 7(d) [15 U.S.C. 80a–7(d)] to apply to the Commission for an order permitting the company to register under the Act if it proposes to "make use of the mails or any means or instrumentality of interstate commerce, directly or indirectly, to offer for sale, sell, or deliver after sale, in connection with a public offering, any security of which such company is the issuer."

[4] Section 6(c) of the Act provides that the Commission may, by rules and regulations upon its own motion, or by order upon application, conditionally or unconditionally exempt any person or any class of persons from any provision or provisions of the Act, if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes intended by the policy and provisions of the Act.

[5] *See* Investment Company Act Release Nos. 5186 (December 7, 1967) [32 FR 1788] and 5330 (March 25, 1968) [33 FR 5295].

[6] Rule 6c–1 has its origins in the April 1964, report of the Presidential Task Force on Promoting Increased Foreign Financing for United States Corporate Securities and Increased Foreign Financing for United States Corporations Operating Abroad (the "Fowler Report"). Among other recommendations, the Fowler Report suggested the establishment of programs designed to maximize the use of foreign sources of finance in order to increase the overall positive contribution which U.S.-based international corporations could make to the U.S. balance of payments. It also made specific recommendations for action by the private sector.

[7] A finance subsidiary under rule 6c–1 was required pursuant to paragraph (b)(7) of that rule to invest 90% of its assets in companies that were at least 10% owned by the finance subsidiary's parent. Its remaining assets could only be invested in or loaned to customers and supplies of the parent or of the parent's subsidiaries or affiliates. This provision was intended to ensure that investments in a finance subsidiary were, in fact, being employed predominantly in operations related to the parent company's operations and not in a portfolio of securities issued by companies which the parent did not influence.

[8] *See, e.g.*, W. R. Grace Overseas Development Corporation, Investment Company Act Release Nos. 4397 (November 3, 1965) and 4406 (November 16, 1965) and Atlantic Richfield International Finance Corporation, Investment Company Act Release Nos. 4920 (April 3, 1967) and 4941 (April 28, 1967).

[9] Internal Revenue Code of 1954, ch. 41, sections 4911–4931 Pub. L. 88–563, September 2, 1964. In this context the I.E.T. deterred the purchase of the finance subsidiaries' debt by U.S. nationals or residents by subjecting the interest they received to an excise tax. The I.E.T. was introduced in 1963 in response to concern about increasing outflow of capital from the United States, and was generally designed to make foreign investment unattractive to U.S. investors.

Controls on U.S. investment abroad were removed with the dismantling of the balance of payments program in 1974. Coles, M.H. "Foreign Companies Raising Capital in the United States," 3 *Journal of Corporative Corporate Law and Securities Regulation* 300 (1981) at 300–301, and Newburg, *supra* note 1, at 2184f.

[10] *See, e.g.*, orders of exemption from the provisions of paragraph (c)(2) of the rule granted to General Electric Overseas Capital Corporation, Investment Company Act Release Nos. 8624 (December 27, 1974) and 8649 (January 22, 1975), and Ford International Capital Corporation, Investment Company Act Release Nos. 9943 (September 23, 1977) and 9981 (October 17, 1977).

expand the exemption afforded by rule 6c–1 to cover (in addition to U.S. finance subsidiaries of U.S. corporations selling securities outside the United States) U.S. finance subsidiaries of U.S. corporations selling securities in this country, foreign finance subsidiaries of U.S. corporations, and U.S. finance subsidiaries of foreign corporations, and would also update and revise the rule in certain significant respects.[11]

A. Expansion of the Scope of the Rule

Like the finance subsidiaries exempted by existing rule 6c–1, the types of finance subsidiaries which would be covered by the proposed rule have as their primary purpose the financing of their parent companies' operations. Because of the particular nature of these types of finance subsidiaries, the Commission believes that to require them to file individual applications for exemption would impose an unnecessary burden on the private sector and on the Commission. Based on such considerations and the experience it has had with these types of finance subsidiaries, the Commission is proposing that rule 6c–1 be amended to provide uniform exemptive treatment under the Act for these companies.

1. *Exemption for domestic and foreign finance subsidiaries of U.S. corporations:* Rule 6c–1 as originally adopted exempted only special purpose domestic finance subsidiaries of U.S. companies. The proposed revision would extend the exemption to include both domestic and foreign finance subsidiaries of U.S. corporations since, if operating in compliance with the conditions imposed by the proposed rule, they would not be engaging in the type of investment company business the Act was intended to regulate. Since the adoption of rule 6c–1 the Commission has processed a number of applications for exemption from all provisions of the Act filed by both domestic [12] and foreign [13] finance subsidiaries of U.S. companies that were not of the special purpose type covered by the existing rule.

2. *Exemption for U.S. finance subsidiaries of foreign corporations:* On November 20, 1981, the Commission proposed a new integrated disclosure system for foreign private issuers under the Securities Act of 1933 (the "Securities Act") [15 U.S.C. 77a *et seq.*] and the Securities Exchange Act of 1934 [15 U.S. 78a *et seq.*.] (the "Exchange Act").[14] This system, if adopted, would for the first time make certain foreign issuers eligible to use simplified short-form registration. The Commission believes that these proposals would reduce the burden and expense of public offerings in this country by qualified foreign issuers.

In connection with the foreign integration proposals, public commentators have indicated that in many cases foreign companies would choose to guarantee debt issued by wholly-owned U.S. subsidiaries rather than directly issue their own debt securities in the U.S. finance market. Purchasers of subsidiary's debt would rely on the credit of the parent company as guarantor. It is represented that this arrangement is occasioned by state laws in the United States restricting investments in debt securities of foreign issuers by institutions such as insurance companies. Under such state "legal investment" laws, debt securities of a foreign issuer may not be permissible investments,or the amount regulated institutions can invest in them may be limited.[15] Because participation by such regulated institutions might be important to the success of an offering, it is represented that the debt would be issued by the U.S. subsidiary so that the institutional participation would not be restricted.[16]

The Commission has processed a number of applications for exemption from the Act filed by such finance subsidiaries of foreign private issuers.[17] Commentators, however, have suggested that the necessity of a U.S. subsidiary obtaining an exemptive order by application and the attendant delay in its effecting a public offering of guaranteed debt would substantially

---

[11] The proposed amendment would be adopted pursuant to the authority granted to the Commission in sections 6(c) and 38(a) of the Act. Section 6(c) provides that the Commission may, by rules and regulations upon its own motion, or by order upon application, conditionally or unconditionally exempt any person or any class of persons from any provision or provisions of the Act, if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes intended by the policy and provisions of the Act. Section 38(a) confers upon the Commission general rulemaking authority under the Act. The Commission is proposing this rule for public comment now so that it can be considered with minimum delay should the foreign integrated disclosure system be adopted in the near future.

[12] *See, e.g.*, Cortez Capital Corporation, Investment Company Act Release Nos. 12502 (June 23, 1982) and 12559 (July 20, 1982); Prudential Funding Corporation, Investment Company Act Release Nos. 12336 (March 29, 1982) and 12366 (April 27, 1982); Pembroke Capital Corporation, Investment Company Act Release Nos. 10485 (November 17, 1978) and 10522 (December 13, 1978); Mobil Alaska Pipeline Co., Investment Company Act Release Nos. 8657 (January 30, 1975) and 8678 (February 19, 1975). *See also* pending application of Amax International Finance Corporation, File No. 812–5203. Some of these finance subsidiaries were formed to fund specific projects (Cortez, Pembroke, Mobil Alaska) while others were organized to finance a variety of operations of their parents (Amax, Prudential).

[13] *See* Exxon Finance N.V., Investment Company Act Release Nos. 12485 (June 11, 1982) and 12547 (July 14, 1982).

[14] Securities Act Release No. 33–6360 (November 20, 1981) [46 FR 56511].

[15] For example, the New York Insurance Law, which applies to any insurance company authorized to do business in New York, provides that an insurance company may not purchase debt securities of foreign issuers in an aggregate amount that exceeds 1% of its "admitted assets" (New York Insurance Law § 81 (McKinney) 8(b)). In some circumstances, commentators state, the issuer must be organized under the laws of one of the United States, and also must have an earnings history over the previous three to five years in order to qualify as a legal investment.

[16] The Commission is offering no opinion on whether debt securities of such finance subsidiaries would meet any state law requirements regarding permissible investments by regulated institutions.

[17] *See, e.g.*, DSAG Corporation, Investment Company Act Release Nos. 10204 (April 13, 1978) and 10243 (May 17, 1978) (Canadian parent); Baychem Funding Corporation, Investment Company Act Release Nos. 7675 (February 16, 1973) and 7728 (March 19, 1973) (West German parent); BP North American Finance Corporation, Investment Company Act Release Nos. 4332 (August 20, 1965) and 4350 (September 9, 1965) (British parent).

Besides the finance subsidiaries discussed above, the Commission and its staff have considered the status under the Act of another class of wholly-owned subsidiaries of foreign corporations issuing securities guaranteed by their parents. The Commission has granted a number of applications for orders of exemption filed by foreign banks and their U.S. finance subsidiaries that wished to sell commerical paper and other securities in the United States. Banks, as defined in section 2(a)(5) [15 U.S.C. 80a–2(a)(5)] of the Act, are excluded pursuant to section 3(c)(3) [15 U.S.C. 80a–3(c)(3)] of the Act, from the definition of investment company. However, foreign banks do not fall within the section 2(a)(5) definition of a bank, which includes only United States banks. Therefore, because notes that evidence the loans made by the foreign banks (and which constitute the major portion of the banks' assets) would be deemed securities within the meaning of section 2(a)(36) of the Act, foreign banks would be deemed investment companies under sections 3(a)(1) [15 U.S.C. 80a–3(a)(1)] and 3(a)(3) of the Act. Some of these banks proposed to enter U.S. capital markets directly, but others proposed to guarantee securities that they would sell through wholly-owned subsidiaries organized in the United States. Because substantially all of the assets of the banks' finance subsidiaries would be evidence of amounts receivable from the parent bank, the subsidiaries, like their parent banks, would be deemed investment companies under section 3(a)(1) and 3(a)(3) of the Act. These bank subsidiaries have been granted orders of exemption for many of the reasons applicable to the subsidiaries discussed in the text. In essence, the bank subsidiaries merely serve as conduits for the indirect issue of debt by the parent banks. *See, e.g.*, Barclays Bank Limied, Investment Company Act Release No. 11052 (February 15, 1980) and Barclays North American Finance, Inc., Investment Company Act Release No. 11054 (February 27, 1981).

Finance subsidiaries of foreign banks would not be covered by the proposed revision of rule 6c–1. The foreign bank parents, as discussed previously, are deemed investment companies under the Act. Paragraph (a)(1) of the rule would exclude from the rule's coverage finance subsidiaries of investment parents.

reduce the benefits that could otherwise be realized from the proposed integrated disclosure system.[18] In periods of volatile interest and exchange rates, the processing time required might cause a prospective issuer to miss a favorable opportunity for an offering.

3. *Rationale for the Exemptions:* The Commission has granted orders of exemption upon application to the types of finance subsidiaries described above because the Commission believes such types were not intended to be regulated under the Act. The finance subsidiaries that the Commission proposes to exempt by the revision of rule 6c–1 are the same types of companies. All of their equity securities would be owned by non-investment company parents. Neither their structure nor their mode of operation resembles that of a typical investment company. Under the rule, they would not be able to engage in a general program of investment but would serve primarily as conduits for their parents to raise capital. The only securities a subsidiary would publicly offer would be debt guaranteed by the parent.[19] Since the debt would be sold on the basis of the parent's credit, purchasers of the debt would look to the parent for their assurance of repayment despite the interposition of the subsidiary. Absent unusual circumstances, if the parent were to issue the debt directly, no question would arise under the Act.

B. Other Revisions of the Rule

In addition to expanding the scope of the rule as described above, the proposed revision would clarify the definition of finance subsidiary, eliminate a number of restrictions on the activities of covered finance subsidiaries that are included in the present rule because of its narrow exemptive purpose, and require that the parent's guarantee allow the holders of a finance subsidiary's debt securities to proceed directly against the parent in the event of default.

1. *Clarifying the definition of "finance subsidiary":* Paragraph (a)(1) of the proposed revised rule would continue to define a finance subsidiary to be a corporation the outstanding voting securities of which (other than directors' qualifying shares) are owned by a non-investment company parent or subsidiary of a non-investment company parent. However, since the status of the parent under section 3(a)(3) of the Act depends upon the value of the "investment securities" held by the parent and securities issued by majority-owned subsidiaries may be excluded as "investment securities" only if those subsidiaries are not investment companies,[20] the situation could arise where a finance subsidiary could not rely on the rule simply because the value of that finance subsidiary's securities in the parent portfolio caused the parent to be considered an investment company under section 3(a)(3). To avoid that result, the proposed revision would add a clause stating that, for the purpose of the rule, securities of a finance subsidiary held by its parent or another subsidiary of its parent shall not be considered investment securities.

2. *Updating the rule:* The Commission proposes to delete as unnecessary paragraph (c) of the rule 6c–1, which provides that covered finance subsidiaries may issue securities after the expiration of the Interest Equalization Tax only upon order of the Commission.[21]

3. *Sales of debt securities in the United States:* The finance subsidiaries exempted by rule 6c–1 were special purpose funding vehicles designed to assist a national program to improve the United States balance of payments position. In keeping with that special purpose, finance subsidiaries covered by rule 6c–1 were not permitted to sell their debt securities to nationals or residents of the United States or its territories or possessions [17 CFR 270.6c–1(b)(4)]. Since that program is no longer in effect, the proposed amendment would eliminate paragraph (b)(4) of the rule, which expressed that restriction, and thus allow sales of debt securities by covered finance subsidiaries in the United States.[22]

The Commission is proposing to remove this limitation because allowing sales of debt securities in this country would not change the nature of the operations of the covered subsidiaries as financing conduits.

4. *Removing investment restrictions:* The proposed revision would also delete paragraphs (b)(6) and (b)(7) of the existing rule. Paragraph (b)(6) required the special purpose finance subsidiaries to invest at least 80 per cent of their assets, excluding U.S. government securities and cash items, in foreign companies. Paragarph (b)(7) required at least 90 per cent of the assets of the finance subsidiary to be invested in or loaned to companies in which the parent held, directly or indirectly, at least a 10 per cent equity interest, and the remainder of the assets invested in or loaned to suppliers or customers of the parent or its subsidiaries. Paragraph (b)(6) related to the special purpose design of the exemption. Paragraph (b)(7) was intended to restrict narrowly the investment of the finance subsidiaries to the foreign investment objectives of the parent companies that created them.

Paragraphs (b)(6) and (b)(7) by their terms were concerned only with the special purpose finance subsidiaries covered by rule 6c–1. The proposed revision includes requirements that apply more broadly. It requires that the primary purpose of a covered finance subsidiary be the financing of the business operations of the parent company, and prohibits covered finance subsidiaries from dealing or trading in securities, and from holding securities other than those resulting from its primary purpose. Those conditions should be sufficient to ensure that the exemption does not provide a vehicle through which some other type of investment company warranting regulation might evade the Act.

Commentators have represented that a U.S. finance subsidiary of a foreign private issuer may find it necessary to have other, non-financing, operations in order to allow it to meet earnings tests under state legal investment laws. Given the primary purpose test of the proposed rule, as well as other requirements which, among other things, would prohibit the subsidiary from dealing or trading in securities, the Commission

---

[18] Notice of an application for exemption from the Act must be published in the Federal Register, and a notice period must expire before the Commission can act on an application.

[19] Any registration statement filed under the Securities Act would contain the same disclosure, including financial statements, regarding the parent/guarantor as would be required for a direct offering of securities by that parent. The parent's guarantee would itself be considered a separate security under section 2(1) of the Securities Act [15 U.S.C. 77(b)(1)] and, therefore, would also require registration.

[20] *See* note 2 *supra*.

[21] The proposed revision also deletes as no longer necessary the time limitation in paragraph (b)(5) of the existing rule, which provides that securities issued by a covered finance subsidiary shall not be convertible or exchangeable for securities of the parent any sooner than six months from the date of issue except where a shorter period of time has been approved by the Secretary of the Treasury or his delegate.

[22] The Commission's staff has taken the position that it would not recommend any action for failure to register under the Securities Act of 1933 securities of U.S. issuers distributed abroad to foreign nationals if the offering was made "under circumstances reasonably designed to preclude distribution of the securities within, or to nationals of, the United States" and was effected "in a manner which will result in the securities coming to rest abroad." (Securities Act Release No. 4708 (July 9, 1964)). This position covered the securities issued by the special purpose finance subsidiaries under rule 6c–1. If securities are offered in the United States, registration under the Securities Act will be required unless some other exemption from registration is available.

does not believe that some degree of non-financing activities should render the proposed exemption unavailable in such circumstances.

5. *Guarantee:* The proposed revision also requires that the parent company's guarantee provide that in the event of a default with respect to a security issued by the finance subsidiary, creditors of the finance subsidiary may proceed directly against the parent company to enforce the guarantee of that security without first proceeding against the finance subsidiary. The rationale underlying the exemption for finance subsidiaries is that the parent company's guarantee and other circumstances make the finance subsidiary's debt effectively the debt of the parent company. In that case, investors in the finance subsidiary's debt, who have relied on the credit of the parent company, ought to be able to proceed directly, if the need arises, against the party on whose credit the securities were marketed, without the intermediate step of proceeding against the finance subsidiary.[23]

6. *Registration of parent:* Paragraph (b)(1) of the existing rule limits the availability of the exemption to subsidiaries of parent companies that are issuers of a class of securities registered under section 12 of the Exchange Act [15 U.S.C. 781], or exempted from such registration pursuant to rule 12g3–2(b) under that Act [15 CFR 240.12g3–2(b)], thereby limiting the availability of the rule to subsidiaries of parent companies which have some form of continuing disclosure obligation under the Exchange Act.[24] The proposed rule revision would delete that condition on the rationale that the issuance of debt securities by a finance subsidiary should be treated as though the debt securities were issued directly by the parent. If the parent would not incur a reporting obligation under the Exchange Act if it issued the debt securities directly, it seems inappropriate to impose such a reporting obligation if the parent chooses to issue debt securities indirectly through a finance subsidiary.

III. Request for Specific Comments

Specific comments are invited on whether the rule should limit the proposed exemption for finance subsidiaries of foreign private issuers to finance subsidiaries of "world class issuers," those that would be eligible to use proposed Form F–3 (as proposed, these would be foreign private issuers that have an equity float of at least $500 million, of which at least $150 million is held by U.S. residents, or that are registering investment grade debt securities).[25] In view of the importance of the parent's guarantee and the fact that the subsidiary would be little more than a conduit for financing, it may be appropriate to restrict the exemption to subsidiaries of foreign companies of a certain size or creditworthiness.

As proposed, the rule would require that a parent company directly and unconditionally guarantee as to principal, interest, and premium the debt securities issued by its finance subsidiary. The proposed revision retains this requirement as it appears in the existing rule. The rationale for the exemption of finance subsidiaries is that they are merely conduits, and their debt is in effect the debt of their parents. In order to provide a self-executing exemption through a rule, the Commission must be assured that the debt of the subsidiary is essentially debt of the parent company. The Commission is, however, aware that there may be other methods of structuring a corporate parent's assurance of the repayment of its finance subsidiary's debt.[26] In our experience, alternative types of guarantees that would not satisfy the requirements of the proposed revision have been utilized in every situation where a finance subsidiary has had more than one parent, and only occasionally elsewhere. The proposed revision therefore, like the existing rule, contemplates the exemption only of finance subsidiaries of a single parent.[27] However, the Commission is willing to consider accommodating multiple-parent finance subsidiaries and alternative guarantee structures that would be consistent with the rationale underlying the exemption. Specific comment is invited on whether and how the proposed rule's guarantee and other provisions might be revised so as to allow alternative methods of guarantee while still assuring that the finance subsidiary's debt would essentially be that of the parent.

Summary of Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 regarding the amendments to rule 6c–1 proposed herein. The Analysis notes that the proposed amendments to the exemptive rule will obviate the need for finance subsidiaries to file individual applications for exemption and will make available a more flexible form of financing for the parent companies. The proposed amendments are designed to make the exemptive relief afforded by the rule available to several types of finance subsidiaries.

A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Lewis B. Reich, Esq., Investment Company Act Study, Securities and Exchange Commission, Room 5086, 450 Fifth Street NW., Washington, D.C. 20549.

Text of Proposal

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

It is proposed to amend Part 270 of Chapter II of Title 17 of the Code of Federal Regulations by revising § 270.6c–1 as follows:

---

[23] *See, e.g.*, application of Exxon Finance N.V., as amended (File No. 812–5186), at 5–6.

[24] Companies that are issuers of securities registered under section 12 are subject to the reporting requirements of section 13 and 14 of the Exchange Act and the rules and regulations thereunder; foreign companies that are issuers of securities exempted from registration under rule 12g3–2(b) are subject to the continuing disclosure requirements of paragraph (b)(1) of that rule.

[25] Securities Act Release No. 33–6360, text at footnote 37.

[26] Some of the finance subsidiaries cited in note 12 *supra*, were owned either by two parents (Pembroke Capital) or by a partnership of two or more wholly-owned operating subsidiaries of the parents (Cortex Capital). In such situations, the parents' guarantee of the finance subsidiary's debt securities has often been accomplished indirectly. For example, wholly-owned subsidiaries of different integrated petrochemical producers have formed a joint venture partnership to build a pipeline, and, in turn, the partnership has organized a finance subsidiary. The debt securities held by the finance subsidiary are the debt securities of the joint venture partnership. The wholly-owned subsidiaries guarantee their respective shares of the partnership debt by means of "throughput" and "deficiency" agreements providing (1) that they will provide the completed pipeline with a volume of business sufficient to ensure profitable operation that will enable it to repay its obligation to the finance subsidiary and (2) that in the event the partnership is unable to meet its obligations to the finance subsidiary, each operating subsidiary will be obliged to advance in cash to the partnership its percentage share of the deficiency as an advance payment of future charges for use of the pipeline. The rights and obligations of the partnership would then be pledged to secure the finance subsidiary's debt securities, and held by a trustee for purchasers of those securities. *See also* Sohio/BP note 12 *supra*. Such arrangements would not fall within the exemption provided by the proposed revision of the rule. Nor would an undertaking by the parent that it would cause the finance subsidiary to have, at all times, a consolidated net worth of at least $1.00 (*see* Prudential Funding, *supra* note 12) satisfy the rule's requirement of a guarantee by the parent.

[27] The proposed revision retains in paragraph (a)(1) the language defining a finance subsidiary as a corporation all of whose equity securities are owned by a single parent, or a subsidiary of such a parent.

§ 270.6c–1 Exemption for subsidiaries organized to finance the operations of domestic or foreign companies.

(a) For the purpose of this rule, a "finance subsidiary" shall mean any corporation:

(1) All of whose securities other than debt securities, non-voting preferred stock meeting the requirements of paragraph (b)(2) of this section, or directors' qualifying shares, are owned either by a foreign private issuer (in which case the finance subsidiary must be organized under the laws of the United States or of a State), or by a corporation organized under the laws of the United States or of a State (the "parent company"), or by another subsidiary of such a parent company, provided that neither the parent company nor such other subsidiary is an investment company as defined in section 3(a) of the Act; and

(2) The primary purpose of which is to finance the business operations of the parent company through borrowings or other sale of the finance subsidiary's securities.

(b) A finance subsidiary shall be exempt from all provisions of the Act, *provided that:*

(1) Any debt securities of the finance subsidiary issued to or held by the public are unconditionally guaranteed by the parent company as to payment of principal, interest and premium, if any (except that the securities issued by the finance subsidiary may be subordinated in right or payment to other debt of the parent company);

(2) Any preferred stock of the finance subsidiary issued to or held by the public is unconditionally guaranteed by the parent company as to payment of dividends, payment of the liquidation preference in the event of liquidation, and payments to be made under a sinking fund, if a sinking fund is provided;

(3) The parent company's guarantee provides that in the event of a default with respect to a security issued by the finance subsidiary, legal proceedings may be instituted directly against the parent company to enforce the guarantee of that security without first proceeding against the finance subsidiary;

(4) Any securities of the finance subsidiary which are convertible or exchangeable shall be convertible or exchangeable only for securities of the parent company; and

(5) The finance subsidiary does not deal or trade in securities or hold securities other than securities resulting from its primary purpose.

(c) For the purpose of this rule, securities of a finance subsidiary held by its parent or another subsidiary of its parent shall not be considered investment securities.

(Rule 6c–1 is proposed pursuant to sections 6(c) [15 U.S.C. 80a–6(c)] and 38(a) [15 U.S.C. 80a–37(a)] of the Act]

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM79–76–139 (New Mexico–18)]

18 CFR Part 271

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the State of New Mexico that the Basin-Dakota Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on November 8, 1982.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on October 7, 1982.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Victor Zabel, (202) 357–8616.

Issued: September 22, 1982.

I. Background

On August 26, 1982, the State of New Mexico Energy and Minerals Department, Oil Conservation Division (New Mexico) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Basin-Dakota Formation located in San Juan County, New Mexico, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether New Mexico's recommendation that the Basin-Dakota Formation be designated a tight formation should be adopted. The United States Department of the Interior, Minerals Management Service (formerly the U.S. Geological Survey) concurs with New Mexico's recommendation. New Mexico's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The Basin-Dakota Formation is defined as that interval including the Graneros, Dakota, and Morrison Formations found below a depth of 7,251 feet as indicated on the Induction-Electrical and Gamma Ray log from the El Paso Natural Gas Gartner No. 9 well. The average depth to the top of the Basin-Dakota is 7,575 feet. The gross thickness of the formation varies from 250 to 300 feet.

New Mexico Order No. R–1670–V, issued on May 22, 1979, authorized infill drilling in the Basin-Dakota Gas Pool. Accordingly, certain portions of the recommended area may be subject to exclusion pursuant to § 271.703(c)(2)(i)(D) of the Commission's regulations.

III. Discussion of Recommendation

New Mexico claims in its submission that evidence gathered through information and testimony presented at a public hearing in Case No. 7608 convened by New Mexico on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

New Mexico further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by New Mexico that the Basin-Dakota Formation, as described in delineated in New Mexico's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., , Washington D.C. 20426, on or before November 8, 1982. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-139 (New Mexico-18), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than October 7, 1982.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Title 18, Code of Federal Regulations, as set forth below, in the event New Mexico's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—CEILING PRICES

Section 271.703(d) is revised by adding new subparagraph (139) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(109) through (138) [Reserved]

(139) *Basin-Dakota Formation in New Mexico.* RM79-76-139 (New Mexico-18).

(i) *Delineation of formation.* The Basin-Dakota Formation is located in San Juan County, New Mexico, in Township 32 North, Range 7 West, Sections 7, 8, 9, 16 through 21, and 25 through 36; Township 32 North, Range 8 West, Sections 7 through 36; Township 32 North, Range 9 West, Sections 7 through 36; Township 31 North, Range 8 West, Sections 1 through 31, and 33 through 36; Township 31 North, Range 9 West, Sections 1 through 28, and 29 through 36; Township 30 North, Range 8 West, Sections 1, 2, 6 through 34, and 36; Township 30 North, Range 9 West, Sections 1 through 30, 35 and 36; Township 30 North, Range 10 West, Sections 1 through 18 and 24; Township 29 North, Range 8 West, Sections 1 through 6; Township 29 North, Range 9 West, Sections 1 and 2, NMPM.

(ii) *Depth.* The Basin-Dakota Formation is defined as that interval including the Graneros, Dakota, and Morrison Formations found below a depth of 7,251 feet as indicated on the Induction-Electrical and Gamma Ray log from the El Paso Natural Gas Gartner No. 9 well. The average depth to the top of the Basin-Dakota Formation is 7,575 feet. Gross thickness of the Basin-Dakota Formation ranges from 250 to 300 feet.

[Docket No. RM79-76-136 (Utah-5)]

High-Cost Gas Produced From Tight Formations; Notice of Proposed Rulemaking

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendations of the State of Utah that the Dakota Formation be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on November 8, 1982.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on October 7, 1982.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Victor Zabel, (202) 357-8616.

Issued: September 22, 1982.

I. Background

On August 18, 1982, the State of Utah Board of Oil, Gas and Mining (Utah) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Dakota Formation located in Grand and Uintah Counties, Utah, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Utah's recommendation that the Dakota Formation be designated a tight formation should be adopted. The United States Department of the Interior, Minerals Management Service (formerly the U.S. Geological Survey) concurs with Utah's recommendation. Utah's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended formation underlies certain lands of Grand and Uintah Counties, Utah. The

recommended area contains 1,062,400 acres located in the general area of Townships 11 South through 18 South and Ranges 17 through 26 East, SLM. The Formation is bordered on the east by the Colorado state line and on the west by the Green River.

The vertical limits of the Dakota Formation are defined by the Dakota Silt Formation above and the Morrison Formation below. The average depth to the top of the productive zone is 7,137 feet and the average thickness of the Dakota Formation is approximately 200 feet.

III. Discussion of Recommendation

Utah claims in its submission that evidence gathered through information and testimony presented at a public hearing in Cause No. TGF–104 convened by Utah on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Utah asserts that based on averaging techniques and on cumulative frequency distributions of well production data, 92.5% of wells drilled in the Dakota Formation would not be expected to exceed the maximum allowable production rate set out in the regulations. The Minerals Management Service asserts that based on a review of all the available data submitted by the applicant and information in their own files that the straight arithmetic average of pre-stimulated, stabilized flow rates of wells completed for production in the recommended formation did meet the guidelines. Preliminary Commission staff analysis of the data submitted by Utah indicates that the recommended formation may not satisfy the production guidelines set forth in § 271.703(c)(i)(B) when the straight arithmetic average methodology is used. Comments are specifically requested on the use of averaging methodologies other than the arithmetic average method.

Utah further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Utah that the Dakota Formation, as described and delineated in Utah's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC. 20426, on or before November 8, 1982. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–136 (Utah–5), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than October 7, 1982.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432)

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, *Code of Federal Regulations*, as set forth below, in the event Utah's recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—CEILING PRICE

Section 271.703(d) is revised by adding new subparagraph (136) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(109) through (135) [Reserved]

(136) *Dakota Formation in Utah.* RM79–136 (Utah–5).

(i) *Delineation of formation.* The Dakota Formation is located in Grand and Uintah Counties, Utah, and is in the general area of Townships 11 South through 18 South and Ranges 17 East through 26 East, SLM. The formation is bordered on the east by the Colorado state line and on the west by the Green River.

(ii) *Depth.* The Dakota Formation's vertical limits are defined by the Dakota Silt Formation above and the Morrison Formation below. The average thickness throughout the proposed area is approximately 200 feet and the average depth to the top of the Dakota Formation is 7,137 feet.

DATE: Comments on the proposed rule are due on November 8, 1982.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on October 7, 1982.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357–8511, or Victor Zabel, (202) 357–8616

Issued September 22, 1982.

I. Background

On August 18, 1982, the State of Utah Board of Oil, Gas and Mining (Utah) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that the Morrison Formation located in Grand and Uintah Counties, Utah, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Utah's recommendation that the Morrison Formation be designated a tight formation should be adopted. The United States Department of the Interior, Minerals Management Service (formerly the U.S. Geological Survey) concurs with Utah's recommendation. Utah's recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

The recommended formation underlines certain lands of Grand and Uintah Counties, Utah. The recommended area contains 1,062,400 acres located in the general areas of Townships 11 South through 18 South and Ranges 17 through 26 East, SLM. The formation is bordered on the east by the Colorado state line and on the West by the Green River.

The vertical limits of the Morrison Formation are defined by the Dakota Formation above and Jurassic Entrada Formation below. The average depth to the top of the productive zone is 7,349 feet. The average thickness of the Morrison Formation is approximately 600 feet.

III. Discussion of Recommendation

Utah claims in its submission that evidence gathered through information and testimony presented at a public hearing in Case No. TGF–104 convened by Utah on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Utah asserts that based on averaging techniques and on cumulative frequency distributions of well production data, 100% of wells drilled in the Morrison Formation would not be expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B). Preliminary Commission staff analysis also indicates that the expected production rate for wells in the recommended formation satisfies the guidelines set out in § 271.703(c)(2)(i)(B) when the arithmetic average methodology is used.

Utah further asserts that existing State and Federal Regulations assure that development of this formation will not adversely affect any fresh water aquifers.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80–68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Utah that the Morrison Formation, as described and delineated in Utah's recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before November 8, 1982. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79–76–137 (Utah–6), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of the desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than October 7, 1982.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 404

[Regulations No. 4]

Federal Old-Age, Survivors, and Disability Insurance; Withdrawal of Applications of Deceased Claimants

AGENCY: Social Security Administration, HHS.

ACTION: Proposed Rule.

SUMMARY: The Social Security Administration proposes to amend its regulations on withdrawal of applications for benefits. The applications affected are those for old-age benefits that would be reduced because of the worker's age. Currently, even if the worker dies before we take action to pay the first of the reduced old-age benefits for which he or she applied, the widow's or widower's benefits must be reduced because the worker was technically entitled to reduced benefits. The revised regulations would remedy this by permitting the person eligible for widow's or widowers benefits based on the worker's earnings to withdraw the worker's application if the worker died before we certified his or her benefit entitlement to the Treasury Department for payment.

DATES: Your comments will be considered if we receive them no later than November 29, 1982.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and human Services, P.O. Box 1585, Baltimore, Maryland 21203, or delivered to the Office of Regulations, Social Security Administration, 3-A-3 Operations Building, 6401 Security Boulevard, Balitmore, Maryland 21235, between 8:00 am and 4:30 pm on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Lawrence V. Dudar, 3-B-4 Operations Building, 6401 Security Boulevard, Balitomre, Maryland 21235 (301) 594-6629.

SUPPLEMENTARY INFORMATION:

Background

Our existing regulations permit one person, under certain conditions, to withdraw another person's application for social security benefits, One existing requirement is that the person whose application is being withdrawn must be alive at the time of withdrawal.

This was a reasonable requirement until Congress amended the law to require reduction of widow's or widower's benefits if the worker was ever entitled to old-age benefits that were reduced because of his or her age (under 65). Since then there have been instances in which the worker died after applying for reduced benefits, and thus the widow's or widower's benefits were subject to reduction, even though the worker died before we certified his or her benefit entitlement to the Treasury Department for payment of any benefits whatsoever. This is because the worker is technically "entitled" to benefits as soon as he or she meets all the requirements for benefits and has filed an application for those benefits.

We do not believe it was the intent of Congress to reduce the widow's or widower's benefits where the worker met the technical requirements for entitlement, including the filing of an application, but then died before we actually certified his or her benefit entitlement to the Treasury Department for payment.

Proposed Change

There is no statutory provision governing withdrawal of an application for benefits. Accordingly, it is left wholly to the discretion of the Secretary of Health and Human Services to establish criteria for a valid withdrawal of an application. Since under the current regulation the existence of a valid application after the death of a worker can harm the survivors, we propose to allow the withdrawal of the application after the worker's death, but only if the worker died before we certified his or her benefit entitlement to the Treasury Department for payment. We would permit the withdrawal by the person eligible for widow's or widower's benefits or by someone else on his or her behalf, with the consent of any other individual who would lose benefits as a result of the withdrawal.

Regulatory Procedures

Executive Order 12291—These regulations have been reviewed under Executive Order 12291 and do not meet any of the criteria for a major regulation. Therefore, a regulatory impact analysis is not required. We estimate that by the end of the fifth year from the time that this regulation is first implemented, the Federal cost for the payment of the full amount of benefits to survivors affected by the regulation would be approximately $3 million. Any resulting administrative costs would be negligible.

Paperwork Reduction Act—These regulations impose no new reporting/recordkeeping requirements requiring OMB clearance. Our form SSA-521, Request for Withdrawal of Application, has OMB approval under control number 0960-0015.

Regulatory Flexibility Act—We certify that these proposed regulations will not, if promulgated, have a significant economic impact on a substantial number of small entities because they affect only individuals. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96-354, the Regulatory Flexibility Act, is not required.

These regulations are issued under the authority of sections 202(j), 205 and 1102 of the Social Security Act, as amended (49 Stat. 623, as amended; 53 Stat. 1362, as amended; 49 Stat. 647, as amended; 42 U.S.C. 402(j), 405, and 1302).

List of subjects in 20 CFR Part 404

Administrative practice and procedure; Death benefits; Disabled; Old-Age, Survivors and Disability Insurance.

Dated: July 21, 1982.

John A. Svahn,

Commissioner of Social Security.

Approved: September 8, 1982.

Richard S. Schweiker,

Secretary of Health and Human Services.

For the reasons stated in the preamble, it is proposed to amend Part 404 of Title 20 of the Code of Federal Regulations as follows:

PART 404—FEDERAL OLD-AGE, SURVIVORS AND DISABILITY INSURANCE (1950-).

In § 404.640, paragraph (c) is redesignated as paragraph (d), and a new paragraph (c) is added, to read as follows:

§ 404.640 Withdrawal of an application.

* * * * *

(c) *Request for withdrawal filed after the claimant's death.* An application may be withdrawn after the claimant's death, regardless of whether we have made a determination on it, if—

(1) The claimant's application was for old-age benefits that would be reduced because of his or her age;

(2) The claimant died before we certified his or her benefit entitlement to the Treasury Department for payment;

(3) A written request for withdrawal is filed at a place described in § 404.614 by or for the person eligible for widow's or widower's benefits based on the claimant's earnings; and

(4) The conditions in paragraphs (b)(2) and (3) of this section are met.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2646

Definition of "Building and Construction Industry"

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice of proposed rulemaking presents for public comment possible options for defining "building and construction industry" and related terms, for the purposes of the special withdrawal rules for that industry contained in the Employee Retirement Income Security Act of 1974, as amended. The definitions for these otherwise undefined terms may be needed to provide guidance to plan sponsors and employers. The effect of this notice is to obtain the views of the public on whether a regulation is needed and on what it might contain.

DATE: Comments must be received on or before November 29, 1982.

ADDRESS: Comments should be addressed to the Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006. Written comments will be available for public inspection at the PBGC, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), 2020 K Street, NW., Washington, D.C. 20006; (202) 254-4862. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION:

Introduction

Under section 4203(a) of Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act, (ERISA), a complete withdrawal from a multiemployer pension plan is generally defined as the permanent cessation of an employer's obligation to contribute under the plan, or the permanent cessation of all covered operations under the plan. Under section 4205, partial withdrawal generally occurs when an employer reduces covered operations by seventy percent, or removes a continuing facility or bargaining unit from the plan while continuing to do the previously covered work at the facility or in the area. Thus, the general rules on complete and partial withdrawal identify those events that normally result in a loss to the plan's contribution base.

However, Congress recognized that cessation of the obligation to contribute by an employer in certain industries does not normally weaken the plan's contribution base. The building and construction industry was identified as one industry in which withdrawals typically do not adversely affect the plan unless an employer continues to do the same work in the same area. In this industry, work is generally on a project-by-project basis, an employer's covered employment may fluctuate drastically, and when a project ends an employer's workers will normally remain in the labor pool available for employment by other contributing employers. Because of these factors, Congress established special withdrawal rules for the construction industry. (Throughout this notice, the terms "building and construction industry" and "construction industry" are used interchangeably.)

The special construction rule applies to a construction employer who is participating in a construction plan. A construction plan is defined as a plan that primarily covers employees in the building and construction industry; an employer is a construction employer if substantially all of the employees for whom the employer has an obligation to contribute under the plan work in the building and construction industry (ERISA section 4203(b)(1)). (For non-construction plans, the special construction rule applies only if a plan amendment is adopted which extends the rule to construction employers within the plan (section 4203(b)(1)(B)(ii).)

Under ERISA section 4203(b)(2), a complete withdrawal occurs only if a construction industry employer ceases to have an obligation to contribute under the plan, and the employer either continues to perform previously covered work in the area of the collective bargaining agreement or resumes such work within five years without renewing the obligation to contribute at the time of resumption. Under section 4208(d)(1), a construction industry employer is liable for a partial withdrawal "only if the employer's obligation to contribute under the plan is continued for no more than an insubstantial portion of its work in the craft and area jurisdiction of the collective bargaining agreement of the type for which contributions are required".

ERISA does not contain definitions of the critical terms in section 4203(b): "building and construction industry",[1] "substantially all", and "primarily". The purpose of this advance notice of proposed rulemaking is to solicit public comment on whether PBGC should attempt to define these terms by regulation, and, if so, on the possible options for those definitions. After reviewing the comments received pursuant to this notice, PBGC may issue

[1] For legislative history, see Senate Labor and Human Resources Committee, 96th Cong., 2d. Sess., The Multiemployer Pension Plan Amendments Act of 1980: Summary and Analysis of Consideration 14 (Comm. print, April 1980); and H.R. Rep. No. 869, Pt. I, 96th Cong., 2d Sess. 76 (1980).

a proposed regulation containing definitions of some or all of those terms.

Need for Definitions

Many construction contractors contribute to plans in which all covered employers are engaged in construction and in which all participants work only on the site of construction projects. In these cases, it is clear that the building and construction industry special withdrawal rules apply. However, some pension plans are mixed plans that cover both construction and non-construction employers. Some plans also include employers who are involved in both on-site construction work and off-site activities. Because of these variations, without a definition of "building and construction industry", plan sponsors may have difficulty determining—

(1) whether their plans are construction plans;

(2) whether an individual employer is a construction employer; and

(3) when a plan or employer, once so classified, ceases to be eligible for the special rules.

Therefore it may be desirable for PBGC to provide some guidance in this area. The first question, however, is whether PBGC should attempt to develop its own definition of "building and construction" or whether it should, instead, rely on definitions of the term that already exist under other laws.

Definition of "Construction Industry" Under Other Laws

Two Federal labor laws, the National Labor Relations Act, as amended (NLRA), and the Davis-Bacon Act, have specific provisions concerning the building and construction industry. In determining the appropriate scope of "construction" work, both laws emphasize the importance of work actually done at the construction site.

For employers in the building and construction industry, NLRA section 8(e) provides an exception for on-site work from the general prohibition against "hot cargo" clauses, and section 8(f) similarly provides an exception from rules on "prehire" agreements (29 U.S.C. 158 (e) and (f)). These exceptions recognize that, due to the casual and intermittent nature of employment, the hiring practices and collective bargaining relationships in the construction industry are unlike those in many other industries.[3]

Although the NLRA contains no definition of "construction industry", case law does provide some guidance. Under NLRA section 8(f), "building and construction industry" has been interpreted to exclude employers who manufacture and assemble products which are subsequently installed by the employees of *other* employers at the construction site.[4] In a section 8(f) case, the NLRB underscored the importance of actual on-site work to the definition:

"* * * the so-called building and construction concept subsumes *the provision of labor whereby material and constituent parts may be combined on the building site* to form, make, or build a structure." [5]

The Davis-Bacon Act, which covers federally financed and assisted construction projects and requires that construction contractors pay prevailing wages and fringe benefits, also does not define building and construction work. However the Department of Labor, which administers the Davis-Bacon Act, has issued by regulation a comprehensive definition of construction work and related terms. In relevant part, the regulation provides: "The terms 'building' or 'work' generally include construction activity as distinguished from manufacturing, furnishing of materials, or servicing and maintenance work. The terms include without limitation, buildings, structures, and improvements of all types * * * The manufacture or furnishing of materials, articles, supplies, or equipment * * * is not a 'building' or 'work' within the meaning of the regulations in this part *unless conducted in connection with and at the site* of such a building or work * * *".

"The terms 'construction', 'prosecution', 'completion', or 'repair' mean all types of work *done on a particular building or work at the site* thereof * * * including without limitation, altering, remodeling, painting and decorating, the transporting of materials and supplies to or from the building or work by the employees of the construction contractor or construction subcontractor, and the manufacturing or furnishing of materials, articles, supplies or equipment *on the site of the building or work* * * * in the construction or development of the project by persons employed by the contractor or subcontractor * * *".[6] (Emphasis supplied.)

The Department of Labor has also issued an administrative opinion defining the site of work. Under this opinion, the "site of work" is the "physical place" where the "construction * * * will remain when work on it has been completed." [7] The size of the site is usually limited, but in geographically large projects, such as airports or dams, the site may include "(f)abrication plants, 'mobile factories', batch plants, borrow pits, job headquarters, tool yards, etc. * * * provided they are dedicated exclusively or nearly so to performance on the contract and are so located in proximity to the actual construction location that it would be reasonable to include them." [8]

That opinion also indicates that the Davis-Bacon Act wage rate decisions apply only to the contractor's or subcontractor's employees that perform work on the site of the construction project. However, employees who normally work off-site at, for example, a factory or tool yard, but who go to the site to perform activities pursuant to the on-site contract, are covered by the Davis-Bacon Act for the actual time worked on-site.[9]

The Standard Industrial Classification (SIC), which is published by the Office of Management and Budget and is widely used by government and the private sector to classify various types of economic activities, provides additional guidance on the meaning of "construction industry".[9] Under the SIC, the term "construction" includes "new work, additions, alterations and repairs."[10] Three broad types of construction activity are identified under the SIC scheme: (1) building construction by general contractors or operative builders; (2) other construction (*e.g.* streets, bridges, and sewers) by general contractors; and (3) construction by special trade contractors, which includes activities such as plumbing, painting, electrical work and carpentry. However, the installation of prefabricated building equipment and materials, which is "performed as a service incidental to sale" by employees of the manufacturing company, is excluded from the construction classification, and instead classified within the appropriate manufacturing or trade division.[11] Also excluded from the definition is on-site work by a firm which is not primarily engaged in construction activity, but which performs construction work for its own account and with its own employees ("force account construction").[12]

[11] *Id.*, at 48.

[12] *Id.*

Thus, the SIC definition of construction, like that under the Davis-Bacon Act and the NLRA, focuses on work performed by construction employers on the site of a construction project.

PBGC could adopt a regulation providing that the term "construction industry" would have the same meaning under ERISA as it does under, for example, the Davis-Bacon Act. That approach would have the advantage of using a definition familiar to both government and industry. But is a definition which, in the example given, was developed for wage and hour determinations, wholly suitable for the purposes of the pension insurance system? In addition, if the ERISA definition were linked to that in another law, it would be subject to modification by other agencies and the courts without the involvement of the PBGC. Is that advisable?

On the other hand, PBGC could, after considering the existing definitions, develop its own definition for "construction industry".

Options for a PBGC Definition of Construction Industry

In developing an appropriate PBGC definition for "building and construction industry", three basic issues would need to be addressed—

—What is "construction" work?

—Should the definition be restricted to work actually performed at the site, or should it be broadened to include off-site work?

—If so, what kinds of off-site activities should be included, and under what circumstances?

How should construction work be defined, so as to distinguish it from other industries and other activities, such as manufacturing? In this regard, the previously discussed definitions under other laws provide useful guidance. It is clear under definitions that "construction" includes the actual on-site erection, alteration and repair of a structure, whether it be an office building, a highway, or a sewer system. However there is other work which is performed at the construction site, but not directly linked to the actual erection of a structure. For example, an on-site food concession presumably would not be considered construction. But what about the delivery of needed materials, or the on-site repair of construction machinery? How should the definition treat those kinds of related, on-site support services?

Once the nature of the work is determined, a second basic question involves whether and where to draw a line between on-site and off-site work. In accord with the Davis-Bacon Act, the definition could be limited only to construction work that is actually performed at the site of the project. By restricting the special withdrawal rules to work done on-site, this option may pose the least risk to the insurance system and may also minimize the need for *ad hoc* determinations by the PBGC. However, would this approach be likely to upset existing relationships between plans and employers who have traditionally viewed themselves as being in the construction industry? Moreover, it is appropriate for the definition to exclude activities of an employer that are closely related to its on-site work (*e.g.*, shop fabrication of materials to be installed at the project site) simply because they are not performed at the construction site?

The definition could be broadened to include off-site work to the extent that work supports and employer's on-site activities. For employers who are engaged in both on-site and off-site construction work, this approach would have the advantage of treating an employer's work as an integrated operation. There may also be benefits to plans, since employers with off-site as well as on-site operations may be more likely to join multiemployer plans or increase existing operations under this option, as compared to the first option.

However, broadening the definition to include certain off-site activities could result in added risk to plans and to the PBGC insurance system. Under that approach, the special withdrawal rules would apply, for example, to an employer's off-site fabrication activities when the resulting product is installed on-site by its employees. This might enable the employer to withdraw from the plan for its off-site work, while continuing to do that work in the area of the plan, without incurring liability for a partial withdrawal under section 4208(d). Or an employer could move its off-site work outside the jurisdiction of the collective bargaining agreement and continue to ship materials into the area of the plan for on-site installation (whether by its employees or by others) without incurring liability. Both situations could damage the plan's contribution base. These problems arise from including in the definition of construction, work that is essentially manufacturing in nature. Because this work need not be performed at a particular place, its removal could have the effect of diminishing work in the area of the plan.

Therefore if the definition is to include certain off-site work, PBGC may need to specify the kinds of work that are included, as well as other appropriate restrictions. For example, what requirements, if any, should the rule impose on the relationship between an employer's on-site and off-site work? In line with decisions under the NLRA, the definition could exclude off-site work where the resulting product was actually erected on-site by employees of a different employer. The rule could also require a particular mix of on-site compared to off-site work. Should these or any other requirements be imposed?

Finally, if certain off-site work is to be considered construction work, should the definition include an employer's off-site work when it is covered under a different plan than the employer's on-site work? A potential effect of such a rule could be that a plan, under which no on-site construction work is performed, would qualify as a construction plan. Is this a desirable result?

Tests for Eligibility

In order to be eligible for the special construction rule under ERISA section 4203(b)(1), the plan must "primarily" cover employees in the building and construction industry, and "substantially all" of the employees for whom an employer contributes under the plan must perform construction work.[13] While employers must meet the "substantially all" test in order to be covered by the special rules, a plan that does not "primarily" cover construction employees (and thus is not automatically covered by the special rules) may be amended to apply the special rules to only its qualified construction employers (section 4203(b)(1)(B)(ii). Neither "primarily" nor "substantially all" is defined in ERISA. Should the PBGC define these terms? If so, how should they be defined?

According to *Webster's New Collegiate Dictionary*, "primarily" means "for the most part" or "chiefly", suggesting that something stands in first rank of importance. *Webster's* defines "substantial" as "considerable in quantity" or "significantly large". Should PBGC follow this approach and adopt adjectival definitions of the terms? Would such definitions provide enough precision for purposes of

[13] The special withdrawal rule for the construction industry applies only to the employer's operations covered under a construction industry plan. That is, an employer that does a relatively small amount of construction work compared to its total operations would be, for the purposes of the special rule, a construction employer in a plan to which it contributed only for its construction employees. On the other hand, that same employer would not be a construction employer in another plan to which it contributed only for its nonconstruction operations.

determining the applicability of the construction rules? One effect of this approach would be that these terms would have different meanings in different plans. Is this desirable?

Another approach would be to use quantitative definitions. For example, "primarily" might be defined as "more than 50%", and "substantially all" as "at least 85%".[14] However, is it clear that "substantially all" means something greater than "primarily"? Also, if a quantitative definition is preferred, should a single number or a range of numbers be chosen?

Still a third option would be a combination of the adjectival and quantitative approaches. It can be argued that the terms "primarily" and "substantially all" are not directly comparable; that "primarily" refers to the character of a plan, while "substantially all" indicates a quantity, a numerical amount. Following this reasoning, a percentage test may be appropriate only for the "substantially all" requirement, with "primarily" defined in adjectival terms. Which of these general approaches is most desirable?

In addition, do these definitions need to specify the units of measurement for determining whether a plan and its contributing employers meet the "primarily" and "substantially all" requirements under ERISA section 4203(b)(1)? Various units for measuring construction work are available, including—

1. the percentage of employees performing construction work;
2. the number of hours of construction work done by employees; or
3. the share of total plan contributions attributable to construction work.

Should plans be given the flexibility to select any of the above options? Are there other units of measurement that should be considered?

The last issue in determining whether a plan and its contributing employers meet the section 4203(b)(1) requirements is the period of measurement. That is, must the plan and the employer meet the tests only at the time the issue is raised, *e.g.*, upon the employer's withdrawal, or should the tests take into account the characteristics of the plan and the employer over a longer period of time? For example, should it be necessary that a plan or employer meet the appropriate test for the current plan year and for a specified number of preceding plan years? A longer test period may mean greater stability and certainty for plans and employers. If a longer test period is used, should it be required that the test be met for every year in the test period or for just a certain number of years within the test period?

For an employer, eligibility for the special withdrawal rule is usually relevant only at the time of withdrawal from the plan. For a plan, however, there is a greater need to know on a continuing basis whether it qualifies for the special rule, because, among other reasons, plan status affects the allocation rule under ERISA section 4211 the plan is required to use.[15] Because of this, should PBGC provide that once a plan is classified as a building and construction industry plan, that status would continue until there is a fairly drastic change in plan composition? In other words, should the standards for determining that a plan is no longer a construction industry plan be different from the standards that qualify a plan as a construction plan?

Requests for Comments and Suggestions

PBGC invites comments on the issues discussed in this notice, including specific suggestions on how a regulation might address these issues.

List of Subjects in 29 CFR Part 2646

Employee benefit plans, Pensions, Pension insurance.

Issued at Washington, D.C. on this 21st day of September, 1982.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

[14] It is noted that for purposes of the special trucking industry rule under ERISA section 4203(d), the legislative history of the Multiemployer Act indicates that "substantially all" means "at least 85%". *Congressional Record*, p. H7900, August 26, 1980 (statement by Representative Frank Thompson).

[15] Under section 4211(c)(1), "a plan which primarily covers employees in the building and construction industry" must use the presumptive rule in paragraph (b) of that section for allocating unfunded vested benefits.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 35

[WH-FRL 2161-8]

Construction Grants Program; Policies and Procedures; Proposed Rule

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule, with request for comments.

SUMMARY: The proposed regulation establishes policies and procedures for delegating and overseeing administration of the construction grants program to the States under Section 205(g) of the Clean Water Act, as amended. The delegation agreement is a precondition for a construction management assistance grant under Section 205(g). Grant administration requirements and procedures are contained in the proposed Subpart A of this part. This proposed rule, in conjunction with Subpart A, will revise and replace the current Section 205(g) regulation (Subpart F) contained in this subpart.

DATE: Comments must be received by October 28, 1982.

ADDRESS: Please submit your comments in duplicate to: Central Docket Section (A-130), Docket No. [G-82-04], Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Comments received may be inspected at the Central Docket Section, West Tower Lobby, Gallery Room 1, between 8:15 a.m. and 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Carl Reeverts, Office of Water Program Operations (WH-546), Environmental Protection Agency, Washington, D.C. 20460, (202) 382-5839.

SUPPLEMENTARY INFORMATION: Since the enactment of Section 205(g) of the Clean Water Act in December, 1977, authority to administer the construction grant program has been delegated to 45 States and Territories through the execution of delegation agreements. By the end of fiscal year 1982, States will have assumed over 60 percent of the direct program workload previously undertaken at the Federal level. Thus, the initial delegation program is largely in place.

The requirements for executing and amending State delegation agreements, although streamlined, are basically unchanged and will not affect existing agreements. Changes are limited to removal of outdated and unnecessary provisions, language changes that encourage full State delegation, and the broadening of EPA and State responsibilities related to oversight, evaluation, and planning under delegation.

The proposed regulation clearly reflects the Agency policy to deemphasize procedural review and oversight in favor of overall program management. EPA retains its responsibility for adherence to Federal requirements and progress toward national goals and objectives, but will not intrude on the States' prerogative under delegation to manage the program. Although EPA will continue to

make final determinations for selected non-delegable requirements as required by statute, delegable activities and preliminary decisions for all activities will be the responsibility of the States under full delegation. EPA oversight will be limited to key areas of national and regional concern and will focus on program effectiveness in achieving legislative and policy objectives. In support of the regulation, EPA will propose delegation guidance for Regional and State use in developing delegation management approaches.

Summary of Major Changes

The following table shows the relationship between the current regulation and this revision. Also shown are the portions of the current regulation that are being transferred and included in the proposed Subpart A and other regulations.

Current subpart F	Current title	Revision	
		Proposed subpart J	Proposed other
§ 35.1000	Purpose and scope	35.3000	35.100, 35.300.
35.1005	Policy	35.3005	
35.1010	Application for grant		35.140, Part 30.
35.1015	Eligibility for funding		35.300.
35.1018	Limitations on award		35.310.
35.1020	Grant amount and award		35.115, 35.310.
35.1025	Payment		Part 30.
35.1030	Delegation agreement	35.3010	35.130, 35.310.
35.1030–1	Scope of delegation agreement	35.3015	
35.1030–2	Certification procedures	35.3020	
35.1030–3	Limitation on delegation	35.3015	
35.1030–4	Terms of delegation agreement	35.3010	
35.1030–5	Implementation of the delegation agreement	(1)	
35.1030–6	State assurance	35.3010	
35.1030–7	Determination of competence	35.3010	
35.1030–8	Amendments	35.3010	
35.1030–9	Right of review; appeal	35.3030	
35.1033	Public participation	35.3035	
35.1035	Adherence to budget estimates		Part 30.
35.1040	Program evaluation and reporting	35.3025	35.130, 35.150.
35.1045	Reduction in grant amount		35.150.
35.1050	Disputes	35.3030	Part 30.

[1] Deleted.

As the table illustrates, the proposed regulation retains (in modified form) only the program requirements for the delegation agreement process. All portions of the current Subpart F regulation related to administration of grants under Section 205(g) have been moved to the proposed Subpart A regulation, Financial Assistance for Continuing Environmental Programs (40 CFR Part 35, Subpart A), 47 FR 25912 (June 15, 1982), and to the proposed Part 30 regulation, General Regulation for Assistance Programs (40 CFR Part 30), 47 FR 26564 (June 18, 1982). References related to Section 205(g) reserves, obligations, and reallotments were deleted from the proposed regulation and are provided in detail in Subpart I, Grants for Construction of Treatment Works, 47 FR 20450 (May 12, 1982). These three regulations should be read together with this regulation to understand the substantive and administrative requirements governing the construction grant delegation program.

Delegation Policy

The proposed regulation broadens the delegation policy to include a stronger statement to assure full delegation of all project level activities, including delegation of preliminary determinations for non-delegable requirements (e.g., grant closeouts, payments, and environmental assessments). It also adds a reference to EPA oversight of State performance, based on results-oriented evaluation, to the policy statement. These changes are intended to strengthen State responsibility for all project level decisions, while States work with EPA to attain national program results. (§ 35.3005.)

Delegation Agreement

The proposed regulation consolidates several Subpart F sections and eliminates redundancies and outdated references. One section now contains all the requirements and contents of the initial delegation agreement and future revisions. The basic components of the delegation agreement remain in the regulation, but in a less detailed form. (§ 35.3010.)

Extent of Delegation

The proposed regulation simplifies, clarifies, and updates the scope and authority conveyed by the delegation agreement. The list of delegable activities in the current Subpart F regulation was eliminated and replaced by a general statement related to administering the construction grants program. Also, the explanation of the non-delegable activities was simplified and made less specific. (§ 35.3015.)

Certification Procedures

The proposed regulation revises the current subsection on procedures for certifying construction grant projects, but does not change the existing requirements. A new subsection is provided to specify the conditions which a delegated State must meet in order to have "sufficient authority" under delegation. A definition of "sufficient authority" was necessary to implement Section 219 of the Act (added by the 1981 amendments). Under Section 219, EPA is required to approve or disapprove an application for a construction grant within 45 days, if a State with sufficient authority under delegation certifies the project for award. States will have sufficient authority when they have assumed responsibility for all delegable pre-award requirements contained in the construction grant regulation (40 CFR Part 35, Subpart I, 47 FR 20450 (May 12, 1982)). A list of the specific requirements is included in this section. The definition is objective and non-discretionary and is based totally on the extent of delegation. (§ 35.3020.)

Oversight of State Performance

The proposed regulation in § 35.3025 broadens the scope of performance evaluation beyond that contained in the current § 35.1040 of Subpart F. The current regulation emphasizes compliance with the terms of the delegation agreement, particularly related to the procedures to be followed in carrying out each delegated function. (See § 35.1034–4(a)(7).) The proposed regulation links all oversight activities to a set of program and management objectives, and emphasizes performance in terms of an annual oversight program designed around achievement of priority objectives and results (called performance areas). The specific monitoring and evaluation activities may include any method of oversight, including procedural review as appropriate, but process-related activities should be sharply reduced as delegation reaches the advanced stage.

The development of an annual oversight program, as one of the terms of the delegation agreement (see § 35.3010(c)(7)), is a condition to receiving a construction management assistance grant under Section 205(g). The annual oversight program is the blueprint for the day-to-day monitoring

and evaluation of activities under delegation and is the vehicle that links the various oversight activities to achievement of program and management objectives. It supplements the delegation agreement on an annual basis to reflect the specific needs and requirements of the upcoming fiscal year.

All oversight activities, whether formal or informal, should be conducted with the understanding that the relationship between the Region and the State is that of a partnership. The two are working toward mutually agreed-upon program and management objectives. The purpose is to give feedback to all responsible entities to improve program performance. The oversight program will hold the delegated States accountable for performance against objectives and Agency priorities in the same manner in which Agency management is held accountable, while at the same time allowing considerable flexibility in terms of operating the program.

The proposed regulation does not prescribe what program and management objectives should be included in the oversight program or the specific monitoring and evaluation activities that should be undertaken to assess performance. Rather, it establishes oversight requirements in terms of a process, schedule, and progress against priority objectives. The principal aspects of the annual oversight program are threefold: identification of priority management and program objectives for the upcoming fiscal year, including development of performance measures; negotiation of an annual work plan for each performance area that includes both qualitative and quantitative commitments; and performing an annual on-site performance evaluation, covering performance areas identified in the oversight program. The key for its success is in the design of the oversight program, which ensures that all oversight activities are jointly agreed to between the Region and State, are known in advance, and can be integrated into the day-to-day management of delegation.

The work program required under Subpart A of this part, as a portion of the 205(g) grant application, contains many of the same elements as the annual oversight program (i.e., program commitments) and the delegation agreement (i.e., staffing, delegation schedule, and cost estimates). It is very important that the grant and program process be integrated to avoid duplication of effort. It was agreed in the drafting of the Subpart A and Subpart J regulations (under Part 35) that the delegation agreement and the oversight program would be broader in scope than the grant application and likely to precede the grant application in the planning process. Therefore, the results of the planning under the oversight program (e.g., the priority objectives and negotiated workplan) should be referenced in the 205(g) grant application. At no time should the outputs required under the grant work program be beyond the scope of the negotiated commitments in the oversight program.

Annual guidance on national priorities, performance areas, and resource assumptions for developing the oversight program will be issued each February as part of the Office of Water Operating Guidance and Accountability System. This should provide sufficient time for all Regions and States to develop their annual oversight program and work plan before the beginning of the operating year. (§ 35.3025.)

Review of State Decisions

The proposed regulation strengthens the role of the States under delegation by requiring a grantee or citizen to request the State to review its decision first, before contacting EPA. This emphasizes to all parties the responsibility of the State in project level decisions. It is intended to allow resolution of most issues without EPA involvement. It is not intended to require the State to establish any formal process for resolving disputes. However, the State must set down the reasons for its decision within a reasonable time after the request for review in order for the Regional Administrator to have a record for his review of the disputed action on omission. Failure of the State to address the disputed action or omission in writing in a timely fashion will not preclude Regional Administrator review. This section will not apply to State agency decisions concerning use of State funds for the construction grant program or for any State program managed by the State agency. (§ 35.3030.)

Public Participation

The public participation requirements were streamlined and some of the provisions in the current Subpart F regulation were eliminated. The requirements in the current regulation for States to provide resources to oversee public participation and for a public meeting or workshop to be held, in conjunction with EPA's annual review of State performance under delegation, were removed. The proposed regulation requires EPA and the State to consult informally with interested or affected groups and citizens when developing or amending a delegation agreement. A public meeting rather than the current, more formal public hearing, will be held only if the Regional Administrator or the State agency determines that significant interest exists. This regulation is consistent with the current Part 25 regulation covering public participation (40 CFR Part 25), which provides the minimum requirements for appropriately involving the public in construction grants program delegation. (§ 35.3035.)

Regulation Development

Under Executive Order 12291, EPA is required to determine if this is a major rule. EPA has determined that this is not a major rule. This rule will not have a substantial impact on the Nation's economy or large numbers of individuals or businesses. There will be no major increase in cost or prices for consumers, individuals, industries, and Federal, State, or local government agencies. Additionally, it will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Pub. L. 96-354 (5 USC 601). The rule was submitted to the OMB for review as required in E.O 12291.

The reporting provisions that are included in this proposed rule are modeled on the current requirements, which were submitted to and approved by OMB under Section 3504(h) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* The approved information collection requests cover the terms of the mutually negotiated delegation agreements, the functional schedules which indicate when States begin performing specific activities, and State reporting of program performance. Associated records are kept by the States as a standard management practice. Any final rule will include an explanation of how the reporting requirements reflect comments from OMB and the public.

List of Subjects in 40 CFR Part 35

Air pollution control, Grant programs—environmental protection, Indians, Pesticides and Pests, reporting and recordkeeping requirements, waste treatment and disposal, water pollution control.

Dated: September 21, 1982.

Anne M. Gorsuch,

Administrator.

For the reasons set forth in the preamble, EPA is proposing to amend Part 35 of Title 40, by removing Subpart F and adding a new Subpart J to read as follows:

PART 35—STATE AND LOCAL ASSISTANCE

* * * * *

Subpart J—Construction Grants Program Delegation to States

Sec.

35.3000 Purpose.
35.3005 Policy.
35.3010 Delegation agreement.
35.3015 Extent of delegation.
35.3020 Certification procedures.
35.3025 Oversight of State performance under delegation.
35.3030 Right of review of State decisions.
35.3035 Public participation.

Authority: Sec. 205(g) of the Clean Water Act, as amended, 33 U.S.C. 1251 *et seq.*

Subpart J—Construction Grants Program Delegation to States

§ 35.000 Purpose.

This regulation establishes policies and procedures for the development, management, and EPA oversight of State administration of the construction grants program under Section 205(g) of the Clean Water Act, as amended. The delegation agreement between EPA and the State is a precondition for a construction management assistance grant under Section 205(g). Program requirements for grants authorized by Section 205(g) for activities under Sections 402, 404, and 208(b)(4) are provided in Part 130. Administration of all Section 205(g) grants follows the procedures established in Subpart A of this part.

§ 35.3005 Policy.

(a) EPA's policy is to delegate management of the wastewater treatment construction grant program to the maximum extent possible consistent with the objectives of the Act, prudent fiscal management, and EPA's overall national responsibility for the program. EPA encourages States to undertake all project level activities, including preliminary determinations for non-delegable requirements. The objective of delegation is to eliminate duplication of Federal and State effort in the management of the construction grant program, to increase State participation in the construction grant program, and to improve operating efficiency.

(b) Program delegation is to be accomplished through a formal delegation agreement between the Regional Administrator and the State. The delegation agreement will specify the functions which the State will perform and procedures for State certification to EPA.

(c) EPA will oversee the performance of the State under delegation to ensure that progress is being made toward meeting the construction grant program objectives and that State is continuing to employ administrative, fiscal, and program controls to guard against fraud, misuse, and mismanagement of public funds. Oversight will also include review of the State management process to ensure it is efficient, effective, and assures timely State reviews.

§ 35.3010 Delegation agreement.

(a) Before execution of the delegation agreement, the Regional Administrator must determine that the unit of the State agency designated to implement the agreement is capable of carrying out the delegated functions. The Regional Administrator will evaluate all aspects of the unit which directly affect the State's capability to implement the agreement.

(b) In the delegation agreement, the State agency will assure the Regional Administrator that it will execute its responsibilities under the delegation agreement in conformance with all applicable Federal laws and regulations.

(c) The delegation agreement will:

(1) Designate the organizational unit within the State responsible for the implementation of the delegation agreement;

(2) List the functions delegated and functions to be delegated, with a schedule for their assumption by the State;

(3) Identify procedures to be followed and records to be kept by the State and EPA in carrying out each delegated function;

(4) Identify the staffing, hiring, training, and funding necessary to carry out the delegated functions;

(5) Estimate program costs by year for the term of the delegation agreement;

(6) Establish an accounting and audit process, acceptable to the Regional Administrator, to identify and relate State costs to delegated functions; and

(7) Identify the form and content of the program for EPA oversight of State performance consistent with the requirements in § 35.3025 of this Subpart, including the frequency, method, and extent of Regional monitoring and evaluation.

(d) The term of the delegation agreement shall generally be 5 years. However, as subsequent construction management assistance is awarded, the term may be extended to maintain the 5 year period.

(e) The delegation agreement will be revised, as necessary, to reflect significant program or procedural changes, as determined jointly by the Regional Administrator and State agency.

§ 35.3015 Extent of delegation.

(a) Except as provided in paragraph (c) of this section, the Regional Administrator may delegate to the State agency authority to review and certify all construction grant documents required before and after grant award and to perform all construction grant review and management activities necessary to administer the construction grants program.

(b) The Regional Administrator may also delegate to the State agency the authority to act as the manager of waste treatment construction grant projects for small communities. In this capacity, the State agency may serve as the community contracting agent. The State agency may enter into an agreement with another organization within the State capable of performing the service. The terms of the agreement must be approved by the Regional Administrator before its execution.

(c) The Regional Administrator shall retain overall responsibility and exercise direct authority for the construction grant program for the following:

(1) Construction grant assistance awards, grant amendments, and payments;

(2) Projects where an overriding Federal interest requires greater Federal interest or participation;

(3) Final determinations under Federal statutes and Executive Orders (e.g., the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, Title VI of the Civil Rights Act of 1964, 42 U.S.C. 2000d *et seq.*), other than Sections 201, 203, 204, and 212 of the Clean Water Act;

(4) Final resolution of construction grant audit exceptions; and

(5) Final procurement protest appeal determinations under Part 33, Subpart G, of this subchapter.

§ 35.3020 Certification procedures.

(a) The State will furnish a written certification to the Regional Administrator for each construction grant project application submitted to EPA for award. The certification must state that all Federal requirements, within the scope of authority delegated to the State under the delegation agreement, have been met. This

certification must be supported by documentation specified in the delegation agreement. The documentation must be made available to the Regional Administrator upon request.

(b) States with sufficient authority under Section 219 of the Act to review applications need forward only the EPA Form 5700–32 application with the certification. Sufficient authority exists when States have assumed responsibility under delegation for applicant compliance with all delegable pre-award requirements, as provided for in the following sections of Subpart I of this part: § 35.2030, Facilities planning; § 35.2040(a) and (b), Grant application; § 35.2042, Review of grant applications; and §§ 35.2100, Limitations on award, through and including 35.2127, except for § 35.2101, Advanced treatment reviews for projects valued over $3 Million, § 35.2112, Marine waiver discharge applicants, and § 35.2113, Environmental review (as it applies to final decisions under the National Environmental Policy Act).

§ 35.3025 Oversight of State performance under delegation.

The Regional Administrator will oversee the performance of the State under delegation on a continuing basis, under the annual oversight program developed as a supplement to the delegation agreement at the beginning of each planning year. (§ 35.3010(c)(7)). The purpose of the oversight program is to ensure that both the delegated State and EPA efficiently and effectively execute the fiscal and program responsibilities under the Clean Water Act and related legislation. It does this by facilitating improved State and EPA administration of the program through program monitoring, evaluation, and feedback consistent with EPA and State roles under delegation. The oversight program will include the following components:

(a) *Program objectives and annual performance areas.* The foundation of the oversight program is a list of program and management objectives that describe what results are to be achieved in the program for the State, recognizing the national legislation and unique State requirements. Annually, the priority objectives, or performance areas, for the planning year must be identified and agreed to, through extensive collaboration among the State, the Region, and the National program. The basis for all oversight activities should be this set of agreed-upon multiyear objectives, and the oversight program is to provide the linkage between the objectives and the activities.

(1) For each performance area, the oversight program should specify key measures of performance (both quantitative and qualitative) and enumerate the specific monitoring and evaluation activities and methods to be performed during the operating year to assess performance against the objective.

(2) State oversight programs must include at a minimum the performance areas identified as priority objectives by the Administrator on an annual basis.

(3) The monitoring and evaluation activities in the oversight program should be appropriate to the delegation situation, reflecting phase of delegation, feedback to performance, and other circumstances unique to the Region and State. Oversight activities will shift toward program and performance monitoring and away from procedural reviews as delegation proceeds.

(b) *Annual work plan.* Annually, the Region and delegated State will negotiate a plan for each performance area for the succeeding year, to include expected outputs and program results. The State will manage against this work plan and report on progress in accordance with the annual oversight program and the delegation agreement. EPA will use the work plan to monitor and evaluate the program.

(c) *Annaul on-site performance evaluation.* Review and evaluation of the program will occur at least annually, and cover at a minimum performance against the program and management performance areas identified in the oversight program and the commitments agreed to in the work plan. The evaluation will cover performance of both the EPA and the State in these performance areas. Upon completion of the evaluation, the delegation agreement may be revised to reflect changes resulting from the evaluation.

§ 35.3030 Right of review of State decisions.

(a) Any construction grant applicant, recipient, or interested citizen who has been adversely affected by a State's action or omission must first request review by the State. After the State has made its determination, the adversely affected party may request the Regional Administrator to review the State agency's decision. The State must provide, in writing, within a reasonable time, the basis for its decision regarding the disputed action or omission. A Regional Administrator's decision is final unless appealed in accordance with Part 30 of this subchapter. A State's failure to address the disputed action or omission in a timely fashion will not preclude Regional Administrator review.

(b) Requests for Regional Administrator review must be in writing, adequately state the basis for the request, and include a copy of any written State determination of the review request. The request must be received by the Regional Administrator within 30 days after the State determination of the review request has been revieved by the adversely affected party, or within a reasonable time if the State fails to address the issue(s) raised in writing.

§ 35.3035 Public participation.

(a) Public participation during the development, review, approval, and major revision of the delegation agreement shall be in accordance with the requirements of Section 101(e) of the Act, Part 25 of this chapter, and this subpart.

(b) The Regional Administrator and the State will consult informally with interested or affected groups and citizens during negotiation of the initial delegation agreement, and also during renegotiation, if major amendments or revisions of significant interest to the public, as determined by the Regional Administrator or the State agency, are being made to the delegation agreement. A copy of the draft delegation agreement will be made available to the public before it is executed by EPA. One or more public meetings will be held at least 30 days before EPA executes the delegation agreement, if the Regional Administrator or the State agency determines that significant interest and desire for a public meeting exist.

40 CFR Part 230

[OW-FRL 2218-2]

Guidelines for Specification of Disposal Sites for Dredged or Fill Material

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of denial of requests for extension of comment period.

SUMMARY: On August 23, 1982, EPA issued an Advance Notice of Proposed Rulemaking requesting comments on the guidelines for specification of disposal sites for dredged or fill material under section 404(b)(1) of the Clean Water Act (47 FR 38798). The comment period on this notice expired September 22, 1982. EPA has received a number of requests that this comment period be extended for at least two weeks. EPA is denying these requests, however, because of the

urgency of making clarifying reforms to the section 404 program and, in particular, the section 404(b)(1) guidelines. Of course, any such revisions to the guidelines will be proposed in the Federal Register, and opportunity for public comments on the proposal will be provided.

FOR FURTHER INFORMATION CONTACT: Suzanne Schwartz, Criteria and Standards Division (WH–585), Office of Water, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, 202–472–3400.

SUPPLEMENTARY INFORMATION: The section 404(b)(1) environmental guidelines were originally promulgated by the Administrator in interim-final form on September 5, 1975, after consultation with the Corps of Engineers (COE). After promulgation of the interim-final guidelines, the Act was substantially amended in 1977. As a result of the 1977 amendments, the guidelines were revised and published in final form on December 24, 1980, simultaneously with proposed revised testing requirements for the guidelines.

In August 1981, the section 404 program was designated for review by the President's Task Force on Regulatory Relief. On May 7, 1982, the Task Force announced a program of administrative reforms to simplify the section 404 program and eliminate unnecessary delays. As part of this process, on August 23, 1982, EPA published in the Federal Register (47 FR 36798) an Advance Notice of Proposed Rulemaking soliciting comments on the environmental guidelines promulgated by EPA under section 404(b)(1) of the Act.

The 404(b)(1) guidelines are a particularly important part of the section 404 program, because they establish the environmental criteria used to evaluate *all* permit applications and proposed general permits for discharges of dredged or fill material. Neither individual nor general permits may be issued by the COE or by a State with an approved section 404 program unless they are consistent with the 404(b)(1) guidelines.

EPA has received a number of requests that the comment period be extended. Requests for a 30 day extension were received from the Utility Water Act Group on September 10, 1982, the Office of Coastal Zone Management on September 13, 1982, the National Wildlife Federation on September 14, 1982, and the National Marine Fisheries Service on September 15, 1982. A request for a 15 day extension was received from the Attorney General of the State of Illinois on September 21, 1982. These requests are being denied because of the urgency of making clarifying changes to the section 404 program and the need to implement aspects of the administrative reforms recommended by the Task Force in an expeditious and consistent manner. Therefore, we must adhere to a tight regulatory agenda which does not allow for extension of the comment period.

However, because this is an advance notice and not yet a formal rulemaking proposal, we can and will consider comments and supporting information received after the end of the comment period to the extent our schedule allows. Such information should be submitted as soon as possible in order for EPA to give it adequate consideration.

In addition, should EPA propose revisions to the section 404(b)(1) guidelines, the Agency will provide opportunity for public comments both in hearings and in writing on any proposed changes to the guidelines. Any comments submitted in response to the advance notice which could not be considered at this time will be considered as part of the record on any proposal to revise the guidelines.

Dated: September 24, 1982.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

BILLING CODE 6560-50-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 653

[Docket No. 2830–171]

Atlantic Herring Fishery

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of initial decision to withdraw plan approval, proposed repeal of regulations, and request for comments.

SUMMARY: NOAA announces its initial determination to withdraw Secretarial approval of the Fishery Management Plan for the Atlantic Herring Fishery of the Northwest Atlantic (FMP), and proposes to repeal the regulations implementing the FMP. Comments are requested. Withdrawal of FMP approval is necessitated by serious operational difficulties in implementing the FMP, which no longer meets the national standards of the Magnuson Fishery Conservation and Management Act. The intended effect of the repeal of the regulations is to eliminate Federal management of the Atlantic herring fishery until such time as the New England Fishery Management Council prepares a new management plan which can be approved and implemented.

DATE: Comments must be received on or before November 12, 1982.

ADDRESSES: Comments may be mailed to Frank Grice, Chief, Management Division, National Marine Fisheries Service, State Fish Pier, Gloucester, Massachusetts, 01930. A copy of the regulatory impact review may be obtained from Mr. Grice.

FOR FURTHER INFORMATION CONTACT: Barbara S. Claflin, Herring Plan Coordinator, 617–281–3600, extension 351.

SUPPLEMENTARY INFORMATION: The FMP, developed by the New England Fishery Management Council (Council), was approved in December 1978. It was implemented on March 19, 1979 (44 FR 17186), under the Magnuson Fishery Conservation and Management Act (Magnuson Act). Amendment 1 to the FMP revised the procedure for determining when a quota is reached (44 FR 37616). Amendment 2 extended the optimum yield (OY) and seasonal allocations for the Georges Bank and Gulf of Maine management areas through the 1979–80 fishing year (44 FR 56700).

Amendment 3, the most recent amendment to the FMP, was implemented in August 1980 (45 FR 52810). Amendment 3 expanded the management unit to include the herring fisheries from the shoreline of all States out to the seaward limit of the fishery conservation zone (FCZ). Prior to this amendment, the herring fishery within Maine's boundaries was not part of the management unit, although the herring fisheries within other States' boundaries were included. The redefined management unit was designed to manage the species throughout its range, in order to better fulfill the requirements of national standard 30 of the Magnuson Act (16 U.S.C. 1851(a)(3)). Amendment 3 also increased the Gulf of Maine OY and quotas for age-3-and-older fish (age 3+), and modified the "area/period" allocation system.

The result of these amendments is a quota-based management system that depends on State cooperation for its effectiveness. Section 2.2 of the FMP mandates that "All herring age 3 and older taken from territorial waters of all States are to be deducted from the appropriate area/period allocations." Under terms of section 4.2 of the FMP, "all States are relied upon to enforce the

area/period seasonal allocations by closing directed herring fisheries in their territorial waters when the seasonal catch allocations have been taken."

Shortly after approval and implementation of Amendment 3, problems with the herring management system became apparent. The National Marine Fisheries Service (NMFS) was unable successfully to implement the FMP in conformance with the Magnuson Act during the 1980–81 fishing year. When the area/period seasonal catch allocations (quotas) established by the FMP had been reached during the 1980 summer/fall fishing period, the FCZ was closed as required under the implementing regulations. The States, however, failed to take appropriate action. There was a delayed closure of Massachusetts waters and no closures at all of Maine and New Hampshire waters. Under the FMP, the Gulf of Maine quota for the 1980 summer/fall fishing period was 17,850 mt. Herring landings from the FCZ and State waters totaled 57,131 mt, exceeding the quota by 39,281 mt.

The NMFS recognized the need to address the problems with herring management after the failure of the FMP to restrict landings to the quotas and maintain the specified OY, and the failure to attain any assurances from the States that the necessary level of cooperation would be forthcoming. Under authority of section 305(b) of the Magnuson Act, a hearing was held on May 22, 1981, to receive public comments on the operation and continued implementation of the FMP.

In the agency recommendations that resulted from the hearing, the management problems and their causes were detailed. Since 85 percent of the total 1980–81 herring harvest had been taken from territorial waters, FCZ closures without territorial waters closures were ineffective in maintaining the quotas and achieving OY. Inconsistent management between Maine's territorial waters and the FCZ was also identified as a critical factor. Maine deducted from the quota only age-3+ herring greater than 9 inches in length and caught by mobile gear. The FMP requires that all age-3+ herring caught, regardless of length or capture method, be deducted from the quota.

The lack of State cooperation in providing consistent management resulted in a failure to achieve national standards 1 (to achieve OY) and 3 (to manage the fishery as a unit). In addition, it appeared that harvest levels of age-3+ herring are effectively controlled by year class strength, availability of the resource to the fishery, and market demand, rather than by the quotas. Therefore, the fixed-quota management strategy appears inappropriate for management of Atlantic herring. Accordingly, the FMP is also arguably inconsistent with national standard 6, which provides that conservation and management measures must take into account and allow for variations among, and contingencies in, fisheries, fishery resources, and catches.

A letter from the Assistant Administrator for Fisheries, NOAA, to the Council in December 1981 informed the Council that it must clarify and amend various portions of the FMP by July 1, 1982, to resolve management problems and to reconcile the FMP's management measures with NMFS' capability to implement them. The letter also indicated to the Council that, in the absence of action on its part, NOAA/NMFS would take remedial action and either amend the FMP or withdraw plan approval. Although the Council's Herring Oversight Committee has begun to address the problems, the Council did not take significant remedial action by July 1.

NMFS forecasts that, during the 1982 summer/fall fishing period, there will be a larger number of age-3 herring than age-2 herring in the fishery. The fishing patterns of recent years indicate that most of the age-3 herring are likely to be harvested within State boundaries. These stock conditions and harvesting patterns are similar to those that occurred during the 1980 summer/fall fishing period. Therefore, it is likely that quotas will be exceeded, and area/period closures will be necessary. Although NMFS is required by the regulations to close the herring fishery in the FCZ to enforce quotas, Maine and Massachusetts have not guaranteed cooperation in enacting similar closures in territorial waters. As it appears that the implementation problems experienced in the 1980–1981 fishing year will recur, immediate action to withdraw approval of a plan which no longer meets the national standards is required.

Alternatives to withdrawing approval of the FMP include taking no action while waiting for the Council to complete an amendment, or preparing one of several kinds of Secretarial amendment. After careful evaluation of all the alternatives, withdrawal of approval was determined to be the most appropriate alternative. The alternative under which NMFS would take no action and wait for the Council to develop an amendment is not an appropriate response to identified management problems. The Council's amendment, which is barely in outline form at this time, could not be completed, reviewed, and implemented within a year, or possibly longer. In the interim, NMFS would continue to be unable to implement effectively the FMP because of noncooperation from the concerned States.

The alternative of implementing a Secretarial amendment to the FMP is not desirable because NMFS prefers, in this difficult management situation, to implement the Council's policy decisions rather than to impose its own plan. As with the former alternative, a Secretarial amendment could not be implemented in sufficient time to address problems anticipated during the 1982 summer/fall fishery.

Withdrawal of plan approval was selected over other alternatives because approval of the FMP was based upon assumptions and statements that have proven to be erroneous, and because circumstances have changed in the fishery. These assumptions and changed fishery circumstances have rendered the FMP invalid and inoperative since its approval.

Statements and assumptions that have proved to be erroneous are found in section 4.2 of Amendment 3, which concerns the relationships of the FMP to State management. This section describes State actions taken in response to the approval and implementation of the original FMP, and specifies a continuing reliance upon the States to ensure the effectiveness of the FMP. Furthermore, by section 4.2.2, the States of Maine, Massachusetts, and Rhode Island are expected to implement herring management plans that are complementary with the FMP. Section 4.2.1.1 discusses Maine's 1979 herring plan, indicating Maine's quotas are consistent with those established in the FMP, and that the Maine plan is consistent with appropriate State management measures described in section 4.2.2 of the FMP. However, experience has demonstrated the Maine herring plan is not consistent with the FMP, and serious management problems have arisen, in part because of different interpretations of section 4.2.2. A recent attempt by NMFS to provide Maine with a clarified interpretation of this section did not resolve the management problems. In addition, section 4.2.1.3 indicates that the Massachusetts Director of the Division of Marine Fisheries has the authority to close State waters to herring fishing when seasonal allocations for the Gulf of Maine are reached and after notification of FCZ closure is received from the Assistant Administrator for Fisheries. However, use of this authority to close Massachusetts' waters is discretionary,

and is expected to be based primarily on socio-economic considerations and the responses of other States to FCA closures.

In conclusion, experience has shown that section 4.2 of the FMP is clearly in error. When Amendment 3 was approved, there was every reason to expect State cooperation in accordance with this section; events have proven otherwise. The level of State cooperation necessary to carry out the management measures of the FMP has not been, and is not anticipated to be, forthcoming.

Changed circumstances in the fishery also justify withdrawal of FMP approval. The changed circumstances involve (1) the condition of the resource, and (2) the market demand for adult herring products.

The condition of the Atlantic herring resource has improved significantly since the FMP was implemented in 1977. The spawning stock biomass increased from a very low level in 1979 of 131,000 mt to 562,000 mt at the beginning of 1981, according to the most recent assessment. The Council believes that the main objective of the FMP has been achieved—that is, adult stocks have been managed to achieve individual biomass levels at which annual recruitment continues and is stabilized allowing for annual stock increases. Recent stock assessments appear to support this conclusion. However, since the stock appears to be in a healthy condition, restrictive quotas are probably unnecessary, in the short run, for the protection of the resource.

The FMP recognized that market-induced pressures affect harvests of the Gulf of Maine herring stocks. The FMP's quota-based management system was implemented to control harvest levels. During the first years of management under the FMP, the collapse of the herring stocks in the North Sea resulted in a strong export market in Western Europe for herring fillets. The FMP annual quota of 8,000 mt of adult herring prevented the U.S. industry from taking full advantage of this market. As the Gulf of Maine herring stocks inproved and annual quotas increased to 30,000 mt, the industry was able to export at top prices. As noted, the 1980 summer/fall harvest of age-3 + herring exceeded the quota by 39,281 mt. By 1981, herring were again being taken in the North Sea, and the demand for Gulf of Maine herring products was reduced. Only a limited export market for roe herring in Japan was available. The domestic market for fillets and other adult herring products has expanded, resulting in continued but much reduced interest in the fishery. In conclusion, when herring are abundant and available, market pressures, rather than FMP quotas, control the level of harvest.

Withdrawal of approval of this FMP necessitates the repeal of the implementing regulations (50 CFR Part 653). This notice requests comments on withdrawing approval of the FMP and on the proposed repeal of the regulations. Comments may be sent to the address listed above.

Classification

An environmental assessment was prepared to determine whether the proposed action will have a significant impact on the environment. The Assistant Administrator for Fisheries, NOAA, has determined that repealing the regulations will not significantly affect the environment, so that an environmental impact statement is not required under the National Environmental Policy Act of 1969.

A regulatory inpact review (RIR) was prepared. The RIR concludes that harvest levels have not been controlled by the FMP quotas, but rather by the availability of, and market demand for, herring. Repeal of regulations is not expected to affect supply, price, or income in the fishery. The Administrator has determined, after reviewing the information set forth in the RIR, that this action is non-major under E.O. 12291; accordingly, preparation of a regulatory impact analysis is not required.

The General Counsel for the Department of Commerce has certified that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (see discussion in paragraph above).

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Meeting

Notice is hereby given in accordance with Section 800.6(d)(3) of the Council's regulations, "Protection of Historic and Cultural Properties".(36 CFR Part 800), that the Advisory Council on Historic Preservation will meet on Tuesday, October 19, 1982, in the Board Room, AIA Headquarters, 1735 New York Avenue NW., Washington, D.C. The meeting will begin at 9:00 a.m. The meeting is open to the public.

The Council was established by the National Historic Preservation Act of 1966 (16 U.S.C. Sec. 470) to advise the President and Congress on matters relating to historic preservation and to comment upon Federal, federally assisted, and federally licensed undertakings having an effect upon properties listed in or eligible for inclusion in the National Register of Historic Places. The Council's members are the Architect of the Capitol, the Secretaries of the Interior, Agriculture, Housing and Urban Development, Treasury, Transportation; the General Services Administrator; the Chairman of the National Trust for Historic Preservation; the President of the National Conference of State Historic Preservation Officers; a Governor, a Mayor, and eight non-Federal members appointed by the President.

The agenda for the meeting includes the following: 9 a.m., Call to Order, Chairman's Welcome, Swearing-In Ceremony, Order of Business, Consideration of Minutes of May 25, 1982, Meeting.

I. Section 106 Cases

A. Council Comment: Anderson Ferry, Cincinnati, Ohio
1. Report of the U.S. Corps of Engineers
2. Report of the State Historic Preservation Officer
3. Executive Director's Report

B. Status Reports
1. Fort Logan Roots, Arkansas
2. Memphis Street Railway Office and Streetcar Complex, Tennessee

BILLING CODE 4310-10-M

DEPARTMENT OF AGRICULTURE

Commodity Credit—Corporation

1982 Crop Soybean Preliminary Loan and Purchase Rate

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of determination of 1982 crop soybean preliminary loan and purchase rate.

SUMMARY: The purpose of this notice is to announce the preliminary loan and purchase rate for the 1982 soybean crop at $5.02 per bushel. This determination is required to be made by the Agricultural Act of 1949, as amended by the Agriculture and Food Act of 1981.

EFFECTIVE DATE: August 3, 1982.

FOR FURTHER INFORMATION CONTACT: Orville L. Overboe, Agricultural Economist, Analysis Division, ASCS-USDA, P.O. Box 2415, Washington, D.C. 20013, Telephone (202) 447-4417. Since this is a preliminary determination calculated in accordance with the statutory formula, no Impact Analysis was prepared.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512-1 and has been designated "not major." It was designated "not major" because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State or local Government agencies, or geographic regions, or (3) significant adverse impacts on competition, employment, investment; productivity, innovation, or the ability of U.S. based enterprises to compete with foreign based enterprises in domestic or export markets.

The title and number of the federal assistance program that this notice applies to are: Title—Commodity Loans and Purchases; Number—10.051 as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since the Commodity Credit Corporation is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

Section 201(g)(1) of the Agricultural Act of 1949, as amended provides that the price of soybeans for each of the 1982 through 1985 marketing years shall be supported through loans and purchases at a level equal to 75 percent of the simple average price received by farmers for soybeans for each of the preceding five marketing years, excluding the high and low valued years. However, the Secretary cannot establish the support price at less than $5.02 per bushel. If the Secretary determines that the average price producers receive for soybeans in any marketing year is not more than 105

percent of the level of loans and purchases for such marketing year, the support level may be reduced for the next marketing year by the amount which is determined to be necessary to maintain domestic and export markets for soybeans. However, the price support level for loans and purchases cannot be reduced by more than 10 percent in any year nor below $4.50 per bushel.

Section 201(g)(1) also provides that the Secretary must make a preliminary announcement of the level of price support no earlier than 30 days prior to September 1, the beginning of the marketing year, based upon the latest information and statistics then available. The Secretary must make a final announcement of such level as soon as full information and statistics are available on prices for the five years preceding the beginning of the marketing year. The final level of price support must be announced no later than October 1 of the marketing year to which the announcement applies. The final level of support cannot be less than that of the preliminary announcement.

It was essential that this determination be announced as soon as possible so that farmers could make their marketing plans. Accordingly, the preliminary loan and purchase rate for the 1982 crop of soybeans was determined and announced by the Secretary by press release on August 3, 1982. Since the purpose of this notice is to affirm the announcement of the preliminary level of support, it has been determined that no further rulemaking is required with respect to this determination. The basis for the determination is set forth herein.

Determination

The average price received by farmers for soybeans for each of the preceding five years, excluding the high and low valued years, is $6.41 per bushel; 75 percent of which is $4.81. Therefore, the preliminary 1982-crop soybean loan and purchase rate will be $5.02 per bushel, the minimum rate required by law. This determination is based on the following data:

(1) *Season-Average Soybean Prices ($/bu.).*1977, $5.96; 1978, $6.83; 1979, $6.29; 1980, $7.50; 1981, $6.10.

(2) Average of the five years, excluding the low valued year (1977) and the high valued year (1980): ($6.83+$6.29+$6.10)/3=$6.41 per bushel.

(3) Preliminary loan and purchase rate calculation: $6.41×.75=$4.81.

(4) Since the calculated rate of $4.81 per bushel is less than the statutory minimum rate of $5.02 per bushel, the preliminary rate must be established at $5.02 per bushel.

Signed at Washington, D.C. on September 23, 1982.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Soil Conservation Service

Crowley's Ridge and Benton Hills RC&D Measure, Missouri

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Crowley's Ridge and Benton Hills RC&D Measure, Scott, Stoddard and Dunklin Counties, Missouri.

FOR FURTHER INFORMATION CONTACT: Paul F. Larson, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Missouri, 65202, telephone 314/875-5214.

SUPPLEMENTARY INFORMATION: The Environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional or national impacts on the environment. As a result of these findings, Paul F. Larson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The Noticed of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Paul F. Larson.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A-95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Date: September 16, 1982.

Russell C. Mills,

Assistant State Conservationist—Programs.

DEPARTMENT OF COMMERCE

International Trade Administration

Petitions by Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from the following firms: (1) Friend Manufacturing Corporation, P.O. Box A, Gasport, New York 14067, producer of agricultural sprayers and other equipment (accepted August 27, 1982); (2) Anson Incorporated, 100 DuPont Drive, Providence, Rhode Island 02907, producer of jewelry, writing instruments, figurines and metal boxes (accepted August 27, 1982); (3) H. D. MacDonald, Inc., 99 Chestnut Street, North Attleboro, Massachusetts 02760, producer of jewelry (accepted August 30, 1982); (4) Wesley International Corporation, P.O. Box 934, Scottdale, Georgia 30079, producer of pallet trucks and other materials handling equipment (accepted August 31, 1982); (5) Louis Lefkowitz and Brother, Inc., 50 Washington Avenue, Milltown, New Jersey 08850, producer of carrying cases and leather straps, handles, sheaths and grips (accepted September 1, 1982); (6) Dart Industries, Inc., 4913 Crofton Road, Louisville, Kentucky 40207, producer of metal display fixtures and housewares (accepted September 2, 1982); (7) Shintron Company, Inc., 144 Rogers Street, Cambridge, Massachusetts 02142, producer of television equipment (accepted September 7, 1982); (8) Northern Heel Corporation, Six Grove Street, Dover, New Hampshire 03820, producer of shoe heels, baseballs and industrial molds (accepted September 7, 1982); (9) Mary Meyer Manufacturing Company, Inc., Mary Meyer Station, Townshend, Vermont 05353, producer of stuffed toys (accepted September 7, 1982); (10) VoCorp, Inc., 312 Marlboro Street, Keene, New Hampshire 03431, producer of shears (accepted September 7, 1982); (11) Advanced Terminals, Inc., 6700 Thompson Road, N., Syracuse, New York 13211, producer of computer printer equipment (accepted September 7, 1982); (12) Empacadora F.Q., Inc., G.P.O. Box 3558, San Juan, Puerto Rico 00936, processor of meat (accepted September 8, 1982); (13) Neely Manufacturing Company, Inc., State Highway 2 West, Corydon, Iowa 50060, producer of garment bags and ponchos (accepted September 8, 1982); (14) David F. Sklar Laboratories, Inc., Peekskill Hollow Road, Carmel, New York 10512, producer of laboratory equipment and parts (accepted September 9, 1982); (15) Douglas Company, Inc., Krif Road, Keene, New Hampshire 03431, producer of stuffed toys (accepted September 10, 1982); (16) Thomas' Handbags, Inc., 86 Webster Street, Haverhill, Massachusetts 01830, producer of handbags (accepted September 9, 1982); (17) Parco-Parisi Corporation, 91 Hartford Avenue, Providence, Rhode Island 02909, producer of jewelry (accepted September 10, 1982); (18) Harwood Manufacturing Company, 415 Valley Street, Providence, Rhode Island 02908, producer of metal stamped and cast novelties and giftware (accepted September 10, 1982); (19) Vermont Abestos Group, Inc., Stafford Avenue, Morrisville, Vermont 05661, producer of asbestos fiber (accepted September 10, 1982); (20) Ronnie Dress Company, R.D. Number 2, Shickshinny, Pennsylvania 18655, producer of women's dresses (accepted September 10, 1982); (21) Jean Fogel Creations, Inc., 628 Broadway, New York, New York 10012, producer of handbags (accepted September 10, 1982); (22) Jo-Ann Apparel, Inc., Lovell Park, Ebensburg, Pennsylvania 15931, producer of women's dresses (accepted September 13, 1982); (23) United Retail Corporation, 531 Kamoku, PH8, Honolulu, Hawaii 96826, producer of gem stones (accepted September 13, 1982); (24) Hyde Spring and Wire Company, 14341 Schaefer Highway, Detroit, Michigan 48227, producer of springs and other wire products (accepted September 15, 1982); (25) Ellingson Lumber Company, P.O. Box 866, Baker, Oregon 97814, producer of softwood lumber, veneer and panels (accepted September 15, 1982); (26) Signature Office Furniture, Inc., 610 East 61st Street, Los Angeles, California 90001, producer of wood office furniture (accepted September 15, 1982); and (27) Midwest Stoves, Inc., P.O. Box 1704,

Mount Vernon, Illinois 62864, producer of stoves and fireplace inserts (accepted September 16, 1982);

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93–618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Director, Certification Division, Office of Trade Adjustment Assistance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.309, Trade Adjustment Assistance. Inasfar as this notice involves petitions for the determination of eligibility under the Trade Act of 1974, the requirements of Office of Management and Budget Circular No. A–95 regarding review by clearinghouses do not apply.

Charles L. Smith,

Acting Director, Certification Division, Office of Trade Adjustment Assistance.

BILLING CODE 3510-25-M

[Order No. 41–2 (Amendment 1); D.O.O. Reference 10–3, 40–1]

Organization and Function Order; Deputy Under Secretary for International Trade

Effective Date: August 22, 1982.

This order amends ITA Organization and Function Order 41–2 of March 31, 1982 (47 FR 22996) to abolish the Information Systems Staff in the Office of Personnel, reassign its functions to the Special Programs Staff, Office of Personnel, and abolish the Office of Administrative Support to reflect the transfer of its functions to the Office of the Secretary.

1. Part III, Section 2.03e. is deleted.

2. Part III, Section 3.01b. is revised as follows:

"b. The Special Programs Staff also plans and coordinates matters relating to the development of ITA-wide personnel management information systems and procedures, including records and reports; processes personnel actions, ensures proper documentation for legality and propriety and maintains control over the content and disposition of Official Personnel Folders; coordinates with ADP personnel concerning processing and records documentation, improvements, or needs relating to personnel management and administration; provides ADP input necessary to generate SF–113 reports and a variety of statistical, personnel and employee information reports; provides advice and assistance to serviced organizations concerning employment benefits and entitlements, such as health plans and insurance programs; arranges for National Agency checks by the Office of Personnel Management and processes employee security clearance; conducts the ITA security program; provides physical and document security orientation for employees and security briefings; maintains NATO sub-registry for Commerce; controls credentials, building passes and keys; performs the safety function for ITA; and provides paymaster services."

3. Part III, Section 7 is deleted.

The attached organization chart [1] supersedes the chart attached to ITA Organization and Function Order 41–2 of March 31, 1982.

Lionel Olmer,

Under Secretary for International Trade.

[FR Doc. 82-26570 Filed 9-27-82; 8:45 am]
BILLING CODE 3510-25-M

Exemption of Foreign Air Carriers from Customs Duties and Taxes, Nigeria

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of request for comments.

SUMMARY: The Department of Commerce is completing an investigation to determine the extent to which the Government of Nigeria allows substantially reciprocal privileges in exempting aircraft supplies and equipment from import duties and certain internal revenue taxes. Interested parties are invited to submit their views and comments on this investigation.

DATE: Comments must be submitted on or before October 28, 1982.

ADDRESS: Comments may be sent to: Albert N. Alexander, Office of Service Industries, International Trade Administration, Room 1124, U.S. Department of Commerce, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT: Fred Elliott, 202–377–5071.

SUPPLEMENTARY INFORMATION: Pursuant to a request by Nigeria Airways, Ltd. in 1978 (see 43 FR 32444 of July 27, 1978), the Department of Commerce (the Department) undertook an investigation to determine whether the Government of Nigeria allowed customs and tax exemptions to aircraft of U.S. registry substantially reciprocal to those that the U.S. Government would allow under sections 309 and 317 of the Tariff Act of 1930, as amended (19 U.S.C. 1309 and 1317), and section 4221 of the Internal Revenue Code of 1954, as amended (26 U.S.C. 4221). The Department is now completing its investigation and invites final comments from interested parties.

The above-cited statutes provide exemptions for aircraft of foreign registry from payment of import duties and certain internal revenue taxes on the import or purchase of supplies in the United States for such aircraft in connection with their international commercial operations. "Supplies" as used in this context includes a wide range of articles used by aircraft in international operations including fuel and lubricants, spare parts, consumable supplies, and ground handling and support equipment. These exemptions apply upon a finding by the Secretary of Commerce, or his designee, and communicated to the Department of Treasury, that such country allows, or will allow, "substantially reciprocal privileges" to aircraft of United States registry.

Written comments regarding this review will be maintained in the International Trade Administration, Freedom of Information Records Inspection Facility, Room 4001B, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230.

Records in this facility may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Patricia L. Mann, the International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

[1] Filed as part of the original document.

Dated: September 21, 1982.

Donald V. Earnshaw,

Deputy Assistant Secretary for Export Development.

BILLING CODE 3510-25-M

Extension of Period for Final Determinations: Certain Steel Products From Belgium, the United Kingdom, France, The Netherlands, Italy, and the Federal Republic of Germany; Carbon Steel Structural Shapes From Luxembourg; and Carbon Steel Plate From Romania

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of extension of period for final determinations.

SUMMARY: The Department of Commerce hereby extends the period for its final determinations with respect to the antidumping investigations of certain steel products from Belgium, the United Kingdom, France, the Netherlands, Italy, and the Federal Republic of Germany; carbon steel structural shapes from Luxembourg; and carbon steel plate from Romania. The final determinations will be made no later than December 29, 1982.

EFFECTIVE DATE: September 28, 1982.

FOR FURTHER INFORMATION CONTACT: David L. Binder, Office of Investigations, Import Administration, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230 (202) 377-1273.

SUPPLEMENTARY INFORMATION: On August 9, 1982, the Department of Commerce determined preliminarily that certain steel products from Belgium, the United Kingdom, France, Italy, the Federal Republic of Germany, and carbon steel plate from Romania were being sold, or were likely to be sold, at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act). The Department also determined preliminarily that certain steel products from the Netherlands and carbon steel structural shapes from Luxembourg were not being sold, or were not likely to be sold, at less than fair value within the meaning of the Act. We announced our determinations in the Federal Register on August 16, 1982 (47 FR 35646).

In those proceedings where the preliminary determinations were affirmative, exporters who accounted for a significant proportion of exports of the merchandise which are the subject of these investigations have requested that the Department extend the period for final determinations. In those proceedings where the preliminary determinations were negative, the petitioners have requested extensions. These requests are in accordance with sections 735(a)(2) (A) and (B) of the Act (19 U.S.C. 1673d(a)(2) (A) and (B)).

We have determined that additional time is needed in order to ensure that a proper analysis may be completed with regard to these investigations. Accordingly, the period for determinations in these cases is hereby extended. Final determinations will be made not later than December 29, 1982.

Public Comment

As stated in the preliminary determinations (47 FR 35646), public hearings, if requested, were to be held in accordance with § 353.47 of the Commerce Department Regulations. Due to these extensions of the period for final determinations, the hearing dates have also been extended. If requested, we will hold public hearings to afford interested parties an opportunity to comment on the preliminary determinations at the United States Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230. The new dates, times, and room numbers follow:

Romania—November 2, 1982, 10 am, Room 3104
United Kingdom—November 2, 1982, 2 pm, Room 3104
The Netherlands—November 3, 1982, 10 am, Room 1851
Italy—November 3, 1982, 2 pm, Room 1851
Luxembourg—November 4, 1982, 10 am, Room 4830
Federal Republic of Germany—November 4, 1982, 2 pm, Room 4830
France—November 5, 1982, 10 am, Room 3104
Belgium—November 5, 1982, 2 pm, Room 3104

As stated in the preliminary determinations (47 FR 35646), all written views were to be filed in accordance with 19 CFR 353.46, within thirty days of publication of the preliminary determination notices at the above address and in at least ten copies. Because of these extensions, written views filed in accordance with 19 CFR 353.46 will be considered if received on or before November 15, 1982.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration

September 22, 1982.

BILLING CODE 3510-25-M

Travel and Tourism Administration

Travel and Tourism Advisory Board; Meeting

On September 17, 1982, notice was given in the Federal Register (47 FR 41153), that the Travel and Tourism Advisory Board would meet on October 7, 1982. Notice is hereby given that the Travel and Tourism Advisory Board meeting will begin at 10:45 am in Room 5859 of the Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Established March 19, 1982, the Travel and Tourism Advisory Board consists of 15 members, representing the major segments of the travel and tourism industry and state tourism interests, and includes one member of a travel labor organization, a consumer advocate, an academician and a financial expert.

Members advise the Secretary of Commerce on matters pertinent to the Department's responsibilities to accomplish the purpose of the National Tourism Policy Act (Pub. L. 97-63), and provide guidance to the Assistant Secretary for tourism Marketing in the preparation of annual marketing plans.

Agenda items are as follows:

I. Call to Order
II. Approval of the Minutes
III. Report
A. In-flight survey
IV. Old Business
A. Status of visa Waiver legislation
B. Customs and Immigration user fees
V. New Business
A. Customs staffing
B. Customs ASSIST program
C. VISIT USA—a promotional program to increase tourism to the United States
D. 1992 World's Fair
E. OMB understanding of the tourism industry
F. Travel industry image
VI. Miscellaneous
VII. Date of next meeting
VII. Adjournment

A limited number of seats will be available to observers from the public and the press. The public will be permitted to file written statements with the Committee before or after the meeting. To the extent time is available, the presentation of oral statements is allowed.

Christine Hathaway, Committee Control Officer, United States Travel and Tourism Administration, Room 1865, U.S. Department of Commerce, Washington, D.C. 20230, (Telephone: 202/377-0139), will respond to public

requests for information about the meeting.

Peter McCoy,

Under Secretary for Travel and Tourism, Department of Commerce.

Name of the committee: Army Science Board.
Dates of meeting: Wednesday, 20 October 1982; Thursday, 21 October 1982.
Times: 0830-1700 hours on 20 October (closed); 0830-1600 hours on 21 October (closed).
Place: The Pentagon, Washington, D.C.
Agenda: The Army Science Board Functional Subgroup on Mobility will meet to receive briefings and hold discussions in that specific area with respect to Army research, development, and acquisition issues, developments, and opportunities. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C. App. 1, subsection 10(d). The classified and non-classified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 695-3039 or 697-9703.

Helen M. Bowen,

Administrative Officer.

BILLING CODE 3710-08-M

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), announcement is made of the following Committee Meeting:

Name of the committee: Army Science Board (ASB).
Dates of meeting: Wednesday, 20 October 1982; Thursday, 21 October 1982.
Times: 0830-1700 hours on 20 October (closed); 0830-1600 hours on 21 October (closed).
Place: The Pentagon, Washington, D.C.
Agenda: The Army Science Board Ad Hoc Subgroup on Ballistic Missile Defense will meet to receive subcommittee reports and develop conclusions and recommendations for the final report. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C. App. 1, subsection 10(d). The classified and non-classified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 695-3039 or 697-9703.

BILLING CODE 3710-08-M

Department of the Army

United States Army Medical Research and Development Advisory Committee, Subcommittee on Blood Preservation and Substitutes; Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Subcommittee meeting:

Name of Committee: United States Army Medical Research and Development Advisory Committee, Subcommittee on Blood Preservation and Substitutes.
Date of meeting: 5 November 1982.
Time and place: 0900 hrs, Conference Room AS3102, Letterman Army Institute of Research, Presidio of San Francisco, CA.
Proposed agenda: This meeting will be open to the public from 0900 to 1045 hrs for the administrative review and discussion of the scientific research program of the Blood Preservation and Substitutes Group, Letterman Army Institute of Research. Attendance by the public at open sessions will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), US Code, Title 5 and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 1100 to 1715 hrs for the review, discussion and evaluation

of individual programs and projects conducted by the U.S. Army Medical Research and Development Command, including consideration of personnel qualifications and performance, the competence of individual investigators, medical files of individual research subjects, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Ryan Neville, Assistant Director, Research Contract Management, Letterman Army Institute of Research, Presidio of San Francisco, CA 94129 (415/561-4367), will furnish summary minutes, roster of Subcommittee members and substantive program information.

Harry G. Dangerfield, M.D.,

Colonel, MC, Deputy Commander.

September 15, 1982.

BILLING CODE 3710-08-M

United States Army Medical Research and Development Advisory Committee, Subcommittee on Medical Defense Against Chemical Agents; Partially Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Subcommittee meeting:

Name of committee: United States Army Medical Research and Development Advisory Committee, Subcommittee on Medical Defense Against Chemical Agents.

Date of meeting: October 29, 1982.

Time and place: 0830 hrs, Room 14, U.S. Army Medical Research Institute of Chemical Defense, Aberdeen Proving Ground, MD.

Proposed agenda: This meeting will be open to the public from 0830 to 0930 hrs for the administrative review and discussion of the scientific research program of the U.S. Army Medical Research Institute of Chemical Defense. Attendance by the public at open sessions will be limited to space available.

In accordance with the provisions set forth in Section 552b(c)(6), U.S. Code, Title 5 and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public from 0930 to 1730 hrs for the review, discussion and evaluation of individual programs and projects conducted by the U.S. Army Medical Research and Development Command, including consideration of personnel qualifications and performance, the competence of individual investigators, medical files of individual research subjects, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Richard Lindstrom, U.S. Army Medical Research Institute of Chemical Defense, Aberdeen Proving Ground, MD 21010 (301/671-2833) will furnish summary minutes, roster of Subcommittee members and substantive program information.

Harry G. Dangerfield, M.D.,

Colonel, MC, Deputy Commander.

BILLING CODE 3710-08-M

Intent To Prepare a Revised Draft Environmental Impact Statement for the Continuing Operation and Maintenance Program of Harlan County Lake, Nebr.

AGENCY: Kansas City District, US Army Corps of Engineers, DOD.

ACTION: Notice of Intent to prepare a revised draft statement.

SUMMARY: 1. The Draft Environmental Impact Statement for the continuing operation and maintenance program of Harlan County Lake was circulated for public review on 13 May 1977. Necessary coordination activities with the Bureau of Reclamation, the US Fish and Wildlife Service and other Corps work priorities delayed completion of a final impact statement. A revised draft is now necessary to reflect major changes in project programs and impacts on the environment that have occurred since 1977.

2. Because the project is in operation, the "no action" alternative of no continued maintenance program will not be considered, but options to ongoing management and maintenance programs will be discussed in the revised draft.

3. The revised draft statement will be coordinated with and reviewed by appropriate Federal, State and local agencies and groups including the US Fish and Wildlife Service, Bureau of Reclamation, Soil Conservation Service, Advisory Council on Historic Preservation, Nebraska Game and Parks Commission, local county governments and other groups and individuals. A public meeting concerning project natural resource management activities was held on 21 November 1980. A meeting with project agricultural lessees was also held on 2 March 1981 to discuss project natural resource management alternatives. No other public meetings have been scheduled in conjunction with this revised draft, but any interested agency, organization or individual is invited to comment. Input presented will be considered in the preparation of the revised draft.

4. Environmental concerns analyzed in the revised draft will include the effects of water level fluctuations on project recreation programs, shoreline environments and insect pest populations. The effects of the project land management program in relation to fish and wildlife management, protection of project water, soil and vegetation resources and project agricultural lessees will also be discussed. All environmental consultation and review will be conducted in accordance with the National Environmental Policy Act and other applicable laws and regulations.

5. The revised draft is tentatively scheduled to be available for public review in March 1983.

ADDRESS: Questions concerning the project operation and maintenance program and EIS revision should be directed to Mr. Richard Lenning, Operations Division, Kansas City District, Corps of Engineers, 725 Federal Building, Kansas City, Missouri 64106. Phone: (816) 374-3245 or FTS 758-3245.

Dated: September 21, 1982.

M. D. Jewett,

Acting Chief, Operations Division.

[FR Doc. 82-26560 Filed 9-27-82; 8:45 am]

BILLING CODE 3710-KH-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for Permanent Designation of Dredged Material Ocean Disposal Sites at Coos Bay, Oreg.

LEAD AGENCY: U.S. Army Corps of Engineers, Department of Defense.

COOPERATING AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of Intent to prepare a DEIS.

The Corps of Engineers, Portland District, is currently investigating several sites in the vicinity of Coos Bay, Oregon, for designation as dredged material ocean disposal sites. The investigation includes two sites which were designated by the Environmental Protection Agency (EPA) for interim use. These sites have been used for maintenance dredging disposal since 1977.

The following alternatives are being considered at this time:

1. The two existing interim sites.
2. Two new sites near the 35 and 40 fathom contours.
3. A continental slope alternative (deep water).
4. Combinations of the above.

Each of the alternatives will be evaluated for timing of disposal and for material that does and does not meet EPA's ocean dumping exclusion criteria.

The scoping process will formally commence in mid-September 1982, with the issuance of a public notice containing a draft outline of alternatives and potential effects which will be discussed in the DEIS. Federal, State, and local agencies, Indian tribes, and interested organizations and individuals will be asked to comment on the draft outline and to identify significant issues relating to the effects of the alternatives. The DEIS is scheduled for agency and public review in July 1983. The final EIS is scheduled for publication in early 1984.

Address: If you have any questions or need additional information, please contact Steve Stevens, (503) 221-6438 (FTS 423-6438), U.S. Army Corps of Engineers, Natural Resources Branch, P.O. Box 2946, Portland, Oregon 97208.

Dated: September 10, 1982.

R. L. Friedenwald,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-GC-M

Office of the Secretary

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, November 2, 1982; Tuesday, November 9, 1982; Tuesday, November 16, 1982; Tuesday, November 23, 1982; and Tuesday, November 30, 1982 at 10:00 a.m. in Room 3D321, the Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Public Law 92-392. At this meeting, the committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D264, the Pentagon, Washington, D.C. 20301.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

National Defense University Panel of the Board of Visitors for National Defense University and Defense Intelligence School; Notice of Advisory Committee; Meeting

The President of the National Defense University has scheduled a meeting of the National Defense University Panel of the Board of Visitors for National Defense University and Defense Intelligence School on Monday, November 22, 1982, from 0900-1145 and 1330-1600. The meeting will be held in the Hill Conference Center, Theodore Roosevelt Hall (Bldg. 61), Fort Lesley J. McNair, Washington, D.C. The discussions will include progress and plans for the National Defense University and the curricula, faculty, and students of the Industrial College of the Armed Forces, the National War College, and the Armed Forces Staff College. The meeting is open to the public, but the limited space available for observers will be allocated on a first-come, first-served basis. To reserve space, interested persons should write or phone (693-1075), the Assistant to the President, National Defense University, Fort Lesley J. McNair, Washington, D.C. 20319.

September 23, 1982.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington, Headquarters Services, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Minority Institutions Science Improvement Program

AGENCY: Department of Education.

ACTION: Application notice of Minority Institutions Science Improvement Program (MISIP).

Applications are invited for new grant awards to be made in Fiscal Year 1983 under the Minority Institutions Science Improvement Program (MISIP), administered by the Fund for the Improvement of Postsecondary Education.

The Secretary makes four types of project grant awards under MISIP. Depending on the type of grant, eligible applicants are public and private nonprofit predominantly minority institutions, professional scientific societies, or nonprofit accredited colleges and universities which render a needed service to a group of eligible minority institutions, or which provide in-service training to project directors, scientists, and engineers from eligible institutions.

Authority for this program is contained in section 408A of the General Education Provisions Act, as amended by the Education Amendments of 1980, Pub. L. 96-374.
(20 U.S.C. 1221e-1a)

Closing Dates for Transmittal of Applications. Applications for Institutional, Design, and Cooperative project grants must be mailed or hand-delivered by December 3, 1982. Applications for special project grants must be mailed or hand-delivered by March 4, 1983.

Applications Delivered By Mail. An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.120A, Washington, D.C. 20202.

To establish proof of mailing, an applicant must show one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the Secretary.

If an application is sent through the U.S. Postal Service, the Secretary does not accept a private metered postmark or a mail receipt that is not dated by the U.S. Postal Service as proof of mailing. An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered By Hand. An application that is hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Attention: 84.120A, Room 5673, Regional Office Building 3, 7th and D Streets, SW., Washington, D.C.

The Secretary will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays. Applications for Institutional, Design, or Cooperative project grants that are hand-delivered will not be accepted after 4:30 p.m. on December 3, 1982. Applications for Special project grants that are hand-delivered will not be accepted after 4:30 p.m. on March 4, 1983.

Program Information. The Secretary supports projects that propose to enhance a minority institution's capacity for developing and maintaining a quality science education program for all of its students and to augment the institution's capability for increasing the flow of underrepresented ethnic minorities into the fields of science and engineering.

The Secretary awards grants in the following categories of projects:

(1) Design project grants to assist minority institutions that do not have their own appropriate resources or personnel to plan and develop long-range science improvement;

(2) Institutional project grants to individual minority institutions to support the implementation of a comprehensive science improvement plan, which may include any combination of activities for improving the preparation of minority students for careers in science and engineering;

(3) Cooperative project grants to assist groups of nonprofit accredited colleges and universities to work together to conduct a science improvement project;

(4) Special project grants for which—

(a) Minority institutions are eligible which support activities that improve quality training in science and engineering or enhance a minority institution's general scientific research capabilities.

(b) All applicants are eligible which support activities that provide a needed service to a group of eligible minority institutions or provide in-service training for project directors, scientists, and engineers from eligible minority institutions.

Available Funds. (a) Approximately $2.8 million is estimated to be available for Institutional and Cooperative project grant awards in Fiscal Year 1983. It is estimated that these funds will support approximately 12 awards. The maximum amount of an Institutional or Cooperative project grant is $300,000 for a 36-month period.

(b) Approximately $0.5 million is estimated to be available for Special project and Design project grant awards in Fiscal Year 1983. It is estimated that these funds will support approximately 10 grant awards for Special and Design projects.

The maximum amount for a Special project grant award is $150,000 for a 24-month project period. The maximum amount for a Design project grant award is $20,000 for a 12-month period.

However, these estimates do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless the amount is otherwise specified by statute and regulations.

Application forms. Application forms are included in the program information packages that are expected to be ready for mailing in September, 1982. Interested persons may obtain program information packages by writing to the U.S. Department of Education, Office of Postseconday Education, Fund for the Improvement of Postsecondary Education, Attention: 84.120A, 400 Maryland Avenue, SW., (Room 3100, ROB-3), Washington, D.C. 20202.

Applicable Regulations. Regulations applicable to this program include the following:

(1) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77 and 78; and

(2) Regulations governing the Minority Institutions Science Improvement Program (34 CFR Part 637).

Further Information. For further information, contact the U.S. Department of Education, Office of Postsecondary Education, Fund for the Improvement of Postsecondary Education, regarding the Minority Institutions Science Improvement Program. Telephone: (202) 245-8100.

(Catalog of Federal Domestic Assistance No. 84-120A, Minority Institutions Science Improvement Program)

Dated: September 21, 1982.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 3042-001]

Arkansas Electric Cooperative Corporation, C & L Electric Cooperative, Inc. and Riceland Electric Cooperative, Inc.; Application for License (Over 5 MW)

September 23, 1982.

Take notice that Arkansas Electric Cooperative Corporation, C & L Electric Cooperative, Inc. and Riceland Electric Cooperative, Inc. (Applicant) filed on June 14, 1982, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for construction and operation of a water power project to be known as the Lock and Dam No. 5 Project No. 3042. The project would be located on the Arkansas River near Pine Bluff, in Jefferson County, Arkansas. Corresponding with the Applicant should be directed to: Joe R. Moody, Jr., P.E., Benham-Holway Power Group, 5300 South Yale Avenue, Tulsa, Oklahoma 74135.

Project Description—The proposed project would utilize the existing Lock and Dam No. 5 and the resulting pool and under the jurisdiction of the Corps of Engineers and would consist of: (1) a new reinforced concrete powerhouse, 210 feet wide and 200 feet long, with an enclosed work area 45 by 75 feet on the south side of the powerhouse; (2) four horizontal shaft, bulb turbine/generator units each rated at 9.0 MW; (3) new headrace and tailrace channels; (4) a new 115-kV transmission line four miles long leading to the existing White Bluff Switchyard; and (5) appurtenant mechanical and electrical equipment.

This license application was filed during the term of the Applicant's preliminary permit for Project No. 3042.

Purpose of Project—The average annual generation of 140 million kWh will be utilized by the Applicant in its distribution system.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before November 9, 1982, either the competing application itself [See 18 CFR

4.33 (a) and (d)] or a notice of intent [See 18 CFR 4.33 (b) and (c)] to file a competing application. Filing of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et. seq. (1981).

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 FR 19025–28 (1980). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before November 29, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST," or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26606 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL82-18-000]

Cities of Campbell and Thayer, Missouri; Order Granting Intervention, Denying Request for Declaratory Judgment, and Terminating Docket

Issued September 22, 1982.

Before Commissioners: C. M. Butler III, Chairman; Georgiana Sheldon, J. David Hughes and A. G. Sousa. Electric Rates: Complaint; Intervention; *Mobile-Sierra*.

On May 18, 1982, the Cities of Campbell and Thayer, Missouri (Cities) filed a complaint seeking a declaratory judgment that, as to these customers, the Commission was without jurisdiction to accept for filing an Arkansas Power & Light Company (AP&L) unilateral rate increase previously submitted in *Arkansas Power & Light Company*, Docket No. ER81–577–000, and that the rate filing is therefore illegal. Cities contend, in essence, that the contracts for service by AP&L to Cities do not permit unilateral rate filings under the *Mobile-Sierra* doctrine.[1]

Notice of the Cities' request was published in the Federal Register with responses due on or before July 21, 1982. On June 17, 1982, AP&L filed a motion requesting rejection of the Cities' complaint as procedurally defective and barred by *res judicata*. On June 25, 1982, the Cities filed an answer to AP&Ls motion urging the Commission to grant its original request because AP&L had failed to satisfy or answer the Cities' complaint within thirty days as required by the Commission's regulations. On July 21, 1982, AP&L filed a petition to intervene and protest reiterating its position that the complaint should be rejected because it is procedurally defective and because it is barred by principles of *res judicata*. On August 6, 1982, the Cities filed an answer which essentially repeats their earlier arguments.

Discussion

Intially, the Commission finds that participation in this proceeding by AP&L is in the public interest, and, therefore, the petition to intervene will be granted.

On June 30, 1981, AP&L tendered for filing the rate increase at issue here. The Cities petitioned to intervene but did not then raise any *Mobile-Sierra* claims. By order issued August 28, 1982, the Commission accepted the rates for filing and made them effective, subject to refund, following suspension.[2]

On December 30, 1981, the Cities filed a request to modify the Commission's August 28, 1981 suspension order and to reject AP&L's filing under the *Mobile-Sierra* doctrine. The Commission reviewed the contract language and, by order issued March 3, 1982, found that the contract permitted unilateral rate changes.[3] By pleadings filed on April 5, 1982, the Cities sought rehearing of that order. Initially, by order issued May 5, 1982, the Commission denied rehearing for failure to timely file and because the application for rehearing presented no new facts, circumstances, or arguments that would warrant reconsideration.[4] The Cities filed their complaint in the instant docket following the May 5 denial of rehearing.

Subsequently, on June 4, 1982, the Cities filed an application for rehearing of the Commission's May 5, 1982 order. The Commission, noting that when it has issued the May 5 order, it had been unaware of a pleading filed by the Cities on April 5, 1982, agreed to reconsider its earlier orders of March 3, 1982, and May 5, 1982. By order issued July 6, 1982, the Commission found that the Cities should be allowed an opportunity to present extrinsic evidence to explain or interpret the contract terms at issue. Accordingly, the Commission stayed its order of March 3, 1982, pending hearing and decision on the Cities' *Mobile-Sierra* claims.[5]

As a result of the foregoing series of pleadings and orders, the matters raised by the Cities in their complaint have already been considered by the Commission and a suitable forum to hear their *Mobile-Sierra* claims has been provided in Docket No. ER81–577–000. Moreover, the Cities will have the full protection of the refund obligation imposed on AP&L in that docket should they prevail. In view of our decision in Docket No. ER81–577–000 to provide an opportunity for hearing as to the *Mobile-Sierra* question, the Cities' complaint in this docket is moot. Accordingly, we shall deny the request for declaratory relief without prejudice and we need not address the various procedural requests of the Cities and AP&L concerning the validity of the complaint or the answer.

The Commission orders:

(A) The Cities' request in this docket for the Commission to issue a declaratory judgment is hereby denied.

(B) The petition to intervene in this proceeding is hereby granted subject to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act.

(C) Docket No. EL82–18–000 is hereby terminated.

(D) The Secretary shall promptly publish this order in the Federal Register.

BILLING CODE 6717-01-M

[Project No. 6602-000]

D. J. Pitman International Corp.; Application for Preliminary Permit

September 23, 1982.

Take notice that D. J. Pitman International Corporation (Applicant) filed on August 17, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 6602 to be known as the Macallen Dam Project located on the Lamprey River in Rockingham County, New Hampshire. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Donald J. Pitman, President, D. J. Pitman International Corporation, 7–A Lexington Street, Dover, New Hampshire 03820.

run-of-river project would consist of: (1) the existing Macallen Dam 150 feet long and 27 feet high, owned by Essex Group, Inc.; (2) a reservoir with negligible storage capacity and a water surface elevation of 40 feet m.s.l.; (3) a new 200-foot-long penstock; (4) a new powerhouse with an installed capacity of 750 kW; (5) a 250-foot-long transmission line; and (6) other appurtenances. Applicant estimates an average annual generation of 3,500,000 kWh. Project energy would be sold to the Public Service Company of New Hampshire.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 2 years during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, and project power potential. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates the cost of the studies under the permit would be $3,850.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must file with the Commission, on or before December 7, 1982, the competing application itself [see: 18 CFR 4.30 et. seq. (1981)]. A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be filed with the Commission on or before November 26, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR 4.30 et. seq. or § 4.101 et. seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Motions To Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 Fed. Reg. 19025–26 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before November 26, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred S. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CP82-509-000]

Esperanza Transmission Co.; Application

September 23, 1982.

Take notice that on August 23, 1982, Esperanza Transmission Company (Applicant), P.O. Box 2447, Corpus Christi, Texas 78403, filed in Docket No. CP82-509-000 an application pursuant to Section 311(a) of the Natural Gas Policy Act of 1978 (NGPA) and Section 284.127 of the Regulations for authorization to transport natural gas through its intrastate facilities on behalf of Natural Gas Pipeline Company of America (NGPL) for more than two years, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is an intrastate pipeline company within the meaning of the NGPA and that it owns and operates an intrastate natural gas pipeline system within the State of Texas. Applicant indicates that NGPL has agreed to sell natural gas to Southwestern Electric Power Company (SWEPCO) for use in SWEPCO's Wilkes Plant located in Marion County, Texas. Since NGPL's pipeline system is not connected to SWEPCO's Wilkes Plant, Applicant states it has agreed to transport the gas to the plant on behalf of NGPL. In order to implement the transportation agreement, Applicant and Transok Pipe Line Company (Transok), another intrastate pipeline company, would jointly construct and operate approximately 11 miles of 14-inch pipeline to transport gas from NGPL's system in Marion County, Texas, to SWEPCO's Wilkes Plant, also in Marion County, Texas.

Applicant proposes to transport gas for NFPL on a limited firm basis for a period ending December 31, 1988. Applicant avers that the term of the transportation agreement between NGPL and Applicant is co-extensive with the term of the sales agreement between NGPL and SWEPCO. For such service Applicant would charge NGPL an initial rate of 15.0 cents per million Btu delivered by Applicant to the Wilkes Plant.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 14, 1982, file with the Federal Energy

Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 6682-000]

F&T Services Corporation; Application for Preliminary Permit

September 24, 1982.

Take notice that F&T Services Corporation (Applicant) filed on September 8, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)–825(r)] for Project No. 6682 to be known as the Columbia Project located on the Ouachita River in Caldwell Parish, Louisiana. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. J. B. Lancaster, Jr., F&T Services Corporation, P.O. Box 64884, Baton Rouge, Louisiana 70896.

Project Description—The proposed project would utilize the U.S. Army Corps of Engineers' Columbia Lock and Dam. The project would consist of a powerplant built adjacent to the dam that would include two to five bulb or tube-type turbine/generator having a total rated capacity from 25 to 75 MW. Average annual generation would range up to 385,000,000 kWh. Energy produced at the project would be sold to a local utility.

Proposed Scope of Studies under Permit—Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would perform surveys and geologic investigations, coordinate studies with the U.S. Army Corps of Engineers, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the cost of studies under permit would be less $20,000.

Competing Applications—Any desiring to file a competing application for preliminary permit must file with the Commission, on or before January 3, 1983, the competing application intent to file a competing application for preliminary permit will not be accepted filing.

The Commission will accept applications for license or exemption from licensing, or a notice of intent to file such an application in response to this notice. A notice of intent to file an application for license or exemption must be filed with the Commission on or before December 3, 1982, and should specify the type of application forthcoming. Applications for licensing or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR § 4.30 et seq. or § 4.101 et seq. (1981), as appropriate].

Agency Comments—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of Rules 211 or 214, 18 CFR 385.211, or 385.214, 47 Fed. Reg. 19025–28 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before December 3, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825, Room 208 RB at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

[Project No. 5470-001]

Homestake Consulting and Investments, Inc.; Surrender of Preliminary Permit

September 24, 1982.

Take notice that Homestake Consulting and Investments, Inc., Permittee for the North Meadow Creek Project, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 5470 was issued on February 26, 1982, and would have expired on July 31, 1983. The project would have been located on Meadow Creek in Lincoln County, Montana.

Homestake Consulting and Investments, Inc. stated that its preliminary feasibility studies indicate that the project is not economically feasible.

Homestake Consulting and Investments, Inc. filed the request for Project No. 5470 on August 30, 1982, and the surrender of Project No. 5470 has been deemed accepted as of the date of this notice.

BILLING CODE 6717-01-M

[Docket No. ER82-673-000]

Kentucky Utilities Company; Order Accepting for Filing and Suspending Rates, Noting Interventions, Denying Motions for Rejection and Summary Disposition, and Establishing Hearing and Price Squeeze Procedures

Issued September 22, 1982.

Before Commissioners: C. M. Butler III, Chairman; Georgiana Sheldon, J. David Hughes and A. G. Sousa. Electric Rates: Suspension; Intervention; Summary Disposition; Price Squeeze.

On July 23, 1982, Kentucky Utilities Company (KU) tendered for filing a proposed two-step increase in rates for firm and interruptible service to fourteen wholesale customers.[1] The proposed step-one rates would result in an increase in revenues of approximately $4.9 million (5.8%) for the twelve months ending September 30, 1982. The step-two rates would increase revenues by an additional $2.0 million (3.0%). KU requests that, in the event the Commission concludes that the step-two rates should be suspended for a period of more than one day, the alternate step-one rates be made effective on September 22, 1982.[2] It requests that the step-two rates be made effective on September 23, 1982.

Notice of the filing was published in the **Federal Register** with comments due on or before Augsut 23, 1982. On August 23, 1982, a group of Kentucky municipalities (Municipalities)[3] filed a protest, motion to intervene, motion to reject, and motion for summary judgment.[4] The Municipalities request rejection of KU's step-two increase and suspension of its step-one increase for five months or, alternatively, rejection of step-one increase and suspension of the step-two increase for five months. In support of this motion, the Municipalities contend that, except in unusual circumstances, such phased rate increases violate section 205 of the Federal Power Act and represent an effort to nullify the purposes of the suspension policy enunciated in *West Texas Utilities Company*, Docket No. ER82-23-000 (February 26, 1982). They argue that the purpose of that policy is to provide an incentive to utilize to file cost-justified rate increases. If phased rate increases are permitted, according to the Municipalities, a utility has no incentive to file cost-justified step-two rate increases. They urge that the step-two increase has no cost support and should be rejected.

The Municipalities also request summary disposition with respect to (1) a minimum bill provision incorporating a 100% demand ratchet, and (2) a rate schedule provision which provides for a upward adjustment in demand billings where a customer's power factor is less than 90%. In addition, the Municipalities raise a variety of cost of service issues,[5] allege that the proposed rates are unduly discriminatory and will cause a price squeeze, and challenge certain terms and conditions of service as unjust and unreasonable.

Jackson Purchase Electric Cooperative Corporation (Jackson Purchase) also filed a timely protest, motion to intervene, request for summary judgment, or in the alternative, for a five month suspension. Jackson Purchase argues that the stepped increase is an attempt to circumvent the suspension policy of this Commission and should be rejected. In support of its alternative request for a five month suspension, Jackson Purchase contends that a number of adjustments to KU's cost of service study are required.[6] Jackson Purchase also requests summary disposition to require KU to allocate transmission costs on a rolled-in basis.

The City of Paris, Kentucky (Paris) filed a timely protest and motion to intervene. Paris also seeks a maximum suspension, objecting to KU's allocation of cost and rate base items, its requested rate of return, and an increase in capacity deficiency charges. On September 2, 1982, KU filed an answer to the pleadings of the Municipalities, Jackson Purchase, and Paris, in which it responded to all their allegations.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR § 385.214), timely motions to intervene serve to make the Municipalities, Paris, and Jackson Purchase parties to this proceeding absent opposition within 15 days of their pleadings. The Commission also finds that participation in this proceeding by the City of Bardstown, Kentucky is in the public interest and that good cause exists to permit that customer to intervene as part of the Municipal customer class.

We note that the Municipalities and Jackson Purchase have objected to KU's efforts to phase the instant rate increase. However, we find that KU's submittal substantially complies with the Commission's regulations[7] and that the phased filing does not contravene the filing requirements of the Federal Power Act. Therefore, consistent with prior orders permitting such phasing,[8] we shall deny the motions to reject.

As noted, the Municipalities' request summary disposition as to KU's minimum bill provision and power factor charge. We believe, however, that these issues present questions of law or fact which should be resolved on the basis of an evidentiary hearing.[9] Similarly, Jackson Purchase's request for summary disposition regarding KU's allocation methodology also raises questions which should be addressed at hearing. Therefore, summary disposition will be denied.

Our preliminary review of KU's filing and the pleadings indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly

---

[1] *See* Attachment A for customers and rate schedule designations.

[2] If the step-two rates are suspended for only one day, the step-one rates are to be deemed withdrawn.

[3] The Cities of Barbourville, Benham, Cordin, Falmouth, Madisonville, and Providence, Kentucky, the Electric Water Plant Board of Frankfort, Kentucky, and Berea College.

[4] On August 30, the Municipalities requested that the City of Bardstown be included as a member of the municipal group and as an intervenor.

[5] These issues include: (1) improper rate design; (2) erroneous demand and energy forecasts; (3) improper demand allocation factors; (4) understated off-system sales in Period II; (5) excessive O&M expenses; (6) excessive rates of return; (7) an improper amortization period for deferred tax reserves; (8) overstated depreciation expense and cash working capital, and (9) an improper income tax calculation.

[6] Jackson Purchase raises several of the cost of service issues addressed by the Municipals, and, in addition, raises the following issues: (1) direct assignment of transmission facilities; (2) allocation of pollution control CWIP to Jackson Purchase.

[7] *See Municipal Light Boards of Reading and Wakefield, Massachusetts* v. *FPC*, 450 F.2d 1341 (D.C. Cir. 1971).

[8] *See, e.g., Indiana & Michigan Electric Company*, 20 FERC ¶ 61,079 (1982); *Jersey Central Power and Light Company*, 19 FERC ¶ 61,308 (1982).

[9] We note that these rate schedule provisions have previously been filed by KU and are issues in a pending proceeding in Docket No. ER81-361-000.

discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

In *West Texas Utilities Company, supra,* we noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not generate substantially excessive revenues, as defined in *West Texas.* Our preliminary review indicates that KU's proposed step-one increase may not yield substantially excessive revenues. Under these circumstances, we shall suspend the step-one rates for one day to become effective, subject to refund, on September 23, 1982. With respect to KU's step-two rates, however, preliminary review suggests that the proposed increase may yield substantially excessive revenues. Accordingly, we shall suspend KU's proposed step-two rates for five months, to become effective, subject to refund, on February 22, 1982.

In light of the intervenors' price squeeze allegations, we shall institute price squeeze procedures and phase those procedures in accordance with the Commission's policy and practice established in *Arkansas Power and Light Company,* Docket No. ER79–339 (August 6, 1979).

As a final matter, the Commission observes that KU has utilized full tax normalization with respect to Accelerated Cost Recovery System (ACRS) property. According to our review, it appears that the instant filing reflects a normalization method of accounting for all post-1980 property additions, that KU's cost of service correctly reflects the effects of normalization, and that KU's submittal satisfies the requirements of the Economic Tax Recovery Act of 1981.

The Commission orders:

(A) The motions to reject KU's filing or to summarily resolve issues are hereby denied.

(B) KU's proposed step-one and step-two rates are hereby accepted for filing; the step-one rates are suspended for one day from 60 days after filing, to become effective, subject to refund, on September 23, 1982, and the step-two rates are suspended for five months from sixty days after filing, to become effective, subject to refund, on February 22, 1983.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of KU's rates.

(D) The City of Bardstown, Kentucky's petition to intervene in this proceeding is hereby granted subject to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act.

(E) The Commission staff shall serve top sheets in this proceeding on or before October 4, 1982.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(G) The Commission hereby orders initiation of price squeeze procedures and further orders that this proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The price squeeze portion of this case shall be governed by the procedures set forth in section 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(H) The Secretary shall promptly publish this order in the Federal Register.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Project No. 4684-001]

Long Lake Energy Corporation; Application for License (5 NW of Less)

September 23, 1982

Take notice that Long Lake Energy Corporation (Applicant) filed on February 10, 1982, an application for license [pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)–825(r)] for construction and operation of a water power project to be known as Stillwater/Lock C–4 Dam Project No. 4684. The project would be located on the Hudson River and Champlain canal in Saratoga and Rensselaer Counties, New York, Correspondence with the Applicant should be directed to: Paul J. Elston, 420 Lexington Ave. Suite 320, New York, New York 10170.

Project Description—The proposed project would consist of: (1) the existing Niagara Mohawk Power Corporation Lock 4 Dam, a concrete gravity structure 5 feet high and 800 feet long; (2) a second existing Dam connecting two Islands south of the Lock Dam is 5 feet high and 320 feet long and owned by the New York State Department of Transportation; (3) the existing Lock 4 is owned by the New York State Department of Transportation; (4) a reservoir having, a mean surface elevation of 82.4 feet msl, a surface area of 1500 acres, and a storage capacity of 14,220 acre-feet; (5) a new intake structure; (6) a new power canal 1500 feet long; (7) a new powerhouse having 2 units with a generating capacity of 4.98 MW; (8) a new tailrace 845 feet long with a bottom width of 160 feet; (9) a new switch yard; (10) a new 34.5–kv transmission line 2,500 feet long; (11) a new access road and; (12) appurtement facilities. The Applicant estimates the average annual energy production would be 30,600,000 kW–hrs and estimates that the cost of the project would be $14,685,000. The Applicant also plans to construct a temporary cofferdam to allow for the construction of the power canal and tailrace in the dry.

Purpose of Project—Project energy would be sold to Niagara Mohawk Power Corporation.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issue of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it wil be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must file with the Commission, on or before November 26, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d)] or a notice of intent [See 18 CFR 4.33(b) and (c)] to file a competing application. Filing of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) of § 4.101 et. seq. (1981).

Comments, Protests, or Petitions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 Fed. Reg. 19025–25 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before November 26 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE "COMPETING APPLICATION","PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 3183–001]

Massachusetts Municipal Wholesale Electric Company and Connecticut Municipal Electric Energy Cooperative; Surrender of Preliminary Permit

September 24, 1982.

Take notice that Massachusetts Municipal Wholesale Electric Company and Connecticut Municipal Electric Energy Cooperative, Permittee for the proposed Warehouse Point Project No. 3183 filed a request on September 10, 1982, that its preliminary permit be terminated. The preliminary permit was issued on July 28, 1981, and would have expired on June 30, 1984. The project would have been located on the Connecticut River, in Hartford County, Connecticut. Permittee indicated that the project would not be economically feasible to develop.

The surrender of the permit is in the public interest. Therefore, the surrender of the preliminary permit for Project No.

3183 is accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26809 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5835-000]

Pennsylvania Hydro-Electric Development Corporation; Application for License (5 NW or Less)

September 23, 1982.

Take notice that Pennsylvania Hydro-Electric Development Corporation (Applicant) filed on December 31, 1981, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for construction and operation of a water power project to be known as the Felix Water Power Project No. 5835. This application for license was filed during the term of the Applicant's preliminary permit for Project No. 2803. The project would be located on the Schuylkill River in Berks County, Pennsylvania. Correspondence with the Applicant should be directed to: Mr. Larry Gleeson, President, Pennsylvania Hydro-Electric Development Corporation, Suite 213, Continental Offices, P.O. Box 814, King of Prussia, Pennsylvania 19406.

Project Description—The proposed project would be run-of-the-river and would consist of: (1) the existing Felix Dam, approximately 450 feet long and 24 feet high, constructed of rock-filled timber cribs with spillway crest elevation at 237.5 feet m.s.l.; (2) a reservoir having minimal pondage; (3) an existing navigation lock to be rehabilitated, gated, and used to transport flows to the powerhouse intake structure; (4) a new powerhouse containing a turbine-generator unit having a total rated capacity of 1,500 kW; (5) a tailrace with re-entry to the river approximately 170 feet downstream of the dam; (6) a new transmission line, approximately 1,000 feet long, connecting to existing 13.2-kV lines; and (7) appurtenant facilities. The Applicant estimates that the average annual energy output would be 8,000,000 kWh. Project energy would be sold to the Metropolitan Edison Company. Felix Dam is owned by the Commonwealth of Pennsylvania.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must file with the Commission, on or before November 29, 1982, either the competing application itself [See 18 CFR 4.33(a) and (d)] or a notice of intent [See 18 CFR 4.33(b) and (c)] to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et. seq. (1981).

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 Fed. Reg. (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before November 29, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26801 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 6658-000]

Pioneer Hydro Power, Inc.; Application for Preliminary Permit

September 24, 1982.

Take notice that Pioneer Hydro Power, Inc. (Applicant) filed on August 31, 1982, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for Project No. 6658 to be known as the Whale Creek Hydroelectric Project located on Whale Creek, near Estacada, in Clackamas County, Oregon. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Messrs. Carl Rounds and K. Marshal Volpa, 1885 W. Washington Ave., Stayton, Oregon 97383.

Project Description—The proposed project would consist of: (1) a 6-foot-high by 30-foot-long diversion structure; (2) a 13,200-foot-long penstock; (3) a powerhouse to contain one impulse-type, turbine-generating unit with a rated capacity of 1,250 kW; and (4) a 200-foot-long, 12-kV transmission line. The project would be located within the boundaries of the Mt. Hood National Forest. The average annual production is about 7 million kWh.

Proposed Scope of Studies Under Permit—A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the proposed project and to file an FERC license application.

Competing Applications—Anyone desiring to file a competing application for preliminary permit must file with the Commission, on or before December 6, 1982, the competing application itself, or a notice of intent to file such an application [see: 18 CFR 4.30 et seq. (1981); and Docket No. RM81-15, issued October 29, 1981, 46 FR 55245, November 9, 1981.]

The Commission will accept applications for license or exemption from licensing, or a notice of intent to file such an application in response to this notice. A notice of intent to file an application for license or exemption must be filed with the Commission on or before December 6, 1982, and should specify the type of application forthcoming. Any application for license

or exemption from licensing must be filed in accordance with the Commission's regulations [see: 18 CFR § 4.30 et seq. or § 4.101 et seq. (1981), as appropriate].

Filing of a timely notice of intent to file an application for preliminary permit, allows an interested person to file an acceptable competing application for preliminary permit no later than February 4, 1983.

Agency Comments—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time set below, it will be presumed to have no comments.

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 FR 19025–28 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before December 6, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26603 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 3013-001]

Quidnick Reservoir Association; Application for License (5 MW or Less)

September 24, 1982.

Take notice that Quidnick Reservoir Association (Applicant) filed on March 30, 1982, as amended on April 12, 1982, an application for license [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for construction and operation of a water power project to be known as the Natick Dam Project No. 3013. The project would be located on the Main Branch-Pawtuxet River in Kent County, Rhode Island. The application was filed during the term of the Applicant's preliminary permit for Project No. 3013. Correspondence with the Applicant should be directed to: Steven Krous, Halliwell Associates, Inc., 865 Waterman Avenue, East Providence, Rhode Island 02914.

Project Description—The proposed project would consist of: (1) the Applicant's existing Natick Dam, 166 feet long and 19 feet high, with provisions for installation of 12-inch high flashboards; (2) a new 75-foot long headrace; (3) a new powerhouse with an installed capacity of 522 kW; (4) a new 50-foot long tailrace; and (5) other appurtenances. Applicant estimates an annual generation of 2,853,504 kWh.

Purpose of Project—Project energy would be sold to Narragansett Electric Company.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before December 3, 1982, either the competing application itself [See 18 CFR 4.33 (a) and (d)] or a notice of intent [See 18 CFR 4.33 (b) and (c)] to file a competing application. Filing of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or § 4.101 et seq. (1981).

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 CFR 385.211 or 385.214, 47 FR 19025–28 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be filed on or before December 3, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26603 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 6375-000]

Russell Biggs, Sr.; Application for Exemption for Small Hydroelectric Power Project Under 5 MW

September 23, 1982.

Take notice that on May 27, 1982, Russell Biggs, Sr. (Applicant) filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for

exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric Project No. 6375 would be located on Slaughterhouse Gulch-Rock Creek, near Twin Falls, in Twin Falls County, Idaho. Correspondence with the Applicant should be directed to: Mr. Russell Biggs, Sr., Route #5, Box 1905, Twin Falls, Idaho 83301.

Project Description—The proposed project would consist of: (1) a 5-foot-high, 25-foot-long concrete structure; (2) a 1,000-foot-long, 30-inch-diameter penstock; (3) a powerhouse containing two generating units with a total installed capacity of 116 kW; and (4) a 300-foot-long, 12-kV transmission line from the powerhouse to an existing transmission line. The Applicant estimates that the average annual energy production would be 0.50 million kWh.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the Idaho Department of Fish and Game are requested, for the purposes set forth in Section 408 of the Act, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments wihin 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives. *"Competing Applications*—Any qualified license applicant desiring to file a competing application must file with the Commission, on or before November 8, 1982 either the competing license application that proposes to develop at least 7.5 megawatts in that project, or notice of intent to file such a license application. Filing of a timely notice of intent allows an interested person to file the competing license application no later than 120 days from the date that comments, protests, etc. are due. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 C.F.R. § 4.33 (b) and (c) (1980). A competing license application must conform with the requirements of 18 C.F.R. § 4.33 (a) and (d) (1980).

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of the Rules 211 or 214, 18 C.F.R. 385.211 or 385.214, 47 Fed. Reg. 19025–26 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before November 8, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26004 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 6441-000]

South Fork Hydroelectric; Application for Exemption for Small Hydroelectric Power Project of 5 MW or Less Capacity

September 24, 1982.

Take notice that on June 17, 1982, South Fork Hydroelectric Association filed an application under Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended*), for exemption of a proposed hydroelectric project from licensing under Part I of the Federal Power Act. The proposed small hydroelectric Project No. 6441 would be located on Kern River in Kern County, California. Correspondence with the Applicant should be directed to: Messrs. Carl G. and William B. Allen, 3435 Wilshire Boulevard, Suite 2320, Los Angles, California 90010.

Project Description—The proposed project would consist of: (1) a proposed 6-feet high, 135-feet long diversion structure; (2) a proposed 84-inch diameter conduit; (3) a proposed powerhouse containing 3 generating units having a total installed capacity of 3,810 kW; (4) a proposed 13.8 kV transmission line; (5) a proposed access road; and (6) appurtenant facilities. A part of the project would be located on lands owned by the U.S. Forest Service. The Applicant estimates the average annual energy output would be 19,692,000 kWh.

Purpose of Project—The power produced would be delivered to local electrical utilities, or to adjacent industrial plants.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

Agency Comments—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the California Department of Natural Resources are requested, for the purposes set forth in Section 408 of the Act, to submit within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period that

agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Competing Applications—This application was filed as a competing application to Victor page and LaVerta Page's application for Project No. 4805 filed on October 2, 1981. Public notice of the filing of that application, which has already been given, established the due date for filing competing applications for licenses, exemption, or notices of intent. In accordance with the Commission's regulations, no exemptions, licenses, or notices of intent will be accepted for filing in response to this notice. Any application for license or exemption from licensing, or notice of intent to file an exemption application, must be filed in accordance with the, Commission's regulations [See: 18 CFR 4.30 et seq. or 4.101 et seq. (1981), as appropriate].

Comments, Protests, or Motions to Intervene—Anyone may file comments, a protest, or a motion to intervene in accordance with the requirements of Rules 211 or 214, 18 C.F.R. 385.211 or 385.214, 47 Fed. Reg. 19025–26 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before November 15, 1982.

Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26606 Filed 9-27-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-544-000]

Southern Company Services, Inc.; Order Accepting for Filing Unit Power Sales Agreements, Granting Interventions and Waiver of Notice, and Denying Requests for Rejection and Hearing

Issued September 22, 1982.

Before Commissioners: C. M. Butler III, Chairman; Georgiana Sheldon and J. David Hughes. Electric rates: Acceptance; Intervention; Waiver of Notice.

On May 24, 1982, Southern Company Services, Inc. (SCSI), acting on behalf of its affiliates, Alabama Power Company, Gulf Power Company, Georgia Power Company, and Mississippi Power Company, tendered for filing superseding Unit Power Sales Agreements with Jacksonville Electric Authority (JEA) and Florida Power and Light Company (FP&L).[1] The proposed agreements include the same formulary rates as those which were accepted for filing in SCSI's earlier Docket No. ER81–678–000.[2] The proposed amendments differ from the orginally filed unit sales' agreements in that they provide for increases in capacity entitlements, extensions of the terms of the agreements and the inclusion of additional units from which capacity and energy would be sold to JEA and FP&L.[3] SCSI states that the proposed revenues over the twelve-month period ending December 31, 1983, would remain unchanged from the original submittal in Docket No. ER81–678–000 (approximately $152,854,900 for the sales to FP&L and approximately $136,109,800 for the sales to JEA). However, the inclusion of lower cost units is expected to result in lower total capacity charges over the life of the agreements. SCSI proposes an effective date of January 1, 1983, the same date specified for initiation of service under the originally filed unit sales agreements.

Notice of SCSI's filing was issued on June 2, 1982, with responses due by June 16, 1982. On June 16, 1982, Seminole Electric Cooperative, Inc. (Seminole) filed a protest and intervention. Seminole challenges the increased sales to FP&L and requests that the proposed amendments to the SCSIFP&L agreement be rejected to the extent that they "preclude . . . unit power purchases by FP&L from Seminole."[4] Seminole also requests a hearing concerning the lawfulness of the proposed amendments.

Seminole's requests are based on two premises. First, it is alleged that unit sales by Seminole to FP&L would be made at a lower cost than those by SCSI. SCSI's proposed arrangement would allegedly result in higher rates for Seminole, inasmuch as Seminole also purchases power from FP&L. Second, Seminole asserts that FP&L, by failing to purchase unit power from Seminole, will force Seminole to pass along the entire cost of its new generating units to its member cooperatives. This would result in a substantial increase in the cooperatives' rates, thereby hampering their ability to compete with FP&L for retail loads.

On July 1, 1982, SCSI and FP&L separately filed answers to Seminole's protest. FP&L also filed on that date an untimely intervention. In its answer, SCSI states that the Commission should deny Seminole's intervention and dismiss its protest. SCSI contends that Seminole has failed to raise any issue over which the Commission has jurisdiction and that it seeks a remedy the Commission is without authority to grant. SCSI further alleges that Seminole's filing is an abuse of process, on the ground that Seminole's allegations are completely without merit. FP&L makes essentially the same arguments, adding that even if the Commission had authority to negate the

---

[1] *See* Attachment A for Rate Schedule designations.

[2] By letter dated March 3, 1982, the Director, Office of Electric Power Regulation, accepted for filing the present formulary rates subject to the same filing and review procedures which were established in Docket No. ER80–58 for similar formulary rates filed by SCSI. In Docket No. ER80–58 the Commission, by letter dated September 14, 1981, accepted for filing a settlement agreement which included formulary rates for interchange service provided to FP&L. Under the settlement agreement, SCSI agreed to file periodic informational schedules of rates determined pursuant to the operation of the formulas with such rates subject to the Commission review and subject to refund pending that review.

[3] Under the original agreements, SCSI would sell amount varying from 660 MW to 1400 MW, between 1983 and 1992, from the following units: Scherer Unit Nos. 1–4 and Daniel Unit Nos. 1 and 2. Under the revised agreements, SCSI would sell amounts varying from 600 MW to 2300 MW, between 1983 and 1995, from the originally designated units as well as Miller Unit Nos. 1–4.

[4] Seminole is constructing two 600 MW coal-fired generating units from which such unit power purchases would be made. Seminole does not challenge the SCSI-JEA agreement.

existing contract and direct FP&L, instead, to contract with Seminole. SCSI's proposal is superior to Seminole's both in terms of economics and reliability. With respect to its intervention, FP&L states that it had no reason to intervene until it was apprised of Seminole's intervention, and that it filed its late intervention as shortly as possible thereafter.

Discussion

The Commission finds that participation in this proceeding by Seminole is in the public interest. Accordingly, its petition to intervene will be granted. The Commission further finds that good cause has been shown by FP&L for its untimely intervention, and that because of the early stage of this proceeding, its intervention will not disrupt the proceeding or burden other parties. Accordingly, its petition to intervene will be granted.

Seminole's request for rejection of SCSI's filing and for a hearing on the lawfulness of the proposed amendments must be denied. Our review indicates that the rates to FP&L are cost justified and should be accepted. Indeed, Seminole does not suggest in its pleading that the rates under SCSI's proposed agreements are unjust and unreasonable on a cost basis. With regard to the allegation that FP&L's rates to Seminole will be excessively increased by FP&L's purchases from SCSI, the gravaman of Seminole's complaint apparently is that FP&L's failure to purchase allegedly less costly power from Seminole is imprudent. We need not pass on the merits of this allegation because this proceeding is not the appropriate forum in which to pursue it. The proper forum for Seminole's complaint is in a rate case in which FP&L proposes to pass on to Seminole the allegedly imprudent costs.

As to Seminole's broad, anticompetitive allegations, they do not appear to state a claim for which there is a remedy under the Federal Power Act. While it appears that Seminole may be in a better position to compete with FP&L if FP&L purchases unit capacity from Seminole, we perceive no duty on FP&L's part, under the Federal Power Act or other applicable statutes, to purchase capacity from Seminole. We shall accordingly deny the request for a hearing since Seminole has raised no material questions of fact or law regarding the lawfulness of Southern Company's sale to FP&L.

SCSI requests waiver of the 120 day notice requirement of section 35.3 of the Commission's regulations (18 CFR 35.3) since it states that advance approval is essential to avoid the necessity of contingency planning for the construction of facilities and the supply of capacity to meet expected demand. We find good cause to grant the waiver as requested,

The Commission orders: (A) Seminole's requests for rejection of SCSI's filing and for a hearing are hereby denied.

(B) SCSI's and FP&L's requests for rejection of Seminole's intervention are hereby denied.

(C) Waiver of the 120 day notice requirement is hereby granted for good cause shown.

(D) SCSI's Amended and Restated Unit Power Sales Agreements with JEA and FP&L are hereby accepted for filing to become effective, without suspension, on January 1, 1983, as requested by SCSI.

(E) The interventions in this proceeding are hereby granted subject to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act; *Provided, however,* that participation by such intervenors shall be limited to matters set forth in their petitions to intervene; and *provided, further,* that the admission of said intervenors shall not be construed as recognition that they might be aggrieved by any order of the Commission in this proceeding.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Doc. Nos. CP82-125-003 and CP82-125-004, et al.]

Trans—Niagara Pipeline, et al.; Intent To Prepare An Environmental Impact Statement for the Trans-Niagara Import Project and Request for Comments on Environmental Issues and the Scope of Those Issues

September 23, 1982.

In the matter of Trans-Niagara Pipeline, Algonquin Gas Transmission Company, Transcontinental Gas Pipe Line Corporation, ANR Storage Company, Great Lakes Gas Transmission Company, Texas Eastern Transmission Corporation, ANR Michigan Storage Company, Docket Nos. CP82–125–003, CP82–125–004, CP82–119–001, CP82–385–000, CP82–420–000, CP82–428–000, CP82–446–000, and CP82–478–000.

Notice is hereby given that the staff of the Federal Energy Regulatory Commission (FERC) has determined that approval of the projects proposed in the dockets listed above would constitute a major Federal action significantly affecting the quality of the human environment. Therefore, pursuant to section 2.82(b) of the Commission's rules of Practice and Procedure (18 CFR 2.82(b)), an environmental impact statement (EIS) will be prepared. The draft EIS for the Trans-Niagara Import Project will deal with the facilities proposed in these applications. It will also address alternatives to the proposed project including no action, route deviations, and system design modifications where feasible. In addition, the EIS will present comparative analysis of the Trans-Niagara Import Project as proposed and any other reasonable gas transportation system alternatives, as appropriate.

The applicants are seeking certificates of public convenience and necessity, under section 7(c) of the Natural Gas Act, authorizing construction and operation of a total of 556 miles of pipeline and 176,480 horsepower of compression and transportation and storage service. Transcontinental Gas Pipe Line Company (Transco), Texas Eastern Transmission Corporation (Texas Eastern), and Algonquin Gas Transmission Company (Algonquin) would purchase imported Canadian natural gas from TransCanada Pipelines Limited, Pan-Alberta Gas Ltd., ProGas Limited, Sulpetro Limited, and Union Gas Limited. The gas would be imported from Canada at a point on the international boundary near Niagara Falls, New York, and transported through existing and proposed facilities for sale to customers in the Northeast.[1]

Trans-Niagara Pipeline (Trans-Niagara) proposes, in Docket No. CP82–125–003, to construct 161 miles of 42-inch diameter pipeline, a dual 36-inch diameter pipeline crossing of the Niagara River, and two meter stations in New York and Pennsylvania. In addition, Trans-Niagara proposes to install under Docket No. CP82–125–004 a total of 102,000 horsepower of compression at two new compressor stations in Niagara County, New York, and Clinton County, Pennsylvania.

Under Docket No. CP82–385–000, Transco would construct 230 miles of 10-, 16-, 24-, 36-, and 42-inch diameter pipeline loop in seven segments adjacent to its existing pipeline in Pennsylvania and New Jersey. The applicant would also install a total of 16,350 horsepower of compression at two existing compressor stations in Lycoming and Luzerne Counties, Pennsylvania.

Texas Eastern requests authorization in Docket No. CP82–446–000 to construct 98 miles of 30- and 36-inch diameter pipeline loop in six segments adjacent to its existing pipelines in Pennsylvania.

In Docket No. CP82–119–001, Algonquin proposes to construct 19.2 miles of 30-inch diameter pipeline and 3.9 miles of 36-inch diameter pipeline in New Jersey and New York, respectively. Algonquin further proposes to install a total of 42,130 horsepower of compression, including two new compressor stations, in Morris County, New Jersey, and Putnam County, New York, as well as adding compression at two existing compressor stations in New York and Connecticut. Algonquin would also install four new regulator stations in Massachusetts and a meter station in Connecticut.

Great Lakes Gas Transmission Company proposes in Docket No. CP82–428–000 to construct 20.6 miles of 36-inch diameter pipeline loop in Crawford and Kalkaska Counties, Michigan, and to modify three existing metering stations in Michigan.

ANR Storage Company (Docket No. CP82–420–000) would construct 15.9 miles of 36-inch diameter pipeline adjacent to existing pipeline rights-of-way, two meter stations, and a 4,000-horsepower compressor station in Kalkaska and Grand Traverse Counties, Michigan.

Finally, ANR Michigan Storage Company (Docket No. CP82–478–000) would construct 6.5 miles of 16-inch diameter pipeline and a 12,000-horsepower compressor station. The applicant would also develop and operate the Whitewater 36/36A and Union 8/8A fields for underground storage by rehabilitating a total of 4 existing wells and drilling 19 new wells. All of these facilities would be in Grand Traverse County, Michigan.

To allow sufficient space for construction of the pipelines, construction rights-of-way up to 75 feet wide would be required. After construction, new 20- to 50-foot wide permanent rights-of-way would be maintained.

A copy of this notice and additional technical information about the proposed project have been distributed to Federal, state, and local environmental agencies, parties to the proceeding, and the public. These groups are invited to comment on anticipated environmental problems associated with the proposed projects. Comments will be used by the FERC staff to identify the issues which require in-depth environmental analysis. Comments should be addressed to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Recommendations that the EIS address specific issues should be supported by detailed rationale or a showing of the need to consider those issues. Written comments should be submitted by October 29, 1982, and reference Docket No. CP82–125–003.

Additional information about the proposals is available from Mr. Kenneth Frye, Project Manager, Environmental Evaluation Branch, Office of Pipeline and Producer Regulation, telephone (202) 357–9039.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

FEDERAL MARITIME COMMISSION

[Docket No. 82-36]

Requirements for Filing Currency Adjustment Factors Reflecting Changes in the Exchange Rate of Tariff Currencies; Availability of Finding of No Significant Impact

Upon completion of an environmental assessment, the Federal Maritime Commission's Office of Energy and Environmental Impact has determined that the Commission's decision on Docket No. 82–36 will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, and that preparation of an environmental impact statement is not required. Docket No. 82–36 involves a proposed rulemaking which is intended to establish a uniform procedure for publishing currency adjustment factors (CAF's) by all common carriers by water via the U.S. foreign commerce and conferences of such carriers, including non-vessel operating common carriers (NVOCC's).

This Finding of No Significant Impact (FONSI) will become final within 20 days of publication of this Notice in the **Federal Register** unless petition for review is filed pursuant to 46 CFR 567.6(b).

The FONSI and related environmental assessment are available for inspection on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone (202) 523–5725.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Hawkeye Bancorporation,* Des Moines, Iowa, to acquire 100 percent of the voting shares or assets of First National Bank in Lenox, Lenox, Iowa. Comments on this application must be received not later than October 22, 1982.

B. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Atlantic Bancorporation,* Jacksonville, Florida; to acquire 100 percent of the voting shares or assets of Atlantic National Bank of Florida at Orange Park, Orange Park, Florida, a *de novo* bank. This application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Comments on this application must be received not later than October 22, 1982.

Board of Governors of the Federal Reserve System, September 22, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

[FR Doc. 82-26534 Filed 9-27-82; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated for each application.

A. **Federal Reserve Bank of Boston** (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *First National Boston Corporation,* Boston, Massachusetts (data processing activities; Rhode Island): To engage, through its subsidiary, FBC, Inc., in providing bookkeeping and data processing services for the internal operation of a single named financial institution and storing and processing banking, financial or related data

(including demand deposit, savings, direct and indirect installment loans, commercial loans, mortgages, general ledger and central information accounting) for such financial institution and indirectly for institutions which may enter into a data processing agreement with such institution. These activities would be conducted from an office in Pawtucket, Rhode Island serving the state of Rhode Island. Comments on this application must be received not later than October 20, 1982.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Midland Mortgage Corporation,* Detroit, Michigan (mortgage servicing activities; United States): To open a branch office in Orlando, Florida, to perform loan origination and mortgage loan servicing and accounting for Midland Mortgage Corporation throughout the United States. Comments on this application must be received not later than October 19, 1982.

C. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northwest Bancorporation,* Minneapolis, Minnesota (financing, servicing, leasing activities; Texas, Oklahoma, Louisiana, Arkansas, Missouri, Kansas, Tennessee, New Mexico, Arizona and Alabama): To engage through its subsidiary, Banco Financial Corporation, in making or acquiring loans or other extensions of credit such as would be made by a commercial finance company, involving commercial loans secured by borrower's inventory, accounts receivable, or other assets; servicing such loans for others; and making leases of personal property in accordance with the Board's Regulation Y. These activities would be conducted from an office in Dallas, Texas, serving Texas, Oklahoma, Louisiana, Arkansas, Missouri, Kansas, Tennessee, New Mexico, Arizona and Alabama. Comments on this application must be received not later than October 20, 1982.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation,* San Francisco, California (travelers check activities; Florida): To engage, through its indirect subsidiary, FinanceAmerica Corporation, a Florida corporation, in the activity of selling travelers checks. This activity will be conducted from a *de novo* office located at the Miami International Airport, Miami, Florida, serving the entire State of Florida. Comments on this application must be received not later than October 22, 1982.

Board of Governors of the Federal Reserve System, September 22, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares and/or assets of a bank. The factors that are considered in acting on the applications are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta Georgia 30303:

1. *Britton & Koontz Capital Corporation,* Natchez, Mississippi; to become a bank holding company by acquiring 100 percent of the voting shars of the successor by merger to Britton & Koontz First National Bank, Natchez, Mississippi. Comments on this application must be received not later than October 22, 1982.

B. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. **Eitzen Independents, Inc.,** Eitzen, Minnesota; to become a bank holding company by acquiring 84.4 percent of the voting shares of Eitzen State Bank, Eitzen, Minnesota. Comments on this application must be received not later than October 22, 1982.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Green Mountain Bancorporation, Inc.,* Englewood, Colorado; to become a bank holding company by acquiring 100 percent of the voting shares of Green Mountain Bank, Lakewood, Colorado. Comments on this application must be received not later than October 22, 1982.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Community Bancorporation, Inc.,* Bellville, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Bellville, Bellville, Texas. Comments on this application must be received not later than October 22, 1982.

E. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *First Manitowoc Bancorp, Inc.,* Manitowoc, Wisconsin; to become a bank holding company by acquiring 80 percent or more of the voting shares of First National Bank in Manitowoc, Manitowoc, Wisconsin. This application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Comments on this application must be received not later than October 22, 1982.

Board of Governors of the Federal Reserve System, September 22, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Warranty Rules; Information Collection Requirement

AGENCY: Federal Trade Commission.

ACTION: Application to OMB under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) for clearance of a study intended to evaluate changes which may have occurred since promulgation of the warranty rules. (16 CFR 701; 16 CFR 702; 16 CFR 703.)

SUMMARY: The purpose of this study is to gather information about consumer use, awareness, and understanding of warranties and to examine consumer expectation and experiences regarding product failure and repair performance. Results will be compared to data collected in a 1977 study to examine changes in consumer warranty experience which may have occurred since the warranty rules went into effect.

DATES: Comments on the proposed study must be submitted on or before October 28, 1982.

ADDRESS: Send comments to Ms. Nell Minow, Office of Information and

Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3228 Washington, D.C. 20503. Copies of this application may be obtained from: Public Reference Branch, Room 130, Federal Trade Commission, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:
For further information contact Thomas J. Maronick, Office of Impact Evaluation, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580 (202) 724–1877.

Dated: September 22, 1982.

John H. Carley,

General Counsel.

BILLING CODE 6750–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration; Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following national advisory bodies scheduled to assemble during the month of October.

Alcohol Biomedical Research Review Committee

October 13–15; 9:00 a.m., Embassy Square Hotel, 2000 N Street, N.W., Washington, D.C. 20036.
Open—October 13, 9:00–11:00 a.m.
Closed—Otherwise.
Contact: Harvey P. Stein, Ph.D., Executive Secretary, Alcohol Biomedical Research Review Committee, Parklawn Building, Room 16C–26, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–6106.
Purpose: The Alcohol Biomedical Research Review Committee is charged with the initial review of applications for assistance from the National Institute on Alcohol Abuse and Alcoholism for support of research and training activities and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.
Agenda: From 9:00–11:00 a.m., October 13, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552b(c)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

* * * * *

Services Improvement Evaluation and Transfer Subcommittee of the Epidemiologic and Services Research Review Committee

October 18–19; 8:30 a.m., Washington Marriott Hotel, 1221 22nd Street, N.W., Washington, D.C. 20037.
Open—October 18, 8:30–9:30 a.m.
Closed—Otherwise.
Contact: Sandra Buckhalter, Parklawn Building, Room 9C–02, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4728.
Purpose: The Services Improvement Evaluation and Transfer Subcommittee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and training activities in the fields of mental health services research, clinical services research, and evaluation methodology, and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 8:30–9:30 a.m., October 18, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Subcommittee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552b(c)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

* * * * *

Basic Psychopharmacology Research Subcommittee of the Basic Psychopharmacology and Neuropsychology Research Review Committee

October 21–22; 9:00 a.m., the Capitol Hill Hotel, 200 C Street, S.E., Washington, D.C. 20003.
Open—October 21, 9:00–10:00 a.m.
Closed—Otherwise.
Contact: Mary Cope, Parklawn Building, Room 9C–26, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3944.
Purpose: The Basic Psychopharmacology Research Subcommittee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research activities in the fields of basic psychopharmacology and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00–10:00 a.m., October 21, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Subcommittee will be performing initial review of applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552b(c)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

* * * * *

Clinical Program Projects/Clinical Research Centers Subcommittee of the Treatment Development and Assessment Research Review Committee

October 28; 9:00 a.m., the Georgetown Hotel, 2121 P Street, N.W., Washington, D.C. 20036.
Open—9:00–10:00 a.m.
Closed—Otherwise.
Contact: Pamela J. Mitchell, Parklawn Building, Room 9C–18, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1367.
Purpose: The Clinical Program Projects/Clinical Research Centers Subcommittee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of Mental Health Clinical Research Centers, clinical research program projects, and other large-scale multidisciplinary research projects, and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00–10:00 a.m., October 28, the meeting wil be open for discussion of administrative announcements and program developments. Otherwise, the Subcommittee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552b(c)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

Psychopharmacological, Biological, and Physical Treatments Subcommittee of the Treatment Development and Assessment Research Review Committee

October 28–29; 9:00 a.m., the Georgetown Hotel, 2121 P Street, N.W., Washington, D.C. 20036.
Open—October 28, 9:00–10:00 a.m.
Closed—Otherwise.
Contact: Pamela J. Mitchell, Parklawn Building, Room 9C–18 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1367.
Purpose: The Psychopharmacological, Biological, and Physical Treatments Subcommittee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and training activities in the fields of development and assessment of psychopharmacological, biological, and physical treatments of mental illness, and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9:00–10:00 a.m., October 28, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Subcommittee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of 5 U.S.C. 552b(c)(6), and Section 10(d) of Public Law 92–463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact persons listed above. Summaries of the meetings and rosters of Committee members may be obtained as follows: NIAAA: Mrs. Diana Widner, Committee Management Officer, Parklawn Building, Room 16C–18, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4375. NIMH: Ms. Helen W. Garrett, Committee management Officer, Parklawn Building, Room 17C–26, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4333.

Dated: September 23, 1982.

Sue Simons,

Committee Management Officer Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

Food and Drug Administration

Advisory Committee; Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770–776 (5 U.S.C. App. I)), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meeting is announced.

Peripheral and Central Nervous System Drugs Advisory Committee

Date, time, and place. October 28 and 29, 9 a.m., Conference Rm. D, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, October 28, 9 a.m. to 10 a.m.; open committee discussion, October 28, 10 a.m. to 5 p.m., October 29, 9 a.m. to 5 p.m.; Frederick J. Abramek, National Center for Drugs and Biologics (HFD–120), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3800.

General function of the committee. The committee reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational drugs proposed for marketing for use in the treatment of neurological disease.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writting, on issues pending before the committee.

Open committee discussion. The committee will discuss orphan products development, phenytoin use in myotonic conditions, Bureau of Drugs advisory system (film), skeletal muscle relaxants, over-the-counter use considerations, and clinical trial design for status epilepticus.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contract person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: September 21, 1982.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

Social Security Administration

Refugee Resettlement Program; Formula for Allocation to States of FY 1982 Refugee Social Services Funds

AGENCY: Office of Refugee Resettlement, Social Security Administration, HHS.

ACTION: Final notice.

SUMMARY: This notice sets forth the formula for allocation to States of FY 1982 social services funds under the Refugee Resettlement Program (RRP). The formula yields the allocation of FY 1982 refugee social services funds for each State participating in the RRP.

EFFECTIVE DATE: September 28, 1982.

FOR FURTHER INFORMATION CONTACT: Ellen McGovern, (202) 472-6510.

SUPPLEMENTARY INFORMATION:

Discussion of Comments

Twenty-three comments were received in response to the notice of proposed formula for allocation to States of FY 1982 refugee social service funds which was published in the Federal Register of March 17, 1982 (47 FR 11566). The comments supported the concept of an allocation formula, but generally they disagreed with the basis or methodology of the formula.

The following sections address specific points that commenters raised, together with our responses:

Allocation Formula Methodology

Data Base

Comment: Several comments indicated that the utilization of the Immigration and Naturalization Service (INS) alien registration would underestimate the refugee population since many of the refugees failed to register at a time when INS had no reasonable way to enforce registration. Moreover the commenters said that other problems such as long waiting lines at post offices to get registration forms and scarcity of those forms, as well as existing language barriers of refugees and the inability of post office personnel to assist refugees due to this language barrier, prevented refugee registration.

Response: Based on some reactions to the formula, it appears that there is a misunderstanding about the sources of data being used in the population estimates. ORR's data system has multiple sources, of which the INS alien registration is one. The formula simply describes the process that ORR has used to develop its State population estimates, with the added restriction to persons who entered during the past three fiscal years. The INS annual registration figures are adjusted for underregistration, updated monthly with ORR's arrival data, and adjusted for secondary migration. ORR's arrival data come from the Centers for Disease Control (CDC) of the U.S. Public Health Service, which has records of all Southeast Asian refugees who have arrived in the U.S. since July 1979; the ORR Miami office, which has records on arriving Cuban refugees; and the records of new refugee arrivals from the American Council of Voluntary Agencies (ACVA) and from the nominal rolls prepared by the Intergovernmental Committee for Migration (ICM). In January 1980, out of 289,200 Southeast Asian refugees in the U.S., 253,100 registered with INS, a compliance rate of 87.5 percent. Since the population estimates were initially prepared, we have been able to validate them against the U.S. Census of April 1, 1980, and the refugee child counts collected by the Department of Education in February 1981 and October 1981. We remain confident that ORR's methodology is the best available for generating these estimates.

Comment: Other commenters said that the January 1980 INS alien registration included only some of the boat cases since these people had just begun to arrive in the U.S. Further, the total population of refugees, according to the commenters, has doubled since then so that the January 1980 registration is statistically biased in "unknown" ways.

Response: Although the Department recognizes that the INS alien registration figures have certain limitations, we believe that these data provide the best possible starting point, since no other nationwide data exist which reflect the relocation of refugees after their initial resettlement in the U.S. and which have information on the year of entry. Further, the INS annual registration figures are adjusted for underregistration, updated monthly with ORR's arrival data, and adjusted for secondary migration. Therefore the data do include subsequent boat cases.

Comment: One commenter stated that the formula may be responsive to the needs of recent arrivals for services, but it fails to take into consideration the economic condition in the State as reflected by its rate of unemployment, number of refugee cash assistance recipients, and number of medical assistance recipients. Further, the commenter suggests that serious consideration should be given to the following formula factors: (1) Estimated number of refugees in the State; (2) number of new arrivals in the State; (3) unemployment rate in the State; (4) number of cash assistance recipients in the State; and (5) number of medical assistance recipients in the State.

Response: ORR has considered using factors in addition to the number of refugees in a State. In fact, one of the expected uses of the discretionary funds would be in consideration of unanticipated changes in location of new refugees. We do not believe, however, that the number of cash and medical assistance recipients or the unemployment rate in a State provides a good measure of refugee needs. The number of recipients may reflect widely varying eligibility requirements and payment levels among States, and recently arrived refugees may have equivalent needs for English language training and other basic services without regard to receipt of assistance or a State's unemployment rate.

Comment: Another commenter strongly objected to the assumptions used to develop the formula. The INS registration, according to this commenter, was discontinued because of uneven reporting of aliens around the country. This registration process resulted in underregistration of certain populations. The commenter also said that ORR has access to data on newly arrived refugees provided by the voluntary agencies of the American Council of Voluntary Agencies (ACVA), which provide an accurate count of arriving refugees. Adjustments for secondary migration can be made as indicated in the notice. Then, these population figures can serve as the baseline data for FY 1983, not the new figures developed from the 1981 INS data, according to the commenter.

Response: The Department recognizes that the INS alien registration figures have certain limitations. However, we feel that the data provide the best possible baseline, particularly since no

other comprehensive data base exists that reflects the relocation of refugees after their initial resettlement in the U.S. A comparison of the January 1980 INS registration with the April 1, 1980, U.S. Census count does not support the assertion of uneven reporting. Further, we think that the January 1981 registration, with the addition of subsequent arrivals and adjustments for estimated secondary migration, will provide an appropriate base for population estimates for social service funding to be allocated for FY 1983. Since INS does not currently expect to conduct further annual alien registrations, an alternative proposal, based on available data, will be developed for subsequent years and published in the **Federal Register** for public comment in 1983.

ORR does use the ACVA data on new arrivals of refugees, but at the same time we find this data source inadequate without further verification of population figures with other sources, such as CDC.

ORR's data system uses multiple data sources, including CDC, ICM, and ACVA. Data are updated monthly with refugee arrival information and adjusted for secondary migration.

In constructing the allocation formula, ORR determined that it had to provide a situation in which social service funding would be made available to States on an equitable basis—that is, more closely related to proportionate numbers of recent arrivals. Therefore ORR established the following criteria in recommending the allocation formula for FY 1982: The formula should give major emphasis to the needs of recent arrivals; assure a reasonable amount of continuity of State program levels where needs exist; and be based upon objective information which can actually be obtained or estimated reliably. Hence, the Director believes that the formula will result in allocations related to refugees generally having the greatest need for services (recent arrivals) and will at the same time minimize fluctuations in funding which would result if the allocations were based on changes in numbers of refugees during time periods shorter than three years. Thus the formula is expected to provide greater stability in State planning and programming for refugee services.

Comment: Criteria for the allocation formula, says one commenter, should reflect the same factors as the criteria for placement policy: For example, States might be identified as high impact areas (large concentration of refugee population), medium impact areas (medium concentration of refugee population), or low impact areas (low concentration of refugee population). High impact States (6–8 States) might receive $155.00 per refugee; medium impact (16–18 States), $130.00 per refugee; and low impact (the remaining States), $115.00 per refugee. This would use approximately the same amount as the total allocation amount proposed, according to this commenter. Hence, the formula would take "impact area" into account, and thereby be based more on the needs of refugees than only on the numbers of refugees.

On the other hand, other commenters stated that rural areas and States with only a few refugees have greater needs on a per capita basis. A commenter suggested that ORR consider "rural States" with refugee populations to have special needs and thereby be eligible to receive discretionary funds set aside by ORR for this purpose. Only then can the rural States be considered to be receiving equal consideration with urban States, says the commenter. Another commenter remarked that the formula concept was acceptable, but that a formula based on population assumes that social service costs are relatively equal, no matter where they are provided. The cost of providing these services to smaller groups of refugees scattered throughout a rural State, for example, is higher than the cost of providing services to the same number of refugees concentrated in a larger urban area.

Response: ORR has considered using a State's refugee population ratio (number of refugees as a proportion of the number of State residents). However, based on our consideration of the significance of the impact factor and other such factors, we concluded that these factors were undependable or poor indicators of refugee need.

In recognititon of the needs of States with small refugee populations, which may be widely scattered, ORR has decided to use some of the discretionary funds to assure that every participating State receives funding of at least $50,000. It is thought that this amount will provide the minimal, but necessary, level of funding needed to maintain effective services for a small refugee population.

Comment: Some commenters referred to the "best data available to the Director" language in the notice with respect to adjusting for secondary migration and indicated interest in the identification by ORR of the data sources.

Response: At this time, ORR means by "best data available" the information from its multiple data source system, including data from CDC, ICM, ORR-Miami, and ACVA. Because of the number of inquiries regarding the best available data, we are defining what we mean by "best data available" in Section I of the final notice, below.

Refugees Estimated in The Population

Comment: Several commenters pointed out that the Refugee Act of 1980 specifically removes national origin as an eligibility criterion for the provision of services to refugees. The commenters say that the population groups and statistics cited in the **Federal Register** as Southeast Asian and Cuban refugees (not entrants) reflect only a partial count of the eligible refugee population. Therefore the method of allocating funds for social services for refugees is inconsistent with the legal base under which State governments are required to operate their service delivery to all refugees.

Other commenters stated that currently the majority of refugees are Southeast Asian but in the future other ethnicities might predominate. An allocation formula therefore should remain valid regardless of the shifts in the ethnic composition of refugees.

Response: The population estimates used for the allocation for FY 1982 cover Southeast Asian and Cuban refugees (not entrants) who arrived from October 1, 1978, through September 30, 1981. These are the two principal groups that are served only by the State-administered program.

ORR will modify the refugee population estimates for FY 1983 and thereafter to include all time-eligible refugee groups, to the extent of available data. We now have INS alien registration data for January 1981 for Soviet, East European, Ethiopian, and Afghan refugees, as well as arrival data covering Soviet, East European, African, and Near Eastern refugees who have arrived since 1980. This will enable us to develop estimates covering all refugee groups of significant size.

Secondary Migration

Comment: One commenter said that the development of an acceptable and valid measure of secondary migration is essential to an equitable allocation of funds.

Response: ORR concurs. We have developed the State population estimates on the basis of the best data available for estimating secondary migration.

Comment: According to some commenters, the method used by ORR to estimate and adjust for secondary migration is unclear. The notice of the proposed allocation formula states that

the method is described in detail in ORR's *Report to Congress* of January 1981. However, the commenter says after examination of that document that it describes only how secondary migration during 1979 was developed from the INS alien registration. It does not describe, according to the commenter, how it is applied in subsequent years' estimates or for this special subpopulation; for example, treating 1979 net secondary in-migration to States as a constant number is said to be statistically improper in view of the fact that each year the number of refugees in the U.S. has dramatically increased.

The commenter suggests that the proper statistical approach would be to covnert the number to a proportion of the total refugee population in the U.S. It is reasonable to figure this proportion of secondary migration as of the midpoint of the year being studied rather than at the beginning.

Response: A complete self-contained explanation of the method used to adjust the State population estimates for secondary migration appears in Section III—Basis for Population Estimates—of this final notice.

The suggestion that ORR calculate secondary migration as a proportion of the number of refugees in the country has merit. However, the approach suggested makes the assumption that the propensity to migrate remains constant with length of residence in the U.S., so that an increasing refugee population would be assumed to manifest an increasing number of moves. Evidence available to ORR suggests that, on the contrary, most secondary migration is concentrated in the early period of residence in the U.S. For the purposes of the allocation, it would be necessary to focus only on migration of persons of less than three years' residence. Also, the calculations should be nationality-specific and adjusted for the changing nationality composition of the Southeast Asian refugee population, since available evidence indicates that the direction of secondary migration varies by nationality. In time, we hope to refine our estimation procedures to take all these factors into account. Until that work can be completed, a relatively simple, conservative estimation procedure seems preferable to the method suggested.

Comment: A commenter suggested that ORR consider using CDC statistics on refugee arrivals and secondary migration. The commenter also offered an alternative method to adjust the population figures for secondary migration by using State education agency statistics on non-English-speaking students enrolled in primary and secondary schools whose native language is representative of various refugee populations. These figures could be adjusted by dividing the national numbers into the total refugee arrivals for the pertinent time period to determine a child-to-adult ratio for the appropriate "multiplier" to be applied to each State's school population. This method would yield an estimate of total "eligible" refugee population in each State.

Response: ORR agrees that CDC is the best source of data on Southeast Asian refugee arrivals, and their information has been the basis of our system for more than a year. CDC does not compile statistics on secondary migration. ORR is using the refugee child counts provided by States to the U.S. Department of Education as an independent check on the accuracy of our population estimates. They are not a perfect source, because some States appear to have undercounted their refugee children, and because different nationality groups have significant variation in their average family size. Therefore different multipliers would be needed to compensate for variations in the nationality composition of the States.

Comment: The allocation formula does not consider policy changes that would impact secondary and tertiary migration inflows and outflows, according to one commenter. This is especially important in light of the recent policy change in refugee cash assistance (RCA) eligibility from a refugee's first 36 months in the U.S. to the first 18 months. The commenter stated that States having GA programs (not all of them do) will probably be heavily impacted with refugees from other States that do not have GA.

Response: ORR has incorporated information on secondary migration into its population estimates for the period up to the beginning of FY 1982. Where States have presented convincing evidence of additional secondary migration up to that time, the population estimates have been adjusted accordingly. ORR will incorporate available new information on secondary migration during 1982 into its estimates for FY 1983.

Alternative Methods to the INS Alien Registration

Comment: Some commenters recommended that ORR require CDC to report on all refugees because they feel that the information collected is accurate and dependable. According to one commenter, CDC sends the initial notice of refugee arrivals to the State's Health Department, and then it is verified by local health departments. Hence the information is a fairly reliable headcount of the local refugee population. Local health departments, according to the commenter, not only validate the residency from CDC data, they also provide data on secondary migration. Therefore this is a viable alternative to the INS registration, states the commenter.

Response: All refugees receive a medical examination overseas prior to admission. In addition, refugees arriving from Southeast Asia are met at the ports of entry by CDC health inspectors for an additional health screening. ORR has explored with CDC the possibility of expanding current health screening and data collection functions to all refugees at all ports of entry. Currently, the high cost of such expansion is not thought to be justified by the public health considerations involved. If health screening at ports of entry is expanded in the future to other groups, data collection will expand with it.

State and local health departments vary in their success in locating newly referred refugees and in their ability to report on secondary migration. Therefore the quality of data available from different jurisdictions is variable; the same point can be made with regard to any other data base compiled at the State and local level. The use of a national data base is the fairest method in that it measures all jurisdictions with the same yardstick.

Discretionary Funds

Comment: One commenter thought it was inappropriate to retain 10% of available funds for use for discretionary purposes. This commenter and others indicated that the total funds available for services to refugees are inadequate to meet the needs of the refugee population. Therefore they feel that discretionary funds should not be retained, but allocated to States according to the formula.

Response: ORR believes that it was important to have discretionary funding of at least 10% (of the available 15%) that would be made available to States on the basis of such factors as changed geographic distribution and special needs of particular groups. Also, it was recognized that additional funding under the formula resulting from any adjustments made in population estimates beyond the estimates specified in Sections III and IV might be needed; therefore some of the discretionary funds would be used for

this purpose. The discretionary funds will be used for services to refugees.

Comment: Several commenters remarked that if discretionary funds remain, then those monies should be distributed to augment existing State social service programs for refugees. These funds should not be used for special research or study projects according to these commenters.

Response: The Department agrees with the commenters. The discretionary funding purposes, we believe, were quite clearly outlined in the notice of the proposed formula. The available funding will be used to meet special and unforeseeable needs of States and to carry out special projects intended to contribute to the effectiveness and efficiency of refugee resettlement programs in service delivery and self-sufficiency.

Final Notice:

I. Allocation Formula

The Director of the Office of Refugee Resettlement (ORR) plans to allocate funds available for FY 1982 to States for refugee social services in accordance with the formula specified below.

Each State's allocation consists of that State's proportion of the total funds which the Director determines to be available for this purpose. A State's allocation is determined as follows:

The sum of—

1. (a) The number of refugees in the State who arrived in the U.S. not more than three years prior to the beginning of the fiscal year for which the funds are appropriated, as shown by the latest annual alien registration data from the Immigration and Naturalization Service available at the time the allocation is determined; and

(b) The number of refugees who have arrived in the State subsequent to the date of the annual alien registration data used in (a), above, up to the beginning of the fiscal year, as shown by the best data available to the Director at the time the allocation is determined; with

(c) An adjustment for the secondary migration of refugees who arrived in the U.S. not more than three years prior to the beginning of the fiscal year for which the funds are appropriated;

Divided by—

2. The national total of 1(a) and 1(b) above;

And the result multiplied by—

3. The total amount of funds determined by the Director to be available for this purpose.

The calculation above yields the allocation for each State.

Example: The following presents a computation for a hypothetical State XYZ based on the formula. All population figures are from ORR records or estimated actuals.

- State XYZ refugee population: (10/1/78 to 12/31/79) 14,500 + (1/1/80 to 10/1/81) 5,250 − (secondary migration) 100 = 19,650
- U.S. refugee population: (10/1/78 to 12/31/79) 170,000 + (1/1/80 to 10/1/81) 232,000 = 402,000
- State/U.S. refugee population proportion: 19,650 ÷ 402,000 = .04888
- FY 1982 funds determined by ORR director to be available for this purpose: $57,435,000
- State allocation for refugee support services: $57,435,000 × .04888 = $2,807,423.

The Director believes that the above formula results in allocations related to refugees generally having the greatest need for services (recent arrivals) and at the same time minimizes fluctuations in funding which would result if the allocations were based on changes in numbers of refugees arriving during time periods shorter than three years. Thus the formula provides greater stability in State planning and programming for refugee services.

The population estimates for the allocation of funds in FY 1982 are based on the January 1980 INS alien registration and subsequent arrivals (see section III, below). The last INS annual alien registration was conducted in January 1981, but data from that registration are not yet available. Under amendments to the Immigration and Nationality Act enacted on December 29, 1981 (Pub. L. 97-116), aliens are no longer required to register with INS on an annual basis. We believe that the January 1981 registration provides an appropriate base for population estimates for social service funds to be allocated for FY 1983. An alternative proposal, based on available data, will be developed for subsequent years and published for public comment.

II. Amount for Allocation

ORR expects $67,571,000 to be available for refugee social services in FY 1982.

The Director plans to allocate $57,435,000 (approximately 85%) of this total to States under the formula. The grant awards to each State depend upon the acceptance of each State's proposals for providing services in accordance with existing rules at 45 CFR Part 400.

The remaining funds will be used on a discretionary basis to meet special and unforeseeable needs of State and to carry out special projects intended to contribute to the effectiveness and efficiency of the refugee resettlement program in service delivery and self-support. Discretionary funds will be made available to States on the basis of such factors as changed geographic distribution and special needs of particular refugee groups. Of the remaining 15% of funds, up to 5% will be used for special projects similar to demonstration projects, and the remainder (at least 10%) will be made available to States during the year on a discretionary basis to meet special needs. Some of the discretionary funds are also being used to provide additional funding under the formula resulting from adjustments made in the population estimates which were published with the proposed formula. The special projects will test approaches to particular problems or be designed to develop model programs in refugee service delivery and self-support.

Basis for Population Estimates

The population estimates used for the allocations for FY 1982 cover Southeast Asian and Cuban refugees (not entrants) who arrived from October 1, 1978, through September 30, 1981. These are the two principal groups that are served only by the State-administered program.

The starting point for the population estimates was the Immigration and Naturalization Service (INS) alien registration for January 1980, the last available enumeration of the Southeast Asian population in the United States. Although we recognize that the INS alien registration figures have certain limitations, since not all persons register and since time has passed since the registration took place, we believe that these data provide the best possible starting point since no other nationwide data exist that reflect the relocation of refugees after their initial resettlement in the U.S.

The population base was derived as follows:

The number of Southeast Asians who registered in each State in January 1980 was cross-tabulated by year of entry. The figures were adjusted for underregistration. Entries from January 1980 through September 1981 by State were added. Persons who entered before FY 1979 were subtracted from each State's total. The figures were adjusted for estimated net interstate secondary migration.

ORR estimated the secondary migration of the Southeast Asian refugee population as follows: The data obtained from two consecutive INS alien registrations were adjusted for

estimated underregistration. (As in any census-type operation, some people fail to register.) Arrivals in each State for the year in question were added to the adjusted figures for the base year. These totals—the number of persons expected to register in each State if there were *no* secondary migration—were compared with the actual adjusted registration for the second year. Differences between the expected and the actual totals were attributed to net secondary migration. (This method does not consider deaths or emigration, which are statistically rare among this group, or births, since children born in the United States do not register with INS.)

Because the tabulation of the January 1981 data was incomplete when these estimates were developed, it was not possible to apply this method to measure secondary migration during 1980. Therefore, ORR combined several sources of data to adjust State population estimates for secondary migration through September 30, 1981. Estimates of secondary migration during 1978 and 1979 have been derived by the above method and published in ORR's two previous Reports to Congress. A mean of the two-year pattern during 1978 and 1979 was calculated for each State, and this number was considered to be the historical pattern of secondary migration during one year. That mean number was multiplied by 1.75, since the period during which secondary migration was being estimated was 21 months—from January 1980 through September 1981. The resulting figure was added to each State's total refugee population as estimated by adding new arrivals from January 1980 through September 1981 to the January 1980 INS registration base, as adjusted for underregistration.

During 1980 and 1981, certain new patterns of secondary migration are known to have developed. In particular, the H'mong refugees congregated in certain areas, notably California, Minnesota, and Wisconsin, with smaller concentrations in other States. Estimates of the secondary migration of the H'mong were developed with the assistance of the Lao Family Community, an organization assisting the H'mong. These were validated against the refugee child count compiled by the U.S. Department of Education, in tabulating the number of refugee children in each school district. Therefore, new secondary migration figures accounting for the more recent movements of the H'mong were applied to the State totals.

Finally, a reduction of 1,500 was made in the District of Columbia estimate, and the amount of the reduction was distributed between Virginia and Maryland according to their relative shares of the refugee population. ORR is aware that the number of refugee arrivals apparently destined for the District of Columbia each month is artificially inflated, because many local sponsoring organizations have offices there. Housing is located in the Virginia and Maryland suburbs for most of these refugees.

The population estimation procedure described above pertains to the estimated Southeast Asian population only. To these figures were added the Cuban refugee arrivals, by State, for FY 1979, FY 1980, and FY 1981, as shown by the ORR-Miami records. The Cuban figures were not adjusted for secondary migration since the majority are known to live in Florida and there are no reports of significant net secondary migration among this group.

The population estimates include only Southeast Asian and Cuban refugees, since these are the two principal groups that are served only by the State-administered program.

V. Allocations

The allocations for FY 1982 are as follows:

REFUGEE SOCIAL SERVICES FORMULA CALCULATION: FISCAL YEAR 1982

State	Population base [1] (1)	Formula calculation [2] (2)
Alabama	1,381	$197,388
Alaska	241	(*)
Arizona	2,691	384,629
Arkansas	1,282	183,238
California	131,169	18,748,174
Colorado	5,643	806,562
Connecticut	3,853	550,715
Delaware	151	21,583
District of Columbia	1,151	164,514
Florida	23,917	3,418,491
Georgia	4,641	691,931
Hawaii	4,183	597,882
Idaho	826	118,081
Illinois	16,149	2,308,200
Indiana	2,287	326,864
Iowa	5,496	785,837
Kansas	4,835	691,074
Kentucky	1,148	164,098
Louisiana	5,548	792,964
Maine	710	101,481
Maryland	4,700	671,771
Massachusetts	8,905	1,268,511
Michigan	6,303	900,897
Minnesota	19,007	2,659,525
Mississippi	1,100	157,223
Missouri	3,012	430,510
Montana	686	98,091
Nebraska	1,250	178,662
Nevada	1,425	203,677
New Hampshire	239	34,161
New Jersey	4,226	604,026
New Mexico	2,269	324,311
New York	13,346	1,907,568
North Carolina	3,338	484,252
North Dakota	550	78,600
Ohio	4,711	673,350
Oklahoma	3,855	551,001
Oregon	12,170	1,739,478
Pennsylvania	14,391	2,056,926

REFUGEE SOCIAL SERVICES FORMULA CALCULATION: FISCAL YEAR 1982—Continued

State	Population base [1] (1)	Formula calculation [2] (2)
Rhode Island	4,400	628,892
South Carolina	1,340	191,529
South Dakota	562	80,327
Tennessee	3,300	471,673
Texas	30,662	4,382,554
Utah	5,911	844,958
Vermont	232	33,160
Virginia	10,123	1,446,895
Washington	19,141	2,735,851
West Virginia	332	47,453
Wisconsin	7,442	1,063,606
Wyoming	305	43,594
Guam	135	19,296
Puerto Rico	104	(*)
Virgin Islands	10	(*)
Total:	[4] 402,870	[4] 58,056,005

[1] Indochinese and Cuban refugees who arrived in U.S. October 1, 1978—September 30, 1981.

[2] At $142.93 per capita. This figure is for calculating purposes only; the FY 1982 budget request was based on anticipated numbers of new arrivals, not on 3-year population estimates.

[3] Not currently participating in refugee program.

[4] Total dollars reflect upward adjustments which have been made in allocations to certain States based on evidence resulting in revised population estimates. Sum of population figures is greater than actual total shown because upward revisions in estimates for certain States have not been deducted from other States' estimates.

Paperwork Reduction Act

This notice does not create any reporting or recordkeeping requirements requiring OMB clearance.

(Catalog of Federal Domestic Assistance No. 13.814 Refugee Assistance State Administered Programs)

Dated: September 20, 1982.

John A. Svahn,

Commissioner of Social Security.

[FR Doc. 82-26486 Filed 9-27-82; 8:45 am]

BILLING CODE 4190-61-M

Public Health Service

Privacy Act of 1974; Notification of New Routine Use

AGENCY: Public Health Service (PHS), HHS.

ACTION: Notification of a new routine use permitting disclosure of information from Privacy Act system of records 09-35-0044, "Health Professions Planning and Evaluation," HHS/HRA/OA.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing notice of a proposal to establish a new routine use permitting disclosure to contractors of information in the Privacy Act system of records 09-35-0044, "Health Professions Planning and Evaluation," HHS/HRA/OA.

DATE: The Health Resources and Services Administration (HRSA) will adopt the new routine use without

further notice on October 28, 1982 unless PHS receives comments which would result in a contrary determination.

ADDRESS: Comments should be addressed to the individual named at the address listed below. Comments received will be available for inspection during office hours, Monday through Friday, in Room 9–22, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782.

FOR FURTHER INFORMATION CONTACT: Kay Clarey, Privacy Act Coordinator, Room 9–22, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, or call 301–436–7240.

SUPPLEMENTARY INFORMATION: The Health Resources and Services Administration (HRSA), Office of the Administrator (OA), maintains a system of records on health professionals and students in the various health professions to identify problems in the health care training and delivery systems, to plan programs to correct those problems, and to evaluate the effectiveness of the resultant programs. Data collection may be accomplished under contract.

Due to an oversight, a routine use to provide for disclosure to contractors and their staff was not originally published in the system notice. We are now inserting the following routine use to clarify to the public the nature of the data collection process:

Disclosure may be made to HHS contractors and their staff in order to accomplish any of the purposes of the system of records. The recipients are required to protect such records from improper disclosure and to maintain Privacy Act safeguards.

The purpose of adding the new routine use is to permit disclosure of records to HHS contractors and their staff so that they are able to accomplish objectives required by approved contracts. Because the purpose of the system could not be accomplished in the absence of the approved contracts, we believe that disclosure to contractors pursuant to the proposed routine use is compatible with the purpose of the system. Contractors will receive such data only upon approval of the System Manager when appropriate safeguards, required by the terms of the contract, are in place.

The system notice was last published in the **Federal Register** on October 27, 1981 (46 FR 52744–52745). We are republishing the entire notice to incorporated the proposed new routine use, and to update the "Safeguards" and "Contesting Record Procedure" sections of the notice. These last changes are technical in nature and do not require a public comment period.

Dated: September 21, 1982.

Jack Markowitz,

Acting Deputy Assistant Secretary for Health Operations and Director, Office of Management.

09–35–0044

SYSTEM NAME:

Health Professions Planning and Evaluation. HHS/HRA/OA.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Health Resources Administration, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782.

In addition, data are maintained at contractor and field work sites as studies are developed, data collected, and reports written. You may request a list of locations where individually identifiable data are currently located from the System Manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Health professionals and students in the various health professions. Physicians, dentists, pharmacists, optometrists, podiatrists, veterinarians, public health personnel, audiologists, speech pathologists, heath care administration personnel, nurses, allied health personnel, medical technologists, and other health personnel may be included.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, address, health profession, education history, academic grades, employment history, nationality, race, ethnicity, economic background, and sex. The specific data items collected and maintained are determined by the needs of the individual project.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Public Health Service Act, Section 708 (42 U.S.C. 292h re: Health Professions Data), Section 787 (42 U.S.C. 295g–7 re: Educational Assistance to Individuals from Disadvantaged Backgrounds), Section 798 (42 U.S.C. 295h–7 re: Educational Assistance to Disadvantaged Individuals in Allied Health Training), and Section 820 (42 U.S.C. 196k re: Special Project Grants and Contracts).

PURPOSE(S):

The Health Resources Administration uses various records in this system to identify problems in the health care training and delivery systems, to plan programs to correct those problems, and to evaluate the effectiveness of the resultant programs. The agency assesses the current supply of health professionals and predicts the supply needs of the future. The agency determines nationwide requirements as well as the needs of specific areas.

The agency also collects data on the educational system which supplies health professionals and on specific health education programs. The data are used to develop and test new methods of training and utilizing health professionals.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

A record may be disclosed for a research purpose, when the Department:

(a) Has determined that the use or disclosure does not violate legal or policy limitations under which the record was provided, collected, or obtained;

(b) Has determined that the research purpose (1) cannot be reasonably accomplished unless the record is provided in individually identifiable form, and (2) warrants the risk to the privacy of the individual that additional exposure of the record might bring;

(c) Has required the recipient to—(1) Establish reasonable administrative, technical, and physical safeguards to prevent unauthorized use or disclosure of the record, and (2) remove or destroy the information that identifies the individual at the earliest time at which removal or destruction can be accomplished consistent with the purpose of the research project, unless the recipient has presented adequate justification of a research or health nature for retaining such information, and (3) make no further use or disclosure of the record except—(A) in emergency circumstances affecting the health or safety of any individual, (B) for use in another research project, under these same conditions, and with written authorization of the Department, (C) for disclosure to a properly identified person for the purpose of an audit related to the research project, if information that would enable research subjects to be identified is removed or destroyed at the earliest opportunity consistent with the purpose of the audit, or (D) when required by law; and

(d) Has secured a written statement attesting to the recipient's

understanding of, and willingness to abide by these provisions.

Disclosure may be made to HHS contractors and their staff, in order to accomplish any of the purposes of the system of records. The recipients are required to protect such records from improper disclosure and to maintain Privacy Act safeguards.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

File folders, magnetic tape, card files, microfilm, microfiche, and disk storage. The needs of each project determine the types actually used.

RETRIEVABILITY:

By name. In some instances an assigned number may be used to retrieve records.

SAFEGUARDS:

Locked building, locked rooms, locked file cabinets, personnel screening, locked computer rooms and computer tape vault, guard service, password protection of automated records, and limited access to only authorized personnel will be used, as considered appropriate by the System Manager for the type of records included in each project. Authorized personnel are generally limited to contractor personnel directly involved in data collection compilation, and analysis. (Safeguards are in accordance with Part 6, ADP Systems Security of the Department's ADP Systems Manual, with Chapter 45–13, Safeguarding Records Contained in Systems of Records, of the Department's General Administration Manual, and with supplementary Chapter PHS.hf: 45–13)

RETENTION AND DISPOSAL:

The contractor removes personal identifiers and destroys the records when they are no longer needed, as appropriate to the specific project. (Records may be retired to a Federal Records Center and subsequently disposed of in accordance with the Records Control Schedule of the Health Resources Administration.) You may obtain a copy of the disposal standard for a particular project by writing to the System Manager.

SYSTEM MANAGER(S) AND ADDRESS:

Contracting Officer, Health Resources Administration, Center Building, Room 9–22, 3700 East-West Highway, Hyattsville, Maryland 29782.

NOTIFICATION PROCEDURE:

To determine if you are the subject of a record, contact the System Manager and provide suitable identification and, if possible, information about the specific project.

RECORD ACCESS PROCEDURE:

To obtain access to your record, contact the System Manager and provide suitable identification, a reasonable description of the record and, if possible, information about the specific project.

CONTESTING RECORD PROCEDURES:

To correct your record, contact the System Manager and provide (a) suitable identification, (b) a reasonable description of the record, (c) the specific information you want corrected, and (d) a precise description of the correction, with supporting justification.

RECORD SOURCE CATEGORIES:

Subject individuals, state and local health departments, other health providers, health professions schools, and health professions associations may provide information depending on the individual project involved.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE PRIVACY ACT:

None.

Land Management Bureau

[C-24224]

Colorado; Partial Cancellation of Withdrawal Application and Opening of Land

September 20, 1982.

The Bureau of Land Management, Department of the Interior, filed application for protective withdrawal C–24224 on August 3, 1976, which was published August 12, 1976, as FR Doc. 76–23531. This application is hereby cancelled insofar as it affects the following described public land:

New Mexico Principal Meridian

T. 50 N., R. 8 E., sec. 2, lots 3 and 4.

Sixth Principal Meridian

T. 51 N., R. 8 E.,
Sec. 10, lot 1;
Sec. 11, lot 4, S½NW¼, SW¼, and W½SW¼SE¼;
Sec. 12, lots 1, 2, 3, 4, S½N½, E½W½SW¼, E½SW¼, and SE¼;
Sec. 13, NE¼, E½NW¼, E½NW¼NW¼, SW¼NW¼, and S½;
Sec. 14, N½NW¼, SW¼NW¼, and E½SE¼;
Sec. 23, E½E½, W½E½NW¼, and E½W½S E½;
Sec. 24;
Sec. 25, W½;
Sec. 26, E½E½, W½SE¼NW¼, and E½SW¼SE¼;
Sec. 35, S½SW¼NW¼, W½SW¼, and SE¼SW¼.
T. 15 S., R. 77 W.,
Secs. 18 to 20, inclusive, and 29;
Sec. 30, E½, and E½W½;
Sec. 31, E½, and E½E½W½;
Sec. 32.
T. 13 S., R. 78 W.,
Sec. 30, lots 22 to 24, inclusive;
Sec. 31, E½NE¼, and E½E½SE¼;

Sec. 32, SW¼NW¼, and W½SW¼.
T. 14 S., R. 78 W.,
Sec. 4, SW¼SW¼;
Sec. 5, lots 1 and 2, S½NE¼, and N½SE¼;
Sec. 9, NW¼SW¼NE¼, S½SW¼NE¼, N½NW¼, N½SE¼NW¼, SE¼SE¼NW¼, NE¼NE¼SW¼, W½NE¼SE¼, SE¼NE¼SE¼, W½SE¼, and SE¼SE¼;
Sec. 10 SW¼SW¼;
Sec. 14, SW¼;
Sec. 15, NW¼, N½SW¼, NW¼SW¼SW¼, E½SW¼SW¼, SE¼SW¼, and N½SE¼, exclusive of M.S. 16411, M.S. 16831, and M.S. 19032;
Sec. 16, E½NE¼, and NE¼NE¼SE¼, exclusive of M.S. 19032;
Sec. 23, NW¼, and N½SW¼, exclusive of M.S. 11925.
T. 15 S., R. 78 W.,
Sec. 1, lots 2 to 4, inclusive, S½N½, SE¼SW¼, and SE¼;
Sec. 2, SE¼NE¼, and NE¼SE¼;
Sec. 12, NE¼, NE¼NW¼, S½NW¼, E½SE¼, NW¼SW¼, AND SE¼;
Sec. 13, NE¼, E½NW¼, E½SE¼, and NW¼SW¼;
Sec. 24, E½NE¼.
T. 12 S., R. 79 W., sec. 35, E½W½, exclusive of M.S. 20723.
T. 13 S., R. 79 W.,
Sec. 2, lots 2, 3, and E½SE¼;
Sec. 12, SW¼NE¼, N½NW¼, SE¼NW¼, and SE¼;
Sec. 13, NE¼, and W½SE¼;
Sec. 24, W½SE¼;
Sec. 25, NW¼NE¼, SE¼NE¼, and NE¼SE¼.

The area described aggregates approximately 11,878.66 acres.

Therefore, in accordance with the regulations contained in 43 CFR 2310.2–1(c) at 10:00 a.m. on November 1, 1982, the lands described herein shall be relieved of the segregative effect of this application and open to operation of the public land laws generally, including the United States mining laws, subject to any valid existing rights. The lands remain open to mineral leasing.

Any valid application received at or prior to 10:00 a.m. on November 1, 1982 shall be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

Any questions concerning these lands should be directed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Colorado State Office, 1037—20th Street, Denver, Colorado 80202.

Robert D. Dinsmore,

Chief, Branch of Lands and Minerals Operations.

[FR Doc. 82-26873 Filed 9-27-82; 8:45 am]

BILLING CODE 4310-84-M

[C-35774]

Colorado; Classification of Public Lands for State Indemnity Selection

September 17, 1982.

1. Pursuant to Sections 2275 and 2276 of the Revised Statutes, as amended (43 U.S.C. 851, 852), and the provisions granted to the State of Colorado by the Act of March 3, 1875 (18 Stat. 475), the public lands described below are hereby classified for State Indemnity Selection. The State of Colorado has filed an application to acquire the described lands in lieu of certain school lands that were encumbered by other rights or reservations before the State's title could attach. This application was assigned serial number Colorado 35774.

2. The notice of proposed classification of these lands was published in the **Federal Register** of July 7, 1982, Vol. 47, No. 130, pages 29607–29609. The land is being classified as proposed.

3. The lands included in this proposed classification are in Garfield and Mesa counties and are described below. The names of holders of leases, permits, and/or rights-of-way, and the identifying number of each use authorization, as well as other encumbrances on the land were listed in the Notice of Proposed Classification:

Sixth Principal Meridan

Parcel 8 T. 6 S., R. 94 W.,
Sec. 29, SW¼NW¼;
Parcel 9 T. 7 S., R. 95 W.,
Sec. 9, SE¼SE¼;
Sec. 10, SW¼SW¼;
Sec. 15, W½NW¼, NW¼SW¼;
Sec. 16, E½NE¼, and NE¼SE¼.

Ute Principal Meridian

Parcel 12 T. 1N., R. 1 E.,
Sec. 32, E½NE¼, and NE¼SE¼;
Sec. 33, W½NE¼, N½NW¼, and SE¼.
Parcel 13 T. 2 N., R. 3 W.,
Sec. 30, SW¼, and S½SE¼;
Sec. 31, NE¼, N½NW¼, SE¼NW¼, N½SE¼, and SE¼SE¼;
Sec. 32, W½.
Parcel 15 T. 1 S., R. 1 E.,
Sec. 25, SE¼;
Sec. 35, E½;
T. 2 S., R. 1 E.,
Sec. 1, Lots 1, 2, 3, 4, and S½N½;
Sec. 2, Lots 1, 2, and S½NE¼.
T. 1 S., R. 2 E.,
Sec. 19, SE¼;
Sec. 30, Lots 4, E½, SE¼NW¼, and E½SW¼;
Sec. 31, Lots, 1, 2, 3, 4, and E½W½;
T. 2 S., R. 2 E.,
Sec. 6, Lots 3, 4, 5, and SE¼NW¼.

The areas described contain 3,826.06 acres.

4. This classification decision is based on the following disposal criteria set forth in Title 43 Code of Federal Regulations, Part 2400.

Transfer of the lands to the State will help fulfill the Federal Government's common school land grant to the State, and constitutes a public purpose use of the land. Lands found to be valuable for a public purpose use will be considered chiefly valuable for public purposes (43 CFR 2430.2b).

5. Rights-of-way granted by the Bureau of Land Management on the above lands will transfer with the land. Oil and gas leases will remain in effect under the terms and conditions of the lease. State law and Board of Land Commissioners procedures provide for the offering to holders of Bureau of Land Management grazing permits, licenses or leases the first right to lease lands that are transferred to the State.

In the event these lands are clearlisted, the Bureau of Land Management authorized grazing use will terminate at the time title to the land is transferred to the state.

Any cultural resources will be managed by the State. A study has been made of the areas which indicates little potential for mineral exploration for locatable minerals. There are no mining claims recorded with BLM for these lands, nor has any evidence of mining activity been found on the ground.

6. The public lands classified by this notice are shown on maps on file and available for inspection in the Bureau of Land Management District Office, 764 Horizon Drive, Grand Junction, Colorado 81501, Telephone (303) 243–6552.

7. For a period of 30 days from the date of publication in the **Federal Register**, this classification shall be subject to exercise of administrative review and modification by the Secretary of the Interior as provided for in 43 CFR 2461.3 and 2462.3. Interested parties may submit comments to the Secretary of the Interior, LLM 320, Washington, D.C. 20240.

Bob Moore,

Associate State Director..

[FR Doc. 82-26874 Filed 9-27-82; 8:45 am]

BILLING CODE 4310-4-M

Bureau of Reclamation

Contract Negotiations With Purgatoire River Water Conservancy District, Trinidad Project, Colorado; Intent To Begin Contract Amendment Negotiations of the Repayment Contract and Extension of the Development Period

The Department of the Interior, through the Regional Director, Lower Missouri Region of the Bureau of

Reclamation (Bureau), intends to extend the development period for the Purgatoire River Water Conservancy District (district) under contract No. 7-07-70-W0095 (formerly contract No. 14-06-70-6279) an additional 3 years. Also, the Bureau will initiate negotiations with the district at this time to revise the repayments procedure to ensure that annual repayment installments will provide for repayment of the district's obligation within the authorized 70-year repayment period.

The Trinidad Project, consisting of the multiple-purpose Trinidad Dam and Reservoir, was authorized for construction by the Army Corps of Engineers through the Flood Control Act of 1958 (72 Stat. 297), as amended by the Act of October 27, 1965 (79 Stat. 1073). The Corps of Engineers is responsible for the operation and maintenance of project facilities. The Bureau administers the repayment contract with the district pursuant to Reclamation law.

The project provides flood control, recreation, and supplemental irrigation water. In accordance with the provisions of contract No. 7-07-70-W0095, the district will reimburse the United States for $8,435,600 of the project costs allocated to the irrigation purpose over the term of the contract.

All meetings scheduled by the Bureau with the district for the purpose of discussing terms and conditions of the proposed contract will be open to the general public as observers. Advance notice of meetings shall be furnished to those parties who have provided a written request for same at least 1 week prior to any such meeting. Requests should be addressed to Project Manager, Fryingpan-Arkansas Project Office, Bureau of Reclamation, P.O. Box 515, Pueblo, Colorado 81002.

All written correspondence concerning the proposed contract amendment will be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

The public is invited to submit written comments on the form of the proposed contract amendment not later than 30 days after the completed draft is made available to the public. If little or no public interest in these negotiations is evidenced, as gauged by the response to this notice and local new releases or announcements, the availability of the proposed form of contract for public review and comment will not be publicized through the **Federal Register** or other media. The Commissioner of Reclamation will review comments submitted and, based on the number, sources, and nature of the comments, will decide whether to hold a public meeting.

For further information on the contract negotiations, contact the Project Manager at the above address or telephone (303) 544-5277, extension 201.

Dated: September 22, 1982.

Jed D. Christensen,

Acting Commissioner of Reclamation.

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 (formerly section 5) of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsiderations; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1132.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will indicate that consummation of the transfer will be presumed to occur on the 20th day following service of the notice, unless either applicant has advised the Commission that the transfer will not be consummated or that an extension of time for consummation is needed. The notice will also recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 30 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is Ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC-FC-79997. By decision of August 24, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132 Review Board Number 3 approved the transfer to COAST TO COAST INTERNATIONAL TRANSPORT CORP. of Certificate No. MC-146068 (Sub-Nos. C-12X and 13) issued to CONSOLIDATED CARRIERS INTERNATIONAL TRANSPORT CORPORATION authorizing transportation of (1) *chemicals and related products,* between points in CA, FL, IL, IN, MA, MI, NH, NJ, NY, OH, TN, TX, WV and WY, on the one hand, and on the other points in Mecklenburg County, NC; (2) *metal products,* between Harrisonburg, VA, on the one hand, and on the other, points in Butte County, CA; (3) *motor vehicle parts and accessories,* between (a) Pierce, Mason, King, Grays Harbor and Thurston Counties, WA; (b) Clackamas, Multnomah, Marion, Polk, Yamhill, Columbia and Washington Counties, OR; (c) Pima, Cochise, Graham and Pinal Counties, AZ; (d) Washoe, Lyon, Douglas and Storey Counties, NV; and (e) San Joaquin and Sacramento Counties, CA, on the one hand, and on the other, points in the U.S. (except AK and HI); and (4) (*general commodities* (except classes A and B explosives) between points in AL, GA, NC, SC, TN, and VA on the one hand, and on the other, points in AZ, CA, NV, OR, UT, and WA; and (5) *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in Bristol County, MA, Florence County, SC, and points in FL, on the one hand, and on the other, points in the US (except AK and HI). Representative: Robert B. Walker, Esq., 915 Pennsylvania Building, 425 13th Street NW., Washington, DC 20004. NOTE: This notice corrects the notice published in the **Federal Register**, Vol. 47, No. 176, p. 39909, Friday, September 10, 1982 which contained certain inadvertent errors.

MC-FC-80022. By decision of September 9, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132 Review Board Number 3 approved the transfer to H. O. Kline Transportation, Inc. of New Castle, DE of Certificate No. MC-84145 (Sub-No. 2F) issued March 12, 1981, to Carpenter's

Motor Freight, Inc., of Wilmington, DE, authorizing the transportation of *general commodities* (with the usual exceptions), between Philadelphia, PA, and points in DE, on the hand, and, on the other, points in DE, MD, NJ, NY, PA, and DC. Applicant's representative is: Joseph W. Weik, Stanley T. Czajkowski, 1807 Market St., P.O. Box 2324, Wilmington, DE 19899.

MC–FC–80023. By decision of September 7, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132 Review Board Number 3 approved the transfer to QUESADA AUTO TRANSPORT CORPORATION of Laredo, TX of Certificate NO. MC–127185 (Sub-No. 9) issued September 2, 1981 to GATEWAY TRANSFER CO., INC. of Laredo, TX authorizing the transportation over irregular routes, of *transportation equipment* between ports of entry on the international boundary line between the U.S. and Mexico, located at points in TX, on the one hand, and, on the other, points in AZ, CA, GA, IL, NM, NV, OH, MI, MO, PA, TX, and WI Applicant's representative is: James R. Boyd, 1000 Perry Brooks Building, Austin, TX 78701.

MC–FC–80026. By decision of September 9, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to JIM THORPE TRANSPORTATION CO., INC., of Jim Thorpe, PA of Certificates Nos. MC–35321 and MC–34321 (Sub-No. 1F), issued to HENRY S. ERSCHEN, INC., of Walnutport, PA, authorizing the transportation of passengers and their baggage in round-trip, charter operations, (1) in MC–34321, between Palmerton, PA, and points within 5 miles thereof, and poinys in NY, NJ, MD, and DE, and (2) in MC–35321 (Sub-No. 1F), beginning and ending at Aquashicola, Berlinsville, Bowmanstown, Cherryville, Danielsville, Lehighton, Palmerton, Parryville, Slatington, Walnutport, and Weissport, PA, and extending to points in the U.S., (except points in AL, AK, CT, DE, HI, IL, IN, KY, MD, MI, NJ, NY, NC, OH, TN, VA, and DC. Applicants' Representative: Gary M. Miller, 1414 Millard Street, Bethlehem, PA 18018.

Notes.—Transfer holds no authority from this Commission. TA has been sought.

MC–FC–80031. By decision of September 13, 1982, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to Jerry A. Ammerman of Willmar, MN of Certificate No. MC–5227 (Sub-No. 74)F issued to Eckley Trucking, Inc., of Mead, NE, authorizing: the transportation of general commodities (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), for the United States Government, between points in the U.S. Applicant's representative: Jerry A. Ammerman, P.O. Box 1335, Wilmar, MN 56201. TA lease is not sought. Transferee is not a carrier.

MC–FC–80032. By decision of September 13, 1982, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to Common Carriers, Inc., of Ellensburg, WA, of Certificate No. MC–139248 (Sub-No. 6)X which supersedes Sub-No. 4, issued April 22, 1982, to Contract Carriers, Inc., of Ellensburg, WA, authorizing: commodities in bulk between points in Washington, Oregon and Idaho. Applicant's representative: George R. LaBissoniere, 15 S. Grady Way, Suite 239, Renton, WA 98055. Phone (206) 228–3807. TA lease is not sought. Transferee is not a carrier.

MC–FC–80041. By decision of September 13, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132 Review Board Number 3 approved the transfer to Ronald L. Marquardt, Inc., of Certificate No. MC–156283 (Sub-No. 1) issued April 18, 1982 to Ronald L. Marquardt authorizing operations as a common carrier by motor vehicle, over irregular routes, transporting (1) for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), and (2) used household goods for the account of the United States Government incident to the performance of a pack-and-crate service on behalf of the Department of Defense between points in the United States (except Alaska and Hawaii). Applicant's representative is: Michael J. McCartney, P.O. Box 71, Breckinridge, MN 56520.

MC–FC–80045. By decision of September 14, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 C.F.R. 1132, Review Board Number 3 approved the transfer to KENNY BERGER, of Dickerson, ND, of Certificate No. MC–153154, issued to K & K TRUCKING, INC., of Dickerson, ND, authorizing the transportation of (1) *lumber wood products, forest products, shingles,* and *gypsum board,* from points in WA, OR, CA, ID, MT, UT, NY, CO, and WY, to points in CA, NV, CO, IL, WI, MI, OH, MO, TX, ND, SD, MN, IA, MT, WY, NE, and KS, (2) *knocked down steel buildings and parts and accessories for knocked down steel buildings,* from Pleasant City, IA, Spanish Fork, UT, and Columbus, NE, to points in ND, SD, MT, and MN, (3) *insulating materials and supplies, and roofing, and roofing materials and supplies,* from points in WY, SD, NE, MN, WI, and IL, to points in ND, (4) *drilling mud, drilling mud additives, and drilling fluids,* (a) from points in KS, OK, MO, TX, UT, CO, and WY to points in ND, SD, MT, and WY and (b) from points in ND to points in WY, and (5) *fabricated casting,* from Arlington, WA, to points in the U.S. Applicants' Representative: Charles E. Johnson, P.O. Box 2056, Bismark, ND 58502.

Notes.—Transferee holds no authority from this Commission. However, he controls transferor through his ownership of all of its outstanding stock. An application for TA has been filed.

MC–FC–80048. By decision of September 17, 1982 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1132, Review Board No. 3 approved the transfer to Distron Division of Burger King Corporation, of Miami, FL, Permit No. MC–161043, issued on July 29, 1982, to Distron Transportation Systems, Inc., of Miami, FL, authorizing the transportation of (1) *food and related products,* between points in the United States; (2) *paper and related products and plastic products,* between points in the United States; (3) *animal and vegetable shortening,* between points in the United States; and (4) *such commodities* as are dealt in by wholesale and retail stores, between points in the United States, under continuing contracts with various shippers. Applicants' representative: Michael F. Morrone, 1150 17th Street, NW, Suite 1000, Washington, DC 20036, (202) 457–1124. Transferee is not an ICC carrier.

MC–FC–79890. By decision of August 24, 1982, issued under 49 U.S.C. and the transfer rules at 49 CFR 1132, Review Board Number 3 approved the transfer to SHIPPERS TRANSPORTATION, INC., of Eden Prairie, MN, of Certificate No. MC–145743 (Sub-No. 19), issued to T.F.S., INC., of Grand Island, NE, which authorizes the transportation of *general commodities* (except classes A and B explosives) between points in the U.S., on the one hand, and, on the other, points in Adams, Buffalo, and Hall Counties, NE. Representative: Donald L. Stern, Suite 610, 7171 Mercy Road, Omaha, NE 68106.

MC–FC–80005. By decision of August 31, 1982 issued under 49 U.S.C. 1026 and the transfer rules at 49 C.F.R. 1132 Review Board Number 3 approved the transfer to KEUKA TRANSPORTATION, INC., of Penn Yan, NY, of certain portions of No. MC–

105902 (Subs No. 29X and 31) issued respectively, November 12, 1981, and June 29, 1982, to PENN YAN EXPRESS, INC., of Penn Yan, NY, authorizing the transportation of general commodities (with certain exceptions) over regular and irregular routes between points in described areas of NY, NJ, PA, OH, MD, and IL.

MC-FC-80010. By decision of August 31, 1982 issued under 49 U.S.C. 10924 and the transfer rules at 49 C.F.R. 1132 Review Board Number 3 approved the transfer to DISTRIBUTION IN DIMENSION, INC., of Lakewood, NJ, of License No. MC-153845, issued to MARKO ASSOCIATES, INC. of Lakewood, NJ, authority operations as a broker for the transportation of general commodities (except household goods) between points in the United States.

Note.—Transferee holds no authority from this Commission. TA has not been sought. Applicant's representative: Ronald I. Shapss, 450 Seventh Ave., New York, NY 10123.

MC-FC-80029. By decision of September 9, 1982, issued under 49 U.S.C. 10928 and the transfer rules at 49 C.F.R. 1132, Review Board Number 3 approved the transfer to LOU SEIDEN, doing business as ROSE TRANSPORTATION CO., of Atlantic City, NJ, of Certificates No. MC-323 and MC-323 (Sub-No. 3), issued March 22, 1950 and December 14, 1972 to KARL SEIDEN, doing business as ROSE TRANSPORTATION CO., of Atlantic City, NJ, authorizing transportation as a motor *common* carrier, transporting (1) *general* commodities over regular routes between Philadelphia, PA and Atlantic City, NJ, over U.S. Hwy 30, serving all intermediate points and the off-route points of Pleasantville, Margate, Vontnor, and Long Port, NJ; (2) *art objects, antiques, uncrated household goods, office furniture,* and *equipment in use* over irregular routes between Atlantic City, NJ and points within a 15 mile radius of Atlantic City on the one hand, and, on the other, points in Delaware, Maryland, New Jersey, New York, Pennsylvania, and the District of Columbia; and (3) *food and foodstuffs* (except in bulk, in tank vehicles) in refrigerated vehicles, from the Kraft Food Division facilities near Fogelsville, PA to points in New Jersey. Representative: Robert B. Linhorn, 3220 PSFS Bldg., 12 South 12th Street, Philadelphia, PA 19107, (215) 922-1400.

MC-FC-80030. BILLING CODE 7035-01-M

[Volume No. 162]

Motor Carriers; Permanent Authority Republications of Grants of Operating Rights Authority Prior to Certification

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the Federal Register.

An original and one copy of opposing verified statements must be filed with the Commission within 45 days after the date of this Federal Register notice. Applicant may file a verified statement in rebuttal within 60 days. Such pleadings shall comply with 49 CFR 1100.247 (renumbered 1100.251) addressing specifically the issue(s) indicated as the purpose for republication. Special Rule 247 (renumbered 251) was published in the Federal Register of July 3, 1980, at 45 FR 45539.

MC 138841 (Sub-22), (Republication), filed May 18, 1982, published June 4, 1982, and republished this issue. Applicant: BLACK HILLS TRUCKING CO., PO Box 2130, Rapid City, SD 57709. Representative: James W. Olson, PO Box 1552, Rapid City, SD 57701, (605) 342-7090. A decision by the Commission, Review Board No. 2, decided August 31, 1982, served September 17, 1982, finds that applicant is authorized to operate as *common carrier,* by motor vehicle, in interstate or foreign commerce, over regular routes, transporting (1) *general commodities* (except household goods, and classes A and B explosives), between points in South Dakota on and west of U.S. Hwy 83, on the one hand, and, on the other, points in Iowa, Kentucky, Illinois, Minnesota, Colorado, Missouri, Nevada, New Jersey, Wisconsin, New York, California, and Utah, (2) *auto parts,* between Portland, OR, on the one hand, and on the other, points in Campbell County, WY, and Pennington County, SD, and (3) *food and related products,* between points in Carver and Nobles Counties, MN, Buffalo County, NE, and Muscatine and Johnson Counties, IA, on the one hand, and, on the other, points in North Dakota, South Dakota, Nebraska, Montana, Iowa, Illinois, Wisconsin, Missouri, Minnesota, Oregon and California. Applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is give notice of the authority granted to include authority between South Dakota points, on the one hand, and, on the other, points in Missouri.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions, Decision-Notice

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the Federal Register of December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the Federal Register issue of December 3, 1980, at 45 FR 80100.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. A copy of any application, including all supporting evidence, can be obtained from applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the

Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries about the following to Team 1, (202) 275–7992.

Volume No. OP1–161

Decided: September 17, 1982.

By the Commission, Review Board Number 1, Members Parker, Chandler and Fortier.

MC 6801 (Sub-13), filed September 7, 1982. Applicant: G. H. HARNUM, INC., 867 Woburn St., Wilmington, MA 01887. Representative: Wesley S. Chused, 15 Court Square, Boston, MA 02108, (617) 742–3530. Transporting *machinery and those commodities which because of size or weight require the use of special equipment,* between points in the U.S. (except AK and HI).

MC 104430 (Sub-68) filed September 10, 1982. Applicant: CAPITAL TRANSPORT COMPANY, INC., P.O. Box 408, McComb, MS 39648. Representative: Donald B. Morrison, P.O. Box 22628, Jackson, MS 39205, (601) 948–8820. Transporting *commodities in bulk,* between points in AL, LA, and MS, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 106451 (Sub-23) filed September 3, 1982. Applicant: COOK MOTOR LINES, INC., 1016 Triplett Blvd., P.O. Box 370, Akron, OH 44309. Representative: John P. McMahon, 100 E. Broad St., Columbus, OH 43215, (614) 228–1541. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in Barbour, Grant, Harrison, Marion, Mineral, Monongalia, Preston, Randolph, Taylor, Tucker and Upshur Counties, WV, and Garrett County, MD, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 119211 (Sub-16) filed September 13, 1982. Applicant: MAU TRUCKING, INC., 90 Jacob's Addition, Ida Grove, IA 51445. Representative: Richard D. Howe, 600 Hubbell Bldg., Des Moines, IA 50309, (515) 244–2329. Transporting *food and related products,* between points in Buena Vista and Cherokee Counties, IA, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 119441 (Sub-59) filed September 3, 1982. Applicant: BAKER HI–WAY EXPRESS, INC., 555 Commercial Pkwy., P.O. Box 506, Dover, OH 44622. Representative: Richard H. Brandon, 220 W. Bridge St., P.O. BILLING CODE 7035-01-M

[Ex Parte No. 387 (Sub-No. 275)]

Rail Carriers; Baltimore and Ohio Railroad Company Exemption for Supplement 2 to Contract Tariff ICC-BO-C-0024 (Soda Ash)

AGENCY: Interstate Commerce Commission

ACTION: Notice of Provisional Exemption.

SUMMARY: A provisional exemption is granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariff may become effective on one day's notice. This exemption may be revoked if protests are filed.

DATE: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275-7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions:

This grant neither shall be construed to mean that the Commission has approved the contract for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

Authority: 49 U.S.C. 10505.

Decided: September 22, 1982.

By the Commission, Review Board Number 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30022]

Rail Carriers; Chicago and North Western Transportation Co.—Trackage Rights Exemption—Over Duluth, Missabe & Iron Range Railway Co.; Notice of Exemption

September 21, 1982.

Chicago and North Western Transportation Company (CNW) seeks exemption of a trackage rights agreement from the prior approval requirements of 49 U.S.C. 11343, which will allow CNW to operate over a 5.26-mile segment of rail line owned by the Duluth, Missabe and Iron Range Railway Company (DMIR) between Saunders and South Itasca, WI. CNW's request is being treated as a petition seeking exemption under 49 CFR 1111.2(d)(5).

On June 10, 1982, CNW and DMIR signed an agreement granting CNW trackage rights over DMIR's track. The trackage rights is in substitution for a portion of the trackage rights which CNW currently has over a line of the Burlington Northern Railroad Company (BN) between St. Paul, MN and Allouez, WI.[1] The proposed trackage rights will permit CNW to leave BN's track at Saunders and by-pass BN's Allouez Yard and Taconite Facility. CNW indicates that a petition to amend the Commission's decision in Finance Docket No. 29732 to exclude the Allouez segment will be filed with the Commission shortly.[2] BN has agreed to

---

[1] These trackage rights were exempted from prior approval in Finance Docket No. 29732, *Chicago and North Western Transportation Company—Exemption Under 49 U.S.C. 10505 From 49 U.S.C. 11343* (not printed), served October 27, 1981.

[2] We note that a petition to amend Finance Docket No. 29732 would be unnecessary. Our exemption of the proposed transaction under 49 CFR 1111.2(d)(5) would include an exemption from

the proposed change. The instant proposal involves only a grant of "bridge" trackage.

The proposed transaction is an exempt transaction pursuant to 49 CFR 1111.2(d)(5). Essentially, it is a joint project between CNW, DMIR, and BN involving relocation of a line of railroad. The relocation will not disrupt any existing service to shippers of communities. Thus, it is an exempt transaction pursuant to 49 CFR 1111.2(d)(5). See *Railroad Consolidation Procedures*, 366 I.C.C. 75, 94 (1982).

As a condition to the use of this exemption, any employees affected by the trackage rights shall be protected pursuant to *Norfolk & Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 650 (1978), as modified by *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980) and any employees affected by CNW'S abandonment will be protected by the conditions embodied in *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979).

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[AB 3 (SDM) [1]]

Rail Carriers; Missouri Pacific Railroad Co.; Amended System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.23, that the Missouri Pacific RR. Co. and Subsidiaries has filed with the Commission its amended color-coded system diagram map in docket No. AB 3 SDM. The Commission on September 16, 1982, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 3 SDM.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Consent Decree Lodging Pursuant to Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on September 3, 1982 a proposed consent decree in *United States* v. *Port ConAgra, Inc.*, was lodged with the United States District Court for the District of Minnesota. The proposed decree provides for compliance with the Clean Air Act and with the federally approved Minnesota State Implementation Plan for opacity and emission of particulate matter at a grain handling facility located at 3750 Washington Avenue North, Minneapolis, Minnesota. The proposed decree sets forth a schedule for installation of pollution control equipment and for final achievement with opacity and particulate standards no later than July 1, 1982.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States of America* v. *Port ConAgra, Inc.*, D.J. Ref. 90-5-2-1-505.

The proposed decree may be examined at the office of the United States Attorney, District of Minnesota, 234 U.S. Courthouse, 110 South 4th Street, Minneapolis, Minnesota and at the Region V Office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois. A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section,

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Employment Transfer and Business Competition Determinations Under the Rural Development Act; Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market with particular emphasis upon its potential impact upon competitive enterprises in the same areas.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of application involving the establishement of branch plants or facilities, the potential effect of such new facilities in other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice. Comments received after the two-week period may not be considered. Send comments to: Richard C. Gilliland, Administrator, U.S. Employment Service, Employment and Training Administration, 601 D Street, N.W., Room 8000—Patrick Henry Building, Washington, D.C. 20213.

Signed at Washigton, D.C., this 23rd day of September 1982.

Robert S. Kenyon,

Director, Office of Program Operations.

Applications received during the week ending September 25, 1982:

Name of applicant and location of enterprise: McBee-Bryant Textiles, Inc., Shelby, Mississippi.

Principal product or activity: Manufacture of mop yarn.

NATIONAL SCIENCE FOUNDATION

Subpanel for Social and Developmental Psychology; Notice of Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subpanel for Social and Developmental Psychology, Advisory Panel for Behavioral and Neural Sciences.

Date and time: October 14–15, 1982—9:00 a.m. to 5:00 p.m. each day.

Place: Room 1224, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. Jean B. Intermaggio, Program Director, Social and Developmental Psychology, Room 320, National Science Foundation, Washington, D.C. 20550, 202-357-9415.

Purpose of advisory panel: To provide advice and recommendations concerning support for research in Social and Developmental Psychology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Coordinator.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

White House Science Council Laboratory Review Panel; Meeting

Notice is hereby given that the Panel named above will meet on October 7, 1982 in Room 10103, New Executive Office Building, 17th St. and Pennsylvania Avenue, N.W.; Washington, D.C. 20500.

The meeting will be from 9:00 a.m. to 4:00 p.m. It will be open to the public from 9:00 a.m. to 11:00 a.m. The Panel will discuss with the representatives of the Department of Energy (DOE) and the Energy Research Advisory Board (ERAB) the management of DOE laboratories and the findings of ERAB's review of DOE laboratories.

The afternoon meeting will be closed to the public. The Panel will be discussing with representatives of the National Aeronautics and Space Administration and the President's Private Sector Survey internal personnel practices along with other matters of a personal nature. The premature disclosure of such information could significantly frustrate the implementation of proposed agency actions. Authority for closing: 5 U.S.C. 552(c)(2); 552(c)(6) and 552(c)(9)(B).

Because of security in the New Executive Office Building, persons wishing to attend the meeting should contact Mrs. Minh-Triet Lethi, Senior Policy Analyst, OSTP, (202) 395–4626 prior to 12:00 noon on October 6. Mrs. Lethi is also available to provide further information regarding the Laboratory Review Panel.

Jerry D. Jennings,

Executive Director, Office of Science and Technology Policy.

BILLING CODE 8010-01-M

[Release No. 19033; (File No. SR–NSCC–82–20]

Filing and Immediate Effectiveness of a Proposed Rule Change by the National Securities Clearing Corporation

September 3, 1982.

The National Securities Clearing Corporation ("NSCC") filed a proposed rule change on August 12, 1982, pursuant to Rule 19b–4 under the Securities Exchange Act of 1934, that requires NSCC participants more frequently than in the past to pay NSCC "federal funds" (*i.e.*, same-day funds), rather than "clearing house funds" (*i.e.*, next-day funds), for money differences between the amount of settlement monies due NSCC from a participant on a settlement day and the actual amount paid that settlement day. Under the proposed rule change, the threshold over which federal funds payment is required to be made has been reduced from $500,000 to $100,000. In its filings, NSCC stated that the proposed rule change is designed to effect timely receipt of settlement monies by NSCC.

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934 and Rule 13b–4 thereunder. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Publication of the submission is expected to be made in the **Federal Register** during the week of September 6, 1982. Interested persons are invited to submit written data, views and arguments concerning the submission within twenty-one days from the date of publication in the **Federal Register**. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR–NSCC–82–20.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 5th Street, N.W., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–19063; File No. SR–OCC–82–18]

Self-Regulatory Organizations; the Options Clearing Corp.; Relating to the Requirement of an Authorization Stamp on Clearing Member Input Documents

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on September 8, 1982, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Proposed Rule Change

The proposed rule change would require Clearing Members to use a new OCC approved authorization stamp on various input documents. Clearing Members will have their choice of either an OCC-provided authorization stamp or a member-selected stamp in an OCC-approved format. OCC will provide each Clearing Member with two stamps at no charge. Any additional stamps will be provided to Clearing Members at OCC's cost.

II. Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC

has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to aid OCC's staff in authenticating documents submitted by Clearing Members and to minimize the risk that documents containing unauthorized or fraudulent signatures might be accepted by OCC.

The proposed rule change would enhance OCC's capacity to safeguard securities and funds in its custody or control or for which it is responsible by reducing the risk that OCC personnel may inadvertently accept unauthorized or fraudulent documentation. The proposed rule change would also improve OCC's capacity to facilitate the prompt and accurate clearance and settlement of securities transactions by eliminating processing delays caused by the need to verify signatures and reject documents.

(B) Burden on Competition

OCC does not believe that the proposed rule change would impose any burden on competition.

(C) Comments on the Proposed Rule Change Received from Members, Participants, or Others

Fifteen to twenty Clearing Members were canvassed by telephone with respect to the implementation of the proposed authorization stamp. No negative comments were received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted on or before October 19, 1982.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82-26539 Filed 9-27-82; 8:45 am]

BILLING CODE 8010-01-M

Philadelphia Stock Exchange, Inc.; Application for Unlisted Trading Privileges and of Opportunity for Hearing

September 22, 1982.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and rule 12f-1 thereunder, for unlisted trading privileges in the common stock of:

Coleco Industries, Inc.
Common Stock, $1 Par Value (File No. 7-6320)

This security is listed and registered on one or more other national securities exchange and is reported on the consolidated transaction reporting system.

Interested persons are invited to submit on or before October 14, 1982 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the application if it finds based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 12677; (812-5245)]

Tucker Anthony Group of Tax Exempt Funds; Filing of an Application for an Order Pursuant to Section 6(c) of the Act for Exemption From Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 Thereunder

September 20, 1982.

Notice is hereby given that Tucker Anthony Group of Tax Exempt Funds ("Applicant"), Three Center Plaza, Boston, Massachusetts 02108, a Massachusetts business trust registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on July 13, 1982, for an order of the Commission pursuant to Section 6(c) of the Act exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the exent necessary to permit Applicant to value its portfolio securities using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a "series" money market fund that will offer a means of investing in a professionally-managed portfolio consisting primarily of specified types of short-term securities exempt from federal income tax, with the objective of obtaining as high a level of current income exempt from federal income tax as is consistent with the preservation of capital and liquidity. The application states that Applicant has only one series, but may add other series in the future. Applicant represents that it will invest primarily in a broad range of short-term securities and instruments issued by state and local governments and public authorities including: securities sold by state or municipal governments and public authorities as interim financing in anticipation of tax collections, revenue receipts or bond sales; project notes which are secured by the full faith and credit of the United States; and commitments to purchase the foregoing securities and investments on a "when-issued" basis. Applicant declares that its custodian will set aside, in a separate

account, cash or portfolio securities equal to the amount of Applicant's when-issued commitments. Applicant further states that, for liquidity reasons or for defensive purposes during abnormal market conditions, it may invest in obligations of the United States government, its agencies, instrumentalities or authorities; prime commercial paper; certificates of deposit of domestic banks with assets of $1 billion or more; and repurchase agreements with respect to any securities that Applicant is permitted to own.

Applicant states that a proliferation of tax-exempt mutual funds has significantly increased the demand for short-term tax-exempt instruments and, as a result, available yields on such instruments have declined. At the same time, according to Applicant, certain issuers of tax-exempt instruments have sought to lengthen their terms in order, among other things, to decrease the transaction costs associated with repeated short-term issues. According to the application, in order to induce longer term borrowing relationships, issuers have begun offering higher yields on variable rate or floating rate notes containing a demand feature allowing either party to terminate the obligation within relatively short notice periods. Applicant believes that the acquisition of such variable rate or floating rate demand notes would provide shareholders with a higher tex-exempt return without subjecting them to increased investment risk.

Applicant proposes to acquire, normally in negotiated transactions with the issuers, tax-exempt variable rate or floating rate demand notes having the following features: (1) Each note would have an interest rate determined by a prescribed formula and adjusted at periodic intervals not to exceed one year in the case of a variable rate note or adjusted whenever some set interest rate changes in the case of a floating rate note; (2) Applicant could at any time demand prepayment of the unpaid principal balance plus accrued interest thereon and would be entitiled to prepayment within a prescribed notice period not to exceed seven calendar days; (3) the adjustment feature on a variable rate note will be such that, in the opinion of the board of trustees, whenever a new rate is established it will cause the instrument to have a current market value which approximates its par value; (4) the floating rate feature on a floating rate note will be such that, in the opinion of the board of trustees, it ensures that the market value will always approximate par value; (5) absent an earlier exercise by the Applicant of its prepayment privileges (or exercise of a prepayment privilege by the issuer, if any) the principal and interest under each note would be payable on a date exceeding one year from the date of purchase by Applicant; (6) each note purchased by Applicant would be determined under procedures prescribed by Applicant's board of trustees to present minimal credit risks and would be rated by a major rating service within its two highest rating categories or, if not rated, would be determined by the board of trustees to be comparable to tax-exempt securities which are of "high quality" (i.e., within the two highest ratings assigned by any major rating service). Applicant states that the issuer's obligation to pay principal on its notes would be supported by an irrevocable, unconditional external agreement (normally a bank letter of credit) where necessary to ensure that the notes were of "high quality" (i.e., in all cases where the board of trustees could not determine that a note is of "high quality" without a letter of credit). If such an external agreement is a feature of a note when it is purchased, the note would always be supported by such external agreement unless the rating of the note rose to within the two highest grades without the external agreement. Applicant represents that its board of trustees will reevaluate its variable rate or floating rate demand notes (or the debt securities of the backing banks) not less frequently than quarterly to ensure that they are of high quality. Applicant further represents that it will dispose of any note (by exercising the demand privilege where beneficial) where, due to an adverse change in the issuer's credit, Applicant's board of trustees or any rating service concluded that the note was no longer of "highest quality".

Applicant proposes to acquire variable rate or floating rate demand notes as described above and to consider the maturity of such notes, for purposes of computing its dollar-weighted average portfolio, as: (i) the longer of the period remaining until the principal amount can be recovered through demand or the period remaining until the note's next interest rate adjustment in the case of variable rate demand notes, and (ii) the period remaining until the principal amount can be recovered through demand in the case of floating rate demand notes.

As here pertinent, Section 2(a)(41) of the Act defines value to mean: (i) with respect to securities for which market quotations are readily available, the market value of such securities, and (ii) with respect to other securities and assets, fair value as determined in good faith by the board of directors. Rule 22c-1 adopted under the Act provides, in part, that no registered investment company or principal underwriter therefor issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of security for redemption or of an order to purchase or sell such security.

Rule 2a-4 adopted under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purposes of distribution, redemption and repurchase shall be an amount which reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a-4 further states that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and other securities and assets shall be valued at fair value as determined in good faith by the board of directors. The Commission has expressed the view that, among other things: (i) Rule 2a-4 under the Act requires that portfolio instruments of money market funds be valued with reference to market factors, and (ii) it would be inconsistent, generally, with the provisions of Rules 2a-4 for a money market fund to value its portfolio instruments on an amortized cost basis. (Investment Company Act Release No. 12206, February 1, 1982; Investment Company Act Release No. 9786, may 31, 1977). In view of the foregoing, Applicant requests an exemption from Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to use the amortized cost method to value its portfolio securities.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditioinally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation under the Act, if and to the extent that such exemption is necessary to appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisons of the Act.

In support of the relief requested, Applicant submits that use of the amortized cost method of valuing its portfolio securities, including variable rate and floating rate demand notes, subject to the conditions enumerated above, offers its shareholders the conveniences and advantages of a stable purchase and redemption price of $1.00 per share. In so doing, Applicant states, adequate liquidity is maintained while a high income exempt from federal income tax is still obtained. Applicant further states that, absent unusual or extraordinary circumstances, the amortized cost method of valuation will be in the best interests of its shareholders and reflects the fair value of their securities. Applicant represents that it believes that the granting of the requested exemptions by the Commission is appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

Applicant expressly consents that the following conditions may be imposed in any order of the Commission granting the exemptive relief requested:

1. In supervising the Applicant's operations and delegating special responsibilities involving management to the Applicant's investment adviser, Applicant's board of trustees undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board of trustees shall be the following:

(a) review by the board of trustees as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $1.00 amortized cost price per share, and the maintenance of records of such review.[1]

(b) In the event such deviation from the Fund's $1.00 amortized cost price per share exceeds one-half of one percent, a requirement that the board of trustees will promptly consider what action, if any, should be initiated; by it.

(c) Where the board of trustees believes the extent of any deviation from the Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results which may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten the average portfolio maturity of the Applicant; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

(3) Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that the Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity that exceeds 120 days.[2]

4. Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above. The Applicant will also record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of trustees' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of meetings of the board of trustees. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those United States dollar-denominated instruments that the board of trustees determines present minimal credit risks, and that are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the board of trustees.

6. The Applicant will include as an attachment to each Form N–1Q it files, a statement indicating whether any action pursuant to paragraph 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than October 15, 1982, at 5:30 p.m., submit to the Commission, in writing, a request for a hearing on the application accompanied by a statement as to the nature of his/her interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he/she may request that he/she be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as a matter of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 82–26540 Filed 9–27–82; 8:45 am]

BILLING CODE 8010–01–M

[1] Applicant states that to fulfill this condition, it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the board of trustees in the exercise of its discretion to be appropriate indicators of value which may include, among other things: (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

[2] Should the disposition of a portfolio instrument result in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant, in fulfilling this condition, will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonable practicable.

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 10/10–0160]

Alaska Business Investment Corp.; Application for a License to Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant

to Section 107.102 of the Regulations governing small business investment (13 C.F.R. Section 107.102 (1982)), under the name of Alaska Business Investment Corporation, 301 West Northern Lights Boulevard, Anchorage, Alaska 99510, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), [15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and stockholders of the Applicant are as follows:

Donald L. Mellish, 2200 Cliff Court, Anchorage, Alaska, Chairman of the Board of Directors and President
Michael O. Barry, 7611 Evander Drive, Anchorage, Alaska, Vice President-General Manager and Director
Robert P. Gray, Nettleton Drive, Anchorage, Alaska, Secretary and Director
Edward B. Rasmuson, 2101 Otter Street, Anchorage, Alaska, Director and Treasurer
Elmer E. Rasmuson, Box 600, Anchorage, Alaska, Director

The applicant, a Delaware corporation business, will begin operations with $500,000 paid-in capital and paid-in surplus derived from the sale of stock to the National Bank of Alaska.

The applicant will conduct its activities principally in the State of Alaska.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than fifteen (15) days from the date of publication of this Notice, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Anchorage, Alaska.

Direct Business Loans; Interest Rates

The interest rate on section 7(a) Small Business Administration direct business loans (as amended by Pub. L. 97-35) and the SBA share of immediate participation loans is fourteen and one-half (14½) percent for the fiscal quarter beginning October 1, 1982.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 120.3(b)(2)(iii)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the October-December quarter of 1982, this rate will be thirteen and seven-eighths (13⅞) percent.

Dated: September 22, 1982.

[License No. 01/01-0011]

Schooner Capital Corp.; Notice of License Surrender

Notice is hereby given that, pursuant to § 107.105 of the Small Business Administration (SBA) Rules and Regulations governing Small Business Investment Companies (13 CFR 107.105 (1982)), Schooner Capital Corporation, 77 Franklin Street, Boston, Massachusetts 02110, incorporated under the laws of the State of Massachusetts, has surrendered its License No. 01/01-0011, issued by the SBA on June 24, 1968.

Schooner Capital Corporation has complied with all conditions set forth by SBA for surrender of its license. Therefore, under the authority vested by the Small Business Investment Act of 1958, as amended, and pursuant to the above-cited Regulation, the license of Schooner Capital Corporation is hereby accepted and it is no longer licensed to operate as a Small Business Investment Company.

[License No. 01/01-0302]

Transatlantic Capital Corp.; Notice of Filing of Application for Transfer of Ownership and Control

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to § 107.701 of the Regulations governing small business investment companies (13 CFR 107.701 (1982)) for Transfer of Ownership and Control of Transatlantic Capital Corporation (Licensee), 24 Federal Street, Boston, Massachusetts 02111, a Federal Licensee under the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 *et seq.*).

Pursuant to an August 1982 agreement between and among the Prince of Liechtenstein Foundation (Foundation), the Bank in Liechtenstein (The Bank), Instoria, Inc. (Instoria), and Providentia Ltd. (Providentia), Instoria and Providentia will each purchase a total of 7,500 shares of the Licensee's stock (50 percent or 15,000 shares) held by Foundation and the Bank.

Instoria and Providentia, Delaware Corporation, are investment companies which have their principal place of business at 20 Exchange Place, New York 1005.

Assuming consummation of the proposed transfer of ownership and control, the management and shareholders will be:

Percent of Ownership

Bayard Henry, 65 Goddard Avenue, Brookline, MA 02146, President & Director, None.

John O. Flender, 28 Arlington Street, Cambridge, MA 02140, Vice President, Treasurer, Asst. Clerk, & Director, None.

William D. Nichols, One Post Office Square, Boston, MA 02109, Clerk, None.

Hans-Adam Liechtenstein, Schloss Vaduz, FL-9490 Vaduz, Liechtenstein, Director, None.

James R. Dempsey, 4061 Ridgeview Circle, N. Arlington, VA 22207, Director, None.

Harvey J. Sarles, 25 Thomas Street, Barrington, R.I. 02860, Director, None.

Richard B. Bailey, 102 Commercial Street, Boston, MA 02109, Director, None.

Roger G. Kennedy, 208 N. Quaker Lane, Alexandria, VA 22304, Director, None.

Christian Norgren, Bank in Liechtenstein, FL-9490 Vaduz, Liechtenstein, Director, None.

The Prince of Liechtenstein Foundation, Schloss Vaduz, FL-9490 Vaduz, Liechtenstein, Stockholder, 50 percent.

Instoria, Inc., 20 Exchange Place, New York, NY 10005, Stockholder, 25 percent.

Providentia, Ltd., 20 Exchange Place, New York, NY 10005, Stockholder, 25 percent.

The Licensee will retain its corporate name and location.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed new owner and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed transfer of ownership and control to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in New York, New York.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Traffic Alert and Collision Avoidance System (TCAS) Symposium

The Department of Transportation hereby announces a Traffic Alert and Collision Avoidance System (TCAS) Symposium. This 2-day symposium will commence at 10:30 a.m. on October 12, 1982, in the Federal Aviation Administration auditorium, 800 Independence Avenue, SW., Washington, D.C.

The purpose of this meeting is to present recent results from the FAA engineering development and evaluation program and to discuss these results and program plans with symposium attendees. This information exchange is intended to support current activities to develop Minimum Operational Performance Standards for TCAS.

TCAS is intended to satisfy the operational need for an airborne separation assurance service and to ensure compatibility with all elements of the National Airspace System. Its operation does not depend upon the existence of external equipment other than Air Traffic Control Radar Beacon System (ATCRBS) transponders with altitude encoders or Mode S transponders with altitude encoders in other aircraft.

Although the meeting is open to the public (space permitting) a registration fee of $7.00 will be levied to cover handouts and refreshments for the 2-day symposium. A block of rooms has been reserved at the Holiday Inn, 550 C St., SW, for your convenience. The reservations must be made to the hotel directly on 202-479-4000 no later than October 1 on a first come first serve basis.

Further information concerning the symposium may be obtained from the Federal Aviation Administration, Program Engineering and Maintenance Service, TCAS Branch, ARD-240, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone 202-426-9382.

Dated: September 24, 1982.

Joseph J. Fee,

Symposium Manager, ARD-240.

Part II

Department of Health and Human Services

Health Care Financing Administration

Medicare Program; Elimination of Medicare Indirect Subsidy for Private Rooms

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

Medicare Program; Elimination of Medicare Indirect Subsidy for Private Rooms

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Interim final rule with comment period.

SUMMARY: This interim final rule changes the way Medicare determines the costs of inpatient routine services (bed and board), including costs of private rooms, furnished in hospitals and skilled nursing facilities (SNFs). This change is needed to prevent Medicare from sharing in the added costs of private rooms unless those rooms are used by Medicare beneficiaries and are medically necessary. This regulation implements section 111 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248).

DATES:

Effective date: October 1, 1982. Although this regulation is final, comments may be submitted as described below.

Comment Date: To assure consideration, comments must be mailed by October 28, 1982.

ADDRESS: Address comments in writing to: Administrator, Health Care Financing Administration, Department of Health and Human Services, P.O. Box 17073, Baltimore, Maryland 21235.

In commenting, please refer to file code BPP–216–FC.

If you prefer, you may deliver your comments to Room 309–G Hubert H. Humphrey Building, 200 Independence Ave., S.W., Washington, D.C., or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Comments will be available for public inspection, beginning approximately three weeks after publication, in Room 309–G of the Department's offices at 200 Independence Ave. S.W., Washington, D.C. 20201, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202–245–7890).

FOR FURTHER INFORMATION CONTACT: William Goeller, (301) 597–1802.

SUPPLEMENTARY INFORMATION:

I. General Background

A. Current Problem

The Medicare program recognizes the reasonable costs of general inpatient routine services furnished by hospitals and skilled nursing facilities (SNFs) as allowable costs. Under the Medicare provider reimbursement regulations at 42 CFR 405.452(d)(7), these costs are reimbursed on an overall average cost per diem basis. That is, the total allowable cost of inpatient general routine services (excluding intensive care type units) is divided by the total number of patient days, including private room patient days, to arrive at an overall average cost per diem applicable to each day of care furnished to Medicare and non-Medicare patients.

Because of the current methodology for determining general inpatient routine service costs includes the higher cost of private rooms, this methodology does not fully implement the provisions of the Medicare law that deal with payment for private rooms furnished to Medicare beneficiaries. These provisions state that Medicare reimbursement for bed and board may not exceed the reasonable cost of semi-private accommodations unless more expensive accommodations are medically necesary.

(Section 1861(v)(2)(A) of the Act (42 U.S.C. 1395x(v)(2)(A))). (Section 111 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248), as described in item B below, directs the Secretary to issue regulations enforcing the requirements of section 1861(v)(2)(A) of the Act). Medicare regulations at 42 CFR 405.116(b) specify that a private room is ordinarily medically necessary only when a patient's condition requires him to be isolated or when an individual (in need of immediate inpatient hospital care but not requiring isolation) is admitted to a hospital which has no semiprivate or ward accommodations, or at a time when such accommodations are occupied.

Also, the statute allows a provider to charge a beneficiary for items and services that are more expensive than those covered by the program when they have been furnished at the beneficiary's request. (Section 1866(a)(2)(B)(i) of the Act (42 U.S.C. 1395cc(a)(2)(B)(i))). Thus, if a Medicare beneficiary requests private room accommodations that are not medically necessary, the provider may bill the beneficiary for the difference between the private room and semi-private room charges.

Since Medicare has included the higher costs of private rooms in determining provider's inpatient per diem routine service cost, the provider who bills the beneficiary the difference in charges between the private and semi-private room accommodations would to some extent receive duplicate payment for the accommodations. This situation results in an unintended subsidy to providers for private room costs.

B. 1982 Legislation

On September 3, 1982, Congress enacted the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248). Section 111 of this Act requires the Secretary to issue regulations limiting Medicare routine cost reimbursement for private rooms that are not medically necessary to the reasonable cost of semi-private accommodations, as determined under section 1861(v)(2) of the Act. The legislation specifies that the Secretary shall not allow as a reasonable cost the estimated amount by which costs for nonmedically necessary private room accommodations used by Medicare beneficiaries exceeds the costs which would have been incurred for semi-private accommodations. The Conference Committee Report on Pub. L. 97–248, does not precisely specify how an estimate of the additional cost of nonmedically necessary private rooms is to be developed (H.R. Rep. No. 97–760, 97th Cong., 2nd Sess. 422f (1982). However, the Senate Finance Committee Report on H.R. 4961, which was considered by the Conference Committee in recommending enactment of Pub. L. 97–248, suggests that this be accomplished by subtracting from a provider's allowable cost the estimated differential cost based on the differential charges for private rooms over semi-private rooms (S. Rep. No. 97–494, vol. 1, 97th Cong., 2nd Sess. 27 (1982). Medicare will continue to pay the private room cost differential for medically necessary private rooms used by program beneficiaries.

Section 111(b) specifies that these final regulations, (whether interim or other basis) must be issued by October 1, 1982. The law further specifies that if the regulations are issued as on interim final basis, the final rule must be published by January 31, 1983.

II. Revision to Regulations

A. General Approach

We are amending the Medicare regulations on cost apportionment (42 CFR 405.452) to revise the methodology for computing reimbursement for inpatient general routine service costs. Under this rule, Medicare's methodology for computing reimbursement for inpatient routine services will specifically provide for including the difference in cost between semi-private and private accommodation in Medicare reimbursement only when private rooms

are furnished to Medicare beneficiaries for medically necessary reasons. In this manner, reimbursement for medically unnecessary private room days used by Medicare beneficiaries will not exceed the reasonable cost of services furnished in semi-private rooms, while the higher cost of medically necessary private rooms actually used by Medicare beneficiaries will be specifically recognized. (Providers are still permitted to collect the private room charge differential from Medicare beneficiaries when private rooms are requested and are not medically necessary.) In addition, under this methodology, Medicare will no longer share in the cost of private rooms used by non-Medicare patients.

In general, this rule requires each provider to determine its total cost of private rooms over semi-private room accommodations furnished to all patients, and to exclude this amount from its total inpatient general routine service costs, as suggested by the Senate Finance Committee report. The provider also is required to calculate its per diem inpatient general routine service cost, and the per diem amount of the private room cost differential.

To determine its allowable cost of inpatient general routine services furnished to Medicare patients, the provider multiplies its per diem inpatient general routine service cost, excluding the private room cost differential, by the number of days of care it furnished Medicare beneficiaries and adds to this the product of its per diem private room cost differential times the number of days of care it furnished Medicare beneficiaries in medically necessary private rooms. For purposes of this calculation, "private rooms" and "semi-private rooms" would include rooms in sub-intensive or intermediate care units that do not qualify for separate reimbursement as intensive care type units under 42 CFR 405.452(d)(10).

The specific methodology for implementing this legislation is described in detail in section II. B. of this preamble. We believe that application of this methodology will implement most effectively the requirements of the Medicare law regarding payment for inpatient general routine services in private rooms furnished by hospitals and SNFs.

B. Methodology for Determining Reimbursement for Inpatient General Routine Service Costs.

We are requiring that hospital and SNF reimbursement for inpatient general routine service costs be determined by applying the methodology that is outlined in the following chart, and is explained in detail in steps 1–3 below.

BILLING CODE 4120-03-M

1. Average per diem private room cost differential.

a. Average Per Diem Private Room Charge Differential = Average Per Diem Private Room Charge minus Average Per Diem Semi-Private Room Charge

b. Inpatient General Cost/Charge Ratio = Total Inpatient General Routine Costs / Total Inpatient General Routine Charges

c. Average Per Diem Private Room Cost Differential = Average Per Diem Private Room Charge Differential X Inpatient General Routine Cost/Charge Ratio

2. Average cost per diem for inpatient general routine services

a. Total Private Room Cost Differential = Average Per Diem Private Room Cost Differential X Total Private Room Patient Days

b. Total Inpatient General Routine Service Costs Net of the Private Room Cost Differential = Total Inpatient General Routine Service Costs minus Total Private Room Cost Differential

c. Average Cost Per Diem for Inpatient General Routine Services =

Inpatient General Routine Service Costs Net of Total Private Room Cost Differential
Total Patient Days for All Inpatient General Routine Accommodations

3. Medicare inpatient general routine service costs.

(Average Cost Per Diem for Inpatient General Routine Services X All Medicare Inpatient General Routine Days Including Medicare Private Room Days.

+

(Average Per Diem Private Room Cost Differential X Medicare Medically Necessary Private Room Days)

BILLING CODE 4120-01-C

To apply the formulas described in this chart, hospitals and SNFs participating in Medicare will be required to take the following steps:

Step 1a

Determine the average per diem private room charge differential between a private room patient day and semi-private room patient day, by subtracting the average per diem charge for all semi-private room accommodations from the average per diem charge for all private room accommodations. The average per diem charge for private room accommodations would be determined by dividing the total charges for private room accommodations by the total number of days of care furnished in private room accommodations. The average per diem charge for semi-private accommodations would be determined by dividing the total charges for semi-private room accommodations by the total number of days of care furnished in semi-private accommodations.

Step 1b

Determine the inpatient general routine cost/charge ratio by dividing the total inpatient general routine service costs by the total inpatient general routine service charges.

Step 1c

Determine the average per diem private room cost differential by multiplying the average per diem private room charge differential determined in Step 1a by the inpatient general routine cost/charge ratio determined in Step 1b.

Step 2a

Determine the total private room cost differential by multiplying the average per diem private room cost differential determined in Step 1c by the total number of private room patient days.

Step 2b

Determine the total inpatient general routine service costs net of the total private room cost differential by subtracting the total private room cost differential determined in Step 2a from total inpatient general routine service costs.

Step 2c

Determine the average cost per diem for inpatient general routine services by dividing the total inpatient routine service cost, net of the total private room cost differential determined in Step 2b by all inpatient general routine days for all accommodations.

Step 3

Determine the total inpatient general routine service cost applicable to Medicare including the cost of medically necessary private rooms used by Medicare patients. First, the provider multiplies the average cost per diem for inpatient general routine services determined in Step 2c by all Medicare inpatient general routine days, including Medicare private room days regardless of whether or not they were medically necessary. The provider then adds to this amount the private room cost differential applicable to Medicare inpatient general routine days. This is determined by multiplying the average per diem private room cost differential determined in Step 1c by the number of medically necessary private room days of care furnished to Medicare patients.

An example of the calculation of Medicare reimbursement for inpatient general routine service costs using this proposed methodology is presented in section 405.452(e)(2)(iii) of the revised regulations.

This methodology does not distinguish between ward and semi-private accommodations. We believe that it is not necessary to specifically identify the difference in cost between semi-private and ward accommodations because the provider may not collect separate charges from beneficiaries for ward accommodations. (Providers generally do collect separate charges for private rooms.) Furthermore, in light of the small proportion of ward days compared to semi-private and private days, we believe the aggregation of ward days and cost with days and cost of semi-private rooms will have very little effect on overall Medicare reimbursement.

Section 1861(v)(3) of the Social Security Act (42 U.S.C. 1395x(v)(3)) requires that Medicare payments to a provider be reduced if a beneficiary is put in ward accommodations he/she has not requested, if the use of these accommodations is not consistent with the purposes of the Medicare law. This reduction will continue to be made in the same manner under this revised regulation.

Section 103 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248) eliminated use of the inpatient routine nursing salary cost differential in determining Medicare reimbursement for routine service costs. This amendment is effective with respect to cost reporting periods ending after September 30, 1982, but in the case of any cost reporting period beginning before October 1, 1982, any resulting reduction in Medicare payment will be imposed only in proportion to the part of the period which occurs after September 30, 1982. Final regulations implementing this change in the statute will be issued at approximately the same time as this rule. Although these interim final regulations still reference the nursing salary differential, the differential will only be effective as discussed above. (See **Federal Register** publication entitled Elimination of Inpatient Routine Nursing Salary cost differential for more details.)

III. Swing Beds

Section 904 of the Omnibus Reconciliation Act of 1980 added section 1883 to the Social Security Act (42 U.S.C. 1395tt). Under this section (the swing bed provision), certain rural hospitals with fewer than 50 beds may use their inpatient beds to furnish SNF services to Medicare and Medicaid beneficiaries, and intermediate care facility (ICF) services to Medicaid beneficiaries. On July 20, 1982, we published in the **Federal Register** interim final regulations implementing this provision of the law (47 FR 31518). Payment for SNF and ICF services in a swing-bed hospital is made at the average rate per patient day paid for SNF and ICF routine services respectively, during the previous calendar year under the State's Medicaid plan.

Medicare reimbursement for routine hospital services is determined after the amounts attributable to the routine SNF and ICF services provided under the swing-bed approval are subtracted from total general routine service costs. Likewise, in determining the average general routine cost per diem, only those days of hospital patient care (net of SNF and ICF days) are used. Once the costs and days of care for SNF and ICF services are removed, the apportionment methodology for calculating the hospital level average cost per diem described in section II.B. of this preamble applies. The methodology for eliminating noncovered private room costs does not apply to the computation of routine costs applicable to SNF and ICF days of care. That is, private room days used by SNF and ICF patients in a swing-bed setting would not affect reimbursement for these days because the statute specifically provides for the rate of payment for these days.

Certain small rural institutions that maintain distinct-part SNFs and that do not exceed the maximum number of beds could, without obtaining swing-bed approval, opt to compute reimbursement using the swing-bed methodology. That is, the institution would continue to furnish only hospital services in hospital beds and only SNF services in the

distinct-part SNF beds. However, in computing Medicare reimbursement, the hospital would be permitted to combine the costs of the hospital and SNF components and to use the swing-bed reimbursement methodology for payment as if the two components were combined and had a swing-bed approval. In these cases, the hospital is required to use the same methodology for eliminating the private room subsidy as those hospitals that actually have a swing-bed approval.

IV. Impact Analysis

A. Executive Order 12291

The Secretary has determined that these regulations do not meet the criteria for a major rule that are set forth in section 1(b) of Executive Order 12291. That is, the regulations will not have an annual effect on the economy of $100 million or otherwise meet the threshold criteria of the Executive Order.

We do not have an accurate estimate of the Medicare program savings associated with this rule. Actual savings will vary with the difference between provider's charges for semi-private and private rooms and the proportion of non-medically necessary private rooms used by Medicare beneficiaries. Since it is possible that this rule may influence the decisions of providers in determining charges for semi-private and private rooms, we are not able to project definitive program savings, particularly long-term savings. In any event, the amount of savings will not reach the target threshold to be considered a major rule.

However, even if we were to determine that there was an impact of $100 million or more, we would not classify it as a major rule for purposes of the Executive Order. This is because we have determined that Section 111 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248) has occasioned this impact, and not these regulations which merely implement the statutory provision. Therefore, a regulatory impact analysis is not required.

B. Regulatory Flexibility Analysis

The Secretary certifies, under 5 U.S.C. 605(b) enacted by the Regulatory Flexibility Act (Pub. L. 96–354), that these regulations will not have a significant economic impact on a substantial number of small entities.

The reason for the Secretary's certification is that, as explained in the impact analysis under the Executive Order section, these rules will not have a major dollar impact. Although we do not know exact program savings associated with this revision, we are certain it is less than $100 million. Since the Medicare program will spend approximately $37.5 billion for inpatient services in FY 1983, this reduction will amount to less than .4 percent reduction in Medicare payments nationally. For purposes of the Regulatory Flexibility Act, we have generally considered significant economic impact to be a change which would result in a reduction of 5 percent of a facility's total revenue.

The actual impact of this rule on an individual provider will vary with the proportion of private rooms used by Medicare beneficiaries compared to semi-private rooms used, and with the providers charge differential between private and semi-private rooms. Therefore, we are not able to predict precisely the impact on any individual entity as it is dependent on behavior patterns of providers and beneficiaries. However, nearly all providers will be affected by this proposed rule since the private room cost differential applicable to all patients will be removed from total general routine service costs before the general routine service costs are apportioned to Medicare. Since the less than .4 percent reduction in Medicare payments would be spread among the thousands of providers affected, the impact will not be significant.

However, even if there were a significant effect on a substantial number of small entities, we have determined that this effect is the result of the statutory provision, and not these regulations which merely implement these provisions. Therefore, a regulatory flexibility analysis is not required.

C. Discussion

Although this revision decreases providers' revenue, providers would still be paid their reasonable costs for services. Medicare will continue to pay providers their full reasonable costs of medically necessary private rooms furnished to Medicare patients. Additionally, providers can bill beneficiaries for the incremental charges for private rooms that are not medically necessary but have been furnished at the beneficiary's request.

V. Waiver of Proposed Rulemaking

Section 111(b) of Pub. L. 97–248 specifies that "final regulations (whether on an interim or other basis)" implementing the elimination of private room subsidy shall be issued by October 1, 1982. This provision contemplates that this statutory provision can only be properly implemented by regulations which are issued immediately. Therefore, in our view, publishing a notice of proposed rulemaking would be impractical, unnecessary, and contrary to public interest. We believe that delaying implementation of the statute by the amount of time required for proposed rulemaking would be impractical and contrary to the public interest because the statute does not allow the Secretary the discretion to continue payment for the added costs of private rooms for cost reporting periods beginning on or after October 1, 1982. Moreover, we expect that implementation of the statute will result in budget savings. Any delay in implementation would reduce these savings, and this would be contrary to the public interest of reducing deficit spending. In view of these considerations, we find good cause to waive proposed rulemaking procedures and the usual 30-day delay in effective date.

We will, however, consider any comments on this rule that are mailed by the date specified in the "DATES" section and make any further changes that may be necessary.

VI. Miscellaneous

A. Clearance of Reporting Requirements

This final rule contains information collection requirements that are subject to Office of Management and Budget (OMB) review. As required by section 3504(h) of the Paperwork Reduction Act of 1980 (Pub. L. 96–511), we have submitted a copy of this rule to OMB for review of these information collection requirements.

These requirements are specified at § 405.452(d)(7) and (d)(11) of these regulations. The methodology for eliminating the private room cost differential requires the use of data that are not currently collected by the Medicare cost report (Form HCFA–2552). We assume that hospitals and SNFs presently maintain records on charges for private and semi-private rooms as well as their use by Medicare beneficiaries as part of their private business and accounting practices. Therefore, we do not anticipate that requiring this additional reporting will present a significant burden on providers. We are revising the Medicare cost report to provide for the collection of this additional data.

B. Comments

Because of the large number of comments we receive, we cannot acknowledge or respond to them individually. However, we will consider any comments on this rule that are received by the date specified in the

"DATES" section. If as a result of public comments we conclude that changes in these interim final regulations are needed, we will include these changes in the final regulations described in item B below.

C. Publication of revised final regulations.

Section 111(b) of Pub. L. 97–248 specifically requires the Secretary of HHS to first issue such final regulations (whether on an interim or other basis) before October 1, 1982, as may be needed to eliminate the indirect subsidy of private rooms on a timely basis.

This legislation further requires that if these regulations are promulgated on an interim final basis, the Secretary shall provide an opportunity for public comment and appropriate revision to these regulations, so that they are not on an interim basis later than January 31, 1983.

To comply with these requirements, we are publishing this rule on an interim final basis. As required by the law we will consider all public comments we receive on the rule, determine whether changes in these interim regulations are needed, and publish final regulations implementing section 111 by January 31, 1983.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Certification of compliance, Clinics, Contracts (Agreements), End-Stage Renal Disease (ESRD), Health Care, Health facilities, Health maintenance organizations (HMO), Health professions, Health suppliers, Home health agencies, Hospitals, Inpatients, Kidney diseases, Laboratories, Medicare, Nursing homes, Onsite surveys, Outpatient providers, Reporting requirements, Rural areas, X-rays.

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

42 CFR Part 405, Subpart D is amended as set forth below:

1. The authority citation for 42 CFR Part 405, Subpart D, is amended to read as follows:

Authority: Secs. 1102, 1814(b), 1833(a), 1861(v), 1871, and 1883, 49 Stat. 647, as amended, 79 Stat. 296, 79 Stat. 302, 79 Stat. 322, 79 Stat. 331; 42 U.S.C. 1302, 1395f(b), 1395l (a), 1395x(v), 1395hh, and 1395tt, unless otherwise noted.

2. 42 CFR 405.452 is amended by reprinting the introductory material of paragraph (b), by revising paragraph (b)(1)(i), by revising the heading of (b)(1)(ii), and by adding a new paragraph (b)(1)(iii) to read as follows:

§ 405.452 Determination of cost of services to beneficiaries.

* * * * *

(b) *Principle for cost reporting periods starting after December 31, 1971.* Total allowable costs of a provider shall be apportioned between program beneficiaries and other patients so that the share borne by the program is based upon actual services received by program beneficiaries. For cost reporting periods starting after December 31, 1971, the methods of apportionment are defined as follows:

(1) *Departmental Method*—(i) *Methodology.* Except as provided in paragraph (b)(1)(ii) of this section with respect to the direct apportionment of malpractice costs, and in paragraph (b)(1)(iii) of this section with respect to the treatment of the private room cost differential for cost reporting periods starting on or after October 1, 1982, the ratio of beneficiary charges to total patient charges for the services of each ancillary department is applied to the cost of the department; to this is added the cost of routine services for program beneficiaries, determined on the basis of a separate average cost per diem for general routine patient care areas as defined in paragraph (d)(7) of this section, taking into account, to the extent pertinent, an inpatient routine nursing salary cost differential (see § 405.420 for definition and application of this differential), and in hospitals, a separate average cost per diem for each intensive care unit, coronary care unit, and other intensive care type inpatient hospital units.

(ii) *Exception: Malpractice insurance.* For cost reporting periods beginning on or after July 1, 1979, costs of malpractice insurance premiums and self-insurance fund contributions must be separately accumulated and directly apportioned to Medicare. The apportionment must be based on the dollar ratio of the provider's Medicare paid malpractice losses to its total paid malpractice losses for the current cost reporting period and the preceding 4-year period. If a provider has no malpractice loss experience for the 5-year period, the costs of malpractice insurance premiums of self-insurance fund contributions must be apportioned to Medicare based on the national ratio of malpractice awards paid to Medicare beneficiaries to malpractice awards paid to all patients. The Health Care Financing Administration will calculate this ratio periodically based on the most recent departmental closed claim study. If a provider pays allowable uninsured malpractice losses incurred by Medicare beneficiaries, either through allowable deductible or coinsurance provisions, or as a result of an award in excess of reasonable coverage limits, or as a governmental provider, such losses and related direct costs must be directly assigned to Medicare for reimbursement.

(iii) *Exception: Indirect cost of private rooms.* For cost reporting periods starting on or after October 1, 1982, the additional cost of furnishing services in private room accommodations is apportioned to Medicare only when these accommodations are furnished to program beneficiaries, and are medically necessary. To determine routine service cost applicable to beneficiaries,

(A) Multiply the average cost per diem (as defined in paragraph (d)(7)(ii) of this section) by the total number of Medicare patient days (including private room days whether or not medically necessary).

(B) Add the product of the average per diem private room cost differential (as defined in paragraph (d)(11) of this section) and the number of medically necessary private room days used by beneficiaries.

(C) The days in paragraphs (b)(iii) (A) and (B) of this section do not include private rooms furnished for SNF type and ICF services under the swing bed provision.

3. 42 CFR 405.452(d) is amended by revising paragraph (7) and adding a new paragraph (11) to read as follows:

* * * * *

(d) *Definitions.* * * *

(7) *Average cost per diem for general routine services*—(i) *Average cost per diem for routine services: for cost reporting periods beginning before October 1, 1982.* The average cost per diem for general routine services for cost reporting periods beginning before October 1, 1982, means the amount computed by dividing the total allowable inpatient cost for routine services (excluding the cost of services provided in intensive care units, coronary care units, and other intensive care type inpatient hospital units as well as nursery costs) by the total number of inpatient days of care (excluding days of care in intensive care units, coronary care units, and other intensive care type inpatient hospital units and newborn days) rendered by the provider in the accounting period.

(ii) *Average cost per diem for general routine services: for cost reporting periods beginning on or after October 1, 1982.* The average cost per diem for

general routine services for cost reporting periods beginning on or after October 1, 1982, subject to the provisions on swing bed hospitals, means the average cost of general routine services net of the private room cost differential. The average cost per diem is computed by the following methodology:

(A) Determine the total private room cost differential by multiplying the average per diem cost differential determined in paragraph (d)(11) of this section by the total number of private room patient days.

(B) Determine the total inpatient general routine service costs net of the total private room cost differential by subtracting the total private room cost differential determined in paragraph (d)(7)(ii)(A) from total inpatient general routine service costs.

(C) Determine the average cost per diem by dividing the total inpatient general routine service cost net of private room cost differential determined in paragraph (d)(7)(ii)(B) by all inpatient general routine days, including total private room days. * * *

(11) *Average per diem private room cost differential.* (i) Average per diem private room cost differential means the difference in the average per diem cost of furnishing routine services in a private room and in a semi-private room. (This differential is not applicable to hospital intensive care type units.)

(ii) To compute the average per diem private room cost differential:

(A) Determine the average per diem private room charge differential by subtracting the average per diem charge for all semi-private room accommodations from the average per diem charge for all private room accommodations. The average per diem charge for private room accommodations is determined by dividing the total charges for private room accommodations by the total number of days of care furnished in private room accommodations. The average per diem charge for semi-private accommodations is determined by dividing the total charges for semi-private room accommodations by the total number of days of care furnished in semi-private accommodations.

(B) Determine the inpatient general routine cost/charge ratio by dividing total inpatient general routine service cost by the total inpatient general routine service charges.

(C) Determine the average per diem private room cost differential by multiplying the average per diem private room charge differential determined in paragraph (d)(11)(ii)(A) by the ratio determined in paragraph (d)(11)(ii)(B).

3. 42 CFR 405.452(e)(2) is amended by adding new paragraph (iii), to read as follows:

* * * * *

(e) *Application.* * * *

(2) *Departmental method.* * * *

(iii) *For cost reporting periods beginning on or after October 1, 1982.* The following illustrates how apportionment based on an average cost per diem for general routine services is determined.

HOSPITAL E

Facts	Private accommodations	Semi-private accommodations	Total
Total charges	$20,000	$175,000	$195,000
Total days	100	1,000	1,100
Programs days	70	400	470
Medically necessary for program beneficiaries	20		20
Total general routine service costs			165,000
Average private room per diem charge ($20,000 private room charges ÷ 100 days			[1]200
Average semi-private room per diem charge ($175,000 semiprivate charge ÷ 1,000 days			[1]175

[1] Per diem.

Average per diem private room cost differential

1. Average per diem private room charge differential ($200 private room per diem—$175, semi-private room per diem), $25.

2. Inpatient general routine cost/charge ratio ($165,000 total costs ÷ $195,000 total charges), 0.8461538.

3. Average per diem private room cost differential ($25 charge differential X .8461538 cost/charge ratio), $21.15.

Average cost per diem for inpatient general routine services

4. Total private room cost differential ($21.15 average per diem cost differential X 100 private room days), $2,115.

5. Total inpatient general routine service costs net of private room cost differential ($165,000 total routine cost—$2,115 private room cost differential), $162,885.

6. Average cost per diem for inpatient general routine services ($162,885 routine cost net of private room cost differential ÷ 1,100 patient days), $148.08.

Medicare general routine service cost

7. Total routine per diem cost applicable to Medicare ($148.08 average cost per diem X 470 Medicare private and semi-private patient days), $69,598.

8. Total private room cost differential applicable to Medicare ($21.15 average per diem private room cost differential X 20 medically necessary private room days), $423.

9. Medicare inpatient general routine service cost ($423 Medicare private room cost differential + $69,598 Medicare cost of general routine inpatient services), $70,021.

(Catalog of Domestic Assistance Program No. 13.773 Medicare—Hospital Insurance)

Dated: September 13, 1982.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

Approved: September 17, 1982.

Richard S. Schweiker,

Secretary.

Part III

Department of the Interior

Bureau of Land Management

Recreation and Public Purposes Act Conveyances

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 2740 and 2910

Recreation and Public Purposes Act Conveyances; Amendments to the Recreation and Public Purposes Act Regulations

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The Recreation and Public Purposes Act, as amended, provides the major avenue through which public land are transferred, by conveyance or lease, to the States or their political subdivisions and to nonprofit corporations and associations. The Act provides procedures for lands transfer for recreational and public purpose uses. This proposed rulemaking would make a number of amendments in the existing regulations to facilitate acquisition of public lands by States, State instrumentalities and subdivisions, including counties and municipalities, for recreational or public purposes. This proposed rulemaking would not affect the procedures as they relate to nonprofit associations.

DATE: Comments by November 29, 1982.

ADDRESS: Comments should be sent to: Director (140), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240.

Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT:
John Mezes, (202) 343–8693
or
Robert C. Bruce, (202) 343–8735.

SUPPLEMENTARY INFORMATION: This proposed rulemaking would make a number of changes in the Bureau of Land Management's policy, as well as the application and procedural requirements, for disposal of public lands for recreation and public purposes under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 et seq.). All of the changes will facilitate the processing of applications and expedite the application process.

A major change that would be made by the proposed rulemaking involves revision in the system of filing of petition-applications by applicants and the administrative review by the Bureau of Land Management of the applications. The revised system would utilize a notice of realty action decision document as the classification decision required by the Act. Use of the notice of realty action process will provide for consistency with the same procedural system currently used by the Bureau on other types of public lands proposals and applications for land disposal and use authorizations.

Another change would place in the regulations a recommendation that potential applicants discuss acquisition proposals with the Bureau of Land Management in advance of the filing of a formal application. This preapplication process, which has worked well in other land disposal or use situations, would allow the Bureau to outline the type of information and background detail needed from applicants prior to the filing of an application and thereby speed the processing of the application, once it is filed.

Another change would enable immediate conveyance of title to lands to local governments for sanitary landfill purposes. Existing policy requires that lands for landfill purposes be leased for a number of years before title can be conveyed.

The proposed rulemaking would also add a number of miscellaneous changes that are for clarification as well as changes in policy that have been part of Bureau of Land Management administrative practice for years but have not been included in the regulations.

The principal author of this proposed rulemaking is John Mezes, Division of Lands, Bureau of Land Management, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The changes made by the proposed rulemaking will expedite the processing of applications for disposal of public lands under the Recreation and Public Purposes Act to governmental and nonprofit entities, both large and small. The effect of the changes will be beneficial to all participants in the program, but will not increase or decrease the overall benefits of the program.

The information collection requirements contained in these amendments to 43 CFR Parts 2740 and 2910 have been submitted to the Office of Management and Budget for approval as required by 44 U.S.C. 3507. The collection of this information will not be required until it has been approved by the Office of Management and Budget.

List of Subjects

43 CFR Part 2740

Intergovernment relations, Public lands—sales, Recreation.

43 CFR Part 2910

Airports, Alaska, Mines, Public lands, Recreation areas, Waste treatment and disposal.

Under the authority of the Act of June 14, 1926, as amended (43 U.S.C. 869 et seq.), and sections 211 and 212 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1721), it is proposed to amend Subparts 2740, 2741 and 2742 of Part 2740 and Subpart 2912 of Part 2910, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations as set forth below:

PART 2740—RECREATION AND PUBLIC PURPOSES ACT

1. Section 2740.0–5 is amended by adding a new paragraph (d) to read:

§ 2740.0–5 [Amended].

* * * * *

(d) 'Public purpose' means a use in which the public has an interest affecting the health, safety, morals and welfare of the general public, but does not include uses for habitation, cultivation, trade or manufacturing.

2. Section 2740.0–6 is amended by adding new paragraphs (c), (d) and (e) to read:

§ 2740.0–6 [Amended].

* * * * *

(c) Conveyances of Federally owned and reserved mineral interests under the provisions of section 209 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1719) on lands conveyed under the act shall not be made.

(d) Conveyances shall not be made for uses which can be more appropriately authorized under existing authorities other than the act or where the long-term recreation or public purposes use can be authorized without a plan of development or physical development of the lands.

(e) Non-Federal lands that have been acquired through exchange procedures (See 43 CFR Part 2200) and which are public lands may not be transferred

from public ownership by use of the authority in this part. If the lands meet the disposal criteria of public interest determination requirements contained in sections 203 and/or 206 of the Federal Land Policy and Management Act, they may be disposed of under the applicable provisions of that Act.

2. Subpart 2741 is amended by:

a. Inserting a new § 2741.3 to read:

§ 2741.3 Preapplication consultation.

(a) Potential applicants should contact the appropriate District Office of the Bureau of Land Management well in advance of the anticipated submission of an application. Early consultation is needed to familiarize a potential applicant with management responsibilities and terms and conditions which may be required in a lease or patent.

(b) Any information furnished by the applicant in connection with preapplication activity or use, which he/she requests not be disclosed, shall be protected to the extent consistent with the Freedom of Information Act (5 U.S.C. 552).

(c) Dependent upon the magnitude and/or public interest associated with the proposed use, various investigations, studies, analyses, public meetings and negotiations may be required of the applicant prior to the submission of the application. Where a determination is made that studies and analyses are required, the authorized officer shall inform the potential applicant of these requirements.

(d) The potential applicant may be permitted to go upon the public lands to perform casual acts related to data collection necessary for development of an acceptable plan of development as required in § 2741.4(b) of this title. These casual acts include, but are not limited to:

(1) vehicle use on existing roads;

(2) sampling;

(3) surveys required for siting of structures or other improvements; and,

(4) other activities which do not unduly disturb surface resources. If, however, the authorized officer determines that appreciable impacts to surface resources may occur, he/she may require the potential applicant to obtain a land use authorization permit with appropriate terms and conditions under the provision of part 2920 of this title.

§ 2741.3 Redesignated as § 2741.4 and amended.

b. Redesignating § 2741.3 as §2741.4 and amending it by adding a new paragraph (c) to read:

* * * * *

(c) Each application shall be accompanied by a nonrefundable filing fee of $100.

§ 2741.4 Redesignated as § 2741.5 and amended.

c. Redesignated § 2741.4 as § 2741.5 and amending it by:

1. Amending paragraph (f) by removing all after the first sentence; and

2. Revising paragraphs (h) and (i) to read:

* * * * *

(h)(1) A notice of realty action classifying public lands as suitable or unsuitable for sale or lease under the act shall be issued, published and sent to parties of interest by the authorized officer, including but not limited to, adjoining landowners and current or past land users, when a determination is made that such public lands are suitable or unsuitable for sale or lease under the act. The notice shall also segregate the lands from other appropriations, including locations under the mining laws, except as provided in the notice or amendment thereto. If no application is filed within 12 months after the issuance of the notice, the segregation shall be automatically vacated and the public lands returned to their former status.

(2) The notice shall include the use proposed for the public lands and shall specify whether the public lands are to be sold or leased. A notice of realty action is not a specific action implementing a resource management plan or amendment.

(3) The notice of realty action shall be published once in the **Federal Register** and once a week for 3 weeks thereafter in a newspaper of general circulation in the vicinity of the public lands included in the application submitted under the act and the regulations.

"(i) Patents or leases with option to patent may be issued for sanitary landfill purposes. Such requests, however, shall be based on ultimate use of the lands after completion of landfill activities and for uses which comply with the intent of the act and then in accordance with the approved development plan. Where the ultimate use of the lands is proposed to be for non-recreational or non-public purposes, such patent request shall be considered as a proposal to purchase the lands under section 203 of the Federal Land Policy and Management Act. Such sales shall be made at a price not less than their current fair market value at the time of purchase. Procedures covering such sales are contained in part 2710 of this title.;

* * * * *

§ 2741.5 Redesignated as § 2741.6.

e. Redesignated § 2741.5 as § 2741.6;

§ 2741.6 Redesignated as § 2741.7 and amended.

f. Renumbering § 2741.6 as § 2741.7 and amending it by adding to paragraph (d) a sentence to read "Where such reserved minerals are subject to disposition under the provisions of the Mineral Leasing Act of 1920, as amended, and supplemented (30 U.S.C. 181 et seq.), the Materials Act of July 31, 1947, as amended (30 U.S.C. 601 et seq.) and the Geothermal Stream Act of 1970 (30 U.S.C. 1001 et seq.), the regulations contained in Subchapter C of this title shall be utilized.";

§ 2741.7 Redesignated as § 2741.8

g. Redesignated § 2741.7 as § 2741.8; and

§ 2741.8 Redesignated as § 2741.9.

h. Redesignated § 2741.8 as § 2741.9.

3. Subpart 2742 is amended by:

a. Inserting a new § 2741.1 to read:

§ 2742.1 Lands subject to disposition.

Omitted lands and unsurveyed islands may be conveyed to States and their local political subdivisions under the provisions of section 211 of the Federal Land Policy and Management Act (43 U.S.C. 1721).

§§ 2742.1 through 2742.4 Redesignated as §§ 2742.2 through 2742.5.

b. Redesignating existing §§ 2742.1 through 2742.4 as §§ 2742.2 through 2742.5.

PART 2910—LEASES

4. Subpart 2912 is amended by:

a. Amending § 2912.1–1 by adding a new paragraph (h) to read:

§ 2912.1–1 [Amended].

* * * * *

(h) Public lands included in a mining claim upon which a validity determination has not been made may be leased under the provisions of the act. Leases issued under the act shall contain a provision that the lease is subject to all valid existing rights, including mining claims. Acceptance of a lease subject to valid existing rights is the responsiblity of the applicant.;

b. Revising § 2912.4–1 to read:

§ 2912.4–1 Requirement.

Compliance with all applicable regulations and guidelines regarding solid waste management or disposal is required under a lease issued for purposes involving disposal of solid waste.; and

d. Revising § 2912.4–2 to read:

§ 2912.4-2 Procedures.

(a) All new leases shall contain stipulations requiring compliance with existing regulations and guidelines on the subject of solid waste management and disposal. The authorized officer shall require that leases and respective plans of development and management already in existence without such specific stipulations shall be amended to require compliance with the regulations and guidelines on solid waste management and disposal. In all cases, the lease shall stipulate that failure to comply with the regulations and guidelines on solid waste management and disposal shall constitute sufficient grounds for cancellation of the lease.

(b) Lease applications shall include in the plan of development and management a detailed description of the methods and procedures that will be employed to achieve compliance with existing regulations and guidelines on solid waste management and disposal. The regulations and guidelines delineate minimum standards of performance that shall be followed. The recommended methods and procedures in the guidelines are means whereby requirements may be met. Alternate methods and procedures may be used in meeting the requirements when approved by the authorized officer.

Dated: August 30, 1982.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

Part IV

Environmental Protection Agency

General Pretreatment Regulations for Existing and New Sources; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 403

[OGC-FRL 2181-2]

General Pretreatment Regulations for Existing and New Sources

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: On January 28, 1981, the Environmental Protection Agency promulgated amendments to the General Pretreatment Regulations for Existing and New Sources (46 FR 9404–9460). On March 27, 1981, the effective date of these amendments was indefinitely postponed, in order to enable the Agency to conduct a Regulatory Impact Analysis under Executive Order 12291 (46 FR 19936, April 2, 1981). On January 31, 1982, pursuant to a rulemaking commenced by the Agency on October 13, 1981 (46 FR 50502–50503), all but four of the amendments were put into effect (47 FR 4518, February 1, 1982). On July 8, 1982, the United States Court of Appeals for the Third Circuit issued an opinion finding that the Agency's original indefinite deferral of the amendments to the general pretreatment regulations conrtavened the notice and comment provisions of the Administrative Procedure Act. To remedy this violation, the Court directed the Agency to retroactively reinstate all of the amendments, effective March 30, 1981. By today's notice, the Agency is complying with the Court's order and reinstating all of the amendments as of March 30, 1981.

DATES: The effective date of the amendments to the general pretreatment regulations originally promulgated on January 28, 1981, is March 31, 1981.

FOR FURTHER INFORMATION CONTACT: Bill Diamond, Environmental Protection Agency, Permits Division (EN–336), 401 M Street, S.W., Washington, D.C. 20460, (202) 426–4793.

SUPPLEMENTARY INFORMATION:

I. Background

On June 26, 1978, the Environmental Protection Agency (EPA) promulgated the General Pretreatment Regulations establishing mechanisms and procedures for controlling the introduction of wastes from industry and other non-domestic sources into publicly-owned treatment works (POTWs) (43 FR 27736–27773). Following promulgation, several parties brought actions in Federal court challenging these regulations. On January 28, 1981, pursuant to the terms of a settlement agreement entered into by some of the parties, EPA promulgated amendments to the 1978 regulations (46 FR 9404–9460). These amendments were originally scheduled to take effect on March 13, 1981. Their effective date was temporarily deferred until March 30, 1981 under the President's Memorandum of January 29, 1981 (46 FR 11972, February 12, 1981). On March 27, 1981, EPA indefinitely postponed the amendments' effective date to enable it to conduct a Regulatory Impact Analysis of the general pretreatment program under Executive Order 12291. EPA published a notice in the **Federal Register** to this effect on April 2, 1981 (46 FR 19936).

Subsequent to EPA's indefinite deferral of the effective date of the general pretreatment amendments, a suit was brought by the Natural Resources Defense Council (NRDC) in the United States Court of Appeals for the Third Circuit challenging EPA's deferral of the general pretreatment amendments without notice and comment (*NRDC* v. *EPA*, No. 81–2068). On October 13, 1981, while this suit was pending, EPA announced that it was terminating the indefinite deferral of the amendments, making them effective January 31, 1982 (46 FR 50502). In a separate action also taken on October 13, the Agency initiated a rulemaking and invited public comment on the issue of whether the effective date of all or specific portions of the amendments should be further postponed (46 FR 50503). After evaluating the comments received in response to the October 13 proposal, EPA, on February 1, 1982, announced that it was deferring the effective date of four of the amendments pending further analysis but that the remaining amendments would go into effect (47 FR 4518). The four amendments which continued to be deferred were the combined watestream formula (§ 403.6(e)), the removal credits section (§ 403.7) and the definitions of "pass through" (§ 403(n)) and "interference" (§ 403.3(i)).

On July 8, 1982, the United States Court of Appeals issued its opinion in the NRDC suit, finding that EPA's March 27, 1981 deferral of the amendments to the general pretreatment regulations violated the notice and comment provisions of the Administrative Procedure Act. To remedy this procedural violation, the Court directed EPA to retroactively reinstate all of the amendments as of March 30, 1981, including the four amendments which EPA further deferred on February 1, 1982. At the same time, the court noted that its decision did not "forestall future agency action with regard to the four amendments, provided such action is taken in compliance with the Administrative Procedure Act."

Pursuant to the Court's direction, EPA is hereby reinstating all of the amendments to the general pretreatment regulations, effective March 30, 1981. The Agency is continuing, however, to deliberate on what future steps might be appropriate with respect to these amendments.

One of the amendments which EPA continued to defer on February 1, 1982, but which is being put into effect by today's action is the combined wastestream formula. This formula triggers the three year compliance deadline for integrated facilities under the electroplating pretreatment standards (see, 40 CFR 413.01). As a result of today' action, these facilities will have three years from the combined wastestream formula's March 30, 1981 effective date, or until March 30, 1984, to comply with the electroplating pretreatment standards. Also as a result of today's action, the time allotted for integrated facilities to submit baseline reports (§ 403.12(b)), fundamentally different factors variance requests (§ 403.13) and category determination requests (§403.6) will begin to run. These facilities will have six months from today's date to submit baseline reports and fundamentally different factors variance requests and sixty days from today's date to submit category determination requests.

Today's reinstatement of the amendments to the general pretreatment regulations is being done to rectify past failure to provide notice and comment and is dictated by court order. Thus, there is "good cause" to dispense with notice and comment prior to the reinstatement. See *American Federation of Government Employees, AFL–CIO, v. Block*, 655 F.2d 1153 (D.C. Cir. 1981).

This notice was submitted to the Office of Management and Budget for review as required by Executive Order 12291. Any comments from OMB to EPA and any EPA response to those comments are available for public inspection through contacting the person listed in the front of this notice. EPA is presently in the process of completing a regulatory impact analysis of the general pretreatment program, of which these amendments are part.

OMB has approved the following information collection requirements under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* These requirements have been assigned the following control numbers.

Department of the Interior

Mineral Management Service

Central and Western Gulf of Mexico Outer Continental Shelf Sales Nos. 81 and 84; Call for Information for Oil and Gas Leasing

4310-84

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Central and Western Gulf of Mexico Outer Continental Shelf
Sales Nos. 81 and 84
Call for Information for Oil and Gas Leasing

Purpose of Call

The purpose of the Call is to assist the Secretary of the Interior in carrying out his responsibilities under the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1331-1343), as amended (92 Stat. 629). Potential bidders are requested to outline broad areas where they believe hydrocarbons may occur or where they have an interest in leasing in the Central and Western Gulf of Mexico. The Secretary is also requesting comments from all interested parties--Federal, State, and local governments, environmental groups, the general public, and potential bidders--on possible environmental effects and use conflicts in the Call area, and on the appropriateness of initial lease terms longer than 5 years and lease tracts larger than 5,760 acres.

Use of Information from Call

Information submitted in response to this Call will be considered in selecting the areas of hydrocarbon potential to be proposed for leasing and analyzed in the environmental impact statement (EIS) as the proposed Federal action. This information will also be used in identifying alternatives to the proposed action. Comments received on possible environmental effects and use conflicts may be used in the analysis of local environmental conditions within the Call area so that the potential effects of oil and gas exploration and development, other than the benefits accruing to the Nation as a result of inventorying and producing oil and gas, can be assessed.

These comments may also be useful in developing special lease terms and conditions designed to assure safe offshore operations. Comments submitted regarding length of lease term and size of lease tract may be used in the assessment of the appropriate initial lease term and appropriate tract size, pursuant to section 8 of the OCS Lands Act, as amended (43 U.S.C. 1337).

Description of Area

The general area of this Call lies between 25°N and 30°N latitude and 88°W and 97°W longitude. The Call area is offshore the States of Mississippi, Alabama, Louisiana, and Texas and extends offshore the seaward boundary of those States to roughly the 3,000 meter isobath. Indications of interest and comments may be considered for any area within the boundaries of the Call. Boundaries of the Call area are shown on the maps at the end of this Call.

The following list identifies the Official Protraction Diagrams and leasing maps included in this Call. The diagrams and maps may be purchased by mail from the Minerals Manager, Minerals Management Service (MMS), Gulf of Mexico OCS Region, P.O. Box 7944, Metairie, Louisiana 70010, or in person at 3301 N. Causeway Blvd., Metairie, Louisiana.

a. Outer Continental Shelf Leasing Maps--South Texas Nos. 1 through 4. This is a set of 7 maps which sells for $5.00.

b. Outer Continental Shelf Leasing Maps--East Texas Nos. 5 through 8. This is a set of 9 maps which sells for $7.00.

c. Outer Continental Shelf Leasing Maps--Louisiana Nos. 1 through 12. This is a set of 23 maps which sells for $17.00.

confidential and will be used as a criterion in determining the area

c. Outer Continental Shelf Leasing Maps--Louisiana Nos. 1 through 12. This is a set of 27 maps which sells for $17.00.

d. Outer Continental Shelf Official Protraction Diagrams. These maps sell for $2.00 each.

Instructions on Call

Indications of interest from potential bidders should be limited to the areas included in the Official Protraction Diagrams and leasing maps as described above. Those indicating interest are requested to do so on a standard Call for Information Map, available free from the Minerals Manager, Gulf of Mexico OCS Region, at the address stated in the second paragraph under "Description of Area"; telephone (504) 837-4720. This map shows the Call area and shows that the entire area as identified by the MMS has potential for the discovery of deposits of oil and gas. Respondents are requested to suggest areas of potential interest within the planning areas. Although individual indications of interest are considered to be privileged and confidential information, the names of persons or entities indicating interest or submitting comments will be of public record.

Respondents are requested to rank areas according to priority of interest (e.g., priority 1, 2, or 3). Priority information by company will be held confidential and will be used as a criterion in determining the area identification. If a company does not choose to assign a priority to its nominations, those areas delineated will be assigned a medium, or priority 2, nomination.

In addition to indications of interest, we are seeking comments from all interested parties about particular geological, environmental, biological, archaeological, socioeconomic conditions or problems, or other information which might bear upon potential leasing and development of particular areas. Comments should preferably address broad areas, but may be restricted to designated blocks of particular concern.

Comments are also being sought from all interested parties on the appropriateness of initial lease periods longer than 5 years, and on the need, if any, for lease tracts larger than 5,760 acres. Such comments should describe why such modifications would be appropriate and identify where modifications should be applied. Those making comments are requested to mark the area on the standard Call for Information Map discussed above.

Indications of interest and comments must be submitted no later than 30 days following publication of this document in the Federal Register in envelopes labeled "Indications of Interest for Leasing in the Outer Continental Shelf Central and Western Gulf" or "Comments on Leasing in the Outer Continental Shelf Central and Western Gulf," as appropriate. They must be submitted to the Minerals Manager, Gulf of Mexico OCS Region, at the address stated in the second paragraph under "Description of Area." A copy should be sent to the Chief, Offshore Resource Evaluation Division, Minerals Management Service, 12203 Sunrise Valley Drive, Mail Stop 643, Reston, Virginia 22091.

Final delineation of the area for competitive bidding will be made only at a later date after compliance with established departmental procedures, all requirements of the National Environmental Policy Act of 1969, and the Outer Continental Shelf Lands Act, as amended.

A final Notice of Sale, detailing areas to be offered for competitive bidding, will be published in the Federal Register indicating the conditions and terms for leasing and the place, date, and hour at which bids will be received and opened.

Environmental Protection Agency

General Pretreatment Regulations for New and Existing Sources; Removal Credits

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 403

[WH-FRL-2152-7]

General Pretreatment Regulations for New and Existing Sources—Removal Credits

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: On June 26, 1978, the Environmental Protection Agency ("EPA") promulgated General Pretreatment Regulations for Existing and New Sources (43 FR 27736–27773). On January 28, 1981, in settlement of various suits challenging these regulations, EPA promulgated amendments to the 1978 regulations (46 FR 9104–9460). These amendments were originally scheduled to take effect on March 13, 1981. Their effective date was indefinitely postponed, however, to permit EPA to conduct a Regulatory Impact Analysis of the general pretreatment program under Executive Order 12291 (46 FR 19936, April 2, 1981). On January 31, 1982, all but four of the amendments were put into effect (46 FR 50502–50503, October 13, 1981; 47 FR 4518, February 1, 1982). One of the amendments which continued to be deferred was the removal credits section. On July 8, 1982, the United States Court of Appeals for the Third Circuit directed EPA to reinstate all of the amendments to the general pretreatment regulations, including the removal credits section.

EPA is today proposing revisions to the removal credits section of the general pretreatment regulations to make that section simpler and more workable.

DATE: Comments must be submitted on or before November 29, 1982.

ADDRESSES: Comments should be addressed to: Bill Diamond, Environmental Protection Agency, Permits Division (EN–336), Room 3220, 401 M Street, SW, Washington, D.C. 20460, (202) 426–4793.

The record supporting this proposal will be made available for inspection through contacting Bill Diamond.

FOR FURTHER INFORMATION CONTACT: Bill Diamond, Environmental Protection Agency, Permits Division (EN–336), 401 M Street SW, Washington, D.C. 20460, (202) 426–4793.

SUPPLEMENTARY INFORMATION:

I. Introduction and Background

On June 26, 1978, the Environmental Protection Agency ("EPA") promulgated general pretreatment regulations which established procedures for controlling the introduction of wastes from industry and other non-domestic sources into publicly owned treatment works [POTWs] (43 FR 27736–27773).

Following the promulgation of the general pretreatment regulations in 1978, several parties brought actions in Federal court challenging various aspects of the regulations. On October 29, 1979, pursuant to the terms of a settlement agreement entered into by some of the parties, EPA published proposed amendments to the general pretreatment regulations. These amendments were finalized on January 28, 1981 (46 FR 9404–9460). On March 27, 1981, EPA indefinitely postponed the effective date of the 1981 amendments in order to enable the Agency to conduct a Regulatory Impact Analysis (RIA) of the general pretreatment program under Executive Order 12291 (46 FR 19936, April 2, 1981). On October 13, 1981, EPA terminated the indefinite postponement of the January 1981 amendments and established January 31, 1982 as their effective date (46 FR 50502). On the same day, EPA invited comment on a proposal that the effective date of the amendments be further postponed (46 FR 50503). Most of the 1981 amendments were allowed to go into effect on January 31, 1982. However, a few of the amendments, including the removal credits provisions, were further postponed (47 FR 4518, February 1, 1982). On July 8, 1982, the United States Court of Appeals for the Third Circuit directed EPA to reinstate, effective March 30, 1981, all of the amendments to the general pretreatment regulations, including the removal credits section.

An important part of the June 1978 general pretreatment regulations and the January 1981 amendments was the section governing removal credits (Section 403.7). That section was designed to implement a 1977 amendment to section 307(b)(1) of the Clean Water Act, which allows a POTW to provide industrial users with a "credit" (in the form of reduced pretreatment requirements) for the toxic pollutants removed by the POTW. Industrial Users which qualify for such a "credit" are allowed to discharge larger quantities of toxic pollutants to the POTW. The removal credits section established the conditions under which POTWs could obtain approval to award removal credits and provided the means by which these removal credits should be determined.

Notwithstanding an attempted streamlining in the January, 1981 amendments, the § 403.7 removal credits section has been criticized as being so burdensome and unwieldy as to discourage POTWs from applying for and obtaining authorization to grant removal credits. EPA is today proposing further modifications to the removal credits section to create clearer and more workable provisions.

EPA does not consider today's proposal to be inconsistent with the Regulatory Impact Analysis process. If, as a result of that analysis, the direction of the pretreatment program changes, the removal credits provision can be changed accordingly.

II. Summary of Modifications

Since today's proposal, as well as previous versions of the removal credits section, are a direct outgrowth of statutory requirements, a brief review of the statutory context is warranted. The statutory authority for removal credits is found in a 1977 amendment to Section 307(b)(1) of the Clean Water Act. That section, as amended, permits a POTW to adjust the pretreatment requirements for sources discharging toxic pollutants into the POTW to reflect the removal of such toxic pollutants by the POTW. The availability of such an adjustment, or credit, is however, subject to a number of conditions. First, and most obviously, there must be some demonstrable removal of the toxic pollutant by the POTW. A second requirement is that the discharge from the POTW "* * * not violate that effluent limitaton or standard which would be applicable to (the toxic pollutant removed by the POTW) if it were discharged by [the industrial source] other than through a [POTW]." A third requirement is that the removal of toxic pollutants by the POTW not cause the POTW to violate sludge use or disposal requirements under section 405 of the Act. A fourth requirement is that the POTW develop a local compliance program.

These statutory requirements establish the essential framework for any removal credits scheme. At a minimum, such a scheme must contain some means of calculating and demonstrating consistent removal, require compliance with applicable sludge requirements, and require development of a local compliance program. In addition, it must establish procedures for obtaining approval to grant removal credits.

The revised credit section proposed today implements this basic plan in a more flexibile manner than the earlier removal credits sections. By far the most

important change is the provision for "national removal rates." The revised section provides that POTWs which have complied with secondary treatment requirements, or are within one year of meeting those requirements, may demonstrate consistent removal by reliance on "national" removal rates developed by EPA, rather than through collecting data on their individual removal performances. Another important change is the liberalization of the removal demonstration requirements for POTWs which have not complied with the secondary treatment limitations, or are not close to complying with those limitations. These POTWs must still demonstrate consistent removal by sampling their actual individual plant performance, as was previously required. However, these sampling requirements have been made more flexible by permitting the POTWs to use historical sampling data and to utilize sampling schemes other than the twelve month sampling scheme generally prescribed. Other important changes are the elimination of the adjustment for combined sewer overflows and the simplication of approval procedures. A detailed description of these changes is provided below.

III. Description of Proposed Requirements

Section 403.7(a) Introduction

This introductory section sets out the "ground rules" under which POTWs can obtain authorization to give removal credits. Paragraph (a)(2) makes it clear that the POTW has complete discretion in deciding whether to award removal credits: A POTW qualifying for removal credits may decline to give removal credits or may award a lower removal credit than it is capable of giving. Paragraph (a)(3) outlines the five prerequisites which must be met before POTWs can obtain authorization to give removal credits. The POTW must (1) submit an application or certification (2) demonstrate consistent removal (3) have an approved local pretreatment program (or qualify for the exception to this requirement) (4) meet all applicable sludge requirements and (5) meet any NPDES permit limitation for toxic pollutants covered by the proposed removal credits. These conditions, as discussed above, are for the most part a direct outgrowth of statutory requirements. Paragraph (a)(3) also warns POTWs that if granting removal credits forces them to incur greater sludge management costs than they would incur in the absence of granting removal credits, EPA will not pay for the additional sludge management costs. Paragraph (a)(4) identifies the basic equation from which one calculates the removal credit. This equation is the same as the one contained in the 1978 regulations and the 1981 amendments.

Section 403.4(b) "Consistent Removal"

One of the most important components of the removal credits program, and the one probably criticized most frequently for rendering the program "unworkable," is the section setting forth requirements for demonstrating consistent removal. An attempt has been made to simplify substantially this process by allowing POTWs which are in compliance with secondary treatment requirements to apply a rate of consistent removal based on EPA data on POTW performance, rather than individual performance data collected by the POTW. The Agency's data were obtained in an analytical survey of forty POTWs with secondary treatment and, in almost every case, consist of six influent and effluent 24 hour composite measurements for each pollutant. Using this data, the Agency has calculated "national removal rates" which may be used by qualifying POTWs to demonstrate consistent removal for specific pollutants. In deriving these national removal rates, the Agency screened the pollutant data from all of the forty POTWs for suitability for estimating percent removal. From the selected data, EPA estimated the removal rate for each pollutant at each POTW by taking the difference of the arithmetic average of the influent and effluent measurements, expressed as a percentage. EPA then constructed a cumulative frequency distribution of the removal rates observed for each pollutant. The Agency selected the twenty-fifth percentile of the removal rate distribution as the national removal rate for that pollutant (expressed in terms of percent removal). In other words, the Agency chose a removal rate which was met by roughly seventy-five percent of the POTWs in the screened data base.

The Agency considered three alternatives in choosing the the removal estimate upon which to base the national removal rates—the twenty-fifth percentile of the removal distribution, the median (or fiftieth) percentile, and the average removal. The Agency's objective was to select a percent removal that would be met by most well designed and operated POTWs achieving the secondary treatment standards. The Agency concluded that the twenty-fifth percentile of the removal distribution for the screened data base satisfies this objective without being so conservative that a few POTWs showing poor removal for a particular pollutant (those at the low end of the removal distribution) would determine the removal rate.

The main consideration in choosing the twenty-fifth percentile is the Agency's belief that the POTWs in the 40 plant data base are well operated and maintained so that, as a group, these POTWs are likely to achieve better reductions than the population of all POTWs meeting the secondary limitations. If this is the case, a percent reduction achieved by roughly seventy-five percent of the 40 plants would correspond to a reduction achieved by a somewhat smaller percentage (for example, fifty or sixty percent) of the POTW population eligible for the national rates and would therefore be closer to the median performance of the total eligible population. Another, less important consideration in choosing the twenty-fifth percentile is that in most cases the removal distribution tends to have more dispersion below the neighborhood of the twenty-fifth percentile, while removals above the twenty-fifth percentile are grouped within a somewhat narrower range. That is, removals above the area of the twenty-fifth percentile (the majority of removal estimates in the distribution) tend to be consistently high, while removals below the twenty-fifth percentile are less consistent and cover a wide range of removals in the lower end of the distribution. Thus, in most cases, the neighborhood of the twenty-fifth percentile tends to be a convenient "break" point in the distribution. This "break" point is, of course, a general diagrammatic quality of the removal distributions rather than a precise mathematical characteristic.

The Agency recognizes, however, that there are arguments which militate in favor of using the average or median removal instead of the twenty-fifth percentile. The basic issue is how well the available data approximate the distribution of removals in the eligible population. While the Agency believes the sample population performs somewhat better with respect to metals removal than the population of eligible POTW's, the actual distributions are unknown. Therefore, the question of how well the sample population performs relative to the population of eligible POTW's can not be answered with certainty. If the sample distributions are assumed to approximate closely the population distributions, there is no need to select a removal estimate that compensates for an assumed discrepancy, as is the case

with the twenty-fifth percentile. In this case, a removal estimate based on the average or median of the sample distribution would provide a reasonable value for the national removal rate. Further, the national removal rates represent the maximum allowable credits (unless the POTW individually samples its removal rate). The POTW has the discretion to grant its industrial dischargers lower credits or none at all, based on local control needs.

The table below provides the removal rates that would be obtained using the different removal distribution estimates. The Agency solicits comments on the relative merits or accuracy of these alternatives for determining the allowable level of removal credits. Also, the Agency solicits data on pollutant removal at POTWs to supplement the Agency's data base. (A more detailed description of the data and methodology for determining national removal rates can be found in a background report, "Determining National Removal Credits for Selected Metals at POTWs").

NATIONAL REMOVAL RATES BASED ON DIFFERENT REMOVAL DISTRIBUTION ESTIMATES

	25th percentile (percent)	50th Percentile (percent)	Average (percent)
Cadmium	38	81	85
Chromium	95	78	89
Copper	59	82	75
Cyanide	52	61	59
Lead	48	70	63
Nickel	15	33	24
Silver	66	78	78
Zinc	66	78	70
Total regulated metals	62	71	68

Since the data supporting the national removal rates reflects the performance of well-operated POTWs meeting secondary treatment (and is only valid for this class of facilities) the availability of the national removal rates is being restricted to POTWs which have been in "compliance" with the secondary treatment limitations for BOD and suspended solids found at 40 CFR 133.102(a) and (b) for the six months preceding their application for removal credits. "Compliance" is defined in § 403.7 (b)(1)(i) to mean that the POTW has not exceeded the maximum 30 day average for BOD and suspended solids found at §133.102(a)(1) and (b)(1) by more than 25% in any one month. The Agency is employing this definition so that POTWs will not be disqualified from using the national rates for violations of the secondary treatment standards which are either minor or non-recurring in nature. Recent amendments to the Clean Water Act may well affect the secondary treatment limitations found at 40 CFR 133.102(a) and (b). Should the Agency relax these limitations, it may be necessary to restrict the availability of the national rates to POTWs which are in compliance with the current, more restrictive, secondary treatment limitations, since the rates are only reflective of the removal performance of POTWs meeting the current secondary limitations. Once final secondary treatment limits for trickling filters and waste stabilization ponds are promulgated, the Agency will review the available data to determine if national removal credits for the relaxed effluent limits are possible.

Under paragraph (b)(1)(ii), POTWs which have not yet complied with the secondary treatment limitations but are approaching compliance can provisionally qualify for the national rates if they can show that they will be in compliance within one year. If the Approval Authority elects, it can extend this interim qualification to POTWs which will be in compliance no later than the date the industrial users benefitting from the removal credits are required to comply with their categorical pretreatment standards, as long as the POTW is subject to a compliance schedule which requires compliance by this date. EPA estimates that, under the above provisions, more than 45 percent of all POTWs will be able to qualify for the national removal rates.

EPA attempted to construct national removal rates for POTWs achieving less than secondary treatment, but unfortunately encountered anomalous data which rendered generalization of treatment performance difficult. Consequently, POTWs which do not qualify for the national removal rates must demonstrate consistent removal through reliance on their individual plant performance in accordance with the provisions of paragraph (b)(2). In addition, POTWs which want to give a credit for a pollutant not covered by the national removal rates or want to give a bigger credit than the national rates allow must demonstrate consistent removal under the provisions of paragraph (b)(2). These provisions require generally that the POTW collect twelve influent and effluent samples at approximately equal intervals throughout one full year, analyze these samples for the appropriate pollutants and calculate consistent removal accordingly. These provisions resemble their counterparts in the 1981 amendments. Nevertheless, they do contain a number of features which should make demonstration of actual consistent removal easier and more flexible. First, the proposal explicitly provides that upon concurrence of the Approval Authority, the POTW may use historical data as either a substitute for or a supplement to the twelve samples collected or use a different sample collection scheme than the one prescribed. The only express condition with respect to the use of historical data or alternative sampling design is that the data be representative of the POTW's performance and operating conditions. Second, rather than prescribe rigorously the manner in which the samples are to be collected, as was done in the 1981 amendments, the proposal describes these sampling procedures in the Appendix as guidance. Third, the proposal contains a slightly different means for calculating consistent removal. Instead of taking the average of the lowest fifty percent of measured removals as was done in the 1981 amendments, the proposal calculates consistent removal as the difference between the average influent and effluent concentrations in all the sample data. This method, which does not exclude sample observations, is believed to provide a more reliable estimate of the actual removal achieved than the method employed in the 1981 amendments.

It is, of course, important to the accuracy of the consistent removal calculation that all sample data be used if possible. Problems arise, however, where the pollutant is not measurable in influent and effluent samples. Where the pollutant is not measurable in any influent samples (even though known to be discharged by industrial users into the sewer system), paragraph (b)(2)(iv)(B) of the proposal provides, like the 1981 amendments version, that the sample data not be used. In such event, the POTW may calculate removal using either historical data or data from treatability studies from similar POTWs, upon concurrence of the Approval Authority. If the pollutant is measurable in at least some influent or effluent samples, but not in all, paragraph (b)(2)(iv)(C) provides that the sample data may be used at the discretion of the POTW upon approval by the Approval Authority. In such event, influent and effluent observations below the level of detectability should be set equal to the level of detectability.

Ordinarily, removal credits will be sought for pollutants which are being discharged currently in measurable concentrations into the POTW. Occasionally, however, a new or modified facility will want a removal credit for a pollutant which is not being discharged at measurable concentrations into the POTW from any

facility. If the POTW qualifies for the applicable national removal rates, this poses no problem because the POTW can simply utilize the national rate in calculating the removal credit. If the POTW does not qualify for or wish to use the national rates, however, a problem arises because the POTW is obviously incapable of demonstrating actual removal prior to the discharge of the pollutant into the POTW treatment system. Accordingly, the proposal provides at paragraph (b)(3) that consistent removal may be provisionally demonstrated using data from treatability studies, provided that consistent removal is demonstrated in the conventional manner within eighteen months of the commencement of the discharge.

Compensation for Overflow

To ensure that the POTW's calculation of consistent removal accurately reflected the actual removal achieved, the 1981 amendments provided that the POTW must either take steps to contain overflow or adjust its consisent removal rate to account for overflow. Today's proposal dispenses with these overflow compensation requirements because, in the Agency's view, the overflow adjustment makes a negligible difference in the final removal credit.

In 1978, the Agency surveyed 15 POTWs to determine the impact of combined sewer overflow. The study analyzed runoff characteristics in the drain basins for 10 of the 15 POTWs to determine the magnitude of a rainfall event that would trigger a sewer overflow. Relying on frequency modeling of the rainfall characteristics of the 10 sites, the report found that combined sewers will overflow an average 7.3% of the time.

One can estimate the maximum impact which this overflow will have on the removal credit by making the very conservative assumption that there is no treatment of pollutants by the POTW during this 7.3% period and adjusting the removal credit downward to account for this lack of treatment. After this adjustment is performed, it becomes apparent that combined sewer overflow does not measurably affect the final removal credit.

For example, assume that the POTW's actual removal rate for the toxic pollutant lead were 50%, or approximately what is specified in the national removal rate. To adjust this 50% removal rate to account for the 7.3% period during which no removal is taking place, this 50% should be multiplied by .927 (since the 50% removal is only occurring 92.7 percent of the time). Performing this calculation, the adjusted rate equals 46.35%. The best comparison of the effect this difference in removal will have on the ultimate revised discharge limit is provided by calculating the revised discharge limit with both the adjusted and unadjusted rates using the equation found at § 403.7(a)(4):

$$y = \frac{x}{1-r}$$

(where y equals the revised discharge limit, x equals the pollutant discharge limit under the applicable categorical pretreatment standard, and r equals the removal rate). If the categorical pretreatment limitation on lead were 1.0 mg/1. the revised discharge limit using the removal rate unadjusted for combined sewer overflow would be 2.0 mg/1. Using the adjusted rate, the revised discharge limit would be 1.86 mg/1. The Agency believes the environmental consequences of such differences are insignificant and do not warrant performing the overflow compensation calculation, especially given the fact that the conservative assumptions employed in calculating the difference tend to considerably overstate what the actual difference would be. In actuality, one would expect at a minimum, that some treatment would occur during an overflow event, and that actual overall removal would thus be greater than assumed in the above calculations.

Section 403.7(a)(3)(iii) and (c) Local Pretreatment Program Requirement and Exception Thereto

Paragraphs (a)(3)(iii) and (c) of the proposal are for the most part similar to their counterparts in the 1981 general pretreatment amendments. Paragraph (a)(3)(iii) provides that a POTW must develop a local pretreatment program as a prerequisite to obtaining removal credit authorization unless development of such a program is not required by Part 403. Paragraph (c) creates an exception to this requirement, which allows POTWs to award removal credits pending approval or development of a pretreatment program if two conditions are met. First, all industrial users who wish to conditionally receive a removal credit must supply the POTW with the information required in § 403.12(b)(1)–(7) (except for new or modified industrial users not currently discharging pollutants, who must only submit the information required in § 403.12(b)(1)–(6)). The agency is requiring submission of this information because it will be of great value in helping a POTW decide whether to award removal credits and, under § 403.12(b), would eventually have to be submitted by the industrial users anyway. Second, the POTW must submit an application for pretreatment program approval meeting the requirements of §§ 403.8 and 403.9 in a timely manner, not to exceed the time limitation set forth in the POTW's NPDES permit or July 1, 1983, where no permit deadline exists.

Section 403.7(a)(3)(iv) Compliance With Sludge Requirements

The revised removal credits section, like the 1981 amendments, provides that the POTW must be in compliance with local, State and federal sludge requirements which apply to the sludge management method employed by the POTW. The POTW must remain in compliance after granting removal credits. The following table summarizes the EPA regulations which potentially apply, at present, to sludge disposal.

MAJOR FEDERAL REGULATIONS RELATING TO SEWAGE SLUDGE DISPOSAL

Sludge disposal	Regulation	Date of promulgation authority
1. Landspreading:		
a. Food-chain application.	40 CFR Part 257.	9/78 RCRA/ CWA.
b. Non-food chain application.	40 CFR Part 257.	9/78 RCRA/ CWA.
2. Land disposal:		
a. Solid wastes (nonhazardous).	40 CFR Part 257	9/78 RCRA/ CWA.
b. Hazardous wastes	40 CFR Parts 260 et seq.	5/80 RCRA.
c. PCB's disposal	40 CFR Part 761.	5/79 TSCA.
3. Incineration:		
a. New stationary sources of air emissions.	40 CFR Part 60	10/75 CAA.
b. Hazardous pollutants.	40 CFR Part 61	10/75 CAA.
c. Hazardous wastes	40 CFR Parts 260 et seq.	5/80, 1/81 RCRA.
d. PCB's disposal	40 CFR Part 761.	5/79 TSCA.
4. Ocean dumping	40 CFR Part 220 et seq.	1/77 MPRSA.

Key:
RCRA = Resource Conservation and Recovery Act.
CWA = Clean Water Act.
TSCA = Toxic Substances Control Act.
CAA = Clean Air Act.
MPRSA = Marine Protection, Research, and Sanctuaries Act.

Only rarely will sewage sludge be considered a hazardous waste subject to the requirements of 40 CFR Part 260, et seq. or exhibit a sufficiently high concentration of PCB's to become subject to the requirements of 40 CFR Part 761. EPA anticipates, therefore, that POTWs applying for removal credits will usually only be subject to the landspreading and land application requirements of 40 CFR Part 257 or, if they incinerate their sludge, with the requirements of 40 CFR Parts 60 and 61 or if they dump their sludge in the ocean, with the requirements of 40 CFR Part 220

et seq. (in addition to state and local requirements).

The section contains a new provision designed to accommodate POTWs which are not presently in compliance with sludge requirements applicable to their chosen sludge disposal practice but will be in compliance when the industrial user(s) seeking a removal credit installs the technology needed to comply with their categorical pretreatment standard(s). This provision is intended to benefit industrial users who, unable to get a removal credit now, could get a removal credit after they installed the technology necessary to meet the full pretreatment standard—i.e. possibly too late to be of benefit to them. A POTW which can demonstrate that it will be in compliance with its sludge requirements when the industrial user(s) meets the applicable pretreatment standard (as modified by the removal credit) will be deemed to have satisfied the sludge requirements provision.

Section 403.7(a)(3)(v) Compliance with Toxic Pollutant Limitations

As an additional prerequisite to removal credit authorization, the proposal requires the POTW to be in compliance with any NPDES limitations on toxic pollutants covered by the proposed removal credit and remain in compliance after giving removal credits. This requirement, it should be stressed, applies only to toxic pollutant limitations which are actually contained in the POTW's permit and only to those toxic pollutants which are covered by the removal credits. Violation of a permit limitation for cadmium does not, for instance, disqualify the POTW from granting removal credits for lead.

The requirement can be satisfied in a manner analogous to that provided in § 403.7(a)(3)(iv), if the POTW can demonstrate that it will be in compliance with its toxic pollutant limitations when industrial users are required to comply with their categorical pretreatment standards as modified by the removal credit. An example will illustrate how this demonstration of "future" compliance with the NPDES toxic limitations can be made. Assume that a POTW has an influent concentration of cadmium of 24 μg/1 and an effluent concentration of 12 μg/1 and is therefore presently out of compliance with the 10 μg/1 limitation for cadmium in its permit. Assume further that 75% of the influent concentration of cadmium (18 μg/1) is coming from industrial dischargers presently subject to a categorical pretreatment standard which requires 90 percent removal of the cadmium. In this hypothesized situation, the industrial dischargers would be entitled to a fifty percent credit (since the POTW is actually removing 50 percent of the cadmium in its influent) were it not for the fact the POTW is out of compliance with the cadmium limit in its permit. However, the POTW can show that once the industrial dischargers comply with the categorical pretreatment standard (as modified by the 50 percent removal credit) the industrial dischargers will be removing 40 percent of their contribution of cadmium to the POTW or approximately 7 μg/1 of the influent. This 7 μg/1 reduction in the influent concentration will cause the influent concentration of cadmium to drop to 17 μg/1 and the effluent concentration to 8.5 μg/1. Consequently, the POTW can show that once the industrial dischargers comply with the pretreatment standard as modified by the removal credit, it will be in compliance with its NPDES permit limitation for cadmium.

Section 403.7(a)(3)(i) and 403.7(d) Application for Removal Credit Authorization

The proposal substantially simplifies the requirements governing application for removal credit authorization. POTWs which qualify for national removal rates automatically receive authorization to grant credits upon submission to the Approval Authority of a written certification that they are now in compliance with the secondary treatment limitations, applicable sludge requirements and applicable NPDES limits for toxic pollutants and have developed a local pretreatment program or qualify for the exception to this requirement. They must also certify that the granting of removal credits will not interfere with their chosen method of sludge management or their ability to meet any toxic pollutant limits in their permit. The Agency believes that such POTWs need not be subjected to the full scale approval process because, unlike POTWs which base consistent removal on actual removal achieved or seek interim qualification for the national removal rates, there is little which needs to be reviewed.

POTWs which demonstrate consistent removal through reliance on actual removal or seek interim qualification for the national removal rates must still submit an application and receive approval from the Approval Authority. The provisions governing such applications, however, are considerably more streamlined than their counterparts in the 1981 amendments. Basically all that has to be submitted is a list of the pollutants for which removal credits are sought; data demonstrating actual consistent removal or, alternatively, data demonstrating interim qualification for the national removal rates; the proposed new limits; a certification that the POTW has an approved local pretreatment program or qualifies for the exception to this requirement; a description of the POTW's current method of managing its sludge; and a certification that the POTW is in compliance with applicable sludge requirements and toxic pollutant limits and will not fall out of compliance as a result of granting removal credits. In contrast with the 1981 amendments, which restricted the submission of applications to certain times, the revised section provides that POTWs can submit applications at any time. The Approval Authority is required to review the OPTW's application in accordance with the procedures in § 403.11, which provide it with 90 days from public notice of the application to complete review unless a public hearing is held or the public comment period extended, in which case the Approval Authority may have up to another 90 days.

Section 403.7(e) Continuation and Withdrawal of Authorization

The proposal contains a new provision which states that once a POTW has received authorization to give removal credits for a pollutant regulated in a categorical pretreatment standard, the POTW may automatically extend that removal credit to the same pollutant when regulated in other categorical standards unless granting the removal credit will cause the POTW to violate its sludge requirements or applicable toxic pollutant limitations. This provision makes explicit what was never expressly stated in the January 1981 amendments— namely, that once removal credit authorization is received for a particular pollutant, the POTW may, without re-application, give the same credit for that pollutant when regulated in other categorical standards. The POTW may, of course, elect not to extend the removal credit for a particular pollutant to other categorical standards, but if it so chooses, it must notify EPA.

In other respects, this section is basically the same as its counterpart in the 1981 amendments. As a condition of continued authorization to give removal credits, the POTW must continue to comply with all the requirements of paragraph (a)(3). Compliance with these requirements may be examined by the Approval Authority at any time but, at the very least, upon reissuance of the

NPDES permit. The penalty for failure to comply with the paragraph (a)(3) requirements is withdrawal or modification of the removal credits. Before this can happen, however, the POTW must be notified of the reasons for the withdrawal or modification and given an opportunity to bring itself into compliance.

An exception exists for POTWs which fail to comply with consistent removal requirements of paragraph (b), either by falling out of compliance with the secondary treatment limimtations, failing to achieve compliance with these limitations by the requisite time, or failing to maintain actual consistent removal. Because these consistent removal requirements are considered to be the most essential to the integrity of the removal credits scheme, the section spells out in somewhat greater detail what happens in the event of non-compliance. Basically, the section provides that, in the event of such non-compliance, the POTW must notify the Approval Authority, must return to compliance within six months, and must satisfy the Approval Authority that the problem is not likely to recur. If, at the end of this six month period, the POTW has not returned to compliance or satisfied the Approval Authority that the problem is non-recurring in nature, the Approval Authority must revoke to modify the removal credits. The Approval Authority can, however, extend the time for compliance for up to one year if the POTW demonstrates good faith efforts to return to compliance.

Because POTWs who utilize the national removal rates are already monitoring for compliance with the secondary treatment limitations, the section requires monitoring only of those POTW's who demonstrate consistent removal by reliance on their individual performance under paragraph(b)(2). These POTW's must continue to monitor and report on their removal capabilities no less than once per year.

For POTWs demonstrating consistent removal through reliance upon actual removal, the section further requires that the documented removal be made an enforceable condition of the POTWs NPDES permit.

Miscellaneous

A number of sections of the general pretreatment regulations reference the removal credits section. These references have either been eliminated or changed to conform to the new removal credits section.

V. Economic Benefits of Removal Credits

EPA believes that the revised removal credits scheme will simplify the granting of removal credits. This in turn will benefit industrial users subject to categorical standards. Some measure of the extent to which industrial users can benefit from removal credits can be gained by looking at electroplaters.

Survey data collected from the electroplating industry in 1978 reveals that 19.7% of the captive facilities which would have to install additional treatment to meet the electroplating standards can meet those standards without installing additional treatment if removal credits based on the national removal rates are granted. An additional percentage of captive facilities, which have not yet installed any treatment technology, may be able to install in-plant controls or less expensive treatment systems.

A similar picture is presented for job shops. EPA estimates that 12% of these facilities could meet the electroplating standards without installing any additional treatment if removal credits based on the national removal rates were granted. Other facilities may be able to meet the standards with alternative, less expensive technologies.

The cost savings to the electroplating industry resulting from removal credits based on the national removal rates could be substantial. Based on EPA's 1979 cost projections for the industry, the captive facilities which could avoid any treatment as a result of removal credits could save approximately $223,000,000 in capital costs and $84,000,000 in annual costs. The job shops which could avoid installing additional treatment as a result of removal credits could in turn, save an estimated $22,500,000 in capital costs and $7,500,000 in annual costs. These figures do not, of course, account for facilities which will be able to install less expensive treatment systems because of removal credits.

Regulatory Impact Analysis/Regulatory Flexibility Analysis

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposed regulation is not major because it simplifies existing requirements and will have the ultimate effect of reducing pollution control costs.

This notice was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

Under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, EPA must prepare a Regulatory Flexibility Analysis for all regulations that have a significant impact on a substantial number of small entities. EPA has determined, for the reasons specified above, that this proposal does not have a significant adverse impact on small entities.

Paperwork Reduction

In accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* (the Act), the reporting of recordkeeping provisions that are included in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under section 3504(h) of the Act. Any final rule will include an explanation of how the reporting or recordkeeping provisions contained therein respond to any comments by OMB and the public.

Administrator.

PART 403—GENERAL PRETREATMENT REGULATIONS FOR EXISTING AND NEW SOURCES OF POLLUTION

For the reasons set out in the preamble, EPA proposes to amend 40 CFR Part 403 as follows:

1. The authority citation for 40 CFR Part 403 is as follows:

Authority: Sec. 54(c)(2) of the Clean Water Act of 1977 (Pub. L. 95–217), sections 204(b)(1)(C), 208(b)(2)(C)(iii), 301(b)(1)(A)–(ii), 301(b)(2)(A)(ii), 301(b)(2)(C), 301(h)(5), 301(i)(2), 304(e), 304(g), 307, 308, 309, 402(b), 405, and 501(a) of the Federal Water Pollution Control Act (Pub. L. 92–500), as amended by the Clean Water Act of 1977.

2. 40 CFR 403.7 is revised to read as follows:

§ 403.7 Removal credits.

(a) *Introduction.*—(1) *Definitions.* For the purpose of this section:

(i) "Removal" means a reduction in the amount of a pollutant in the POTW's effluent or alteration of the nature of a pollutant during treatment at the POTW. The reduction or alteration can be obtained by physical, chemical or biological means and may be the result of specifically designed POTW capabilities or may be incidental to the operation of the treatment system. Removal as used in this subpart shall

not mean dilution of a pollutant in the POTW.

(ii) "Sludge Requirements" shall mean the following statutory provisions and regulations or permits issued thereunder [or more stringent State or local regulations]: section 405 of the Clean Water Act; the Solid Waste Disposal Act [SWDA] (including Title II, more commonly referred to as the Resource Conservation Recovery Act (RCRA) and State regulations contained in any State sludge management plan prepared pursuant to Subtitle D of SWDA); the Clean Air Act; and the Toxic Substances Control Act. (iii) "Toxic Pollutant" shall mean any of the designated pollutants on the list developed pursuant to section 307(a) of the Act and found at 40 CFR 401.15.

(2) *General.* Any POTW receiving wastes from an Industrial User to which a categorical Pretreatment Standard applies may, at its discretion and subject to the conditions of this section, revise the discharge limits specified in the categorical Pretreatment Standard to reflect removal of Toxic or other regulated pollutants by the POTW. In keeping with this discretion, the POTW may award less of a removal credit than it is capable of awarding under this section. Removal credits may be given for indicator or surrogate pollutants regulated in a categorical Pretreatment Standard if the categorical Pretreatment Standard so specifies.

(3) *Conditions for Authorization to give removal credits.* A POTW is authorized to give removal credits only if the following conditions are met:

(i) *Application or Certification.* The POTW applies for, and receives, authorization from the Approval Authority to give a removal credit in accordance with the requirements and procedures specified in paragraph (d) of this section; *Provided, however,* That a POTW which is in compliance with the secondary treatment limitations identified in paragraph (b)(1) of this section and elects to demonstrate consistent removal through use of the national removal rates available under that paragraph, shall automatically receive authorization upon submission to the Approval Authority of a written certification that it is in compliance with the secondary treatment limitations, sludge requirements, and NPDES permit limitations for toxic pollutants identified in paragraph (a)(3)(iv) and (v) of this section, has developed a local pretreatment program or qualifies for the exception to this requirement, and that the granting of removal credits will not interfere with its chosen method of sludge management or cause it to violate its sludge requirements or toxic pollutant limits.

(ii) *Consistent removal determination.* The POTW demonstrates and continues to achieve consistent removal of the pollutant in accordance with paragraph (b) of this section.

(iii) *POTW local pretreatment program.* The POTW has an approved pretreatment program in accordance with and to the extent required by Part 403; provided, however, a POTW which does not have an approved pretreatment program may, pending approval of or development of such a program, conditionally give credits as provided in paragraph (c) of this section.

(iv) *Sludge requirements.* The POTW is in compliance with the local, state and federal Sludge Requirements which apply to the sludge management method chosen by the POTW and will remain in compliance after giving removal credits to its Industrial Users. Alternatively, the POTW can demonstrate to the Approval Authority that even though it is not presently in compliance with applicable Sludge Requirements, it will be in compliance when the Industrial User(s) to whom the removal credit would apply is required to meet its categorical pretreatment standard as modified by the removal credit. If granting removal credits forces a POTW to incur greater sludge management costs than would be incurred in the absence of granting removal credits, the additional sludge management costs will not be eligible for EPA grant assistance.

(v) *NPDES permit limitations.* The POTW is in compliance with any limitations in its NPDES permit for Toxic Pollutants covered by the proposed removal credits and will remain in compliance after giving removal credits to its Industrial Users. Alternatively, the POTW can demonstrate to the Approval Authority that even though it is not presently in compliance with applicable Toxic Pollutant limitations in its NPDES permit, it will be in compliance when the Industrial User(s) to whom the removal credit would apply is required to meet its categorical pretreatment standard, as modified by the removal credit provision.

(4) *Calculation of revised discharge limits.* Revised discharge limits for a specific pollutant shall be derived by use of the following formula

$$y = \frac{x}{1-r}$$

where:

x = pollutant discharge limit specified in the applicable categorical Pretreatment Standard

r = POTW's Consistent Removal rate for that pollutant as established under paragraph (b) of this section (percentage removal expressed as a proportion, i.e., a number between 0 and 1)

y = revised discharge limit for the specified pollutant (expressed in same units as x).

(b) *Consistent Removal.* A POTW may demonstrate consistent removal by meeting the requirements of paragraph (b)(1), (b)(2) or (b)(3) below.

(1) *National Removal Rates.* (i) A POTW that is in compliance with the secondary treatment limitations for BOD and suspended solids set forth in 40 CFR 133.102 (a) and (b) for the six months preceeding application for removal credits may use the following removal rates, known as national removal rates, to demonstrate consistent removal. "Compliance" for the purposes of this section shall mean that the POTW does not exceed the maximum 30 day average limitations for BOD or suspended solids set forth in 40 CFR 133.102 (a) and (b) by more than 25% in any one month. These rates ("r" in the equation at paragraph (a)(4) of this section) are expressed in terms of the percent reduction of the influent pollutant concentration. As a condition of continuing to use the national removal rates, the POTW must maintain compliance with the secondary treatment limitations.

Toxic pollutant	National removal rate
Chromium	65
Copper	58
Nickel	19
Zinc	65
Cadmium	39
Lead	43
Silver	85
Total regulated metals (Cr+Cu+Ni+Zn)	62
Cyanide	52

(ii) *Interim Qualifications for National Removal Rates.* (A) A POTW not achieving the requirements of 40 CFR 133.102(a) and (b) for BOD and suspended solids may qualify for use of the national removal rates specified above if it can show that it will be in compliance within 1 year after it applies for removal credit authorization. Alternatively, the Approval Authority may, at its discretion, allow such a POTW to qualify for the national removal rates if the POTW is subject to a compliance schedule which requires compliance with the requirements of 40 CFR 133.102(a) and (b) no later than the date the Industrial User(s) to whom the removal credits apply is required to

comply with its categorical Pretreatment Standard(s), as modified by the removal credit.

(2) *Actual Removal.* A POTW which does not qualify for or choose to use the national removal rates may demonstrate consistent removal through reliance upon actual removal. In order to demonstrate actual consistent removal, the POTW shall, for each pollutent with respect to which removal credit authorization is sought, collect influent and effluent data and calculate consistent removal in accordance with the following requirements. The POTW must continue to maintain this consistent removal as a condition of retaining removal credit authorization.

(i) *Number of samples.* At least twelve samples of influent and effluent shall be taken at approximately equal intervals throughout one full year. Upon concurrence of the Approval Authority, a POTW may utilize an historical data base either in lieu of or as a supplement to these twelve samples. In order to be approved, the historical data base must be representative of the yearly and seasonal conditions to which the POTW is subject and be representative of the POTW's performance for at least one year. As an alternative to the above, a POTW, upon concurrence of the Approval Authority, may utilize an alternative sampling design, as long as the alternative design provides for samples to be taken at times which are representative of the POTW's normal operating conditions and the different seasonal conditions to which the POTW is subject.

(ii) *Method of Sampling.* The POTW must use the composite sampling method unless the grab sampling method is more appropriate. A description of these methods and suggestions on when each method should be used are included in Appendix A as guidance.

(iii) *Method of Analysis for Pollutants.* The POTW shall analyze the samples for pollutants in accordance with the analytical techniques prescribed in 40 CFR Part 136. If 40 CFR Part 136 does not contain analytical techniques for the pollutant in question, or if the Approval Authority determines that Part 136 analytical techniques are inappropriate, the analysis shall be performed using validated analytical methods or any other applicable analytical procedures approved by the Approval Authority, including procedures suggested by the POTW.

(iv) *Calculation of Consistent Removal.* The consistent removal for a specific pollutant ("r" in the equation at paragraph (a)(4) of this section) shall be the difference between the average concentrations of the pollutant in the influent of the POTW, denoted by I, and the average concentrations of the pollutant in the effluent of the POTW, denoted by E, divided by the average concentrations of the pollutant in the influent, denoted by I, as follows:

$$r = \frac{I-E}{I}$$

The average concentrations of the pollutant in the influent and effluent shall be calculated by taking the arithmetic average of all influent and effluent data, respectively. In calculating consistent removal, all sample data must be used, unless the pollutant is only measurable in some of the influent and effluent samples. If the pollutant is only measurable in some of the influent and effluent samples, the following exceptions apply:

(A) *Definitions.* For purposes of these paragraphs, "measurable" refers to the ability of the analytical method to quantify as well as identify the presence of the pollutant in question. "Limit of detectability" refers to the lowest limit at which the analytical method can quantify the pollutant in question.

(B) *Pollutant not measurable in any influent samples.* If a pollutant is not measurable in any of the influent samples, the sample data may not be used to calculate consistent removal for that pollutant. In such event, the POTW may utilize historical data as provided in paragraph (b)(2)(i) of this section to calculate consistent removal. Alternatively, upon the concurrence of the Approval Authority, the POTW may utilize data from treatability studies or demonstrated removal at other treatment facilities where the quality and quantity of the influent are similar.

(C) *Pollutant measurable in some, but not all, influent and effluent samples.* If a pollutant is measurable in some, but not all, influent and effluent samples (including the situation where it is not measurable in any effluent samples) the sample data may be used at the discretion of the POTW and upon approval by the Approval Authority in calculating consistent removal. If such data is used to calculate consistent removal, influent and effluent observations below the limit of detectability should be assigned a value equal to the limit of detectability.

(3) *Pollutants Not Currently Being Discharged.* For pollutants which are not being discharged currently (new or modified facilities, or production changes) the POTW may apply for authorization to give removal credits prior to the initial discharge of the pollutant. Consistent removal shall be based provisionally on data from treatability studies, demonstrated removal at other treatment facilities where the quality and quantity of influent are similar, or on the national removal rates if the requirements of (b)(1) of this section are met. Within 18 months after the commencement of discharge of the pollutants in question, consistent removal must be demonstrated pursuant to the requirements of this section, unless consistent removal has been based on the national removal rates.

(c) *Exception to POTW Pretreatment Program Requirement.* A POTW required to develop a local pretreatment program by § 403.8 may conditionally give removal credits pending approval of or development of such a program in accordance with the following terms and conditions:

(1) All Industrial Users who are currently subject to a categorical Pretreatment Standard and who wish conditionally to receive a removal credit must submit to the POTW the information required in § 403.12(b)(1)–(7), pertaining to the categorical Pretreatment Standard as modified by the removal credit. The Industrial User shall indicate what additional technology, if any, will be needed to comply with the categorical Pretreatment Standard as modified by the removal credit;

(2) The POTW must submit to the Approval Authority an application for pretreatment program approval meeting the requirements of §§ 403.8 and 403.9 in a timely manner, not to exceed the time limitation set forth in a compliance schedule for development of a pretreatment program included in the POTW's NPDES permit or July 1, 1983, where no permit deadline exists.

(d) POTW application for authorization to give removal credits and Approval Authority Review.—(1) *Who must apply.* Any POTW that wants to give a removal credit must apply for authorization from the Approval Authority except those POTWs which qualify for national removal rates and are permitted to submit a certification under paragraph (a)(3)(i) of this section.

(2) *To whom application made.* An application for authorization to give removal credits (or modify existing ones) shall be submitted by the POTW to the Approval Authority.

(3) *When to apply.* A POTW may apply for authorization to give or modify removal credits at any time.

(4) *Contents of the Application.* An application for authorization to give removal credits must be supported by the following information:

(i) *List of pollutants.* A list of pollutants for which removal credits are proposed.

(ii) *Consistent Removal Data.* If paragraph (b)(2) of this section is the basis for demonstration of Consistent Removal, the data required by that section. If paragraph (b)(1)(ii) or (b)(3) of this section is the basis for demonstration of Consistent Removal, data demonstrating that the conditions for use of those sections are met.

(iii) *Calculation of revised discharge limits.* Proposed revised discharge limits for each affected subcategory of Industrial Users calculated in accordance with paragraph of (a)(4) of this section.

(iv) *Local Pretreatment Program Certification.* A certification that the POTW has an approved local pretreatment program or qualifies for the exception to this requirement found at paragraph (c) of this section.

(v) *Sludge Management Certification.* A specific description of the POTW's current methods of using or disposing of its sludge and a certification that the POTW is in compliance with the sludge requirements identified in paragraph (a)(3)(iv) of this section and that granting removal credits will not interfere with the POTW's chosen sludge disposal option or cause the POTW to fall out of compliance with the sludge requirements.

(iv) *NPDES Permit Limit Certification.* A certification that the POTW is in compliance with the NPDES permit limits for toxic pollutants identified in paragraph (a)(3)(v) of this section and that granting removal credits will not cause the POTW to fall out of compliance with these limits.

(5) *Approval Authority Review.* The Approval Authority shall review the POTW's application for authorization to give or modify removal credits in accordance with the procedures of § 403.11 and shall, in no event (as specified in § 403.11) have more than 180 days from public notice of an application to complete review.

(6) *EPA review of state removal credit approvals.* Where the NPDES state has an approved pretreatment program, the Regional Administrator may agree in the Memorandum of Agreement under 40 CFR 123.6 to waive the right to review and object to submissions for authority to grant removal credits. Such an agreement shall not restrict the Regional Administrator's right to comment upon or object to permits issued to POTW's except to the extent 40 CFR 123.(6)(e) allows such restriction.

(7) Nothing in these regulations precludes an Industrial User or other interested party from assisting the POTW in preparing and presenting the information necessary to apply for authorization to give removal credits.

(e) *Continuation and withdrawal of authorization*—(1) *Effect of authorization.* Once a POTW has received authorization to grant removal credits for a particular pollutant regulated in a categorical Pretreatment Standard it may automatically extend that removal credit to the same pollutant when it is regulated in other categorical standards, unless granting the removal credit will cause the POTW to violate the sludge requirements identified in (a)(3)(iv) of this section or the NPDES permit limits for toxic pollutants identified in (a)(3)(v). If a POTW elects to limit the applicability of a removal credit for a particular pollutant to certain categorical Pretreatment Standards, it must notify the Approval Authority and identify the industrial subcategories to which the removal credit applies.

(2) *Inclusion in POTW permit.* Once authority to give removal credits is granted to POTWs who demonstrate consistent removal through reliance upon actual removal as provided in paragraph (b)(2) of this section, the consistent removal documented by the POTW shall be included in POTW's NPDES Permit upon the earliest reissuance or modification (at or following Program approval) and shall become an enforceable requirement of the POTW's NPDES permit.

(3) *Compliance monitoring.* Following authorization to give removal credits, POTW's who demonstrate consistent removal by meeting the requirements of paragraph (b)(2) of this section shall continue to monitor and report on (at such intervals as may be specified by the Approval Authority but in no case less than once per year) the POTW's removal capabilities.

(4) *Modification or withdrawal of removal credits.* In order for revised categorical Pretreatment Standards to continue in effect, the POTW must meet the conditions specified in paragraphs (a)–(c) of this section. Compliance with these conditions may be examined by the Approval Authority whenever it elects and must, at the very least, be examined whenever the POTW's NPDES Permit is reissued. Except in the case of non-compliance with the conditions of paragraph (b) of this section (which is discussed below), if the Approval Authority determines, on the basis of compliance monitoring reports or other information available to it that the conditions specified in paragraphs (a)–(c) of this section are not being met, it must notify the POTW. If appropriate corrective action is not taken within a reasonable time, the Approval Authority shall either withdraw the removal credits or require modifications of those credits; provided however, such withdrawal or modification may only take place after the Approval Authority has provided the POTW and all Industrial Users to whom removal credits have been granted, the reasons for such withdrawal or modification.

If the POTW falls out of compliance with the conditions of paragraph (b) (by failing to comply with the secondary treatment limitations under (b)(l)(i), failing to achieve the deadline for compliance with the secondary treatment limitations under (b)(l)(ii), or failing to maintain actual consistent removal under (b)(2)) the POTW must immediately notify the Approval Authority, return to compliance within six months, and satisfy the Approval Authority that the problem is non-recurring in nature. If, at the end of the six months, the POTW is still not in compliance or has not satisfied the Approval Authority that the problem is non-recurring in nature, the Approval Authority must either withdraw the credits or require modifications of those credits, as appropriate; provided however, upon a demonstration of good faith efforts by the POTW to return to compliance, the Approval Authority may extend the deadline of compliance to one year. The Approval Authority may impose conditions on the POTW to ensure the return to compliance.

In the event removal credits are either withdrawn or modified, all affected Industrial Users must be notified by the POTW. These Industrial Users shall be subject to the modified removal credits or the discharge limits prescribed in the applicable categorical Pretreatment Standards, as appropriate, and shall achieve compliance with such limits within 18 months from the date of withdrawal or modification.

(f) *Removal credits in State-run pretreatment programs under § 403.10(e).* Where an NPDES State with an approved pretreatment program elects to implement a local pretreatment program in lieu of requiring the POTW to develop such a program (as provided in § 403.10(e)), the POTW will not be required to develop a pretreatment program as a precondition to obtaining authorization to give removal credits. The POTW will, however, be required to comply with the other conditions of paragraph (a)(3) of this section.

Appendix A—Sampling Procedures

I. Composite Method

A. It is recommended that influent and effluent operational data be obtained through 24-hour flow-proportional composite samples. Sampling may be done manually or automatically, and discretely or continuously. If discrete sampling is employed, at least 12 aliquots should be composited. Discrete sampling may be flow-proportioned either by varying the time interval between each aliquot or the volume of each aliquot. All composites should be flow-proportional to either the stream flow at the time of collection of the influent aliquot or to the total influent flow since the previous influent aliquot. Volatile pollutant aliquots must be combined in the laboratory immediately before analysis.

B. Effluent sample collection need not be delayed to compensate for hydraulic detention unless the POTW elects to include detention time compensation or unless the Approval Authority requires detention time compensation. The Approval Authority may require that each effluent sample be taken approximately one detention time later than the corresponding influent sample when failure to do so would result in an unrepresentative portrayal of actual POTW operation. The detention period should be based on a 24-hour average daily flow value. The average daily flow should in turn be based on the average of the daily flows during the same month of the previous year.

II. Grab Method

If composite sampling is not an appropriate technique, grab samples should be taken to obtain influent and effluent operational data. A grab sample is an individual sample collected over a period of time not exceeding 15 minutes. The collection of influent grab samples should preceed the collection of effluent samples by approximately one detention period except that where the detention period is greater than 24 hours such staggering of the sample collection may not be necessary or appropriate. The detention period should be based on a 24-hour average daily flow value. The average daily flow should in turn be based upon the average of the daily flows during the same month of the previous year. Grab sampling should be employed where the pollutants being evaluated are those, such as cyanide and phenol, which may not be held for an extended period because of biological, chemical or physical interaction which take place after sample collection and affect the results.

3. 40 CFR 403.6(a)(2)(ii) is revised to read as follows:

§ 403.6 National Pretreatment Standards: Categorical Standards.

* * * * *

(2) * * *

(i) * * *

(ii) Citing evidence and reasons why a particular subcategory is applicable and why others are not applicable. Each such statement shall contain an oath stating that the facts contained therein are true on the basis of the applicant's personal knowledge or to the best of his information and belief.

4. 40 CFR 403.8(a) is revised to read as follows:

§ 403.8 POTW pretreatment programs: development by POTW.

(a) POTW's required to develop a pretreatment program. Any POTW (or combination of POTW's operated by the same authority) with a total design flow greater than 5 million gallons per day (mgd) and receiving from Industrial Users pollutants which Pass Through or Interfere with the operation of the POTW or are otherwise subject to Pretreatment Standards will be required to establish a POTW Pretreatment Program unless the NPDES State exercises its option to assume local responsibilities as provided for in § 403.10(e). The Regional Administrator or Director may require that a POTW with a design flow of 5 mgd or less develop a POTW Pretreatment Program if he or she finds that the nature or volume of the industrial influent, treatment process upsets, violations of POTW effluent limitations, contamination of municipal sludge, or other circumstances warrant in order to prevent Interference with the POTW or Pass Through.

* * * * *

5. 40 CFR 403.11 is revised to read as follows:

§ 403.11 Approval Procedures for POTW Pretreatment Programs and POTW Granting of Removal Credits.

The following procedures shall be adopted in approving or denying requests for approval of POTW Pretreatment Programs and applications for revomal credit authorization:

(a) *Deadlihe for review of submission.* The Approval Authority shall have 90 days from the date of public notice of any Submission complying with the requirements of § 403.9(b) and, where removal credit authorization is sought, with §§ 403.7(d) and 403.9(d), to review the Submission. The Approval Authority shall review the Submission to determine compliance with the requirements of § 403.8 (b) and (f), and, where removal credit authorization is sought, with § 403.7. The Approval Authority may have up to an additional 90 days to complete the evaluation of the Submission if the public comment period provided for in paragraph (b)(1)(ii) of this section is extended beyond 30 days or if a public hearing is held as provided for in paragraph (b)(2) of this section. In no event, however, shall the time for evaluation of the Submission exceed a total of 180 days from the date of public notice of a Submission meeting the requirements of § 403.9(b) and, in the case of a removal credit application, §§ 403.7(d) and 403.9(d).

(b) *Public notice and opportunity for hearing.* Upon receipt of a Submission the Approval Authority shall commence its review. Within 5 days after making a determination that a Submission meets the requirements of § 403.9(b), and, where removal credit authorization is sought, §§ 403.7(d) and 403.9(d), the Approval Authority shall:

* * * * *

(3) (Removed)

* * * * *

§ 403.12 [Amended]

6. 40 CFR 403.12 is amended by removing paragraphs (i) and (j) and renumbering the remaining paragraphs accordingly.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. AW038VA; A-3-FRL 2204-4]

Approval and Promulgation of Implementation Plans Approval of Revision of the Virginia State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces the Administrator's approval of a revision to the Virginia State Implementation Plan of amendments to the Virginia Air Pollution Control Regulations submitted by the Commonwealth of Virginia. This approval is based upon the Commonwealth's request to amend its regulation concerning open burning. This revision allows open burning of landclearing debris under certain conditions at local landfills.

DATES: This action will be effective on November 29, 1982 unless notice is received by October 28, 1982, that someone wishes to submit adverse or critical comments.

ADDRESSES: Written comments should be addressed to Mr. James E. Sydnor of the EPA, Region III address shown below. Copies of the materials submitted by the Commonwealth may be examined during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Air Programs & Energy Branch, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106. Attn.: Patricia Sheridan (3AW11)

Virginia State Air Pollution Control Board, Room 801, Ninth Street Office Building, Richmond, VA 23219. Attn.: Mr. John M. Daniel, Jr.

Public Information Reference Unit, Library Systems Branch, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460

Office of the Federal Register, 1100 L Street, SW., Room 8401, Washington, D.C. 20408

FOR FURTHER INFORMATION CONTACT: Lillie R. Ellerbe (3AW13) 215/597-8170 at the EPA, Region III address indicated above.

SUPPLEMENTARY INFORMATION: On May 28, 1982, the Commonwealth of Virginia (Commonwealth) submitted to the Environmental Protection Agency (EPA) a revision to its State Implementation Plan (SIP). This revision consists of amendments to Virginia's existing Regulations for the Control and Abatement of Air Pollution, Part IV, Emission Standards for Open Burning (RULE EX-1), Section 4.11.

The Commonwealth has provided proof that, after adequate public notice on July 6, 1981, a public hearing was held on September 8, 1981, in Richmond, Virginia with regard to the revision. Notices were published and hearings were also held in each of Virginia's six other Air Quality Control Regions: Abingdon, Roanoke, Lynchburg, Fredericksburg, Virginia Beach, and Annandale. There was no opposition to the revision at the public hearings.

The amendment to Section 4.11 will add certain conditions under which open burning may be conducted at local landfills, and applies to existing sources except those in Air Quality Control Region 7 of Virginia. Open burning under the new provisions of Section 4.11 will be allowed provided that the source demonstrates compliance with all provisions in Section 4.11 as well as those of Section 4.10 in that the open burning must be attended at all times and all reasonable efforts must be employed to minimize the amount of material that is burned.

Provisions of the amendment will also allow open burning for disposal of refuse on the site of a local sanitary landfill, or another area operated under the authority of the locality, provided that a permit has been obtained from the Executive Director of the Virginia State Air Pollution Control Board.

No materials may be burned in violation of the State's Department of Health rules and regulations. Compliance with the visible emissions standard of 20% and any other appropriate air pollution standard will be determined by testing in accordance with existing rules and regulations.

EPA has reviewed the information submitted by the Commonwealth and the Administrator is today approving this SIP revision. The public is advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days from today that someone wishes to submit adverse or critical comments, this action will be withdrawn and a subsequent notice will be published before the effective date. The subsequent notice will withdraw the final action and begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

Conclusion: The Administrator's decision to approve the proposed revisions was based on a determination that the amendments meet the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR Part 51, Requirements for Preparation, Adoption and Submittal of State Implementation Plans.

As a result of EPA's decision to approve this revision to the Virginia Implementation Plan, 40 CFR 52.2420 (Identification of Plan) is being revised as shown below.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days of today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(42 U.S.C. 7401-7642)

Date: September 21, 1982.

Anne M. Gorsuch,

Administrator.

Note.—Incorporation by reference of the State Implementation Plan for the Commonwealth of Virginia was approved by the Director of the Federal Register on July 1, 1982.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS.

Part 52 of Title 40, Code of Federal Regulations is amended as follows:

In § 52.2420, paragraph (c)(71) is added to read:

§ 52.2420 Identification of plan.

* * * * *

(c) The plan revisions listed below were submitted on the dates specified.

(71) Amendments to Part IV, Emission Standards for Open Burning (RULE EX-1), Section 4.11 to the Virginia Regulations for the Control and Abatement of Air Pollution, submitted on May 28, 1982 by the Commonwealth of Virginia.

DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last Listing September 27, 1982

Now Available 1980-1981 Microfilm Editions of the Federal Register

The microfilm editions of the **Federal Register** for 1980 and 1981 (volumes 45 and 46) are now available at a cost of $735. These volumes cover 150,566 pages, the annual indexes, and the quarterly indexes of the List of CFR Sections Affected. Volume 45, the 1980 edition, is available on 26 rolls of microfilm at a cost of $390. Volume 46, the 1981 edition, is on 23 rolls and costs $345. The entire microfilm publication (M190), now comprising 410 rolls and spanning the years 1936–1981, is for sale at $6,150. Further information concerning the 1980–81 volumes or any other volumes may be obtained from the Publications Sales Branch (NEPS), National Archives and Records Service, Washington, D.C. 20408.

Institutions or business may place their orders directly with NEPS. The **Federal Register** is filmed on 35 mm. roll film only.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Presidential Documents

Title 3—

The President

Proclamation 4979 of September 27, 1982

Thanksgiving Day, 1982

By the President of the United States of America

A Proclamation

Two hundred years ago, the Congress of the United States issued a Thanksgiving Proclamation stating that it was "the indispensable duty of all nations" to offer both praise and supplication to God. Above all other nations of the world, America has been especially blessed and should give special thanks. We have bountiful harvests, abundant freedoms, and a strong, compassionate people.

I have always believed that this annointed land was set apart in an uncommon way, that a divine plan placed this great continent here between the oceans to be found by people from every corner of the Earth who had a special love of faith and freedom. Our pioneers asked that He would work His will in our daily lives so America would be a land of morality, fairness, and freedom.

Today we have more to be thankful for than our pilgrim mothers and fathers who huddled on the edge of the New World that first Thanksgiving Day could ever dream. We should be grateful not only for our blessings, but for the courage and strength of our ancestors which enable us to enjoy the lives we do today.

Let us reaffirm through prayers and actions our thankfulness for America's bounty and heritage.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim Thursday, November 25, 1982, as a National Day of Thanksgiving and I call upon all of our citizens to set aside that day for appropriate expressions of thanksgiving.

IN WITNESS WHEREOF, I have hereunto set my hand this 27th. day of Sept. in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 47, No. 189
Wednesday, September 29, 1982

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 354

[Docket No. 82-338]

Commuted Traveltime Allowances

AGENCY: Animal and Plant Health Inspection Service, USDA.
ACTION: Final rule.

SUMMARY: This document amends administrative instructions prescribing commuted traveltime. These amendments establish commuted traveltime periods as nearly as may be practicable to cover the time necessarily spent in reporting to an returning from the place at which an employee of Plant Protection and Quarantine performs overtime or holiday duty when such travel is performed solely on account of such overtime or holiday duty. Such establishment depends upon facts within the knowledge of the Animal and Plant Health Inspection Service.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Thomas J. Lanier, Assistant Director, Regulatory Services Staff, Plant Protection and Quarantine, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 643, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8247.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final action has been reviewed under Executive Order 12291, and has been determined to be exempt from those requirements. Nicholas E. Bedessem, Special Assistant to the Administrator, made this determination because commuted traveltime allowances are strictly a function of where the APHIS employee lives in relation to the place overtime or holiday duty is performed. As employees are transferred or change their residence or as the place of inspection changes, the number of hours of commuted traveltime allowed may change. These amendments merely reflect such changes and serve to notify the public of the new allowed hours.

It is to the benefit of the public that these instructions be made effective at the earliest practicable date. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

List of Subjects in 7 CFR Part 354

Agricultural commodities, Exports, Government employees, Imports, Plants (Agriculture), quarantine, Transportation.

PART 354—OVERTIME SERVICES RELATING TO IMPORTS AND EXPORT

Therefore, pursuant to the authority conferred upon the Deputy Administrator, Plant Protection and Quarantine, by 7 CFR 354.1 of the regulations concerning overtime services relating to imports and exports, the administrative instructions appearing at 7 CFR 354.2, as amended, January 5, September 28, December 18, 1979, March 21, July 11, and October 10, 1980; January 7, April 17, June 19, and November 2, 1981; and March 31, 1982, (44 FR 1364, 55791, and 74791; 45 FR 18367, 46785, and 67268; 46 FR 1661, 22354, 32006 and 54323; and 47 FR 13503) prescribing the commuted traveltime that shall be included in each period of overtime or holiday duty are further amended by adding or removing (in appropriate alphabetical sequence) the information as shown below:

§ 354.2 Administrative instructions prescribing commuted traveltime.

(64 Stat. 561 (7 U.S.C. 2260))

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the **Federal Register.**

Done at Washington, D.C., this 24th day of September 1982.

William F. Helms,

Acting Deputy Administrator, Plant Protection and Quarantine, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

Federal Grain Inspection Service

7 CFR Part 800

Exemption From Inspection and Weighing Requirements for Grain Shipped to Canada and Mexico

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The Federal Grain Inspection Service (FGIS or Service) is adopting as final, with clarification, the interim final rule which revised its regulations for official inspection and Class X weighing requirements by providing for the exemption from official inspection and Class X weighing requirements all grain exported from the United States to Canada or Mexico by rail or truck. This final action is intended to promote the trading of grain between the United States and Canada and Mexico, while protecting the interests of producers, merchandisers, warehousemen, processors, and consumers of grain. This action will not affect the right of U.S. sellers or Canadian and Mexican buyers to obtain official inspection or weighing, when desired. The proposal of March 31, 1982 (47 FR 13700), proposing to reinstate the limited 15,000 metric ton exemption from official inspection is withdrawn.

EFFECTIVE DATE: October 29, 1982.

FOR FURTHER INFORMATION CONTACT: Lewis Labakken, Jr., Regulations and Directives Management, USDA, FGIS, Room 1636 South Building, 14th and Independence Avenue, SW., Washington, D.C. 20250, telephone (202) 382-0231.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Secretary's Memorandum 1512-1. The action has been classified as nonmajor, because it does not meet the criteria for a major regulation established in the order.

Regulatory Flexibility Act Certification

Kenneth A. Gilles, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because its effect is to limit the applicability of certain official inspection and weighing requirements to which many small entities would otherwise be subject.

This final rule becomes effective 30 days after publication in the **Federal Register.**

The U.S. Grain Standards Act (7 U.S.C. 71 *et seq.*) (Act) provides for the mandatory official inspection and official weighing of grain shipped in export from the United States. This requirement may be waived under certain circumstances.

Section 800.19(a) of the regulations, published at 45 FR 15816 on March 11, 1980, provided that official inspection and Class X weighing requirements for grain exported from the United States applied to all exporters and individual elevator operators who exported 15,000 metric tons or more of grain during the preceding calendar year or who have exported 15,000 metric tons or more during the current calendar year. The 15,000 metric ton exemption was considered adequate to give economic relief from inspection and weighing requirements to small exporters without impairing the objectives of the Act.

By an interim final rule published at 46 FR 32859, June 25, 1981, § 800.19(a) was revised to include a provision (§ 800.19(a)(4)) that exempted from the official inspection and Class X weighing requirements, all grain shipped by rail or by truck to Canada or Mexico. Its purpose was to reduce a burden on trading of grain between the United States and Canada and Mexico, without affecting the right of U.S. sellers or Canadian or Mexican buyers to obtain official inspection or weighing, if so desired. Comments were requested on the interim final rule.

Based on written comments received and other comments from the trade, it appeared that not all grain exporters, individual elevator operators, foreign buyers, and other interested parties were in agreement as to whether the provisions of the interim final rule exempting all grain shipped by rail or truck to Canada or Mexico from the official inspection requirements of the Act should remain in effect. Some commentors were concerned that if the grain was not officially inspected there could be no appeal or reinspection services, and consideration should be given to providing official inspection requirements for export rail and truck shipments more consistent with the water carrier requirements which require official inspection.

All commentors supported the exemption from Class X weighing requirements for all grain shipped by rail or truck to Canada and Mexico.

In view of the overall comments received from industry representatives, it was proposed on March 31, 1982, that § 800.19(a) be revised to eliminate that exemption so that the requirement for official inspection of export grain would be applicable to all grain exported by those exporters and individual elevator operators who exported 15,000 metric tons or more of grain shipped by rail or truck to Canada or Mexico during the preceding calendar year or who have exported 15,000 metric tons or more during the current calendar year. Comments were requested on the proposed rule published at 47 FR 13700.

Written comments on the proposed rule were received from five organizations representing a cross section of the grain industry including farmers. Four of those five organizations opposed the proposal. They indicated

that the interim exemption is working well and needs no modification. These commentors further stated that reinstatement for inspection of the limited 15,000 metric ton exemption will: (1) Discourage and hinder exports; (2) cause delays and increase red tape; (3) require additional monitoring from FGIS personnel; and (4) increase the expense of exports and increase costs. The fifth organization made no comment on how the exemption is working but stated that "* * * we do not oppose its implementation." This commentor requested that FGIS clarify that official services will be provided by official inspection agencies if requested and that to be eligible for such service and to obtain official certificates the facility's applicable inspection or weighing equipment must meet FGIS specifications.

Therefore, based upon all information available to FGIS, FGIS is withdrawing the changes proposed in a notice published March 31, 1982, 47 FR 13700, and adopting as final, with clarification, the interim final rule published at 46 FR 32859, July 25, 1981, because it has determined that: (1) The interim final rule is reducing a burden on the trading of grain between the United States and Canada and Mexico without affecting the right of U.S. sellers or Canadian and Mexican buyers to obtain official inspection or weighing, if so desired; (2) small exporters are satisfied with the exemption provisions and oppose changes; and (3) no complaints regarding quality or quantity of grain have been received by the Service from any interested party under the exemption provisions of the interim rule.

For clarification purposes, the following is added to § 800.19(a)(4): "If requested, subject to the conditions for obtaining official services in § 800.46, official services will be provided by the official agency or where applicable, the field office assigned to perform official functions where the grain will be offered for official services."

List of Subjects in 7 CFR Part 800

Administrative practice and procedure, Exports, Grain.

PART 800—GENERAL REGULATIONS

Accordingly, subparagraph (4) which was added to paragraph (a) of 7 CFR 800.19 by the interim rule of July 25, 1981, 46 FR 32859, is revised to read and made final, as follows:

§ 800.19 Exemptions and waivers of the official inspection and Class X weighing requirements.

(a) *Exemptions.* * * *

(4) *Grain shipped by rail or truck to Canada or Mexico.* Official inspection and Class X weighing requirements shall not apply to grain that is shipped by rail or by truck from the United States to Canada or to Mexico. If requested, subject to the conditions for obtaining official services in § 800.46, official services will be provided by the official agency or where applicable, the field office assigned to perform official functions, where the grain will be offered for official services.

BILLING CODE 3410-EW-M

Agricultural Marketing Service

7 CFR Part 910

Lemons Grown in California and Arizona; Amendment to Rules and Regulations

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends rules and regulations issued under the marketing order to temporarily change from eight to four the minimum number of successive weeks during which picks are interrupted by District 2 handlers, before they may apply for a new prorate base, for the remainder of the 1982–83 season. Such action recognizes crop conditions and the current and prospective marketing situation for lemons.

EFFECTIVE DATE: September 24, 1982.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This final rule changes from eight to four the minimum number of successive weeks during which picks are interrupted by District 2 handlers, before they may apply for a new prorate base. Under provisions of the marketing order, District 2 handlers who become eligible for a new prorate base may also apply for accelerated averaging of weekly picks and upward adjustments to receive additional allotment. Under the order a handler's weekly prorate is established on the basis of average weekly picks (quantities harvested and delivered to a packinghouse) during a prior period. The 1982–83 crop is estimated at 54.3 million cartons compared with the five year average (1977–78 to 1981–82) of 50.3 million cartons. The committee reports that additional flexibility is needed to successfully market the crop. The amendment would afford handlers the opportunity to receive adjusted allotment to handle lemons from the 1982–83 crop on an accelerated basis. A similar rule was authorized for use during the latter part of the 1981–82 season.

This final rule is authorized by § 910.53(h), which provides that the number of weeks specified in § 910.53(f)(2) may be changed through informal rulemaking.

It is found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date of this final rule until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that the time intervening between the date when information upon which this final rule is based became available and the time when this final rule must become effective in order to effectuate the declared policy of the act is insufficient. This final rule relieves regulations on the handling of lemons. It is necessary to effectuate the declared purposes of the act to make this final rule effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Therefore, § 910.153(e)(2) in 7 CFR Part 910, Subpart—Lemon Administrative Committee Rules and Regulations, is amended by adding the following language at the end of the last sentence in paragraph (e)(2).

§ 910.153 Prorate bases and allotments.

* * * * *

(e) * * *

(2) * * * Notwithstanding the provisions of this section any District 2 handler whose picks are interrupted for 4 successive weeks or more during the fiscal year ending July 31, 1983, may apply for a new prorate base, for accelerated averaging of weekly picks, and for upward adjustments as provided herein.

BILLING CODE 3410-02-M

Farmers Home Administration

7 CFR Part 1924

Planning and Performing Construction and Other Development

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations for planning and performing construction and other development by adopting the Housing and Urban Development (HUD) Minimum Property Standards (MPS) which were in effect on September 1, 1982. The amendment merely clarifies which MPS has been adopted by FmHA. The clarification is needed to retain accepted technical standards for minimum acceptable design, materials, and construction methods used in the development of structures financed by the Agency. The intended effect of the action is to provide adequate security to the Government's interest and to retain standardization of sound construction practices.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Frank Colon, Deputy Director, Single Family Housing Processing Division, Farmers Home Administration, USDA, Room 5347, South Agriculture Building, 14th and Independence Avenue, SW., Washington, DC 20250, telephone (202) 382–1474.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291, and has been determined to be exempt from these requirements. It is the policy of this Department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This action, however, is not published for proposed rulemaking since the purpose of the change involves a clarification of an existing regulation with no substantive or procedural change and publication for comment is unnecessary.

The FmHA programs or projects which are affected by this final rule are subject to state or local clearinghouse review in the manner delineated in Subpart H of Part 1901 of this Chapter.

This change will affect the following domestic assistance programs:

CATALOG OF FEDERAL DOMESTIC ASSISTANCE REFERENCE LIST

CFDA No.	Program title
10.405	Farm Labor Housing Loans and Grants.
10.407	Farm Ownership Loans.
10.410	Low to Moderate Income Housing Loans (Rural Housing Loans—Section 502—Insured).
10.415	Rural Rental Housing Loans.

This document has been reviewed in accordance with 7 CFR, Part 1901, Subpart G, "Environmental Impact Statements." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

List of Subjects in 7 CFR Part 1924

Agriculture, Claims, Construction complaints, Construction defects, Construction management, Construction and repair, Energy conservation, Government contracts, Housing, Loan programs—Agriculture, Loan programs—Housing and community development, Low and moderate income housing, Suspension and debarment procedures.

In October 1971, FmHA officially adopted the HUD–MPS for its single family and rural rental programs. Since then, the standards have been periodically updated by HUD and on August 6, 1982, HUD published in the **Federal Register** a final rule amending the HUD–MPS. The amendment which will be effective on September 24, 1982, removed the bulk of criteria relating to marketability and livability and all other criteria that do not bear directly on health, life safety, legislative requirements, or durability. The amendment comes as a result of HUD's previous considerations and the most recent recommendations of the President's Commission on Housing that HUD, VA and FmHA ". . . should phase out their use of the Single Family and Multifamily Minimum Property Standards . . .". Implementation of this change would have more adverse effects on FmHA than on the other two agencies because FmHA direct loans require first-hand control of the development being financed as opposed to HUD/VA financing by insuring and guaranteeing loans made by other mortgagees. Furthermore, FmHA makes loans to finance 100 percent of the cost of the purchase or development of housing to low- and moderate-income applicants who cannot obtain credit from other sources. The financing is based on the statutory requirement that the recipient will graduate to other sources of credit when the recipient has accrued enough equity on the property and has improved his or her economic condition to the extent that the recipient can meet terms and conditions of available credit in the area. Marketability and livability standards must be considered at the time of purchase or development, to adequately protect both, the applicant and the Government's interest and facilitate compliance with the graduation requirement.

In view of the HUD's amendment and the limited time now available to replace the HUD–MPS with definite rules and regulations which meet the state of the art requirements or construction and other development, FmHA is retaining the HUD–MPS version that was in effect on September 1, 1982, rather than making any change at the present time. FmHA will complete new rules and regulations within 6 months from the date of this publication.

PART 1924—CONSTRUCTION AND REPAIR

Therefore, § 1924.4(l) of Subpart A, Part 1924, Chapter XVIII of Title 7, Code

of Federal Regulations is revised to read as follows:

§ 1924.4 Definitions.

* * * * *

(l) *Minimum property standards.* The Department of Housing and Urban Development (HUD) Minimum Property Standards (MPS) in effect on September 1, 1982, have been adopted by the FmHA for housing financed with RH, RRH, RCH, LH, and FO loans. The MPS, available in all FmHA offices, supplements this Subpart with the technical requirements for minimum acceptable design, materials, and construction methods.

BILLING CODE 3410-07-M

Animal and Plant Health Inspection Service

9 CFR Part 79

[Docket 82-073]

Scrapie in Sheep; Area Released From Quarantine

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to release a portion of Tulsa County in Oklahoma from areas quarantined because of the existence of vectors of scrapie. Surveillance activity indicates that vectors of scrapie no longer exist in the area quarantined.

EFFECTIVE DATE: September 23, 1982.

FOR FURTHER INFORMATION CONTACT: J. R. Pitcher, Chief Staff Veterinarian, Sheep, Goat, Equine, and Ectoparasites Staff, USDA, APHIS, VS, Federal Building, Room 738, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8231.

SUPPLEMENTARY INFORMATION:

Executive Order 12291 and Emergency Action

This final action has been reviewed in conformance with Executive Order 12291, and has been determined to be not a "major rule." The Department has determined that this rule will have an annual effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have any significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. For this rulemaking action, the Office of Management and Budget has waived their review process required by Executive Order 12291 and the Department has waived the requirements of Secretary's Memorandum 1512-1.

Dr. E. C. Sharman, Assistant Deputy Administrator, Animal Health Programs, APHIS, VS, USDA, has determined that the emergency nature of this final rule warrants publication without opportunity for public comment. This amendment relieves certain restrictions no longer deemed necessary to prevent the spread of scrapie, and must be made effective immediately to be of maximum benefit to affected persons.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the Federal Register.

Certification Under the Regulatory Flexibility Act

Dr. Harry C. Mussman, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities because it removes the quarantine imposed due to the existence of vectors of scrapie concerning only one premises, and that premises is not owned by a small entity.

Background

On January 25, 1980, a document was published in the Federal Register (45 FR 6083) which quarantined a portion of Tulsa County in Oklahoma because of the existence of vectors of scrapie. That action was taken because of the presence of the quarantined premises of a sheep which had been exposed to scrapie. The exposed sheep is now dead, and did not exhibit any signs of scrapie. Thus, it could not have transmitted scrapie to any other animal. Therefore, this amendment releases the premises from quarantine, and the restrictions pertaining to the interstate movement of sheep from quarantined areas, as contained in 9 CFR Part 79, as amended, will no longer apply to the released area.

List of Subjects in 9 CFR Part 79

Animal diseases, Quarantine, Sheep, Transportation, Scrapie.

PART 79—SCRAPIE IN SHEEP

Accordingly, Part 79, Title 9, Code of Federal Regulations, is hereby amended in the following respect:

§ 79.2 [Amended]

1. In § 79.2(a)(1), the following premises is removed: Duane Smith, Route 1, Box 332A, Bixby, Tulsa County, Oklahoma, S½ of the SW¼ of the NW¼ of Sec. 32, T. 17 N., R. 14 E.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141)

Done at Washington, D.C., this 23rd day of September 1982.

Norvan L. Meyer,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 82-26942 Filed 9-28-82; 8:45 am]

BILLING CODE 3410-34-M

DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

12 CFR Part 1204

[Docket No. D-0028]

Payment of Finder's Fees to Bona Fide Brokers; Interpretative Ruling

AGENCY: Depository Institutions Deregulation Committee.

ACTION: Interpretive ruling.

SUMMARY: Effective December 31, 1980, the Depository Institutions Deregulation Committee ("Committee") adopted the finders' fee regulation (12 CFR 1204.110) which defined as interest a fee paid by a depository institution to a third party who introduced a depositor to the institution. That regulation was adopted in response to concern with widespread use of finders' fees to circumvent interest rate ceilings by passing finders' fees through to the depositors. The Committee has received questions as to whether the regulation applies to the payment of a fee to a *bona fide* broker for the placement of deposits with a depository institution. At its September 17, 1982 meeting, the Committee determined that fees may be paid to *bona fide* brokers and not be included as interest under conditions that ensure

that no part of the finders' fee is paid to depositors.

EFFECTIVE DATE: September 17, 1982.

FOR FURTHER INFORMATION CONTACT: Elaine Boutilier, Attorney-Advisor, Department of the Treasury (202) 566-8737; Rebecca Laird, Senior Associate General Counsel, Federal Home Loan Bank Board (202) 377-6446; Alan Priest, Attorney, Office of the Comptroller of the Currency (202) 447-1880; F. Douglas Birdzell, Counsel, or Joseph A. DiNuzzo, Attorney, Federal Deposit Insurance Corporation (202) 389-4147; or Paul S. Pilecki, Senior Attorney, Board of Governors of the Federal Reserve System (202) 452-3281.

SUPPLEMENTARY INFORMATION:

List of Subjects in 12 CFR Part 1204

Banks, banking.

PART 1204—INTEREST ON DEPOSITS

Pursuant to its authority under Title II of the Depository Institutions Deregulation and Monetary Control Act of 1980 (94 Stat. 142; 12 U.S.C. 3501 *et seq.*), to prescribe rules governing the payment of interest and dividends on deposits of Federally insured commerical banks, savings and loan associations, and mutual savings banks, the Committee amends, effective September 17, 1982, Part 1204—Interest on Deposits (12 CFR Part 1204) by adding a new § 1204.202 to read as follows:

§ 1204.202 Payment of fees to bona fide brokers.

(a) Under § 1204.110 of the Committee's rules, any fee paid by a depository institution to a person who introduces a depositor to the institution must be paid in cash when paid for a deposit subject to rate ceilings and generally will be regarded as a payment of interest for purposes of compliance with rate ceilings. This rule was adopted effective December 31, 1980, in order to prevent the circumvention of rate ceilings that could occur if a "finders' fee" is passed on to the depositor.

(b) The Committee has received several inquiries as to whether depository institutions are required to pay fees in cash to brokers that solicit deposits on behalf of the institution and to regard such payments as interest. The Committee previously found the finders' fee regulation inapplicable to All-Savers Certificates and to a specific person who acted as a broker of demand deposits. The Committee has determined that finders' fees may be paid to *bona fide* brokers of time and demand deposits without regarding such payments as interest for purposes of deposit interest rate ceilings. Accordingly, a fee to a broker will not be regarded as a payment of interest if: (1) The fee is paid to a *bona fide* broker, which is a person who is principally engaged in the business of acting as a broker or dealer in regard to deposits, securities or money market instruments; (2) the relationship between the broker and depository institution is memorialized in a written agreement, a copy of which is retained by the depository institution and made available to examiners; and (3) an officer of the broker certifies that no portion of the fee paid to the broker is directly or indirectly passed on to the depositor, and a copy of the certification is given to the depository institution to be retained on file with the agreement.

By order of the Committee, September 24, 1982.

Gordon Eastburn,

Policy Director.

BILLING CODE 4810-25-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 4

[Docket No. RM82-2-000]

Case-by-Case Exemption From All or Part of Part 1 of the Federal Power Act for Small Hydroelectric Power Projects With an Installed Capacity of 5 Megawatts or Less

Issued September 27, 1982.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule; correction.

SUMMARY: This document corrects unintentional errors in the amendatory language and one paragraph of the final rule amending the definition of "small hydroelectric power project," published on September 1, 1982 (47 FR 38506, 38512).

FOR FURTHER INFORMATION CONTACT: Fredric D. Chanania, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, (202) 357-8033.

Kenneth F. Plumb,

Secretary.

Accordingly, the Federal Energy Regulatory Commission is correcting the amendatory language and for the convenience of the reader, republishing the introductory text of 18 CFR 4.102(l) appearing in FR Doc. 82-24057 on page 38512, third column, as follows:

A. The amendatory language should read:

2. In § 4.102, paragraph (a), the introductory text in paragraph (l), and paragraph (l)(2) are revised to read as follows:

§ 4.102 [Corrected]

B. The introductory text in § 4.102(l) should read:

* * * * *

(l) "Small hydroelectric power project" means any project in which capacity will be installed or increased after the date of notice of exemption or application under this subpart, which will have a total installed capacity of not more than 5 megawatts, and which:

(1) * * *

C. The text of § 4.102(l)(2) is not republished.

BILLING CODE 6717-01-M

---

18 CFR Parts 101, 104, 125, 201, 204, and 225

[Docket No. RM81-4-000; Order No. 258]

Revisions to the Uniform Systems of Accounts and Regulations Governing the Preservation of Records

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is revising its regulations governing the retention of records by public utilities, licensees and natural gas companies. The Commission is explicitly defining the information to be included in continuing plant inventory records, establishing a procedure for ensuring the integrity of computer output microfilm records, clarifying the description of three categories of retained records, updating the rules relating to microfilm records, and shortening some periods of records retention. These revisions are part of the Commission's effort to reduce reporting burdens.

DATE: The revisions are effective October 29, 1982.

(Issued September 13, 1982; errata issued September 22, 1982.)

I. Introduction

In the matter of revisions to the Uniform Systems of Accounts and the Regulations Governing the Preservation of Records, Docket No. RM81–4–000. Before Commissioners: C. M. Butler III, Chairman; J. David Hughes and A. G. Sousa.

The Federal Energy Regulatory Commission (Commission) is revising its regulations governing the retention of records by electric public utilities and licensees (Parts 101, 104, and 125), and natural gas companies (Parts 201, 204, and 225). These revisions amend the Commission's regulations in light of technological change and Commission experience over the last decade. Specifically, the Commission is explicitly defining the information to be included in continuing plant inventory records, establishing a procedure for ensuring the integrity of computer output microfilm records, clarifying the description of three categories of retained records, updating the Commission's rules relating to microfilm records, and shortening some periods of records retention. These revisions are part of the Commission's ongoing program to review its reporting and recordkeeping requirements and to reduce unnecessary burdens by eliminating or amending recordkeeping requirements that are not necessary to the performance of the Commission's regulatory responsibilities.

II. Background

Both the Federal Power Act (Section 301, 16 U.S.C. 825(a) (1976)) and the Natural Gas Act (Section 8, 15 U.S.C. 717g(a) (1976)) require regulated companies to keep such records as the Commission may prescribe "as necessary or appropriate for purposes of administration" of these acts.[1] One of the Commission's most important functions under these acts is ensuring that rates charged by regulated companies for certain transactions are "just and reasonable." Most of the records the Commission requires to be retained and their retention periods are to provide an adequate base of information to make decisions ensuring that proper rates are charged.

The Commission's regulations which provide the length of time that public utilities, licensees, and natural gas companies must retain certain records and how those records are to be maintained were last amended in 1972. Since then there have been technological advances in the field of records retention and almost a decade of experience. For these reasons, the Commission proposed a rule which would update some of these regulations.[2]

The proposal focused on two major changes to the Commission's record retention regulations. First, it proposed that, for the first time, the regulations include an explicit definition of the items to be kept for continuing plant records. Second, it proposed a procedure for authenticating certain microfilm records.

In addition to these major proposals, a series of minor proposals were made to shorten the length of retention of certain records, update the regulations in light of new technology, provide cross-references, and clarify the existing requirement that unaccepted bids and certain clearance logs are to be retained.

In response to this proposal, the Commission received written comments from eighty-five respondents. These included four trade associations, sixty-four electric utilities, twelve gas companies, and five companies that provide various services to electric and natural gas companies.

In light of the comments, the Commission is modifying its two major proposals and making various modifications to the minor proposals to provide regulations that impose the minimum burden on regulated companies while ensuring that adequate records are kept for Commission purposes. In addition, the final rule reflects other changes. Some have been adopted as a result of suggestions made by commenters. Others are technical and conforming changes that, while not in the proposal, will result in regulations that are more readily understandable.

In issuing this final rule, the Commission has been guided by three factors. These are as follows: the statutory and regulatory purposes of record retention requirements, the impact of the Commission's action on state regulatory agencies, and the burden imposed on industry by records retention regulations. Based on the comments received, the Commission believes that the new regulations will not have an adverse impact on state regulatory functions. Moreover, the burden imposed on regulated companies by these changes in record retention regulations should be minimal. In this final rule the Commission has decreased the burden of the current regulations by shortening the retention periods for certain records. The Commission has also decreased the burden that would have been imposed by the proposed rule by modifying both the procedures for authenticating certain microfilm records and the definition of continuing plant records.

III. Discussion

A. Information Required in Continuing Plant Inventory Records

The Commission requires regulated companies to keep records relating to any property used in the regulated business of the company. Theses records are called continuing plant inventory records (CPIR). The Commission uses CPIR to prove the physical existence and location of property, to identify costs of units to ensure accurate accounting when a unit is retired, and to provide mortality information for use in depreciation studies.

CPIR was never explicitly defined. As a result, various companies requested that the Commission specify the content of CPIR. The Commission therefore proposed a definition of CPIR which included the following information for both retirement units and mass property:

(1) The name of the item and the manufacturer's code number, or, if built by the utility, engineering studies and details of the materials used;

(2) The location of the unit of property and the department responsible for it;

(3) The date an item was acquired or transferred to plant-in-service;

(4) The cost of the item;

(5) Estimates of the item's service life and salvage value;

(6) Details of depreciation accounting for the item, such as monthly and yearly percentage rates and actual dollar deductions, all additions, modifications and retirements, accumulated depreciation amounts, and information as to whether depreciation is calculated on a unit or group basis; and

(7) The asset control account to which plant costs are charged.

Commenters generally argued that complying with many of these requirements would be duplicative, burdensome, impractical, expensive, and of little use to the company or the Commission. Specifically, commenters argued that it was unduly burdensome to keep detailed information on "mass property," that is low cost property used

[1] Section 402(a)(2) of the Department of Energy Organization Act transfers these Federal Power Act and Natural Gas Act responsibilities from the Federal Power Commission to the Federal Energy Regulatory Commission. 42 U.S.C. 7172(a)(2) (Supp. IV 1980).

[2] Notice of Proposed Rulemaking, Proposed Rulemaking to amend Regulations to Govern the Preservation of Records of Public Utilities, Licensees, and Natural Gas Companies, Docket No. RM81–4, issued November 13, 1980, 45 FR 76076 (November 20, 1980). The Commission intends in the near future to further evaluate its record retention requirements by a separate rulemaking.

in large quantities, such as telephone poles, or gas and electric meters.

The Commission's final rule defining CPIR is substantially less burdensome than that which was proposed, particularly as to mass property. Most importantly, the final rule differentiates between mass property and retirement units, and requires less detailed information to be kept for mass property. In addition, the final rule reflects several other changes. First, the Commission has not adopted the proposed requirement that regulated companies retain the manufacturer's code number for purchased property and engineering studies and details of materials used for utility-built property. Instead, the Commission has substituted a requirement that only a description of the property be kept. Second, the Commission has not adopted the proposed requirement that the name of the department responsible for the property be retained. Third, the final rule requires only that the year mass property was placed in service be kept. Fourth, the final rule does not adopt the proposed requirement that estimates of service life, salvage value, and details of depreciation accounting be stated. Fifth, the final rule changes the term "asset control account" to "plant control account." The term "asset" includes "plant" but it also includes other types of assets which are not related to "plant". This change makes the terminology more precise and avoids confusion.

Lastly, the definition of CPIR is placed in the definitional sections of the applicable parts of the Uniform Systems of Accounts. The proposed rule would have placed this definition in the part of the Commission's regulations which lists the records to be retained and their retention periods. By putting the definition of CPIR in the definitional sections of the Uniform Systems of Accounts, the final rule keeps related definitions together and reduces the potential for confusion.

B. Authentication of Computer Output Microfilm

Under current regulations, all microfilm records must include a certification statement at the beginning of the record and a dated notation at the end of the record.[3] Since a microfilm record is a copy of a paper record, the Commission developed these requirements to ensure the integrity of the microfilm copying process.

[3] This statement includes the title of the record series, the date prepared, and the name of the official responsible for validating the data in the microfilm. 18 CFR 125.2(e)(1) and 225.2(e)(1)(1981).

Computer technology has developed a process called Computer Output Microfilm (COM), in which computer data can be printed directly on microfilm instead of on paper. COM is thus an original record, not a copy of an original record. Accordingly, the same authentication requirements for microfilm are not necessary for COM. However, since this is a new technology for creating and retaining records, the Commission proposed a procedure for authenticating COM which included a certification statement.

Commenters stated that any certification or other authentication of COM should not be necessary because no certification is required for original records that are the product of computer output paper. Additionally, commenters were concerned that the proposed standard procedures for COM would be burdensome and expensive to implement, albeit less expensive than current regulations for microfilm.

The final rule does not adopt the proposed certification procedures. Instead, it requires that companies develop and follow their own operating procedures and that these procedures be standardized and operate to ensure the integrity of the COM records. To ensure this result, the final rule adds a requirement that the procedures include the name of the responsible official. This will give companies flexibility while guaranteeing the integrity of records needed by the Commission. The Commission believes that this requirement is justified by the newness of the technology, until more experience in dealing with records developed as COM is gained.

C. Changes Relating to Microfilm Records

The final rule makes four changes in the Commission's regulations relating to microfilm records. First, the Commission has for information purposes only, updated its regulations to refer to the most recent standards of the Amereican National Standard Institute (ANSI) and had provided for the automatic acceptance of any future revisions of the ANSI standards. The Commission proposed updating the regulations for preservation of microfilm to refer to the 1976 ANSI standard. Based on the comments, the final rule expands on the proposal by referring to ANSI's more recent standards (1979 and 1981) and automatically accepts for reference future revisions to ANSI's standards when those standards are accepted by the National Archives.

Second, at the request of one commenter, the Commission has included a category for "updateable microforms." "Updateable microforms" are temporary records reproduced in reduced size which permit replacement of individual frames on the record without replacing the entire record. The new regulations require that these microform records must have a life expectancy at least as long as the retention period for the paper records copied onto the microform.

Third, the Commission adopted the proposal that supplemental information and information that had to be photographed more than once could be attached at the end of a microfilm record series instead of the beginning if the viewer is advised at the beginning of the series of the location of the problem frames and the location of the substituted information. Under the new rule, regulated companies now have the option of attaching supplemental or rephotographed information to the end of a microfilm record series as an alternative to the present requirement that such information be attached to the beginning of the series.[4]

Finally, a technical change has been made to the rule that forbids the cutting of microfilm. This was done because current regulations implicitly recognize that a company may cut a roll of film into individual strips to create "jacketed microfiche", that is, to display these strips on microfiche sheets. To clear up this inconsistency, the Commission is amending its regulations to explicitly allow a roll of film to be cut for purposes of creating a jacketed microfiche.

D. Clarifications to Three Categories of Records

The final rule makes three clarifications to the current regulations governing record retention. First, the Commission adopts the proposal that electric utilities and licensees keep clearance logs with station and system generation reports. These records indicate when certain equipment is in service. Clearance logs have always been considered a type of system generation report, but inquiries from some companies indicate that the Commission should make this fact more explicit. Because of commenters' concern over the burden of recording the details to keep "supporting data" with

[4] These rules do not prohibit correcting film during the filming process. During filming, companies may arrange the record as they wish provided that the microform record series "commence and end with a statement as to the nature and arrangement of the records reproduced." 18 CFR 125.2 and 225.2 (1981). After filming is completed, however, the roll of film may not be cut except to create jacketed microfiche. Any new film images must be added to the beginning or the end of the microform record series.

the clearance logs, as was originally proposed, the Commission has dropped this requirement from the final rule. As long as the clearance log clearly indicates the time of operation of the equipment and has the initials of the company official making the entry, it will be sufficient for the Commission's purposes.

Second, the rule clarifies that all bids, including unaccepted bids, are to be kept. It does so by specifically referring to unaccepted bids and proposals. Based on comments to the proposal, the rule also allows, as an alternative, the keeping of summaries of unaccepted bids and proposals.

While not part of the proposal, a third clarification has been made to the terminology relating to retention of depreciation records under Item 39. This item was titled "Records of accumulated provisions for depreciation and depletion of utility plant." The final rule changes this to "Records of accumulated provisions for depreciation and depletion of utility plant and supporting computation of expense." In addition, one of the types of records that are part of Item 39 was called "Records supporting computation of depreciation and depletion expense of utility plant, including such data as life and salvage studies." The final rule changes this to "Records reflecting the service life of property and the percentage of salvage and cost of removal for property retired from each account for depreciable utility plant." These changes are changes of terminology and not of substance; they are made to reflect more accurately current practice.

E. Cross-references to regulations implementing recent statutes

The Commission proposed adding a cross-reference to the requirement that electric utilities retain certain cost-of-service reports required by Commission regulations under the Public Utility Regulatory Policies Act (PURPA). The final rule adopts this proposal. Because this provision is for cross-reference purposes only, companies are not required to keep duplicate files.

To provide additional guidance, another statutory cross-reference has been included in this final rule. The regulations relating to natural gas companies have been amended to include a cross-reference to the Commission's rule requiring the retention of offers to continue certain contractual arrangements under the Natual Gas Policy Act. This provision, like the PURPA cross-reference, is for cross-reference purposes only; companies are not, therefore, required to keep duplicate files.[8]

F. Changes in length of retention periods

The final rule makes changes in two different record retention periods. First, the Commission has adopted the proposed change that certain nuclear production records (Records and prints of changes made to the plant as described in the Final Safety Analysis Report) be retained by electric utilities and licensees for ten years after the plant is retired, instead of the life of the corporation. The term "life of the corporation" was to imprecise and probably resulted in the retention of records long after they are of use to the Commission. Commenters supported this change.

Second, under current regulations the Commission requires that certain depreciation records (Item 39 records) be kept for twenty-five years. The Commission proposed adding a footnote to these records which would cross-refer to a requirement that any part of these records relating to life and mortality data be kept for the life of the corporation. Commenters objected to adding the footnote cross-reference because they believed that it is not necessary to keep life and mortality data for the life of the corporation. The Commission agrees that the "life of the corporation" requirement is too imprecise. The Commission is therefore adding the footnoted cross-reference but is changing the retention period requirement to twenty-five years or ten years after plant is retired, whichever is longer.[9]

IV. Public Proceedings and Effective Date

As discussed above, notice and comment has been provided in this rulemaking in accordance with 5 U.S.C. 553(b) except for a few technical and conforming changes for which the Commission finds that no prior notice is necessary. Accordingly, this final rule is effective thirty days after publication in the Federal Register.

(Natural Gas Act, 15 U.S.C. 717–717w (1976); Federal Power Act, 16 U.S.C. 792–828c (1976); Department of Energy Organization Act, 42 U.S.C. 7107–7352 (Supp. IV 1980); E.O. 12009, 42 FR 46,267 (September 15, 1977))

List of Subjects

18 CFR Parts 101 and 104

Electric power, Electric utilities, Uniform system of accounts.

18 CFR Part 125

Electric power, Electric utilities.

18 CFR Parts 201 and 204

Natural gas, Uniform system of accounts.

18 CFR Part 225

Natural gas.

In consideration of the foregoing, the Commission amends Parts 101, 104, 125, 201, 204, and 225, of Title 18 of the Code of Federal Regulations, as set forth below, to be effective thirty days after publication in the Federal Register.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PARTS 101, 104, 201 AND 204 [AMENDED]

1. Part 101 of Subchapter C is amended in the section entitled "Definitions" by redesignating definitions 8 through 35 to be definitions 9 through 36, respectively.

2. Part 104 of Subchapter C is amended in the section entitled "Definitions" by redesignating definitions 8 through 34 to be definitions 9 through 35, respectively.

3. Part 201 of Subchapter F is amended in the section entitled "Definitions" by redesignating definitions 8 through 36 to be definitions 9 through 37, respectively.

4. Part 204 of Subchapter F is amended in the section entitled "Definitions" by redesignating definitions 8 through 30 to be definitions 9 through 31, respectively.

5. Parts 101 and 104 of Subchapter C and Parts 201 and 204 of Subchapter F are further amended in their respective sections entitled "Definitions" by adding a new definition 8 to read as follows:

Definitions

When used in this system of accounts:

* * * * *

8. "Continuing Plant Inventory Record" means company plant records

---

[8] In the notice of proposed rulemaking in this docket the Commission also proposed a cross-reference to reporting and recordkeeping requirements required under Part 276 of the Commission regulations. The Commission, on July 15, 1982, issued a notice of proposed rulemaking proposing to eliminate Part 276's reporting requirements and to move the recordkeeping requirements to Part 271 of the Commission's regulations. Elimination of Reporting Requirements for Sales of Natural Gas under Sections 105, 106(b), and 109 of the Natural Gas Policy Act of 1978, Docket No. RM82–36, issued July 15, 1982, 47 FR 31,562 (July 21, 1982). The Commission has decided not to include cross-references to these regulations at this time, since the regulations may be changed in the RM82–36 rulemaking.

[9] Commenters also suggested that the retention period for station and system generation reports and clearance logs be shortened from 25 years to six years. While the Commission believes that this suggestion may have some merit, this change is not included in the final rule because of uncertainties on the impact this change would have on some aspects of the Commission's hydroelectric program.

for retirement units and mass property that provide, as either a single record, or in separate records readily obtainable by references made in a single record, the following information:

A. For each retirement unit:

(1) the name or description of the unit, or both;

(2) the location of the unit;

(3) the date the unit was placed in service;

(4) the cost of the unit as set forth in Plant Instructions 2 and 3 of this Part; and

(5) the plant control account to which the cost of the unit is charged; and

B. For each category of mass property;

(1) a general description of the property and quantity;

(2) the quantity placed in service by vintage year;

(3) the average cost as set forth in Plant Instructions 2 and 3 of this Part; and

(4) the plant control account to which the costs are charged.

PART 125—PRESERVATION OF RECORDS OF PUBLIC UTILITIES AND LICENSEES

PART 225—PRESERVATION OF RECORDS OF NATURAL GAS COMPANIES

§§ 125.2 and 225.2 [Amended]

6. Section 125.2 and § 225.2 are amended in paragraph (d)(3), respectively, by revising item number 3 in Figure 1 to read as follows:

FIGURE 1.—RECORD MEDIA

Record media/form	Media expected life	Comments and standards
1. * * *		
2. * * *		
3. Microforms:		
a. Microfilm, including Computer Output Microfilm (COM), microfiche jackets, and aperture cards.	....do	Assumes processing to standards and storage in a controlled environment with a temperature and humidity range of 60–80 degrees F. and 40–50% respectively. (Ref. American National Standards Institute (ANSI) standards PH 5.4—1970, PH 1.41—1976, PH 1.28—1979, PH 1.43—1981, or most current standards as accepted by the National Archives for use by federal agencies. See 41 CFR. 101–11.5)
b. Updatable type	Dependant on use of Media	For temporary records not requiring archival permanency so long as the microform or film selected has a life expectancy equal to, or greater than, the retention period for that record. Same storage conditions as for microfilm.
c. Metallic recording data strips.	Archival permanency	Same storage conditions as for microfilm.

7. Section 125.2 is further amended by redesignating paragraphs (e)(1)(ii) and (e)(1)(iii) as (e)(1)(iii) and (e)(1)(iv), respectively.

8. Section 125.2 is further amended by revising paragraphs (e)(1)(i) and (ii), (e)(2)(ii), (j), and (n)(5), and adding (e)(1)(ii) to read as follows:

§ 125.2 General instructions.

* * * * *

(e) *Microform and tape certification.*

(1) As the initial recording media—

(i) Except as provided in paragraph (e)(1)(ii) of this section each microform record series:

(A) shall contain, at the beginning, a microform introduction stating the title of the record series, the date prepared, the name of the official responsible for validating or confirming the data contained therein; and

(B) shall be closed with a clear and standard microform notation indicating the completion of the series and the date.

(ii) If the microform record series is a product of Computer Output Microfilm (COM), the certification required under paragraph (e)(1)(i) of this section is not required if:

(A) the series is prepared in accordance with written standard procedures developed by the company that ensure the integrity of record series which are the product of COM; and

(B) such procedures include the name of the official responsible for validating or confirming the data contained in the record series and confirming that a particular COM record series was produced in accordance with the standard procedures.

(iii) * * *

(iv) * * *

(2) Conversion from other media—

(i) * * *

(ii) Each microform record series shall commence and end with a statement as to the nature and arrangement of the records reproduced, and the date. Rolls of film shall not be cut except to produce jacketed microfiche. Supplemental or retaken film, whether of misplaced or omitted documents or of portions of microform found to be defective, shall be attached to the beginning of the microform record series. However, if a retrieval system using such methods as, for example, image count indexing or "blipping" is used, the supplemental or retaken film may be attached at the end of the series, if provisions at the beginning of the series advise the viewer of the location of the problem frames and the location of the supplemental or retaken frames. If supplemental or retaken film of misplaced or omitted documents, or of portions of microform found to be defective, are attached to the microform record series, the certificate described in paragraph (e)(1)(i) of this section shall cover the supplemental or retaken film and shall state the reasons for the attachment.

(iii) * * *

* * * * *

(j) *Schedule of records and periods of retention.* The schedule of records, § 125.3, shows the period of time that designated records shall be preserved. However, records related to plant shall be retained a minimum of 25 years unless accounting adjustments resulting from reclassification and original cost studies have been approved by the regulatory commission having jurisdiction, and either (1) continuing plant inventory records are maintained (see Definition No. 8, "Continuing Plant Inventory Records", Parts 101 and 104 of this Subchapter), or (2) unitization of construction costs appear in work orders, except that those relating to the construction of licensed projects, or additions or betterments thereto for which the Commission has not determined the actual legitimate original cost are to be retained until such cost has been determined. Additionally, all records which affect the determination of amortization reserves related to licensed projects shall be retained until Commission determination and final adjudication is made.

* * * * *

(n) *Schedule of notes.*

* * * * * *

(5) Life or mortality study data for depreciation purposes shall be retained for 25 years or for 10 years after plant is retired, whichever is longer.

9. Section 125.3 is amended in the "Schedule of Records and Periods of Retention" following the Table of Contents of that section by the following: revising the description and retention period of item 22.1(e); revising item 22.2 (a) and (e); revising item 39; revising item 40(b); and amending item 65 by adding a new sub-item (d); all to read as follows:

§ 125.3 Schedule of records and periods of retention.

* * * * *

SCHEDULE OF RECORDS AND PERIODS OF RETENTION

Description	Retention period
22.1 Production—Electric (less nuclear):	
(a) Station and system generation reports and clearance logs	25 years. See § 125.2(j).
22.2 Production—Nuclear:	
(a) Records of normal plant operation, including power levels and periods of operation at each power level	6 years/operating charts for the first year's operation will be stored for 10 years after plant is retired.
(e) Records and prints of changes made to the plant as described in the Final Safety Analysis Report	10 years after plant is retired.
39. Records of accumulated provisions for depreciation and depletion of utility plant and supporting computation of expense:	
(a) Detailed records or analysis sheets segregating the accumulated depreciation according to functional classification of plant	25 years.
(b) Records reflecting the service life of property and the percentage of salvage and cost of removal for property retired from each account for depreciable utility plant.	Do.[1]
PURCHASES AND STORES	
40. Procurements:	
(b) Supporting documents including accepted and unaccepted bids or proposals (summaries of unaccepted bids or proposals may be kept in lieu of originals) evidencing all relevant elements of the procurement.	6 years. See § 125.2(j).
65. Reports to Federal and State regulatory commissions:	
(d) Cost of service reports filed under section 133 of the Public Utility Regulatory Policies Act (PURPA). (See 18 CFR Part 290.)	5 years.

10. Section 225.2 is further amended by renumbering paragraphs (e)(1)(ii) and (e)(1)(iii) as (e)(1)(iii) and (e)(1)(iv), respectively.

11. Section 225.2 is further amended by revising paragraphs (e)(1) (i) and (ii), (e)(2)(ii), (j), and (n)(5), and adding (e)(1)(ii) to read as follows:

§ 225.2 General instructions.

* * * * *

(e) *Microform and tape certification.*

(1) As the initial recording media—

(i) Except as provided in paragraph (e)(1)(ii) of this section, each microform record series:

(A) shall contain, at the beginning, a microform introduction stating the title of the record series, the date prepared, the name of the official responsible for validating or confirming the data contained therein; and

(B) shall be closed with a clear and standard microform notation indicating the completion of the series and the date.

(ii) If the microform record series is a product of Computer Output Microfilm (COM), the certification required under paragraph (e)(1)(i) of this section is not required if:

(A) the series is prepared in accordance with written standard procedures developed by the company that ensure the integrity of record series which are the product of COM; and

(B) such procedures include the name of the official responsible for validating or confirming the data contained in the record series and confirming that a particular COM record series was produced in accordance with the standard procedures.

Customs Service

19 CFR Part 111

[T.D. 82-161]

Customhouse Broker Licenses

AGENCY: Customs Service. Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations relating to the licensing procedure for customhouse brokers to eliminate the requirement that Customs conduct another investigation each time a broker, previously licensed to transact business (after investigation) in one or more Customs districts, applies for a license in an additional district. This action will reduce delays in processing broker applications and costs to both brokers and Customs.

EFFECTIVE DATE: October 29, 1982.

FOR FURTHER INFORMATION CONTACT: James F. Bartley, Entry Procedures and Penalties Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-5765).

SUPPLEMENTARY INFORMATION:

Background

A customhouse broker ("broker") is a person who is licensed by the Customs Service ("Customs") to transact Customs business on behalf of importers and other persons. The regulations governing the licensing of brokers, and their duties and responsibilities, are found in Part 111, Customs Regulations (19 CFR Part 111).

Under § 111.19, Customs Regulations (19 CFR 111.19), a broker's license authorizes the transaction of Customs business only in the district for which issued. If a licensed broker desires to obtain a license for an additional district, an application must be filed with the district director of the district for which a license is desired, and Customs conducts an investigation to determine if the applicant is prepared and qualified to furnish efficient service in the additional district.

The requirement for another investigation of an applicant desiring to obtain a license for an additional district delays the processing of the application. Furthermore, Customs incurs the additional expense of conducting an investigation each time a broker applies for a license in a new district.

Accordingly, a notice of proposed rulemaking was published in the **Federal Register** on January 13, 1982 (47 FR 1396), requesting public comment on a proposal to eliminate the requirement that Customs conduct another investigation each time a broker previously licensed to transact business (after investigation) in one or more Customs districts, applies for a license in an additional district.

It was proposd that instead of another investigation each time a broker applies for a license in an additional district, the district director of the district where the application is filed could immediately notify the district director of the district in which the applicant is licensed and request his comments as to the applicant's qualifications in providing efficient service to importers and in complying with the duties and responsibilities of a broker. The district director in the district in which the applicant is licensed would submit his comments and recommendations timely to the district director making the request. The district director of the district where the application is filed then would forward the recommendations of the other district director, his recommendations for action on the application, and the application to Customs Headquarters for a determination as to whether to issue the license in the new district.

This change in procedure was proposed to expedite the processing of applications for a license in additional districts, and thus minimize the cost to the applicant of maintaining qualified employees and an office in the new district pending action on his application to be licensed in that district. In addition, Customs would save the costs of conducting what usually is found to be an unnecessary investigation.

Analysis of Comments

Twenty six comments were received in response to the notice of proposed rulemaking. Twenty-three responses favored the proposed revision. Two commenters were opposed and indicated the regulations, as proposed, favored larger brokerage firms. A third commenter offered objections to the amendments eliminating mandatory investigation of additional district license applicants.

A number of individual responses, while approving generally of the proposal, in addition favored other regulatory amendments beyond the scope of the proposed rulemaking. These included the elimination of all requirements for licensing in additional districts, a provisional license effective for 90 days, a performance bond for brokers, a preliminary determination that a broker applicant will satisfy licensing requirements for the establishment and staffing of an office in the additional district within a 30-day period, a post audit requirement that a broker licensed under the proposal continued to meet the licensing requirements, and a reduction of the licensing fee (determined in accordance with 31 U.S.C. 483a). In addition, several commenters, while favoring the proposal, expressed concern that the

rigor of the license application process should not be lessened and that the "screening process" may be abated.

A commenter recommended that additional amendments be made to include (1) the required submission and filing of a copy of the license application for an additional Customs district with the district director(s) in the district(s) where the applicant is licensed, and (2) a specific 20-day period within which the district director(s) where an applicant is licensed be required to submit his comments and recommendation to the district director where the license and application is made. The commenter noted that suggested change (1) would serve as a preliminary notice to a district director that a broker in his district has applied for a license in another district, and that a review of the broker's performance and operations, or other related matters, should be promptly initiated.

Customs believes this suggestion has merit because it is likely to expedite further the licensing procedure. However, in an effort to avoid the unintentional imposition of a paperwork burden on all brokers, the suggestion has been adopted—not as a Customs requirement, but as a voluntary action a broker may wish to perform to facilitate processing of an application.

Customs does not favor suggestion (2) as, during the course of a district director's review of a broker's peformance in his district, objections may be filed to the application following the posting of the notice of the license application. Furthermore, unresolved audit, penalties, financial and investigative matters may also be under review and require conclusion before the expiration of any specified period.

One commenter opposed the proposed amendments because of the insufficiency of the data that may be developed by a district director, rather than by Customs Office of Investigations, and suggested, as an alternative, that the license application format (Customs Form 3124) be amended to accommodate essential data. The investigating special agent, the commenter suggests, has been heretofore the sole source of advice concerning an applicant's financial status and office staffing in determination of its qualifications to render efficient service in an additional Customs district. It should be noted that the amendment adopted provides for a full investigation by Customs special agents if the Commissioner deems it necessary.

While the amendments do impose additional responsibilities on district directors in processing licensing applications, Customs believes that district offices are qualified to make on-site examination of offices to determine the capabilities of employees to manage or staff offices within their districts. Further, district directors, in conjunction with entry control sections and financial management offices, can adjudge if an applicant is meeting its current financial obligations. Therefore, Customs does not believe it is necessary at this time to amend the license application format to reflect the changes provided in this rulemaking.

A broker licensed in a large number of districts expressed concern that sizeable brokerage firms would still experience delay and difficulty in obtaining prompt licensing action due to the required submission of comments from the district directors where such firms are licensed and transact Customs business. In such cases, the commenter suggested limiting the solicitation of comments by the district director where a license application is made to a "reference" Customs district. The broker suggested that comments received from a district director where a broker was last licensed, should be regarded as more relevant and current, and representative of the qualifications of the broker to render efficient service in his district.

Customs believes that the license qualifications of a single entity are subject to review and to limit the solicitation of comments to any one of several districts where an applicant is licensed, may result in Customs not being able to give full consideration to recent activities in another district (whether adverse or not) reflecting on the applicant's meeting its duties and obligations as a broker.

After consideration of the comments received and further review of the matter, it has been determined to adopt the proposal, with the single modification noted above.

Executive Order 12291

Because this document will not result in a regulation which would be a "major rule" as defined by section 1(b) of E.O. 12291, a regulatory impact analysis and review as prescribed by section 3 of the E.O. is not required.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this proposal.

It is certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that the amendments will not have a significant economic impact on a substantial number of small entities.

Drafting Information

The principal author of this document was Todd J. Schneider, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 111

Administrative practice and procedure, Brokers, Licensing.

Amendments to the Regulations

Part 111, Customs Regulations (19 CFR Part 111), is amended as set forth below:

PART 111—CUSTOMHOUSE BROKERS

1. Section 111.14 (a) and (b), Customs Regulations (19 CFR 111.14(a), (b)) are revised to read as follows:

§ 111.14 Investigation of the applicant.

(a) *Individual license.* If the applicant passes the examination, the district director shall refer the application to the special agent in charge for an investigation and report.

(b) *Partnership, association, or corporation license.* The district director shall immediately refer an initial application for a partnership, association, or corporation license to the special agent in charge for investigation and report.

* * * * *

2. Section 111.19(a), Customs Regulations (19 CFR 111.19(a)), is revised to read as follows:

§ 111.19 Licenses for additional districts.

A license authorizes the transaction of Customs business only in the district for which issued. Licenses for additional districts may be obtained by:

(a) Filing with the district director of the district for which a license is desired the application prescribed in § 111.12(a). The applicant may submit a copy of the application for the additional district to the district director in each Customs district where licensed indicating the license number and date of issuance. Upon receipt of the application, the district director of the district for which a license is desired shall follow the procedure set forth in §§ 111.12(b) and 111.14;

* * * * *

3. Section 111.19(c), Customs Regulations (19 CFR 111.19(c)), is amended by removing the words "upon investigation" from the first sentence of that section.

4. New paragraphs (d) and (e) are added to § 111.19, Customs Regulations (19 CFR 111.19), to read as follows:

§ 111.19 Licenses for additional districts.

* * * * *

(d) *Recommendation and return of the application by the district director.* Upon receipt of the application, the district director shall immediately notify the district director in each other district in which the applicant is licensed and request comments as to the applicant's qualifications in rendering valuable service to importers and as to the applicant's compliance with the duties and responsibilities of a broker in the other district. The district director in the other district shall timely submit his comments and recommendation to the district director making the request. The district director where the application is made shall forward to the Commissioner (1) a recommendation for action on the application, (2) the recommendation of each other district director, and (3) the original of the application. The district director's recommendation of approval or disapproval of the application shall indicate if an individual applicant resides or has an established office in the additional district or, in the case of a partnership, association, or corporation application, if the requirements of § 111.11 (b) or (c) have been met.

(e) *Investigation.* The Commissioner may require an investigation to be conducted if additional facts are deemed necessary to pass upon the application.

(R.S. 251, as amended, sections 624, 641, 46 Stat. 759, as amended (19 U.S.C. 66, 1624, 1641))

William von Raab,

Commissioner of Customs.

Approved: September 10, 1982.

Robert E. Powis,

Acting Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

Internal Revenue Service

26 CFR Part 1

[T.D. 7837]

Income Tax; Taxable Years Beginning After December 31, 1953; Treatment of Losses on Small Business Stock

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document restates and clarifies a formula relating to the computation of the amount received for designated stock by a small business corporation. This formula was prescribed in final regulations implementing provisions of the Revenue Act of 1978 and the Technical Corrections Act of 1979 which were published in the **Federal Register** for June 2, 1981 (46 FR 29465) as T.D. 7779.

DATE: The amendments to the regulations are effective with respect to stock issued before and after November 6, 1978, and apply , in general, to taxable years beginning after December 31, 1978. The amendments to the regulations also apply, in certain cases, to taxable years including November 6, 1978.

FOR FURTHER INFORMATION CONTACT: Susan K. Thompson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3294).

SUPPLEMENTARY INFORMATION: On June 2, 1981, the **Federal Register** published as T.D. 7779 amendments to the Income Tax Regulations (26 CFR Part 1) and to the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 (26 CFR Part 11) under sections 414, 1244, and 1563 of the Internal Revenue Code of 1954 (46 FR 29465). The amendments conformed the regulations to section 345 of the Revenue Act of 1978 (92 Stat. 2763) and to section 103(a)(9) of the Technical Corrections Act of 1979 (94 Stat. 194), and also made certain clarifying changes. After the publication of these amendments, comments seeking a clarification of § 1.1244(c)-2(b)(2) of the amendments were received. This section of the amendments appeared at pages 29466 and 29470 in the **Federal Register** of Tuesday, June 2, 1981 (46 FR 29466, 29470).

Section 1.1244(c)-2(b)(2) relates to the requirement that a small business corporation designate as section 1244 stock certain shares of post-November 1978 common stock issued in the transitional year. For purposes of § 1.1244(c)-2(b)(2), the term "transitional year" is defined as the first taxable year in which capital receipts of the corporation exceeded $1,000,000. In computing the amount that may be received for designated stock in the transitional year, a small business corporation is directed by § 1.1244(c)-2(b)(2) to subtract from $1,000,000 amounts received (i) in exchange for stock in years prior to the transitional year; (ii) as contributions to capital in the transitional year or in years prior to that year; and (iii) as paid-in surplus in the transitional year or in years prior to that year. Thus, amounts received for stock in the transitional year are excluded from the computation, while contributions to capital and paid-in surplus accumulated during the transitional year are included under the formula. This yields an inconsistent result where, for example, stock is issued for an amount equal to par value in the transitional year and the amount received is excluded from the computation, in contrast with the economically parallel situation where stock is issued at a price in excess of par value, if any, and part or all of the consideration received for shares is allocated to paid-in surplus. The existing rule also penalizes the small business corporation by requiring the amount of a contribution to capital received in the transitional year to be tallied against the corporation computing the amount of stock issued in the transitional year which may be designated as section 1244 stock.

In order to achieve an equitable result in such situations, and to adhere consistently to the concept of the transitional year as the unit of measurement for capital receipts, the formula set forth in § 1.1244(c)-2(b)(2) is revised by this Treasury decision to exclude from the computation of the amount received for designated stock those contributions to capital and paid-in surplus received in the transitional year, as well as amounts received for stock in the transitional year.

Evaluation of the effectiveness of this regulation will be based on comments received from offices within the Treasury and Internal Revenue Service, other governmental agencies, and the public. These regulations will impose no new reporting or recordkeeping requirements.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for interpretative regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule.

Non-Application of Executive Order 12291

The Treasury Department has determined that this final regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

List of Subjects in 26 CFR Part 1

Income taxes, Capital gains and losses, Recapture.

Drafting Information

The principal author of this regulation is Susan K. Thompson of the Legislation and Regulations Division of the Office of the Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and the Treasury Department participated in developing the regulations, both substantively and stylistically.

Adoption of Amendments to the Regulations

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Accordingly, 26 CFR Part 1 is amended as follows:

Section 1.1244(c)–2(b) is amended by revising subparagraph (2)(i) and *Example (3)* of subparagraph (4) and by adding a new *Example (6)* to subparagraph (4) to read as follows:

§ 1.1244(c)–2 Small business corporation defined.

* * * * *

(b) *Post-November 1978 stock.* * * *

(2) *Requirement of designation in event $1,000,000 limitation exceeded.* (i) If capital receipts exceed $1,000,000, the corporation shall designate as section 1244 stock certain shares of post-November 1978 common stock issued for money or other property in the transitional year. For purposes of this paragraph, the term "transitional year" means the first taxable year in which capital receipts exceed $1,000,000 and in which the corporation issues stock. This designation shall be made in accordance with the rules of subdivision (iii) of this paragraph (b)(2). The amount received for designated stock shall not exceed $1,000,000, less amounts received (i) in exchange for stock in years prior to the transitional year; (ii) as contributions to capital in years prior to the transitional year; and (iii) as paid-in surplus in years prior to the transitional year. * * *

(4) *Examples.* * * *

Example (3). On December 1, 1980, Corporation Y issues common stock to shareholder A in exchange for $500,000 in cash. On August 1, 1981, Corporation Y issues common stock to shareholder B in exchange for property having an adjusted basis to Corporation Y of $500,000. On December 1, 1981, B transfers a tract of land having a basis in B's hands of $250,000 to Corporation Y as a contribution to capital. Under section 362(a)(2) of the Code, Corporation Y takes a basis of $250,000 in the tract of land. Corporation Y is a calendar year corporation. On February 15, 1982, it designates all of shareholder B's stock as section 1244 stock by entering the numbers of the qualifying certificates on the corporation's records. The designation made by Corporation Y is effective because it identifies which shares of its stock qualify for section 1244 treatment, was made in writing before the 15th day of the 3rd month following the close of the transitional year (1981), and because the amount received for designated stock does not exceed $1,000,000, less amounts received (i) in exchange for stock in years prior to the transitional year; (ii) as contributions to capital in years prior to the transitional year; and (iii) as paid-in surplus in years prior to the transitional year. Nevertheless, in the event of B's sale of his stock at a loss, the increase in basis attributable to his December, 1981, contribution to capital will be treated as allocable to stock that is not section 1244 stock under § 1.1244(d)–2.

* * * * *

Example (6). Corporation V comes into existence on July 1, 1982. On that date it issues 10 shares of voting common stock to shareholder A in exchange for $500,000 and 5 shares of voting common stock to shareholder B in exchange for $250,000, designating the shares issued to both A and B as section 1244 stock. On September 15, 1982, Corporation V receives a contribution to capital from shareholders A and B having a basis in their hands of $225,000. On February 1, 1983, Corporation V issues one share of stock to shareholder C in exchange for $50,000. Corporation V may designate one-half of the share issued to shareholder C as section 1244 stock under § 1.1244(c)–2 (b)(2). In 1982 the corporation received $750,000 for stock ($500,000) from A and $250,000 from B) and $225,000 as a capital contribution, totaling $975,000 in capital receipts. The receipt of $50,000 from shareholder C in exchange for stock in 1983 causes capital receipts to exceed $1,000,000 and 1983 thus becomes Corporation V's transitional year. Corporation V may receive only $25,000 for designated stock in 1983 under the rule set forth in § 1.1244 (c)–2 (b)(2)(i), which states that the amount received for designated stock shall not exceed $1,000,000, less amounts received (i) in exchange for stock in years prior to the transitional year ($750,000 from A and B), (ii) as contributions to capital in years prior to the transitional year ($225,000), and (iii) as paid-in surplus in years prior to the transitional year ($0). Thus, one-half of C's share (representing the receipt of $25,000) may be designated as section 1244 stock by Corporation V. In the event of the sale of A's stock or B's stock at a loss, the increase in basis attributable to their contribution to capital will be treated as allocable to stock that is not section 1244 stock under § 1.1244(d)–2.

Because this Treasury decision will not be detrimental to any taxpayer, it is found unnecessary to issue this Treasury decision with notice and public procedure thereon under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of this section.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: September 7, 1982.

John E. Chapoton,
Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 884

Opportunity to Amend State/Tribal Reclamation Plans To Include Provision for Emergency Reclamation Activities

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of opportunity to amend Reclamation Plans.

SUMMARY: The purpose of this notice is to inform the States and Tribes that they may amend their reclamation plans for purposes of undertaking emergency reclamation programs. Under Section 410 of the Surface Mining Control and Reclamation Act of 1977 (Pub. L. 95–87), the Secretary of the Interior is authorized to expend monies for the emergency restoration, reclamation, abatement, control, or prevention of adverse effects of coal mining practices on eligible lands. OSM is currently considering delegating certain emergency reclamation responsibilities to the States and Tribes. States/Tribes wishing to undertake an emergency reclamation program funded by the Office of Surface Mining as an approved component of the Reclamation Plan, may seek approval for such a program by amending the State/Tribal Reclamation Plan in accordance with 30 CFR 884.15.

ADDRESS: Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, Room 5401, 1100 L Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Dr. Phyllis Thompson, Chief, Branch of Fund Management, Program Operations and Inspection, at the address above, Telephone: (202) 343–7944.

SUPPLEMENTARY INFORMATION: Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95–87, 30 U.S.C. 1201 *et seq.*, establishes an abandoned mine land

reclamation program for the purposes of restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal for the specified purpose of financing Federal, State and Indian reclamation activities. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977 and for which there is no continuing reclamation responsibility under State or Federal law.

Title IV provides that if the Secretary determines that a State/Tribe has developed and submitted a program for reclamation of abandoned mines and has the ability and necessary State legislation to implement the provisions of Title IV, the Secretary may aprove the program and grant to the State/Tribe exclusive responsibility and authority to implement the approved program.

As part of the reclamation program, Section 410 of the SMCRA provides the Secretary authority to expend monies for the emergency restoration, reclamation, abatement, control or prevention of the adverse effects of coal mining practices on eligible lands. If the Secretary makes a finding of fact that (1) an emergency exists constituting a danger to the public health, safety or general welfare; and (2) no other person or agency will act expeditiously to restore, reclaim, abate, control or prevent the adverse effects of coal mining practices, then the Secretary, his agents, employees and contractors have the right to restore, reclaim, abate, control or prevent the adverse effects. An emergency, as defined in 30 CFR 870.5, means: "a sudden danger or impairment that presents a high probability of substantial physical harm to the health, safety, or general welfare of people before the danger can be abated under normal program operation procedures."

OSM is proposing to delegate States and Tribes the authority to undertake emergency reclamation projects on behalf of the Secretary of the Interior. For a State or Tribe to undertake an emergency reclamation program as part of its Reclamation Plan, the State/Tribe would have to amend its Reclamation Plan and demonstrate that it has the statutory authority to undertake emergencies, the technical capability to design and supervise the emergency work, and the administrative machinery to quickly respond to emergencies either directly or through contractors. Further, the finding of fact described in Section 410 would be made by a representative of the Secretary who must be able to show that emergency projects to be funded meet the definition of "emergency" under 30 CFR 870.5, i.e., the problem must be life-threatening, have occurred suddenly (or pose the threat of occurring suddenly) and require immediate action. Finally, the scope of work undertaken to reduce the emergency would be established by the Secretary's representative and it must not exceed that necessary to stabilize the life-threatening situation and should allow remaining reclamation work to be undertaken later as a lower priority project.

States/Tribes wishing to undertake an emergency reclamation program funded through the grant process should seek OSM approval for necessary modification of their Reclamation Plan. Those States/Tribes which obtain an approved modification of their Reclamation Plans will have an account added to their grant which would be available only upon project-by-project approval by the Secretary through the finding of fact described above. The initial size of the individual accounts would be based on the history of OSM emergency project expenditures on behalf of the States/Tribes. Emergency financing would be derived from the Secretary's discretionary funds.

OSM will provide technical support as requested to assist in developing the capabilities of States/Tribes to investigate, design, oversee, and implement abatement procedures. Additionally, OSM's Field Offices will have and make available supplemental instructions for establishing a State/Tribe-administered emergency reclamation program. The Field Office also should be contacted if you have any general questions regarding this matter. Regulations for amending a State Plan are found in 30 CFR 884.15.

OSM will continue to administer a Federal emergency reclamation program for all eligible States and Tribes which choose not to participate in State/Tribe-administered Federal reclamation programs. If a State/Tribe does amend its plan to enable it to conduct emergency reclamation activities, all emergency projects within the State/Reservation will be funded out of the monies approved in its revised annual grant.

Dated: September 17, 1982.

J. Steven Griles,

Acting Director, Office of Surface Mining.

[FR Doc. 82-26827 Filed 9-28-82; 8:45 am]

BILLING CODE 4310-05-M

VETERANS ADMINISTRATION

38 CFR Part 21

Promotion of Development of On-The Job Training for Veterans

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: These regulations state VA (Veterans Administration) policy concerning promotion of the development of on-the-job training for veterans under the GI Bill. Although the VA has promoted the development of these programs, no mention of this was included in the Code of Federal Regulations. The law now requires that the policy be made regulatory. These regulations will carry out the requirement of the law.

EFFECTIVE DATE: October 1, 1980.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202-389-2092).

SUPPLEMENTARY INFORMATION: On February 19, 1982 a proposal to amend 38 CFR Part 21 to implement some of the provisions of the Veterans' Rehabilitation and Education Amendments of 1980 was published in the **Federal Register** on pages 7460 and 7461.

Interested people were given 30 days to submit comments, suggestions, or objections. The Veterans Administration received 194 letters and post cards, two from officials of State approving agencies, five from officials of unions and joint apprenticeship committees, one from an apprenticeship association and the remainder from individuals. Nearly all the letters contained objections.

The comments were directed toward § 21.4261. There were no comments on § 21.4262.

Three writers provided similar comments. One thought the VA should not write apprenticeships; one thought it should not develop them; and the third stated it should not supervise them.

This regulation states that the VA will promote the development of apprenticeships. It does not allow, and the VA does not wish to write apprenticeships or develop them. The VA will not supervise them except in States where the VA is acting as the State approving agency. To make this clear the heading of each amended paragraph and the language of the last

subparagraph of each amended paragraph are changed from the proposal to show that the paragraph deals only with promotion rather than with promotion and development.

There were 189 writers who stated that if the VA promoted the development of apprenticeships, it would waste government funds by duplicating the efforts of the Bureau of Apprenticeship and Training.

The VA has no desire to duplicate the efforts of the employees of the Department of Labor. The original proposal called for the VA to coordinate efforts with the Department of Labor. This provision was designed to avoid duplication of effort. Since this apparently was not clear to a large number of readers, language has been added to the final regulation to make clear that the VA will not duplicate the work done by the Department of Labor.

There were 186 writers who claimed that there were enough apprenticeships approved for veterans' training and that more apprenticeships were unnecessary. They suggested that the proposal be withdrawn. The VA does not agree with this suggestion.

The VA is required by law to promote the development of apprenticeships and other on-the-job training. Furthermore a freeze on approved apprenticeships would mean that veterans who wished to be apprentices in new or expanding industries would be unable to train under the GI Bill. This would defeat the purpose of the program.

An official of a State approving agency stated that it was the responsibility of his State approving agency to promote the development of apprenticeships. He stated that the proposed regulation did not take this into account.

The VA desires to cooperate with State approving agencies. Consequently, the final regulations require the VA to coordinate its efforts with any State approving agency which chooses to promote the development of apprenticeships.

One writer suggested that the proposal be withdrawn because he believes that the VA has no authority to promote and develop apprenticeships. As stated earlier, the VA does not desire to develop apprenticeships. The agency does have legal authority to promote their development. The pertinent part of 38 U.S.C. 1772(d) states, "* * * the Administrator (of Veterans' Affairs) shall actively promote the development of programs of training on the job (including programs of apprenticeship) for the purpose of sections 1777 and 1787 of this title * * *" Clearly, the VA has the legal authority to promulgate these regulations.

Two people writing thought the approval of apprenticeships was satisfactory, and that further promotion of development of apprenticeships is unnecessary. As stated previously, the VA is required to promote their development. The agency believes that promotion is valuable in furthering the purposes of the program. Therefore, the agency has decided not to accept the suggestion.

The changes contained in these final regulations are required by statute, and simply incorporate into the regulations the Veterans Administration's longstanding policy and practice.

They, therefore, do not come within the definition of a major rule under Executive Order 12291.

The Administrator of Veterans' Affairs hereby certifies that these regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. Sections 601 through 612. Pursuant to 5 U.S.C. 605(b), these proposed rules are therefore exempt from the regulatory analysis requirements of sections 603 and 604. The reason for this certification is that the regulations are required by law and merely state longstanding VA policy and practice. They will not of themselves have any significant direct impact on small entities (i.e. small businesses, small private and nonprofit organizations and small governmental jurisdictions).

The Catalog of Federal Domestic Assistance number for the program affected by these regulations is 64.111.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

The proposed amendments to §§ 21.4261 and 21.4262 are changed as indicated above. They are deemed proper, and are hereby approved.

Approved: September 13, 1982.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

The Veterans Administration is amending 38 CFR Part 21 as follows:

1. In § 21.4261, paragraph (d) is added as follows:

§ 21.4261 Apprentice courses.

* * * * *

(d) *Promotion.* As funding permits, Veterans Administration employees will promote the development of apprenticeships. They will—

(1) Visit employers and joint apprenticeship committees,

(2) Coordinate their efforts with activities of any State approving agencies that may choose to promote the development of apprenticeships, and

(3) Avoid duplicating the efforts of others by coordinating their promotional efforts with similar activities of the Department of Labor and State employment security agencies as provided by written agreements covering these activities, including utilization of disabled veterans' outreach program specialists.

(38 U.S.C. 1772(d))

2. In § 21.4262, paragraph (d) is added as follows:

§ 21.4262 Other training on-the-job courses.

* * * * *

(d) *Promotion.* As funding permits, Veterans Administration employees will promote the development of on-the-job training courses. They will—

(1) Visit employers,

(2) Coordinate their efforts with activities of any State approving agencies that may choose to promote the development of on-the-job training courses, and

(3) Avoid duplicating the efforts of others by coordinating their promotional efforts with similar activities of the Department of Labor and State employment security agencies as provided by written agreements covering these activities, including utilization of disabled veterans' outreach program specialists.

(38 U.S.C. 1772(d))

BILLING CODE 8320-01-M

---

38 CFR Part 21

Veterans Education; Surviving Spouse's Delimiting Date, Approval Requirements for Nonaccredited Courses

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The following regulatory provisions implement those provisions of the Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981 which affect people receiving educational

assistance under chapters 34, 35 and 36, title 38, United States Code. These amendments liberalize the method used in determining the last date a surviving spouse may receive dependents' educational assistance, and liberalize the approval requirements for nonaccredited courses.

EFFECTIVE DATE: In keeping with Pub. L. 97–66, these regulations are effective October 17, 1981.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420 (202–389–2092).

SUPPLEMENTARY INFORMATION: On pages 19380 and 19381 of the **Federal Register** of May 5, 1982 there was published a notice of intent to amend Part 21 to implement those provisions of the Veterans' Disability Compensation, Housing, and Memorial Benefits Amendments of 1981 which affect people receiving educational assistance under chapters 34, 35 and 36, title 38, United States Code.

Interested people were given 30 days in which to submit comments, suggestions or objections regarding the proposals. The VA (Veterans Administration) received three letters, all from State approving agencies. All letters addressed the proposed change to § 21.4255. There were no comments on either § 21.3046 or § 21.4254.

All three writers objected to what they saw as an attempt by the VA to implement an approval criterion without involving the State approving agencies. They suggested that the Director of a VA field station be permitted to waive the pro rata refund criterion only when the appropriate State approving agency has recommended such a waiver.

The VA does not think it has the legal authority to give to State approving agencies, in effect, a veto over waivers of the pro rata refund approval criterion. However, the agency recognizes the importance of State approving agencies in the approval process, and has changed the amended § 21.4255 accordingly.

The law (38 U.S.C. 1776(d)) gives the Administrator of Veterans' Affairs the authority to waive the pro rata refund approval criterion. The Administrator is permitted by 38 U.S.C. 212(a) to delegate his authority to act or render decisions only to officers and employees of the Veterans Administration. If the Director of a VA field station could authorize waivers only upon recommendation of a State approving agency, this would have the effect of the Administrator's delegating his authority to make negative decisions to State approving agencies. Since this would violate the law, the VA is unable to accept the suggestion of the letter writers.

However, the VA recognizes the importance of involving the State approving agencies in this process. Hence, the final regulation requires schools to apply for a waiver through the State approving agency, and permits the State approving agency to make recommendations which, however, are not binding upon the Director of the VA field station.

The VA has determined that these regulations contain no major rules as that term is defined by Executive Order 12291, Federal Regulation. The annual effect on the economy will be less than $100 million. They will not result in any major increases in costs or prices for anyone. They will have no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans' Affairs hereby certifies that these regulations will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. These regulations are exempt under 5 U.S.C. 601–612. These regulations are exempt under 5 U.S.C. 605(b) from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. There are several reasons for this certification.

The amendment to § 21.3046 will regulate recipients of dependents' educational assistance. It will have no significant impact on small entities, i.e. small businesses, small private and non-profit organizations, and small governmental jurisdictions.

There are 26 publicly supported, degree-granting colleges and universities which are candidates for accreditation by a regional accrediting association. They may possibly be affected by the amendments to §§ 21.4254 and 21.4255. Of these only one is supported by a governmental jurisdiction small enough to be a small entity according to the RFA. This is not a substantial number. The amendments to these sections will have no significant impact on other types of small entities such as small businesses and small private and nonprofit organizations.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

(Catalog of Federal Domestic Assistance numbers for the programs affected by these regulations are 64.111, 64.117 and 64.120)

The amendments to §§ 21.3046, 21.4254 and 21.4255 are deemed proper and are hereby approved.

Approved: September 13, 1982.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

The Veterans Administration is amending 38 CFR Part 21 as follows:

1. In § 1.3046, paragraph (b) is revised to read as follows:

§ 21.3046 Periods of eligibility; spouses and surviving spouses.

* * * * *

(b) *Surviving spouses.* (1) If the Veterans Administration determines before December 1, 1968 that the veteran died of a service-connected disability, the beginning date of the 10-year period is December 1, 1968.

(2) If the veteran's death occurred before December 1, 1968, but the Veterans Administration does not determine that the veteran died of a service-connected disability until after November 30, 1968, the beginning date of the 10-year period is the date on which the Veterans Administration determines that the veteran died of a service-connected disability.

(3) If the veteran's death occurred before December 1, 1968 while a total, service-connected disability evaluated as permanent in nature was in existence, the beginning date of the 10-year period is December 1, 1968.

(4) If the veteran's death occurred after November 30, 1968, the beginning date of the 10-year period is:

(i) The date of death of the veteran who dies while a total, service-connected disability evaluated as permanent in nature was in existence, or

(ii) The date on which the Veterans Administration determines that the veteran died of a service-connected disability. (38 U.S.C. 1712(b); Pub. L. 97–66, 95 Stat. 1026)

* * * * *

2. In § 21.4254, paragraph (c)(13) is revised as follows:

§ 21.4254 Nonaccredited courses.

* * * * *

(c) *Approval criteria.* * * *

(13) The school either: (i) Has and maintains a policy for the pro rata refund of the unused portion of tuition, fees and charges if the veteran or eligible person fails to enter the course or withdraws or is discontinued from it before completion, or

(ii) Has obtained a waiver of this requirement. See § 21.4255. (38 U.S.C. 1776; Pub. L. 97–66, 95 Stat. 1026)

* * * * *

3. Section 21.4255 is revised as follows:

§ 21.4255 Refund policy; nonaccredited courses.

(a) *Acceptable refund policy.* A refund policy meets the requirements of § 21.4254(c)(13), if it provides that the amount charged for tuition, fees, and other charges for a portion of the course does not exceed the approximate pro rata portion of the total charges for tuition, fees, and other charges that the length of the completed portion of the course bears to the total length. The school may make provision for refund within the following limitations:

(1) *Registration fee.* An established registration fee in an amount not to exceed $10 need not be subject to proration. Where the established registration fee is more than $10, the amount in excess of $10 will be subject to proration.

(2) *Breakage fee.* Where the school has a breakage fee, it may provide for the retention of only the exact amount of the breakage, with the remaining part, if any, to be refunded.

(3) *Consumable instructional supplies.* Where the school makes a separate charge for consumable instructional supplies, as distinguished from laboratory fees, the exact amount of the charges for supplies consumed may be retained but any remaining part must be refunded.

(4) *Books, supplies and equipment.* (i) A veteran or eligible person may retain or dispose of books, supplies and equipment at his or her discretion when:

(A) He or she purchased them from a bookstore or other source, and

(B) Their cost is separate and independent from the charge made by the school for tuition and fees.

(ii) The school will make a refund in full for the amount of the charge for unissued books, supplies and equipment when:

(A) The school furnishes the books, supplies and equipment.

(B) The school includes their cost in the total charge payable to the school for the course.

(C) The veteran or eligible person withdraws or is discontinued before completing the course.

(iii) The veteran or eligible person may dispose of issued items at his or her discretion even if they were included in the total charges payable to the school for the course.

(5) *Tuition and other charges.* Where the school either has or adopts an established policy for the refund of the unused portion of tuition, fees, and other charges subject to proration, which is more favorable to the veteran or eligible person than the approximate pro rata basis as provided in this paragraph, such established policy will be applicable. Otherwise, the school may charge a sum which does not vary more than 10 percent from the exact pro rata protion of such tuition, fees, and other charges that the length of the completed portion of the course bears to its total length. The exact proration will be determined on the ratio of the number of days of instruction completed by the student to the total number of instructional days in the course.

(6) *Prompt refund.* In the event that the veteran, spouse, surviving spouse or child fails to enter the course or withdraws or is discontinued therefrom at any time prior to completion of the course, the unused portion of the tuition, fees and other charges paid by the individual shall be refunded promptly. Any institution which fails to forward any refund due within 40 days after such a change in status, shall be deemed, prima facie, to have failed to make a prompt refund, as required by this paragraph.

(b) *Waiver.* (1) An educational institution may apply through the appropriate State approving agency to the Director of the VA field station of jurisdiction for a waiver of the requirements of paragraph (a) of this section as they apply to a veteran or eligible person. The State approving agency shall forward the application to the Director along with its recommendations. The Director shall consider the recommendations and shall grant a waiver only when he or she finds that the educational institution:

(i) Is a college, university, or similar institution offering post-secondary level academic instruction leading to an associate or higher degree;

(ii) Is operated by an agency of a State or a unit of local government;

(iii) If operated by an agency of a State, is located within that State;

(iv) If operated by a unit of local government, is located within the boundaries of the area over which that unit has taxing jurisdiction;

(v) Is a candidate for accreditation by a regional accrediting agency; and

(vi) Charges the veteran or eligible person no more than $120 per quarter, $180 per semester or $360 per school year in tuition, fees and other charges for the course.

(2) If an educational institution disagrees with a decision of a Director of a VA field station, it may ask that the Director, Education Service review the decision. In reviewing the decision the Director must consider the evidence of record. He or she may not grant a waiver unless all the criteria of paragraph (b)(1) of this section are met.

(38 U.S.C. 1776(d); Pub. L. 97–66, 95 Stat. 1026)

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL-2210-6]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: EPA announces final rulemaking on revisions to the Illinois State Implementation Plan (SIP) for Sulfur Dioxide (SO_2). The revision pertains to SO_2 emission limits for solid fuel combustion sources within major metropolitan areas (MMAs) other than Chicago, Peoria and St. Louis (Illinois portion).

EPA's action is based upon a SIP revision request which was submitted by the State.

EFFECTIVE DATE: This final rulemaking becomes effective on October 29, 1982.

ADDRESSES: Copies of this revision to the Illinois SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Randolph O. Cano, (312) 886–6035 before visiting the Region V Office).

Environmental Protection Agency, Air Programs Branch, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20480.

FOR FURTHER INFORMATION CONTACT: Randolph O. Cano, Air Programs Branch, Region V, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois (312) 886–6035)

SUPPLEMENTARY INFORMATION: On July 29, 1981, the State submitted a May 8, 1981 Illinois Pollution Control Board (IPCB) Final Order (R78–14) as a proposed revision to the Illinois SIP. This final Order repeals Rule 204(c)(1)(D) and amends Rule 204(h) to delete reference to Rule 204(c)(1)(D). Rule 204(c)(1)(D) was incorporated into the Illinois SIP on May 3, 1972 (37 FR 10862) as IPCB Rule 204(c)(1)(B)(ii). This action also incorporated Rule 204(h).

Rule 204(c)(1)(D) requires existing solid fuel combustion sources within MMA's other than the Chicago, Peoria and St. Louis (Illinois portion) MMA's to meet a 1.8 lbs SO_2/MMBTU emission limit, if any Illinois Environmental Protection Agency (IEPA) monitor with the MMA records an annual arithmetic average sulfur dioxide level greater than 60 ug/M^3 (0.02 ppm) for any year ending prior to May 30, 1976 or 45 ug/M^3 (0.015 ppm) for any year ending after May 30, 1976.

Rule 204(h) contains a compliance date for Rule 204(c)(1)(D) of three years from the date upon which the IPCB promulgates an Order of Compliance under the provisions of Rule 204(c)(1)(D). Rule 204(c)(1)(D) was promulgated in order to protect a 60 ug/M^3 annual average secondary National Ambient Air Quality Standard (NAAQS); this standard was subsequently withdrawn.

At the IPCB hearings, the following facts were presented in support of the deletion of these rules. Rule 204(c)(1)(D) has never been implemented since it was promulgated in April 1972. This rule was designed to protect a NAAQS which no longer exists. IEPA, in the event of a potential SO_2 problem in any MMA, could bring about necessary changes more expeditiously without resorting to the use of this rule since this rule requires at least three years to produce a new emission limit.

On July 16, 1982 (47 FR 31011), EPA proposed to approve the deletion of these rules from the Illinois SIP since they are not necessary to assure the attainment and maintenance of the SO_2 NAAQS. The public was invited to comment on this proposed SIP revision. No public comments were received. EPA, therefore, approves the deletion of this rule from the Illinois SIP.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See sec. 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

Note—Incorporation by reference of the State Implementation Plan for the State of Illinois was approved by the Director of the Federal Register on July 1, 1982.

(Secs. 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502))

Dated: September 10, 1982.

Valdas V. Adamkus,

Regional Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Title 40 of the Code of Federal Regulations, Chapter I, Part 52 is amended as follows:

Subpart O—Illinois

1. Section 57.720 is amended by adding paragraph (c)(37) to read as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(37) On July 29, 1982, the State submitted a revision to the Illinois State Implementation Plan in the form of a May 28, 1981, Illinois Pollution Control Board (IPCB) Final Opinion of the Board (R78–17). This Final Opinion deletes Rule 204(c)(1)(D) and the reference to it in Rule 204(h) from the IPCB Air Pollution Control Regulations.

BILLING CODE 6560-50-M

---

40 CFR Part 52

[A–5–FRL–2206–5]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: On April 27 and 29, 1982, the State of Indiana submitted source specific emission limitations as revisions to the Total Suspended Particulate (TSP) and Volatile Organic Compound (VOC) portions of its State Implementation Plan (SIP). The source specific emission limitations are contained as a portion of the operating permits for 10 companies: Huntingburg Wood Products, Jasper Desk Company, Jasper Office Furniture Company, Arist-O-Kraft Company, Mohr Construction Company, Dana Corporation, Allis Chalmers Corporation, McGee Refining Corporation, Hesco Industries and Clark Oil and Refining Corporation. EPA has reviewed these source specific emission limitations, has determined that they are more stringent than the present SIP, and has determined that they will contribute to the attainment and maintenance of the National Ambient Air Quality Standards (NAAQS). Therefore, EPA is approving these source specific emission limitations.

DATES: This action is effective November 29, 1982 unless notice is received by October 29, 1982 that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of this revision to the Indiana SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408.

Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses:

U.S. Environmental Protection Agency, Air Programs Branch, Region V, 230 South Dearborn Street, Chicago, Illinois 60604

Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, D.C. 20460

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206

Written comments on this action should be sent to: Gary Gulezian, Chief, Regulatory Analysis Section (5AP–11), U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Anne Ernstein (312) 886–6036.

SUPPLEMENTARY INFORMATION: On April 27, 1982 the State of Indiana submitted source specific revisions to its SIP contained in operating permits for the following facilities:

1. Huntingburg Wood Products—Huntingburg
2. Jasper Desk Company—Jasper
3. Jasper Office Furniture—Jasper
4. Arist-O-Kraft—Jasper
5. Mohr Construction Company—Kokomo
6. Dana Corporation—Hagerstown

7. Allis Chalmers Corporation—LaPorte

On April 29, 1982, the State submitted similar source specific emission limits in the form of operating permits for the following facilities:

1. Kerr McGee Refining Corporation—Clermont
2. Hesco Industries, Incorporated—Charlestown
3. Clark Oil and Refining Corporation—Clermont

The permits contain source specific emission limits in addition to requiring compliance with all other general regulations within the State regulations that may be applicable to these facilities. EPA has in the past or will in the future rulemake on the general regulations contained in these permits and is not rulemaking on these regulations today. EPA is approving the following source specific emission limits contained in the permits:

Facility	Operation	Pollutant	Limitation total emissions [1]	Attainment status designation
Huntingburg Wood Products Company	Wood working processes (sawdust)	TSP	2.5 lbs/hr and 2.4 tons/yr	Nonattainment.
	coal/wood fired boiler	do	2.3 lbs/hr and 7 MMBTU/hr	Do.
Jasper Desk Company	Wood working processes (sawdust)	do	3.3 lbs/hr and 3.9 tons/yr	Do.
	2 boilers (1 wood and 1 oil)	do	8.0 lbs/hr	Do.
Jasper Office Furniture Company, Plant 1	Wood working processes (sawdust)	do	0.8 lbs/hr	Do.
	coal/wood fired boiler	do	11 lbs/hr	Do.
Jasper Office Furniture Company, Plant 2	Wood working processes (sawdust)	do	5 tons/yr	Do.
	coal/wood fired boiler	do	14 lbs/hr and 5 tons/yr	Do.
Ariet-O-Kraft	Wood working processes (sawdust)	do	0.8 lbs/hr and 1 ton/yr	Do.
Mohr Construction Company, Plant No. 3167	Asphalt batching plant	do	50.8 lbs/hr	Do.
Dana Corporation	Grinding boring processes	do	2.56 lbs/hr and 7.96 tons/yr	Unclassifiable.
Allis Chalmers Corporation	Surface coating operations	do	42 tons/yr	Attainment.
	Cleaning, polishing and shot blasting facilities.	do	0.3 lbs/hr and 1 ton/yr	Do.
Kerr McGee Refining Corporation	Petroleum loading and storage facility.	VOC (Ozone)	10 lbs/hr and 40 tons/yr	Attainment/unclassifiable.
Hesco Industries, Incorporated	Surface coating (wood furniture)	do	70 lbs/hr and 70 tons/yr	Nonattainment for Ozone with Dec. 31, 1987 attainment date.
Clark Oil and Refining Corporation	Petroleum loading and storage facility.	do	15 lbs/hr and 50 tons/yr	Attainment/unclassifiable.

[1] The emission limits in this table which EPA is approving today are in addition to those limits contained in the EPA approved SIP.

As can be seen, several of these facilities are located in areas designated for the pollutant in question as nonattainment (40 CFR 81.315). Part D of the Clean Air Act requires the State to submit plans for these areas to attain the primary NAAQS by 1982. (Under certain conditions the attainment date for ozone and carbon monoxide nonattainment areas can be extended until no later than 1987.) One of the requirements of Part D is that reasonably available control technologly (RACT) must be required in all areas not attaining the NAAQS.

For TSP the State did submit such plans and EPA conditionally approved them as meeting the Part D requirements, including RACT, in the nonattainment areas where the above TSP facilities are located. (July 16, 1982, 47 FR 30972). The TSP emission limits which EPA is approving today are in addition to those Part D RACT limits EPA approved on July 16, 1982 and, therefore, should contribute to the attainment and maintenance of the TSP NAAQS in the affected areas.

The current status of the Indiana Part D ozone plan is as follows. With the exception of regulations limiting VOC emissions, EPA approved on February 11, 1982 the ozone plan for several counties in Indiana, including Clark (Hesco Industries), as meeting the requirements of Part D of the Clean Air Act (47 FR 6274). EPA proposed on March 15, 1982 to conditionally approve Indiana's VOC RACT I [1] regulation (1979 APC 15) as meeting the initial VOC RACT requirements of Part D (47 FR 11042). The State recodified 1979 APC 15 as 325 IAC Article 8. The recodification, but not the regulation, was approved by EPA on July 16, 1982, 47 FR 30972. EPA proposed to conditionally approve an expanded version of 325 IAC Article 8, which includes the RACT II [1] emission limits, on May 14, 1982 (47 FR 20824). EPA plans to take final action on both of the VOC RACT regulations in future **Federal Register** notices. Until such time as EPA takes action on either 1979 APC 15 or 325 IAC Article 8, the SIP VOC emission limitation regulation remains SIP rule APC 15, as promulgated by the State in 1972 and approved by EPA on May 14, 1973 (38 FR 12698).

In addition to requiring controls in nonattainment areas such as Clark County, Indiana's VOC RACT I regulation requires RACT controls on petroleum loading and storage facilities in the attainment County of Hendricks (Kerr McGee and Clark Oil). However, this regulation does exempt wood furniture surface coating sources of less than 100 tons/yr, such as Hesco Industries, from control. This exemption is consistent with EPA's current policy which does not require wood furniture surface coating operations of less than 100 tons/yr in Indiana to have now or in the future emission controls (August 11, 1982 memorandum on Review of 1982 Ozone and Carbon Monoxide SIP's from Darryl Tyler, Acting Director of Control Programs Development Division). Therefore, even though an emission limit is not required under current EPA policy, because limits were requested by the States, EPA is approving emission limitations today for Hesco Industries. These emission limits are essentially status quo caps.

The source specific VOC emission limits EPA is approving today are in addition to any emission limits and control techniques contained in the State enforceable 325 IAC Article 8 and those contained in the EPA approved SIP. EPA's approval of the State's source specific emission limits for these sources today will impose overall caps in tons/yr and lbs/hr to the emissions currently allowed.

For both TSP and VOC sources, the limitations EPA is approving today are not inconsistent with the RACT level of control required by Part D. The implementation of these additional emission limits above the Part D requirements should contribute to attaining and maintaining the NAAQS in the areas where the sources are located.

Because EPA considers today's action noncontroversial and routine, we are approving it today without prior proposal. The action will become

[1] RACT I regulation are applicable to VOC sources for which control technique guidelines (CTGs) were published by January 1978. RACT II regulations are applicable to VOC sources for which CTGs were published between January 1978 and January 1979.

effective on November 29, 1982. However, if we receive notice by October 29, 1982 that someone wishes to submit critical comments, then EPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new rulemaking by proposing the action and establishing a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), I certify that SIP approvals do not have a significant economic impact on a substantial number of small entities. Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by 60 days from today. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2))

List of Subject in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

Note.—Incorporation by reference of the State Implementation Plan for the State of Indiana was approved by the Director of the Federal Register on July 1, 1982.

(Secs. 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502))

Dated: September 21, 1982.

Anne M. Gorsuch,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart P—Indiana

1. Section 52.770 is amended by adding new paragraph (c)(38).

§ 52.770 Identification of plan.

* * * * *

(c) * * *

(38) On April 27, 1982, Indiana submitted source specific TSP emission limits for Huntingburg Wood Products, Jasper Desk Company, Jasper Office Furniture Company, Arist-O-Kraft Company, Mohr Construction Company, Dana Corporation, and Allis Chalmers Corporation. On April 29, 1982, Indiana submitted source specific VOC emission limits for McGee Refining Corporation, Hesco Industries, and Clark Oil and Refining Corporation.

40 CFR Parts 60 and 61

[A-7-FRL 2217-1]

New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS); Delegation of Authority to Lincoln/Lancaster County Health Department (Nebraska)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: The EPA is today amending 40 CFR 60.4 and 61.04, Address, to reflect a delegation of authority to Nebraska's Lincoln/Lancaster County Health Department for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS).

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Steve A. Kovac, Air Branch, U.S. EPA, Region VII, 324 East 11th Street, Kansas City, Missouri 64106; 816/374-6525; FTS 758-6525.

SUPPLEMENTARY INFORMATION: The Nebraska Department of Environmental Control has subdelegated authority to implement and enforce the federal NSPS regulations for 32 stationary source categories and national emission standards for four hazardous air pollutants to the Lincoln/Lancaster County Health Department. The amended 40 CFR 60.4(b)(CC) and 61.04(b)(CC) adds the address of the county health department to which all reports, requests, applications, submittals, and communications to the Administrator, as required by 40 CFR Parts 60 and 61, must also be addressed.

List of Subjects

40 CFR Part 60

Air pollution control, Aluminum, Ammonium sulfate plants, Cement industry, Coal, Copper, Electric power plants, Glass and glass products, Grains, Intergovernmental relations, Iron, Lead, Metals, Motor vehicles, Nitric acid plants, Paper and paper products industry, Petroleum, Phosphate, Sewage disposal, Steel, Sulfuric acid plants, Waste treatment and disposal, Zinc.

40 CFR Part 61

Air pollution control, Asbestos, Beryllium, Hazardous materials, Mercury, Vinyl chloride.

The Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an administrative change and not one of substantive content. No additional burdens are imposed upon the parties affected.

The delegation which influenced this amendment was effective on August 5, 1982, and it serves no purpose to delay technical change of this address in the Code of Federal Regulations. This rulemaking is effective immediately, and is issued under the authority of Section 111 of the Clean Air Act, as amended, 42 U.S.C. 7412.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Dated: September 14, 1982.

William W. Rice,

Acting Regional Administrator, Region VII.

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

In § 60.4, paragraph (b)(CC) is amended by adding the following address after the existing address:

§ 60.4 Address.

* * * * *

(b) * * *

(CC) * * *

Lincoln-Lancaster County Health Department, Division of Environmental Health, 2200 St. Marys Avenue, Lincoln, Nebraska 68502.

* * * * *

PART 61—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Part 61 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

In § 61.04, paragraph (b)(CC) is amended by adding the following address after the existing address:

§ 61.04 Address.

* * * * *

(b) * * *

(CC) * * *

Lincoln-Lancaster County Health Department, Division of Environmental

Health, 2200 St. Marys Avenue, Lincoln, Nebraska 68502.

* * * * *

40 CFR Part 81

[A-5-FRL-2204-7]

Designation of Areas of Air Quality Planning Purposes; Attainment Status Designations; Michigan

AGENCY: Environmental Protection Agency.

ACTION: Notice of final rulemaking.

SUMMARY: EPA is today approving a change to the redesignation for a portion of Midland County, from non-attainment to attainment designation relative to the sulfur dioxide (SO_2) National Ambient Air Quality Standard (NAAQS). This revision to the Michigan State Implementation Plan (SIP) is based on a request from the State to redesignate this area.

DATE: This action is effective October 29, 1982.

ADDRESSES: Copies of the redesignation request and the supporting technical information are available at the following addresses:

Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604

Michigan Department of Natural Resources, Air Quality Division, State Secondary Government Complex, General Office Building, 7150 Harris Drive, Lansing, Michigan 48917.

FOR FURTHER INFORMATION CONTACT: Toni Lesser, Regulatory Analysis Section, Air Programs Branch, Region V, U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886–6037.

On July 2, 1982 (47 FR 28968) EPA proposed approval of a redesignation for a portion of Midland County, from nonattainment to attainment relative to the SO_2 NAAQS as a revision to the Michigan SIP. No comments were received.

A portion of Midland County, Michigan (36 square miles surrounding the Dow Chemical plant) was designated as a nonattainment area for the primary SO_2 NAAQS in the March 3, 1978 (43 FR 8964), Federal Register. This nonattainment designation was based on the fact that the Dow Chemical Midland plant operated a Supplementary Control System (SCS), in contravention to Section 123 of the Act, in order to attain the SO_2 NAAQS. Dow Chemical's Midland plant is the major source of SO_2 emissions in Midland County.

On May 6, 1980 (45 FR 29790), EPA approved Michigan's SO_2 control strategy required by Part D of the Act for Midland County. The strategy requires Dow Chemical to comply with the one percent sulfur content limitation contained in Michigan's Rule 336.1401. In that notice, EPA approved the Midland County strategy stating that the available information demonstrated that enforcement of those regulations will protect the ambient air quality in Midland County.

On September 28, 1981, the U.S. District Court for the Eastern District of Michigan in the case of the U.S.A. vs Dow Chemical Company, signed a consent decree which, among other items, committed Dow to comply with the requirements of R336.1401 by September 1, 1981.

On December 21, 1981, the State of Michigan requested that EPA designate Midland County as attainment for SO_2. Michigan indicated that, as of September 1, 1981, the Dow Chemical Company is no longer operating an SCS and that Dow Chemical is now burning compliance fuel (one percent sulfur content). This switch to a lower sulfur content fuel has resulted in a significant reduction in sulfur dioxide emissions in the Midland area.

EPA reviewed Michigan's request to redesignate a portion of Midland County from primary non-attainment to attainment for SO_2 and today is approving the State's request. As noted in EPA's rulemaking of May 6, 1980, EPA believes that Dow's compliance with the 1 percent sulfur limit in R336.1401 will assure attainment of the SO_2 NAAQS in Midland County. Therefore, EPA is approving the redesignation of Midland County as attainment for SO_2 based on Michigan's certification that Dow has been in compliance with R336.1401 since September 1, 1981.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator on January 27, 1981 (46 FR 8709) certified that approvals of SIPs under sections 110 and 172 of the Clean Air Act would not have a significant economic impact on a substantial number of small entities. Because this final action approves a State action taken pursuant to sections 110 and 172 of the Clean Air Act, it falls within this certification. Further, it imposes no new requirements beyond those which the State has already imposed.

This regulation was exempted from review by the Office of Management and Budget under Section 3 of Executive Order 12291.

Under section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit on or before May 24, 1982. Under section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce those requirements.

List of Subjects in 40 CFR Part 81

Air pollution control, National parks, Wilderness areas.

(Secs. 110 and 107, Clean Air Act (42 U.S.C. 7407))

Dated: September 21, 1982.

Anne M. Gorsuch,
Administrator.

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

Section 81.323 of Part 81 of Chapter 1, Title 40, Code of Federal Regulations is amended. In the table for "Michigan—SO_2", the entry for a portion of Midland County should be revised to read as follows:

§ 81.323 Michigan.

Michigan—SO_2

Designated area	Does not meet primary standards	Does not met secondary standards	Cannot be classified	Better than national standards
	•	•	•	•	•

40 CFR Part 180

[PP 0000/R452 PH-FRL 2214-5]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Certain Pesticide Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerance levels for the pesticide chemicals malathion; *O,O*-diethyl *O*-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate; methyl 3-[(dimethoxphosphinyl) oxy] butenoate, alpha and beta isomers; dioxathion; ethion; 2-chloro-1-(2,4-dichorophenyl) vinyl diethyl phosphate; and phosalone in or on certain raw commodities and to revise certain commodity descriptions. These regulations would provide conformity between U.S. tolerances and tolerances established for the above pesticide chemicals by the Codex Alimentarius Commission.

EFFECTIVE DATE: Effective on October 29, 1982.

ADDRESS: Written objections may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Room 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

Pesticide chemical	PM	Telephone
Malathion: Methyl 3-[(dimethoxy-phosphinyl)oxy]bu-tenoate, alpha and beta isomers: Ethion	William Miller—PM16.	(703-557-2600)
Dioxathion: 2-Chloro-1-(2,4-dichlorophenyl) vinyl diethyl phosphate: *O,O*-Diethyl *O*-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate.	George LaRocca—PM15.	(703-557-2400)
Phosalone	Jay Ellen-berger—PM12.	(703-557-2386)

SUPPLEMENTARY INFORMATION: EPA issued a notice of proposed rulemaking published in the **Federal Register** of May 26, 1982 (47 FR 22962) which announced that the United States proposed to adjust current U.S. tolerances for certain pesticide chemicals to conform with the tolerances set by the Codex Alimentarius Commission (CAC). The purpose of the CAC is, in general, to protect consumer health and ensure fair practices in the food trade while fostering the movement of agricultural products across international boundaries. A primary concern of the CAC is the development of international food standards, including tolerances for pesticide residues in food.

As the last step of the Codex process, countries are asked to accept the tolerances established by CAC. Before acceptance of a CAC tolerance by the United States, it must be determined that the tolerance fully complies with the requirements of the Federal Food, Drug, and Cosmetic Act, and a regulation must have been promulgated. The May 26, 1982 notice of proposed regulations for tolerances appeared to satisfy these criteria.

FMC Corporation has commented regarding the proposal to increase the tolerances for ethion (§ 180.173) on cattle meat, meat byproducts, and pears. FMC stated that the increased tolerances will unnecessarily impact on the percent of acceptable daily intake (ADI) utilized and that the theoretical maximum residues contribution (TMRC) would be inflated by a factor of 3.33 in the case of cattle, meat (fat basis); by a factor of 1.33 in the case of cattle, meat byproducts; and by a factor of 2.0 in the case of pears.

The Agency does not consider that revising the cattle meat tolerance of 0.75 ppm (whole product basis) to 2.5 ppm cattle meat, fat basis to be a substantial increase. The Agency's TMRC calculations for fat, meat, and meat byproducts of cattle for ethion are already based on a 2.5 ppm tolerance level. Therefore, the proposed tolerance increases for meat and meat byproducts do not have any impact on the ADI. The proposed tolerance increase for pears results in an incremental increase of less than 0.5 percent of the TMRC and a 0.64 percent increase in the utilization of the ADI. The increase from 1 to 2 ppm for pears may be higher than necessary for U.S. good agricultural practices. However, EPA believes that in cases where international trade in commodities is of concern, we must also consider international good agricultural practices as is done in the Codex Alimentarius procedures.

The proposed increased tolerances for ethion are reasonable and supportable and are therefore established in § 180.173.

No other comments were received in response to this notice of proposed rulemaking.

Accordingly, EPA, based on consideration given the data published by the CAC and other relevant material, has concluded that the residues expected to result from the use of these insecticides in or on the commodities will not pose a hazard when used in accordance with the label directions, and that the CAC tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, withing 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(d), 68 Stat. 514 (21 U.S.C 346a(e))).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Raw agricultural commodities, Pesticides and pests.

Dated: September 10, 1982.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, 40 CFR Part 180 is amended to read as follows:

1. Section 180.111 is amended by revising the established tolerance for broccoli (Pre-H) to read as follows:

§ 180.111 Malathion; tolerances for residues.

* * * * *

Commodities	Parts per million
* * * * *	
Broccoli (Pre-H)	8.0
* * * * *	

2. Section 180.153 is revised to read as follows:

§ 180.153 O,O-Diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate; tolerances for residues.

Tolerances are established for residues of the insecticide O,O-diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl)

phosphorothioate in or on the following raw agricultural commodities:

Commodities	Parts per million
Alfalfa, fresh	40.0
Alfalfa, hay	10.0
Almonds	0.5
Almonds, hulls	3.0
Apples	0.5
Apricots	0.5
Bananas (NMT 0.1 ppm shall be present in the pulp after peel is removed)	0.2
Beans, forage	25.0
Beans, hay	10.0
Beans, guar	0.1
Beans, guar, forage	0.1
Beans, lima	0.5
Beans, snap	0.5
Beets, roots	0.75
Beets, sugar, roots	0.5
Beets, sugar, tops	10.0
Beets, tops	0.7
Birdsfoot trefoil	40.0
Birdsfoot trefoil, hay	10.0
Blackberries	0.5
Blueberries	0.5
Boysenberries	0.5
Broccoli	0.7
Brussels sprouts	0.7
Cabbage	0.7
Carrots	0.75
Cattle, fat (pre-s appl)	0.7
Cattle, meat (fat basis) (pre-s appl)	0.7
Cattle, mbyp (fat basis) (pre-s appl)	0.7
Cauliflower	0.7
Celery	0.7
Cherries	0.75
Citrus	0.7
Clover (fresh)	40.0
Clover, hay	10.0
Coffee beans	0.2
Collards	0.7
Corn, forage	40.0
Corn (inc sweet K + CWHR)	0.7
Cottonseed	0.2
Cowpeas	0.1
Cowpeas, forage	0.1
Cranberries	0.5
Cucumbers	0.75
Dandelions	0.7
Dewberries	0.5
Endive (escarole)	0.7
Figs	0.5
Filberts	0.5
Grapes	0.75
Grass (NMT 40 ppm shall remain 24 hours after appl)	90.0
Grass, hay	10.0
Hops	0.75
Kale	0.7
Kiwi fruit	0.75
Lespedeza	1.0
Lettuce	0.7
Loganberries	0.75
Melons	0.75
Mushrooms	0.75
Mustard greens	0.7
Nectarines	0.5
Olives	1.0
Onions	0.75
Parsley	0.75
Parsnips	0.5
Peaches	0.7
Peanuts	0.75
Peanuts, forage	40.0
Peanuts, hay	10.0
Peanuts, hulls	10.0
Pears	0.5
Peavine hay	10.0
Peavines	25.0
Peas with pods (determined on peas after removing any shell present when marketed)	0.5
Pecans	0.5
Peppers	0.5
Pineapples	0.5
Pineapples, forage	40.0
Plums (fresh prunes)	0.5
Potatoes	0.1
Potatoes, sweet	0.1
Radishes	0.5
Raspberries	0.5
Rutabagas	0.75
Sheep, fat (pre-s appl)	0.7
Sheep, meat (fat basis) (pre-s appl)	0.7
Sheep, mbyp (fat basis) (pre-s appl)	0.7
Sorghum, forage	10.0
Sorghum, grain	0.75
Soybeans	0.1
Soybeans, forage	0.1
Spinach	0.7
Squash, summer	0.5
Squash, winter	0.75
Strawberries	0.5
Sugarcane	0.75
Swiss chard	0.7
Tomatoes	0.75
Turnips, roots	0.5
Turnips, tops	0.75
Walnuts	0.5
Watercress	0.7

3. Section 180.157 is revised to read as follows:

§ 180.157 Methyl 3-[(dimethoxyphosphinyl)oxy]butenoate, alpha and beta isomers; tolerances for residues.

Tolerances are established for residues of the insecticide methyl 3-[(dimethoxyphosphinyl)oxy]butenoate, alpha and beta isomers, in or on the following raw agricultural commodities:

Commodities	Parts per million
Alfalfa	1.0
Apples	0.5
Artichokes	1.0
Beans	0.25
Beets, garden (incl. tops)	1.0
Birdsfoot trefoil, forage	1.0
Birdsfoot trefoil, hay	1.0
Broccoli	1.0
Brussel sprouts	1.0
Cabbage	1.0
Carrots	0.25
Cauliflower	1.0
Celery	1.0
Cherries	1.0
Citrus	0.2
Clover	1.0
Collards	1.0
Corn, field, forage	1.0
Corn, grain, field	0.25
Corn, pop, forage	1.0
Corn, pop, grain	0.25
Corn, sweet (K+CWHR)	0.25
Corn, sweet, forage	1.0
Cucumbers	0.2
Eggplant	0.25
Grapes	0.5
Kale	1.0
Lettuce	0.5
Melons (incl. cantaloupes, honeydew melon, and muskmelon, determined on the edible portion with rind removed)	0.5
Mustard greens	1.0
Okra	0.25
Onions (green)	0.25
Parsley	1.0
Peaches	1.0
Pears	0.5
Peas	0.25
Peavines	1.0
Peppers	0.25
Plums	1.0
Potatoes	0.25
Raspberries	1.0
Sorghum, forage	1.0
Sorghum, grain	1.0
Spinach	1.0
Squash, summer	0.25
Strawberries	1.0
Tomatoes	0.2
Turnips	0.25
Turnips, tops	1.0
Walnuts (determined on the nut meats with shell removed)	0.25
Watermelon	0.5

4. Section 180.171 is amended by revising the established tolerance for stone fruits to read as follows:

§ 180.171 Dioxathion; tolerances for residues.

* * * * * *

Commodities	Parts per million
* * * * *	
Stone fruits	0.1(N)
* * * * *	

5. Section 180.173 is revised to read as follows:

§ 180.173 Ethion; tolerances for residues.

Tolerances are established for residues of the insecticide ethion (*O,O,O',O'*-tetraethyl *S,S'*-methylene bisphosphorodithioate) including its oxygen analog (*S*-[[(diethoxyphosphinothioyl)thio] methyl] *O,O*-diethyl phosphorothioate) in or on the following raw agricultural commodities:

Commodities	Parts per million
Almonds	0.1
Almond, hulls	5.0
Apples	2.0
Apricots	0.1
Beans	1.0
Cattle, fat	2.5
Cattle, meat (fat basis)	2.5
Cattle, mbyp	1.0
Cherries	0.1
Chestnuts	0.1
Citrus fruits	2.0
Corn, fodder	14.0
Corn, forage	14.0
Corn, grain	0.1
Cottonseed	0.5
Cucumbers	0.5
Eggs	0.2
Eggplants	1.0
Filberts	0.1
Goats, fat	0.2
Goats, meat	0.2
Goats, mbyp	0.2
Grapes	2.0
Hogs, fat	0.2
Hogs, meat	0.2
Hogs, mbyp	0.2
Horses, fat	0.2
Horses, meat	0.2
Horses, mbyp	0.2
Melons	2.0
Milk fat (reflecting [N] residues in milk)	0.5
Nectarines	1.0
Onions	1.0
Peaches	1.0
Pears	2.0
Pecans	0.1
Peppers	1.0
Pimentos	1.0
Plums (fresh prunes)	2.0
Poultry, fat	0.2
Poultry, meat	0.2
Poultry, mbyp	0.2
Sheep, fat	0.2

Commodities	Parts per million
Sheep, meat	0.2
Sheep, mbyp	0.2
Sorghum, forage	2.0
Sorghum, grain	2.0
Squash, summer	0.5
Strawberries	2.0
Tomatoes	2.0
Walnuts	0.1

6. Section 180.263 is revised to read as follows:

§ 180.263 Phosalone; tolerances for residues.

Tolerances are established for residues of the insecticide phosalone (*S*-(6-chloro-3-(mercaptomethyl)-2-benzoxazolinone)*O,O,*-diethyl phosphorodithioate) in or on the following raw agricultural commodities:

Commodities	Parts per million
Almond, hulls	50.0
Apples	10.0
Apricots	15.0
Artichokes	25.0
Cattle, fat	0.25
Cattle, meat	0.25
Cattle, mbyp	0.25
Cherries	15.0
Citrus fruits	3.0
Goats, fat	0.25
Goats, meat	0.25
Goats, mbyp	0.25
Grapes	10.0
Hogs, fat	0.25
Hogs, meat	0.25
Hogs, mbyp	0.25
Horses, fat	0.25
Horses, meat	0.25
Horses, mbyp	0.25
Nectarines	15.0
Nuts	0.1
Peaches	15.0
Pears	10.0
Plums (fresh prunes)	15.0
Potatoes	0.1
	(N)
Sheep, fat	0.25
Sheep, meat	0.25
Sheep, mbyp	0.25

7. Section 180.322 is revised to read as follows:

§ 180.322 2-Chloro-1-(2,4-dichlorophenyl) vinyl diethyl phosphate; tolerances for residues.

Tolerances are established for residues of the insecticide 2-chloro-1-(2,4-dichlorophenyl) vinyl diethyl phosphate in or on the following raw agricultural commodities:

Commodities	Parts per million
Cattle, fat	0.2
Eggs	0.005
Goats, fat	0.005
Hogs, fat	0.005
Horses, fat	0.005
Milk, fat (on a fat basis)	0.2
Poultry, fat	0.005
Sheep, fat	0.2

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Chlorothalonil

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the fungicide chlorothalonil in or on certain raw agricultural commodities. This regulation to establish the maximum permissible levels for residues of the fungicide in or on the commodities was requested by Diamond Shamrock Corp.

EFFECTIVE DATE: Effective on September 29, 1982.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3706, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Henry M. Jacoby, Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 227, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1900).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of January 13, 1982 (45 FR 1408) that Diamond Shamrock Corp., 1100 Superior Ave., Cleveland, OH 44114, had submitted a pesticide petition (PP 2F2602) to EPA. This petition proposed that tolerances be established for the combined residues of the fungicide chlorothalonil (2,4,5,6-tetrachloroisophthalonitrile) and its metabolite (4-hydroxy-2,5,6-trichloroisophthalonitrile) in or on the raw agricultural commodities stone fruits (apricots, cherries (sweet and sour)), damsons, nectarines, pawpaws, peaches, plums, and prunes) at 0.2 part per million (ppm). The petition was subsequently amended to list the individual commodities apricots at 0.5 ppm; cherries (sweet and sour) at 0.5 ppm; nectarines at 0.5 ppm; peaches at 0.5 ppm; plums at 0.2 ppm; and prunes at 0.2 ppm.

No comments were received in response to the notice of filing. An adequate analytical method for determining residues of chlorothalonil and its metabolite is available, gas chromatography with an electron capture detector, for enforcement purposes.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data on technical chlorothalonil considered in support of the tolerances included a 2-year dog feeding study with a no-observed-effect level (NOEL) of 60 ppm; a 2-year rat feeding study with a NOEL of 60 ppm with no oncogenic effects; a 3-generation rat reproduction study with a NOEL of 15,000 ppm (reproduction) and 1,500 ppm (lactation); a rabbit teratogenicity study with a NOEL of 62.5 mg/kg (HDT); five mutagenicity studies as follows: cell transformation in newborn rats, negative; mammalian cell gene point mutation, negative; Ames test, negative; in vitro mammalian point mutation, negative; and DNA repair, negative (except, it may interface with DNA repair in TA-1538 cells); and a rat oncogenicity study—NCI, carcinogenic in male and female Osborne-Medel rats, but not on $B_6C_3F_1$ mice at 10,126 ppm (HDT).

Deficiencies have been alleged in the report of the NCI study; however, the present tolerance regulation is based on the assumption that the NCI study is valid. In an Incremental Risk Assessment of the carcinogenic and chronic effects, the analysis showed that, based on the theoretical exposure associated with this tolerance, the carcinogenic upper limits of risk are about 1 in 10—7.

The toxicology data on the metabolite considered in support of the tolerances included a 90-day dog feeding study with a NOEL of less than 50 ppm; a rabbit teratogenicity study with a terata NOEL of greater than 5 mg/kg (HDT); and four mutagenicity studies as follows: a host-mediated assay in the mouse, negative; in vivo cytogenic in the mouse, negative; dominant lethal in the mouse, negative but a significant increase in early deaths at week 3 of mating (spermatid stage) was noted at 6.5 mg/kg/day; and dominant lethal in the rat, negative at 8 mg/kg/day for 5 days. Based on the dog feeding study, the NOEL is 60 ppm or 1.5 milligrams (mg)/kilogram (kg) of body weight (bw). Using a 100-fold safety factor, the acceptable daily intake (ADI) is 0.0150 mg/kg/of body weight/day and the maximum permissible intake (MPI) is 0.90 mg/day for a 60 kg. person. These tolerances utilize a maximum of 0.009% of the ADI; published and proposed tolerances utilize 86.99% of the ADI.

The pesticide is considered useful for the purpose for which the tolerances are

sought. As the proposed uses do not involve any items normally used for livestock feed, there is no expectation of secondary residues in meat, milk, poultry and eggs. It is concluded that the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after the date of publication of this notice in the **Federal Register**, file a written objection with the Hearing Clerk EPA at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

EFFECTIVE DATE: Effective on: September 29, 1982.

(Sec. 408(d)(2), 68 Stat. 512, (21 U.S.C. 346a(d)(2))).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Raw agricultural commodities, Pesticides and pests.

Dated: September 17, 1982.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, 40 CFR 180.275 is amended by adding and alphabetically inserting the below named commodities to read as follows:

§ 180.275 Chlorothalonil; tolerances for residues.

* * * * *

Commodities	Parts per million
Apricots	0.5
Cherries (sweet and sour)	0.5
Nectarines	0.5
Peaches	0.5
Plums	0.2
Prunes	0.2

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6339

[NEV-051745]

Nevada; Partial Revocation of Reclamation Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes Secretarial Orders dated January 31, 1903, October 6, 1931 and October 28, 1953 as they affect 194.31 acres of land withdrawn for the Colorado River Storage Project. This land is within the Lake Mead National Recreation Area and thus will remain closed to surface entry and mining. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, 702–784–5703.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Secretarial Orders dated January 31, 1903, October 16, 1931, and October 28, 1953 which withdrew certain lands for use by the Bureau of Reclamation for the Colorado River Storage Project are hereby revoked insofar as they affect the following described land:

Mount Diablo Meridian

T. 32 S., R. 66 E.,
Sec. 12, lots 5, 6, 9, 10, 11, 12, excepting a strip of land 300 feet in width landward from the existing bank of the Colorado River.

The area described aggregates approximately 194.31 acres in Clark County, Nevada.

The above described land lies within the Lake Mead National Recreation Area and will remain closed to operation of the public land laws and the mining laws. The land has been and will remain open to mineral leasing.

Inquiries concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Nevada State Office, 300 Booth Street, P.O. Box 12000, Reno, Nevada 89520.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

September 20, 1982.

BILLING CODE 4310-84-M

43 CFR Public Land Order 6340

[F-034788]

Alaska; Partial Revocation of Executive Order No. 8847, as Amended; Modification of Public Land Order No. 5187; and Classification of Land for Conveyance to Cook Inlet Region, Inc.

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes Executive Order No. 8847, as amended, modifies Public Land Order 5187, and classifies and considers as withdrawn certain lands for conveyance to Cook Inlet Region, Inc., under the Alaska Native Claims Settlement Act.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Beau McClure 202–343–6511 or Robert D. Arnold, Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

SUPPLEMENTARY INFORMATION: By virtue of the authority vested in the Secretary of the Interior, by Sec. 17(d)(1) of the Alaska Native Claims Settlement Act (ANCSA), 85 Stat. 688, 708 (43 U.S.C. 1616(d)(1)), and pursuant to Sec. 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; (43 U.S.C. 1714), it is ordered as follows:

1. Executive Order No. 8847 of August 8, 1941, as amended, which withdrew lands for use of the Department of the Army as an aerial bombing and gunnery range, is hereby revoked in part, as to the lands described below:

Fairbanks Meridian, Alaska

T. 1 S., R. 1 W.
Portion of NW¼, Sec. 24, further described as:
Beginning at the NW corner of said Section 24, said corner being on the boundary line of that certain easement dated 5 Nov 64 granted

by the United States of America to the State of Alaska for a highway right-of-way, Project No. F-062-4(16) SR-2 Fairbanks SE; thence on said line, through a 2,715.00 foot radius curve to the right (whose center point bears S. 00°03'15" E.) having a central angle of 35°, an arc distaince of 1,658.38 feet; thence S. 54°56'45" E. a distance of 299.54 feet; thence leaving said boundary line and continuing S. 54°56'45" E. a distance of 200.00 feet, more or less, to the east line of said W½ of the NE¼ of the NW¼; thence south on said line a distance of 300.00 feet, more or less, to the most southerly boundary line of said highway easement; said line being common to the south right-of-way line of the Old Richardson Highway; thence on said common line, N. 81°47'29" W. a distance of 1,700.00 feet, more or less, to a point being the terminus of said common line, said point being S. 81°47'29" E. a distance of 278.37 feet from the west line of said Section 24; thence continuing on the said right-of-way line of the Old Richardson Highway N. 81°47'29" W. a distance of 278.37 feet to said west line of Section 24; thence leaving said right-of-way line and on said west line N. 00°03'15" W. a distance of 795.00 feet, more or less, to said point of beginning, and containing a total of approximately 31.73 acres.

2. Subject to valid existing rights, the lands described in paragraph 1, excluding lots 10, 11, 15, and 16 which aggregate approximately 4.59 acres and are no longer under Federal jurisdiction, are classified as suitable for conveyance to Cook Inlet Region, Inc., in accordance with paragraph I.C.(2) of the Terms and Conditions for Land Consolidation and Management in the Cook Inlet Area, as clarified August 31, 1976, and Sec. 12(b)(6) of the act of January 2, 1976 (89 Stat. 1151).

3. Public Land Order No. 5187 of March 15, 1972, which withdrew lands in military reservations for the protection of the public interest under Section 17(d)(1) of the ANCSA is hereby revoked so far as it relates to the lands in paragraph 1 of this order.

4. Subject to valid existing rights, the lands described in paragraph 2 are hereby withdrawn from all forms of appropriation under the public land laws, including selections by the State of Alaska under the Alaska Statehood Act, 72 Stat. 339, and from location and entry under the mining laws, 30 U.S.C. Ch. 2, and from leasing under the Mineral Leasing Act of February 25, 1920, as amended, 30 U.S.C. 181-287.

5. Prior to any conveyance of the lands described in paragraph 2, the lands shall be subject to administration by the Secretary of the Interior under applicable laws and regulations, and his authority to make contracts and to grant leases, permits, rights-of-way, or easements shall not be impaired by this order. Applications for leases under the Mineral Leasing Act, as amended, 30 U.S.C. 181-287, will be rejected until this order is modified or the lands are appropriately classified to permit mineral leasing.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

September 20, 1982.

BILLING CODE 4310-84-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6420]

Suspension of Community Eligibility Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule list communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the flood plain management requirements of the program. If FEMA receives documentation that the community has adopted the required flood plain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the Federal Register.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287-0270, 500 C Street Southwest, Donohoe Building—Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fourth column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the Federal Register.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended, provides that no direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP, with respect to which a year has elasped since identification of the community as having flood prone areas, as shown on the Federal Emergency Management Agency's initial flood insurance map of the community. This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A-95.

Pursuant to the provision of 5 U.S.C. 605(b), the Associate Director of State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood

insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in non-compliance of the Federal standards required for community participation.

In each entry, a complete chronology of effective dates appears for each listed community.

List of Subject in 44 CFR Part 64

Flood insurance, Flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified	Date
Arizona: Pinal	Apache Junction, city of	040120B	Dec. 20, 1979, emergency; Sept. 30, 1982, regular; Sept. 30, 1982, suspended.	June 10, 1980	Sept. 30, 1982.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 15

[Gen. Docket No. 81-462; RM-3738; RM-3789; FCC 82-407]

Amendment To Reclassify Coin-Operated Electronic Games From Class B to Class A Computing Devices

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In response to two petitions from manufacturers this Report and Order reclassifies coin-operated electronic games as Class A (commercial) computing devices instead of the past Class B (residential) classification under Part 15 Subpart J. Under the computing device requirements adopted to control interference from digital electronic equipment, Class B requirements are more stringent than Class A requirements. In addition to placing coin-operated games under Class A, this Order changed the equipment authorization required for these games from certification by the FCC to verification by the manufacturer.

DATE: Effective October 18, 1982.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Sydney P. Bradfield, Office of Science and Technology, RF Devices Branch, Washington, DC 20554, (202) 653–8247, Room 8302.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 15

Communication equipment, Computer technology, Labelling, Radio, Reporting requirements.

Report and Order

Adopted: September 1, 1982.

Released: September 9, 1982.

1. The Commission adopted a Notice of Proposed Rule Making (NPRM) [1] in the above captioned proceeding in response to two petitions from manufacturers of coin-operated electronic games.[2] The NPRM requested comments on a proposal to amend Subpart J of Part 15 of the FCC Rules to reclassify coin-operated video and arcade electronic games from Class B computing devices to Class A computing devices. It also proposed to change the equipment authorization requirement for coin-op games from certification by the Commission to verification by the manufacturer.

2. Comments and reply comments were received October 5, 1981 and October 20, 1981, respectively. The comments, with one minor exception, favored adoption of the Commission's proposal. On the basis of the record in this proceeding and for the reasons stated herein, the Commission has reclassified coin-op games as Class A computing devices subject to verification by the manufacturer. The rules become mandatory for coin-op games manufactured after December 1, 1982. The adopted rules are attached in the Appendix.

Background

3. In 1979, the Commission adopted new rules to control the interference potential of digital electronic equipment (defined as computing devices) to radio communications.[3] These rules established two classes of computing devices: Class B for equipment which is marketed for use in a residential environment; and, Class A for equipment marketed for use in a commercial environment. The rules established limits on conducted and radiated emissions for each class of equipment. Since equipment used in a residential environment has a higher interference potential, Class B limits are 3 times more restrictive than Class A limits.[4]

4. The rules also require that computing devices must be tested and verified for compliance by the manufacturer. Personal computers, associated peripherals and coin-operated electronic games must be certificated by the Commission. Certification is a more burdensome requirement because the manufacturer must wait until a grant of certification has been issued by the Commission, before the device can legally be marketed (See 47 CFR Subparts I and J).[5]

5. Notwithstanding the fact that coin-op games are played in retail establishments where Class A limits would normally be considered sufficient to protect radio communications, the Commission classified all electronic games, including coin-op games, as

[1] Notice of Proposed Rulemaking in Gen. Docket 81-462 adopted July 16, 1981 and released August 27, 1981 (FCC 81-320; 46 FR 44793, September 8, 1981).

[2] RM-3738 filed by Williams Electronics Inc. on August 7, 1980. RM-3789 filed by Atari Inc. on October 24, 1980.

[3] 47 CFR Part 15 Subpart J adopted by *First Report and Order* in Docket 20780 (44 FR 59530; October 16, 1979) and revised by *Order Granting in Part Reconsideration* in Docket 20780 (45 FR 24154; April 9, 1980).

[4] Computing equipment in a commercial environment is further away from susceptible receivers as compared with equipment in residential areas in closer proximity to receivers. Because the emission level decreases with distance, the limits can be higher for Class A equipment and thereby afford the same interference protection. See the *First Report and Order* in Docket 20780 for a more extensive explanation and a complete derivation of the emission limits for computing devices.

[5] Both certification and verification require the manufacturer to measure the emissions from the equipment. Under certification, this data is submitted to the Commission for review. Marketing is prohibited until the Commission has issued a Grant of Equipment Authorization. Under verification, no submission to the Commission is required and the equipment may be marketed as soon as the manufacturer determines that his equipment complies.

Class B computing devices subject to certification by the Commission. The tighter requirements for games were considered necessary in 1979 for the reasons stated in the First Report and Order in Docket 20780. The two primary reasons are:

(1) Expected proliferation and distribution of games, which made them a greater risk to radio communications.

(2) Coin-op games were identified as a source of interference to the Highway Patrol communications at a frequency of 42 MHz in several western states.

6. The compliance date for personal computers and coin-op games was set for January 1, 1981.[6] In late 1980, before certification became mandatory on January 1, 1981, Williams and Atari petitioned the Commission to reclassify coin-op games as Class A computing devices subject only to verification. Subsequently, several coin-op manufacturers filed petitions requesting the Commission to stay the January 1, 1981 compliance date for coin-op games pending resolution of the two above mentioned petitions. The Commission stayed the date until October 1, 1981 in an Order adopted October 4, 1980.[7] It subsequently stayed the date again in the NPRM until final action in this proceeding. During this stay, coin-op games have been subject to the general non-interference requirement of § 15.3 and interim labelling requirement which is intended to warn about possible interference. Coin-operated games, however, do not have to meet emission requirements at present.

Commission Proposal

7. In response to the petitions filed by Atari and Williams, the Commission in this proceeding proposed to reclassify coin-op games as Class A computing devices subject only to verification. This proposal was based on the industry's contentions that technology of the games has changed since 1974 [8] and that the more liberal Class A limits and verification would be adequate to protect communications (See paragraphs 6–11 of the NPRM in this proceeding). These claims were supported in part by measurements made by Atari with the aid of the Oregon and Nevada Highway Patrols. Both police departments claim they are satisfied after the tests that the Class A limits would be sufficient to protect their radio communications.

8. Comments on this proposal were received from the electronic game industry manufacturers and the Association of Maximum Service Telecasters (AMST). In support of the Commission's proposal the game industry repeated the same basic arguments made in the rulemaking petitions and associated comments. The industry arguments are summarized as follows:

(a) Coin-op games should be classified as Class A computing devices, since vendor games are played in commercial establishments and have the same characteristics as other Class A computing devices.

(b) Class B limits are thought to be overly restrictive and unnecessarily costly to the industry.

(c) The price, size, weight and coin box of vendor games do not make these games suitable for marketing to consumers for use in the home.

(d) Certification is perceived as an unduly burdensome requirement because of the frequent and sudden changes of games on the market. It is felt that potential delays in obtaining certification from the Commission would interrupt the game market. Verification by the manufacturer is considered to be sufficient.

9. AMST is the only commenter in this proceeding outside of the coin-op game industry. AMST does not specifically object to reclassifying coin-op games which are marketed to commercial users. However, AMST requests that coin-op games sold to consumers be required to meet Class B emission limits. In response to these comments, the coin-op game industry states that AMST's support of reclassification for coin-op games marketed only for commercial purposes is consistent with the current industry practice of marketing coin-op games for commercial use. Since marketing is directed to commercial establishments, AMST's recommendation for Class B compliance of coin-op games sold to consumers is considered irrelevant by the industry. According to the industry, it is impossible for manufacturers to separate out those few units which might later wind up in the home. Again the industry stresses that cost ($1500 to $2500), weight (approximately 175 lbs.), size (about 5 feet by 2.5 feet and 6 feet high), and the use of a coin-box mechanism tends to make these games unsuitable for the home market.

10. As for the compliance schedule, Bally recommends that compliance be mandatory 90 days after date of final action in this proceeding for new product lines first started into production by that date and on October 1, 1983 for all other product lines. This would be similar to the existing staggered compliance schedule found in the Rules for computing equipment subject to verification except that compliance has been mandatory since October 1, 1981 for equipment first started in production after that date.

Interference Generated by Coin-Op Games

11. After adoption of the proposal to reclassify coin-op games, six recent cases of interference generated by coin-op games came to our attention. Due to the importance of these interference cases to this proceeding, the Chief Scientist, under delegated authority, extended the deadlines for comments in an Order released December 24, 1981 to give interested parties an opportunity to comment. The interference reports are summarized in the Order which extended the comment period in this proceeding.[9] Most of the cases involve interference to land mobile radio communication services including public safety, police and ambulance radio communications. In addition to the interference cases put in the record for comment, we have had three new reports of interference from coin-op games to police and fire department radio communications and one case involving interference to an amateur radio station.

12. In response to these reports, the coin-op game industry filed consolidated comments reflecting the views of the manufacturers of coin-op games.[10] The manufacturers researched the six interference cases and submitted the results of their investigations with comments. The industry notes that as many as twenty to thirty additional interference problems were handled by manufacturers and distributors during 1981. These recent isolated instances of interference, according to the industry, should not alter the Commission's proposal to reclassify coin-op games as Class A computing devices.

13. The industry maintains that these interference cases do not show that

---

[6] In respect to computing equipment subject to verification, there are two dates of compliance depending upon when the equipment was first produced: October 1, 1981 for equipment first produced after that date and October 1, 1983 for equipment first produced before October 1, 1981. See Order Granting in Part Reconsideration in Docket 20780 at paragraphs 19–22.

[7] *Order Staying the January 1, 1981 Compliance Date for Coin Operated Electronic Games* adopted December 4, 1980 (FCC 80–708).

[8] According to industry, technological advances in electronic games involving the use of microprocessors have significantly reduced emission levels thus mitigating the interference that was reported in 1974–76.

[9] *Order Extending Comment Period* in Gen. Docket 81–462 adopted December 24, 1981 and released December 29, 1981 (47 FR 836, January 7, 1982).

[10] *Further Comments of Atari et al.* filed January 18, 1982.

Class A standards on coin-op games would be inadequate for protecting licensed radio communications. It is stressed that during the pendency of this proceeding coin-op games have not had to comply with any radiation limits. The manufacturers claimed to have determined that the games involved in the interference complaints exceeded the Class A radiation limits. They state that tests on prototype of these games indicated emissions as high as 10 times Class A limits on harmonics of the games' clock frequency. In FCC Laboratory tests of four coin-op games one of which happened to be a model of a game reported to be causing interference, it was also observed that this particular model exceeded the Class A limits.[11] The industry asserts that if these games had complied with Class A limits interference would not have been likely to result.

14. More importantly, the industry asserts that there are too few cases of interference for the Commission to make a positive determination that tighter control of coin-op games is actually required to protect radio communications. It particularly points to the fact that there is no evidence to demonstrate that the Class A limit is inadequate for protecting radio communication from coin-op game interference.

15. Concluding, the industry states that severe hardships in terms of added costs, reduced game capability and delayed game introductions would be experienced by the industry and ultimately the public if compliance with Class B limits and certification is required. According to the industry, these burdens are not in the public interest since compliance with Class A requirements will minimize interference.

Commission Response

16. The Commission in FCC Docket 20780 has already determined that emission control standards are necessary for coin-op games. The recently reported interference cases reaffirm that conclusion. The central issue in this proceeding is whether the more liberal emission limit for a Class A computing device and verification of the game by the manufacturer are sufficient to protect radio communications. Unfortunately, there is no simple way to answer the question of sufficiency of the Class A limits at this time. This type of question can only be answered when we have more experience in evaluating the effectiveness of the Class A and Class B limits.

17. The proposal is adopted for the following reasons:

(a) The limited technical data available to us suggest that the Class A limits may be sufficient to protect communication receivers in the majority of locations that games are operated. More experience with the Class A limits is needed to make a more accurate determination of its adequacy.

(b) To arrest the developing interference problems, we believe it is important to implement some minimal emission control standards as soon as possible. Immediate implementation of the Class A limits should satisfy this need for minimal standards.

(c) Relaxing the degree of compliance will reduce the burden on industry and promote the Commission's objective to reduce overly burdensome rules while at the same time protect radio communications. If it is later determined that the Class A limits are not protecting communications, the Commission will immediately start a new proceeding to impose the more restrictive Class B and certification requirement.

18. Since we have received harmful interference complaints and are continuing to receive reports of harmful interference generated by coin-op games, we are hereby setting an earlier mandatory date of compliance for coin-op games than for other Class A computing devices. Notwithstanding the existing verification schedule for Class A equipment recommended in modified form by the industry for coin-op games (see paragraph 10), the Commission reserved the authority to require compliance prior to the Class A mandatory effective date if harmful interference is caused to radio communications.[12] Accordingly, in order to minimize harmful interference problems and to provide a reasonable time frame for manufacturers to verify their products, all coin-op games manufactured after December 1, 1982 shall be verified as complying with Class A standards prior to marketing.

19. To insure that the Class A limits are adequate and that a manufacturer does in fact verify compliance of its game, the Commission will be closely monitoring this situation for the next year or so. The Commission's Authorization and Standards Division of the Office of Science and Technology will be requesting manufacturers to ship a sample game to the FCC Laboratory in Columbia, Maryland for spot checking.

20. With respect to concern of AMST about second hand coin-op games finding their way into a home, we do not expect this to be a problem for the following reasons. First, smaller and more versatile video games are readily available to consumers from retail outlets. Second, the use of coin-op games will in all likelihood have limited use in the home because most vendor games are limited to one game only; whereas, home games have flexibility in the number of games and software that can be used. Finally, it does not appear reasonable to impose Class B and certification on all coin-op games in the event a few of the games are in fact sold second hand to private users.

Pre-Compliant Operation

21. The Commission recently adopted an Order to relax § 2.806 of the marketing rules to allow operation of computing equipment in some instances prior to compliance.[13] This Order deferred to this proceeding consideration of the issue of pre-compliant operation of coin-op games at the user's premises.

22. As amended, § 2.806 allows any computing device including coin-op games to be operated prior to a determination of compliance for purposes of compliance testing, demonstrations at trade shows, and evaluation of performance and customer acceptability at the manufacturer's facilities. In addition, the Commission amended § 2.806 to allow the added privilege of pre-compliant operation at the user's site for a Class A computing device which cannot be determined as acceptable to the customer at the manufacturer's premises because of size or unique capability. In general, this exemption (§ 2.806(d)) will *not* apply to games. Several manufacturers of coin-op games, in their filings in Gen. Docket 81-463, requested this additional privilege of pre-compliant operation at the user's premises (arcades in this case) for coin-op games so that customer reaction to a new game could be measured prior to full scale production.

23. Section 2.806 permits limited pre-compliant operation for testing and evaluation purposes in the development of any product. However, the Commission is reluctant to permit general pre-compliant marketing and operation of coin-op games at the user's premises. We do not believe that adequate control can be maintained over interference potential of such a device. More importantly, pre-compliant operation does not appear to be

[11] FCC Lab Project No. 83-341, file number 31000/EQU/4-0, dated February 5, 1982.

[12] 47 CFR 15.814(d).

[13] Gen. Docket 81-463: In the matter of Amendment of § 2.806 to permit operation of computing equipment prior to certification or verification. Report and Order adopted March 11, 1982, released March 22, 1982 (FCC 82-119); 47 FR 13809, April 1, 1982.

necessary since coin-op games will now be subject to verification by the manufacturer. By changing the equipment authorization to verification, the speed with which a manufacturer can place a new game on the market is left solely to the discretion of the manufacturer and depends only on how fast the manufacturer finds it feasible to verify his new game.

Final Regulatory Analysis

24. Pursuant to 5 U.S.C. 601 et seq. an Initial Regulatory Flexibility Analysis was incorporated in paragraph 17 of the Notice of Proposed Rulemaking. In paragraph 25 of this Notice, written comments on this Analysis were solicited with the same filing deadlines as comments on the rest of the Notice. No comments in response to this request were received.

I. Need for and objective of rule

25. The Commission is relaxing the regulations governing coin-op games from Class B to Class A computing device standards so that manufacturers are not unnecessarily burdened. These Class A requirements are necessary as a minimum requirement to protect against harmful interference generated by coin-op games.

II. Summary of issues raised in comments on Initial Analysis

26. No comments were received specifically concerned with the Initial Regulatory Flexibility Analysis in the Notice in this proceeding. Since these rules do not impose any new reporting or record keeping requirement and actually decrease the administrative burdens on manufacturers under the verification program of equipment authorization in lieu of certification, there is no deleterious economic effect on manufacturers of coin-op games whether a small business or large. In fact, the effects will be beneficial.

III. Significant alternatives

27. The regulations amended herein respond to petitions from the coin-op game industry seeking relief by reclassification under the less stringent Class A requirements of the computing device rules. This relief is granted.

Ordering Clauses

28. Pursuant to the above and under the authority of Sections 4(i), 302 and 303(r) of the Communications Act of 1934, as amended, Part 15 is amended as set out in the Appendix of this Order.

29. It is ordered that this amendment shall become effective October 18, 1982.

30. It is further ordered that this proceeding is terminated.

31. For further information contact Mr. Sydney Bradfield, Office of Science and Technology, phone 202-653-8247.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 15—RADIO FREQUENCY DEVICES

Part 15 is amended as follows:

§ 15.4 [Amended]

1. Section 15.4(p) is amended by removing the example of "electronic games" in the second sentence.

2. Section 15.814 is amended by adding a new paragraph (f) to read as follows:

§ 15.814 Class A computing device: verification requirement.

* * * * *

(f) Notwithstanding paragraphs (a) and (b) of this section, coin-operated electronic games manufactured after December 1, 1982 shall be verified for compliance with the requirements for a Class A computing device prior to marketing pursuant to Subpart I of Part 2 of this chapter.

§ 15.834 [Amended]

3. Section 15.834 is amended by removing the phrase "(including coin-operated games)" in paragraph (a)(1).

[FR Doc. 82-26699 Filed 9-28-82; 8:45 am]

47 CFR Part 15

[Gen. Docket No. 80-439; FCC 82-406]

Amendment to Clarify Which Electronic Games Are Exempted From Commission Certification

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order further clarifies which categories of electronic toy games are subject to FCC approval, and which need only be tested by the manufacturer, with regard to compliance with radio emissions limits. It responds to a petition filed by Texas Instruments, Inc. requesting reconsidertion of the Report & Order in the docket. This action effectively allows most electronic toy games to be self-approved by the manufacturer.

DATE: Effective October 18, 1982.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mr. Julius P. Knapp, Office of Science and Technology, RF Devices Branch, Washington, DC 20554, (202) 653-8247, Room 8302.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 15

Communications equipment, Computer technology, Labelling, Radio, Reporting requirements.

Memorandum Opinion and Order

Adopted: September 1, 1982.
Released: September 9, 1982.

1. A *Report and Order* in this proceeding was adopted March 11, 1981 and released March 24, 1981.[1] Texas Instruments, Inc. (TI) filed a timely petition for reconsideration of the *Report and Order*. The Toy Manufacturers of America, Inc. (TMA), a trade association, filed comments supporting the TI petition. Milton Bradley Co. submitted a letter dated June 17, 1981 also supporting the TI petition. No other comments or reply comments were received.

Background

2. Electronic games which employ digital circuitry are subject to the Commission regulations for computing devices in Part 15 Subpart J. These rules are designed to control the interference potential of computing devices to TV and radio communications. The computing device rules were adopted in September 1979 by a *First Report and Order* in Docket 20780.[2] Revisions were made in March 1980 by *Order Granting in Part Reconsideration* in Docket 20780.[3] The regulations were instituted after the Commission received numerous reports of interferenoe caused by a variety of devices having in common the use of digital electronics. Lengthy study and technical analysis were conducted before the rules were adopted to determine appropriate interference protection requirements.

3. The regulations adopted in 1979 included a rule § 15.834 that required all electronic games to meet the Class B[4]

---

[1] Report and Order in General Docket 80-439, adopted March 11, 1981, released March 24, 1981, 46 FR 19478, March 31, 1981

[2] *First Report and Order* in Docket 20780, adopted September 18, 1979, released October 11, 1979, 79 FCC 2d 28 (1979); 44 FR 59530, October 16, 1979.

[3] *Order Granting in Part Reconsideration* in Docket 20780, adopted March 27, 1980, released April 9, 1980, 79 FCC 2d 67 (1980); 45 FR 24154, April 9, 1980.

[4] The definitions of Class A and Class B computing devices are given in § 15.4(o) and (p) of

computing device emissions limits and be FCC certificated.[5] On reconsideration in 1980, § 15.834 was amended, narrowing the scope of the game certification requirement. The amended § 15.834 required certification for ". . . electronic games, including video coin-operated games, but excluding self-contained, hand-held games that do not use a TV receiver for display."[6] Hand-held games remained subject to manufacturer verification of compliance with Class B limits. (The Class B limits apply irrespective of which authorization procedure is to be used.)

4. Arguing that "hand-held" is too vague (e.g. how big is hand-held?), TMA petitioned the Commission to delete the exemption from certification based on "hand-held" and adopt a new exemption based on the game's clock frequency and/or input power. In the *Report and Order* in the instant proceeding, the Commission amended § 15.834 to exempt an electronic game from certification if it met the following conditions: (1) The game is self contained; (2) the game does not use a TV receiver as a display device; and (3) the game has a clock frequency below 495 kHz.

TI Petition for Reconsideration

5. TI, in its petition, requests reconsideration on two points. First, TI urges that the clock frequency dividing line be shifted from 495 kHz to 1.5 MHz. Second, TI requests that the certification deadline be delayed for those games which remain subject to certification.

6. Several factors weigh in TI's request for shift of the clock frequency dividing line. Current generation toy electronic games employ P–MOS and N–MOS technology.[7] (Only a few games now on the market employ a clock frequency above 495 kHz.) However, according to TI, the trend over the next 2 to 5 years will be to move away from P–MOS and N–MOS technology and move towards C–MOS and other technologies that exhibit higher clock frequencies but consume less power. Emissions thus can be expected to fall on higher frequencies but the levels will be lower. In studying the problem, TI contemplated proposing a certification/verification dividing line based upon a device's clock frequency and power. TI concluded that such a dividing line is impractical due to the difficulty in identifying and measuring the power that contributes directly to the interference signal. As a next best alternative, TI performed a theoretical analysis to evaluate whether the clock frequency dividing line might nevertheless be raised above 495 kHz without unduly increasing the risk of interference. The analysis indicates that the line of demarcation could safely be raised to 1.5 MHz.

7. As to the need to allow more time for certification, TI presents the following argument. Because of the manner in which § 15.834 was revised, it effectively required certification retroactively for all games having a clock frequency above 495 kHz that were produced since January 1, 1981.[8] TI submits that the record does not support the advancement of compliance dates for the class of games. The date for compliance with the certification requirements should be extended to October 1, 1981 for products first placed into production after that date, and to October 1, 1983 for all others. This was the compliance schedule before the rule was amended and only verification was required. TI goes on to explain that the marketing cycle for toy games is keyed around the Christmas selling season and that any marketing delays incurred as a result of the certification process may result in serious hardships to the toy manufacturers. Therefore, it is especially important to allow an adequate period of time for manufacturers to obtain certification.

8. Both TMA and Milton Bradley strongly support the TI petition for reconsideration. They affirm that the information and arguments presented by TI are accurate and correct.

Discussion

9. The petitioner's proposal to require certification for games with a clock frequency greater than 1.5 MHz as opposed to 495 kHz, is a short term and incomplete solution to the matter at hand. The parties commenting in this proceeding generally agree that clock frequency alone does not determine the potential for interference; the emissive character also depends on such factors as circuit layout, accessories, and power of the interfering signal. If there is a simple set of technical characteristics which could be used to distinguish between games which should be certificated and those which need only be verified, it is not readily apparent. Moreover, the selection of an arbitrary technical characteristic such as clock frequency to determine whether a game is subject to certification or verification will apparently result in the need to regularly reexamine and revise the requirement as technology progresses.

10. TI's theoretical analysis showing that game clock frequency may be raised from 495 kHz to 1.5 MHz without potentially increasing the interference risk, assumes that all other factors are effectively held constant. We do not find fault in the analysis itself, but as explained in the previous paragraph, the assumption that other factors besides clock frequency will be constant or similar from one game to the next is not representative of what occurs in actual practice. That is, the combination of factors which affect the emissions characteristics are likely to vary from one game to the next.

11. We have reviewed the record in Docket 20780 (the proceeding which originally set forth the requirements for electronic games) and the record in the instant proceeding, and nowhere has it been shown that games with clock frequencies above a certain point possess characteristics which warrant the Commission's attention in the way of certification. In light of this and the other circumstances discussed above, we have elected to revise and relax § 15.834 beyond what TI has requested. Toy electronic games intended for home use will be subject to manufacturer verification of compliance regardless of clock frequency. We should point out that a game which uses a TV receiver for display is governed by the Class I TV device rules in Part 15 Subpart H and is currently subject to FCC type approval.[9] As for games intended for use in commercial environments (e.g. coin

---

Part 15 of the Rules. A Class A computing device is equipment intended for use in commercial, industrial or business environments. Equipment intended for use in residential environments is termed Class B. The technical requirements for Class A devices are less strict than the Class B, due to a lower potential for interference.

[5] The verification and certification equipment authorization procedures are set forth in Part 2 Subpart J. Verification calls for the manufacturer to perform tests to determine compliance. Submission of results to the FCC is not required. Certification requires the submission of an application with test results and other documents to the Commission for review and approval. Equipment authorization is a prerequisite to legal marketing, pursuant to Subpart I of Part 2.

[6] See *Reconsideration* in Docket 20780 (reference footnote 3 above), Appendix B, § 15.834(a)(1).

[7] The terms P–MOS, N–MOS and C–MOS refer to various methods used for construction of digital integrated circuits. MOS stands for metal oxide semiconductor. The prefixes P or N refer to the type of doping of the substrate. The prefix C refers to complimentary type architecture (using P and N type doping).

[8] See § 15.834 paragraphs (a) and (d).

[9] The computing device requirements do not apply where a device is subject to emanation requirements elsewhere in the rules. See § 15.4(n). A number of changes are contemplated for the rules in Part 15 Subpart H. See the Notice of Proposed Rule Making in Docket 79–244 adopted September 18, 1979, 44 FR 59670, October 16, 1979. The type approval requirement was proposed to be relaxed to certification.

operated games), this matter is being addressed in a separate proceeding.[10]

12. The Commission has had occasion to measure emissions from small electronic games that were designed to meet Class B emissions limits—some with clock frequencies well above 495 kHz.[11] The games were found in our tests to meet the limits. It is apparent from this that manufacturers are not having particular difficulty in conforming to the requirements and possess adequate knowledge of the measurement procedures to be utilized. Based on the compliance record of the devices we've tested, and the responsible actions demonstrated by manufacturers in our contacts with them thus far,[12] we believe that toy game manufacturers will test and verify their games as the rules require.

13. We believe that the added burden imposed by certification is not warranted for the type of devices which are the subject to this proceeding, and it appears that vertification will provide an adequate safeguard against these devices causing interference. The confusion that arose previously surrounding the authorization requirements for games should be alleviated by the reclassification of coin-operated games from Class B to Class A [13] because there no longer is a need to distinguish between Class B games subject to certification as opposed to verification.

14. As a result of the action we are taking, the petitioner's concern about extenaion of the certification compliance date is no longer an issue since there are no longer any games subject to certification. As for the verification schedule, instead of the tiered verification compliance schedule in § 15.834, we have decided to set a single compliance deadline of October 1, 1983 for vertification of electronic toy games (except coin-operated games). This is the same cut off date as that imposed for most other computing devices,[14] and the toy manufacturers supported this deadline in their comments. Manufacturers are encouraged to verify compliance in advance of October 1, 1983 if at all possible. No further action is required for those devices which were certificated or verified before the instant docket was finalized.

Summary/Ordering Clause

15. In light of the TI petition for reconsideration and other facts surrounding this matter, we have reconsidered the basic issue raised in the proposal in this docket: The merits or deficiencies of certificating certain games and verifying others according to the game's clock frequency. We are now convinced that placing games into the certification or vertification categories according to clock frequency is inappropriate. We have decided therefore to place the subject electronic games in the vertification category, regardless of clock frequency. The emissions limits for the devices in question have not been changed.

16. Pursuant to authority in Sections 4(i), 302, And 303(r) of the Communications Act of 1934, as amended, it is ordered that effective October 18, 1982 § 15.834 is amended as set out in the Appendix to this Order.

17. In view of the action adopted herein, the specific changes requested in the TI petition for reconsideration are made moot.

18. For further information about this Order, contact Mr. Julius P. Knapp, Office of Science and Technology, Federal Communications Commission, Washington, D.C. 20554, phone 202–653–5247.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission,

William J. Tricarico,

Secretary.

Appendix

PART 15—RADIO FREQUENCY DEVICES

1. The current text of § 15.834(a)(1) is removed and this paragraph is reserved.

2. The current text of § 15.834(d) is revised to read as follows:

§ 15.834 Class B computing device: Compliance requirement.

* * * * *

(d) The first production compliance date of paragraph (b) of this section may be disregarded for electronic games. All Class B electronic games manufactured after October 1, 1983 must be verified for compliance with Class B requirements.

(Note.—For games that utilize a TV receiver for display see Part 15 Subpart H.)

[Gen. Docket No. 78–391]

Improvements to UHF Television Reception; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: This document corrects typographical errors in the Commission's Report and Order in General Docket 78–391, Improvements to UHF Television Reception (47 FR 35975, August 18, 1982).

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Philip B. Gieseler, 653–5940.

SUPPLEMENTARY INFORMATION:

Released: September 9, 1982.

The following typographical corrections are made concerning the Report and Order in General Docket 78–391, FCC 82–333, released August 6, 1982 (47 FR 35975, August 18, 1982). These corrections are being made in the rule changes that accompany the Report and Order.

§ 15.63 [Corrected]

1. In § 15.63, paragraph (c)(2) is corrected to read "The average of the measurements shall not exceed 350 microvolts per meter." (47 FR 35989, column 1.)

§ 15.65 [Corrected]

2. In § 15.65, paragraph (c) is corrected to read "* * * tuning aids of the same type and comparable capability and quality shall be provided for the UHF portion of that receiver." (47 FR 35989, column 2.)

3. In the second listed rule change to Part 73, in the list of rules in which the number 83 is replaced by the number 69,

---

[10] A Notice of Proposed Rule Making in Gen. Docket 81–462 to change the classification of coin-operated games from Class B to Class A was adopted by the Commission on July 16, 1981, released August 27, 1981, FCC 81–320, 46 FR 44793, September 8, 1981. This proposal was in response to a petition filed by coin-operated game manufacturers, saying that Class A limits offer adequate interference protection for this type of game. The proposed rule revision, if adopted, would permit compliance with Class A limits and require verification instead of certification.

[11] Shortly after the computing device rules were adopted, some manufacturers filed for certification of their hand-held games, and some units were examined at the FCC Laboratory. The applications were returned as unnecessary. See Public Notice released May 7, 1980 mimeo no. 31366. After the Report and Order was issued in the instant proceeding, applications for certification of games with clock frequency over 495 kHz were filed with the FCC Laboratory, along with samples.

[12] During the pendency of this proceeding, several manufacturers have applied for and obtained certification of their devices. In some instances waivers were requested to allow additional time to obtain certification. Waivers were issued to Texas Instruments, Milton Bradley Co., and Mattel Electronics by letters dated April 28, 1981, May 29, 1981 and June 9, 1981, respectively, FCC file no. 31030/EQU/4–3–7–1, by Chief Scientist under delegated authority.

[13] See footnote 10, above.

[14] See Sections 15.814 and 15.834 of the FCC Rules.

the following changes are made. (47 FR 35990, column 1.)

A. "73.687(a)(3) (two changes)" is changed to read "73.687(a)(3)."

B. "73.687(a)(b)" is changed to read "73.687(a)(6)."

Federal Communications Commission.

47 CFR Part 68

Editorial Amendment of the Commission's Rules To Correct a Typographical Error; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: This document corrects an editorial amendment to the Commission's rules on the connection of terminal equipment to the telephone network that appeared on page 10219 of the **Federal Register** on Wednesday, March 10, 1982, (47 FR 10219). The action is necessary to correct the date of a cited publication.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: William H. von Alven, Common Carrier Bureau, (202) 634–1833.

SUPPLEMENTARY INFORMATION:

Released: September 7, 1982.

The following correction of a typographical error is made in regard to an editorial amendment made to § 68.314(e)(1) of the Commission's rules, 47 FR 10219, published March 10, 1982.

The date shown for the Electronics Industries Association (EIA) Standard RS–464 as being December 1969 is incorrect; it should be December 1979.

Federal Communications Commission.

Edward J. Minkel,

Managing Director.

47 CFR Part 73

Oversight of the Radio and TV Broadcast Rules; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: In the *Order* regarding oversight of the radio and TV broadcast rules, published in the **Federal Register** on September 13, 1982 at 47 FR 40170, there is an error in the text of Item 2 of the Appendix (§ 73.561 Operating schedule; time sharing). It is changed to read correctly.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Steve Crane, Broadcast Bureau, (202) 632–5414.

SUPPLEMENTARY INFORMATION:

Released: September 21, 1982.

In the above captioned *Order*, BC 32014, released August 31, 1982 and published in the **Federal Register** on September 13, 1982 at 47 FR 40170, § 73.561, Operating schedule; time sharing (Item 2 of the Appendix) is incorrectly stated in that five asterisks which should follow paragraph (b) of the rule were inadvertently eliminated. It is corrected to read:

§ 73.561 Operating schedule; time sharing.

(a) All noncommercial educational FM stations will be licensed for unlimited time operation except those stations operating under a time sharing arrangement. (See § 73.1715). All noncommercial educational FM stations are required to operate at least 36 hours per week, consisting of at least 5 hours of operation per day on at least 6 days of the week; however, stations licensed to educational institutions are not required to operate on Saturday or Sunday or to observe the minimum operating requirements during those days designated on the official school calendar as vacation or recess periods.

(b) All noncommercial educational FM stations, including those meeting the requirements of paragraph (a) of this section, but will be required to share use of the frequency upon the grant of an appropriate application proposing such share time arrangement. Such applications shall set forth the intent to share time and shall be filed in the same manner as are applications for new stations. They may be filed at any time, but in cases where the parties are unable to agree on time sharing, action on the application will be taken only in connection with the renewal of application for the existing station. In order to be considered for this purpose, such an application to share time must be filed no later than the deadline for filing applications in conflict with the renewal application of the existing licensee.

47 CFR Part 90

Private Land Mobile Radio Services; Amendment To Clarify Practices and Procedures

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Managing Director, through delegated authority, adopted an editorial change to § 90.421 that added a new paragraph (k) which clearly permits licensees of communications systems in the Private Land Mobile Services to install assigned frequencies at locations where they will obtain assistance in emergency situations involving imminent safety to life or property. This action is taken so that a frequency may be installed at fixed locations without waiver to do so from the Commission. Planning to obtain assistance for emergency situation can be planned for routinely.

DATE: Effective August 27, 1982.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Charles F. Turner, Private Radio Bureau, Washington, D.C. 20554 (202) 632–6497.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 90

Administrative practices and procedures, Public safety radio services, Land transportation radio services, Industrial radio services, Special emergency radio services.

Order

Adopted: August 20, 1982.

Released: August 27, 1982.

1. The Commission is editorially amending its rules to clarify that its practices and procedures permit frequencies assigned to licensees in the Private Land Mobile Radio Services to be installed in the facilities of those who assist the licensee in emergencies and with whom the licensee must communicate in situations involving imminent safety to life or property.

2. Recently questions have been raised as to whether the above described practice is permissible. The Commission is, therefore, taking this action to assure that there is no misunderstanding on this point. The Commission's Rules already provide that any authorized station may communicate without restriction as to type, service, of licensee when the communications involved relate directly to the imminent safety-of-life or property. Clarifying this rule, therefore,

assures there will be no further misunderstanding on this point.

3. Accordingly, the Private Land Mobile Radio Service Rules are amended to reflect that a licensee may install its assigned frequency(s) in any facility with whom the licensee must communicate in situations directly related to the imminent safety of life and property. In all cases where such arrangements are made, the licensee is responsible for taking the necessary precaution to assure the facilities are only used in accordance with our Rules and Regulations.

4. Since this rule is both a general statement of policy and a rule of agency procedure and practice, and because it promotes the general public safety and well being, we conclude, pursuant to 5 U.S.C. and 553 (b) and (d), that notice and public procedure thereon is unnecessary, and the rule change should become effective immediately.

5. Accordingly, it is ordered, effective August 27, 1982, that Part 90 of the Rules and Regulations is amended as set out in the Attached Appendix.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 104, 303)

Federal Communications Commission.

Edward J. Minkel,

Managing Director.

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

Part 90 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended as follows:

Section 90.421 is amended by the addition of paragraph (k) as follows:

§ 90.421 Operation of mobile units in vehicles not under the control of the licensee.

* * * * * *

(k) In addition to the above, frequencies assigned to licensees in the Private Land Mobile Radio Services may be installed in the facilities of those who assist the licensee in emergencies and with whom the licensee must communicate in situations involving imminent safety to life or property.

[FR Doc. 82-26702 Filed 9-28-82; 8:45 am]

BILLING CODE 6712-01-M

---

47 CFR Part 97

[PR Docket No. 81-699; RM-3788; FCC 82-413]

Use of Additional Digital Codes in the Amateur Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rule (Report and Order).

SUMMARY: The Commission is authorizing the use of digital codes, other than those specifically defined in the Rules, by amateur radio stations operating on frequencies above 50 MHz. Amateur radio operators have demonstrated a growing interest in experimentation with such codes and communications systems based upon them (e.g. Packet Switching Systems). The broad deregulation being ordered in this proceeding will eliminate many constraints on the use of digital codes for experimentation and communication. Other related regulations regarding digital communications are also being relaxed.

DATES: Effective October 28, 1982.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Steve Lett, Private Radio Bureau, Special Services Division, (202) 632-4964

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 97

Radio.

Report and Order

(Proceeding Terminated)

Adopted: September 14, 1982.

Released: September 21, 1982.

1. On October 1, 1981 the Commission adopted a Notice of Proposed Rule Making [1] in the above-captioned matter proposing to allow amateur radio stations to use digital codes, other than those specified by the Commission, on amateur radio frequencies above 50 MHz. That Notice was in response to a petition for rule making, RM-3788 submitted by the American Radio Relay League, Incorporated (ARRL), which seeks amendment of the Amateur Radio Service Rules (Part 97) to provide for the use of any digital encoding technique in the amateur radio frequency bands above 50 MHz. Currently, the Rules only permit the use of the International Telegraphic Alphabet Number 2 (Raudot code) and the American Standard Code for Information Interchange (ASCII code). The comment period for the Notice ended January 15, 1982 and the reply comment period ended February 15, 1982.

2. In its Notice of Proposed Rule Making, the Commission specifically proposed to permit the transmission of digital codes, other than those defined in the Rules, on all amateur radio frequencies above 50 MHz, with the exception of those frequencies designated for A1 emissions only (50.0-50.1 MHz and 144.0-144.1 MHz). It was also proposed to limit communications using such codes to those between points within areas regulated by the FCC (domestic operation). Requirements that a station licensee include a description of the unspecified digital code in the station records and that the licensee, upon direction of the Commission, cease or restrict the use of the code, or maintain a record of coded communications, were also included in the proposal. In related areas, the Notice proposed to raise the maximum sending speed for ASCII coded communications from 1200 baud to approximately 19.6 kilobaud on amateur radio frequencies between 50 and 225 MHz; but it was also proposed to specify this higher speed, as well as all other sending speeds, in terms of "bits per second." The proposal included bandwidth specifications for transmissions of ASCII coded communications between 50 and 225 MHz, and for all transmissions of communications using unspecified digital codes. Finally the Commission proposed to allow the use of A1 emissions for the transmission of ASCII coded communications on frequencies between 3.5 and 28 MHz.

3. Virtually all of the comments on the Notice support the Commission's proposal, however many suggest minor modifications. John A. Carroll, in his comments, quotes the following portion of the Commission's Notice: "We believe that other unspecified digital coding techniques may also lend themselves to digital voice, facsimile, and television communications. As such uses are not currently prohibited by the rules, the Commission does not see a need to restrict these uses for the unspecified digital codes." John A. Carroll's comments goes on to state that certain of these uses have "* * * enormous potential for improved communication, especially relay communication * * *" and that "* * * it would be well to add a few extra words (to the final rules) so that there is no doubt (this) intent." Since the Commission desires to set forth the rules in the clearest possible manner and also desires to foster experimentation in the Amateur Radio Service, we are including such additional language in the final rules.

4. With regard to our proposal that communications using unspecified digital codes be limited to domestic operation only, the ARRL, petitioner in RM-3788, states in its comments, "There is at present a great deal of interest in linking together packet repeaters between Canada and the United States. The League would suggest that the final rules for additional digital codes provide that, should the governments of, for

[1] 46 FR 50093, October 10, 1981.

example, Canada and the United States specifically so agree, VHF or UHF digital communications across national borders shall be permitted." The Commission recognizes the potential desirability of such intercommunication and accordingly the final rules have been fashioned in such a way as to not preclude the use of unspecified digital codes across borders of consenting countries.

5. Several commenters express concern that the proposed rules allowing the Engineers-in-Charge (EICs) of field facilities to restrict the use of unspecified digital codes, or require maintenance of a record of the communications, might be imposed indiscriminately or without due consideration of the burden involved. The comments of the ARRL state, "While the need for this available sanction is manifest * * * the practicality of compliance with such a sanction is of some concern. Conversion of a digitized image or voice transmission or the contents of a computer memory into plain language may be dificult to accomplish." The ARRL also expresses concern that "* * * the potential requirement that an amateur maintain a record * * * of all coded transmissions from the station with which communication is established may be burdensome in certain cases." John A. Carroll's comments state that "* * * high speed digital communication could rapidly generate a large amount of communicated information, which, by Amateur standards, would be prohibitively costly to file." His comments also state that "(t)his is not to suggest that the provision shouldn't be there; (it would be) an important contribution to effective enforcement * * * (but) it would be desirable to indicate how this authority is intended to be used."

6. The Commission is sympathetic to these concerns and we are including language in the final rules which states that the authority being granted to the EICs to limit unspecified coding, or require maintenance of a record, may only be invoked when "* * * necessary * * * to assure compliance with the rules. * * *" We are also deleting from the final rules the proposal that the EICs be authorized to require the recording of communications from a station with which communications are established using unspecified digital codes.

7. Also with regard to the authority the Commission proposed granting the EICs, the comments of Paul Newland state, "The proposal * * * is well reasoned and more than fair * * * (however it) doesn't include any recourse for the amateur who has been directed to cease (unspecifically coded) transmissions permanently. I would like to see a hearing (or some other process) as a next step in resolving * * * a shut-down order." In fact, the appeal process which applies to virtually all Commission actions will also apply to this delegation of authority to the EICs. An amateur operator aggrieved by invocation of that authority may file an application for review or a petition for reconsideration of the action.[3]

8. The sentiment of the comments is unanimously against the Commission's proposal to replace the term "baud" in the rules limiting sending speeds, with the term "bits per second." Representative of this sentiment are the comments of Robert J. Carpenter which state, "If two bits are coded into a single time element (four level coding) the number of 'bits per second' is twice the number of 'bauds,' but the bandwidth occupied has not increased. I feel certain that the Commission intends to control the characteristic which relates to occupied bandwidth (bauds) * * *" Indeed, the Commission's interest is in maintaining spectrum efficiency through limitations on bandwidth. And since we do not want to close off "* * * a prime area of legitimate technical interest and experimentation by amateurs * * *"[3] we are going to continue to specify maximum sending speeds with the term "baud" so that amateur operators can utilize multi-level coding without incurring a sending speed penalty. We are adding a sending speed definition to the rules to make the Commission's intent in this area clear.

9. Several comments express a desire for the Commission to allow sending speeds greater than those proposed in the Notice for ASCII coded communications in the VHF[4] and higher frequency bands. Those comments also request a commensurate increase in the bandwidth authorized for unspecified digital codes. The comments of Paul Newland suggest that techniques such as *"Time-Division Multiplex (TDM)"* could be used so that "* * * more users could benefit by allowing digital transmissions to occupy a bandwidth greater than the Commission had initially planned to allocate." The Amateur Radio Research and Development Corporation (AMRAD) states in its comments that "(t)he highest permissible ASCII sending speed and bandwidth should be raised to 56 kilobits per second and 100 kHz respectively in the 220.5 to 221.9 MHz subband to permit packet switching network operations in that subband." The reply comments of the ARRL state, "The League shares the concerns of Messrs. Ranaldo (for AMRAD) and Newland, and suggests that the Commission increase permissible bandwidths for digital transmissions at and above 220 MHz."

10. The Commission appreciates the desire of the amateur community to experiment and operate with state-of-the-art digital technology. Therefore, in order to avoid hampering these endeavors we are authorizing greater ASCII sending speeds and the use of wider bandwidths for unspecified coded transmissions. We are authorizing a sending speed as great as 56 kilobaud and a bandwidth as great as 100 kHz in accordance with the request of AMRAD; however, in order to permit the greatest flexibility in spectrum utilization, we are going to permit this speed and bandwidth on all frequencies above 220 MHz rather than limiting them to the frequencies between 220.5 and 221.9 MHz. Furthermore, the final rules will allow the use of any bandwidth on frequencies above 1215 MHz rather than imposing a limitation as was proposed in the Notice. The Commission is also not adopting the bandwidth restriction proposed for transmissions of ASCII coded communications on frequencies between 50 and 225 MHz, using sending speeds between 1200 and 19600 bits per second. Instead we will allow a maximum sending speed on the frequencies between 50 and 220 MHz of 19.6 kilobaud without a bandwidth restriction. The maximum speed of 56 kilobaud will apply to the frequencies between 220 and 225 MHz as discussed earlier. We are raising the permissible bandwidth for transmissions of unspecifically coded communications between 50 and 220 MHz from 16 kHz to 20 kHz in order to fit more closely our desire to equate these emissions with the ones currently used in those bands.

11. The Commission is also including some other minor changes in the final rules regarding sending speed and bandwidth. We are revising our bandwidth definition to eliminate certain ambiguities in the definition we proposed in the Notice. We wish to emphasize that this definition does not imply, nor do we intend to require, that amateur radio operators continuously monitor their emission bandwidth while using the digital codes which subject the station transmissions to bandwidth

[3] See §§ 1.106 and 1.115 of the Commission's Rules; also Section 5, paragraph (d)(4), and Section 405 of the Communications Act of 1934, as amended.

[3] Comments of the American Radio Relay League, Incorporated.

[4] The Very High Frequencies (VHF) are those between 30 and 300 MHz.

limitations. We only require that operators comply with the bandwidth requirements. Operators may determine compliance through electronic, mathematical or any other means they deem sufficient. We are also eliminating the requirement that stations using the Baudot code maintain the sending speed within certain tolerances. Currently, the sending speed must be maintained within 5 words per minute of the standard speeds (60, 67, 75 or 100 words per minute). However, that requirement no longer serves any regulatory purpose since electronic rather than electro-mechanical teleprinter equipment is now commonly used and the newer equipment is less sensitive to variations in sending speed.

12. As another minor change, the Commission is authorizing the use of A1 emissions for ASCII coded communications on all frequencies where F1 emissions are permitted. We had proposed to limit the use of A1 emissions for ASCII coding to the frequencies below 28 MHz, however we can find no reason not to permit this additional mode in the bands above 28 MHz as well. A small amendment to the rules regarding operator privileges is being added to preclude the use of ASCII coded communications by Novice class and Technician class operators using frequencies below 28.2 MHz. This represents no change in privileges for these operators.

13. Finally, with regard to the authorization of unspecified digital codes, concern was expressed in the Commission's Notice that such an authorization could affect ". . . our ability to monitor coded transmissions for content, as well as the ability of the amateur community to monitor transmissions from individual stations for the purpose of self-enforcement." In response to this concern the comments of the ARRL state the following:

> The League is sympathetic to, and generally shares the Commission's reservations about any reduction in the Commission's ability to monitor coded transmissions for content, or the amateur's ability to monitor for purposes of self-enforcement. A combination of several factors should be sufficient to minimize the potential for abuse, however. First, the primarily local nature of communications on the VHF and UHF frequencies involved should limit the potential ability of unscrupulous business users to utilize the amateur bands to transmit data of a commercial nature, circumventing existing common carriers. Second, the vigor with which amateurs protect their allocated frequency bands against unauthorized interlopers, together with well-polished direction finding techniques, will in most cases result in investigation by amateurs of the source of repeated unusual or suspicious digital transmissions. The requirement of open identification procedures is a significant litmus for distinguishing legitimate amateur use from unlawful misuse of amateur frequencies. Finally, the provisions of proposed Rules Section 97.69(c)(3) permit the Commission to take immediate action against a station suspected of unlawful misuse of the amateur bands via unspecified digital codes by ordering the cessation of the use of such codes. The above factors, together with the traditionally superlative level of rule compliance by amateurs, should be sufficient to offset the League's concern and that of the Commission with respect to potential misuse of digital codes.

We have considered this matter at great length. In balancing our objectives of encouraging new technologies against assuring our enforcement capability, it must be recognized that there is an incompatibility between authorizing experimentation with "exotic" technologies and the employment of channel monitoring as an enforcement tool. Our ability to verify that the content of messages complies with our rule requirements will be hindered by the broad relaxation of regulatory constraints that we are ordering in this proceeding. However, the Commission finds itself in agreement with the ARRL that special provisions we are including in the final rules, as well as existing provisions that identification be made in plain English or the international Morse code, should, when combined with the zealous effort of the amateur community to protect their allocated frequency bands, provide adequate protection against unauthorized operation in the service.

14. Accordingly, it is ordered that effective October 28, 1982, Part 97 of the Commission's Rules and Regulations, 47 CFR Part 97, is amended as set forth in the attached Appendix. It is further ordered that to the extent specified herein, RM-3788 is granted, and in all other respects it is denied. It is further ordered that this proceeding is terminated. This action is taken pursuant to authority contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511, December 11, 1980), the Commission will forward a copy of the final rules herein promulgated to the Associate Director for Information and Regulatory Affairs of the Office of Management and Budget. Further information on this matter may be obtained by contacting: Steve Lett, (202) 632-4964, Private Radio Bureau, Federal Communications Commission, Washington, DC 20554.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 97—AMATEUR RADIO SERVICE

Part 97 of the Commission's Rules and Regulations, 47 CFR Part 97, is amended as follows:

1. In § 97.7, paragraph (e) is revised to read as follows:

§ 97.7 Privileges of operator licenses.

* * * * *

(e) *Novice Class.* Radiotelegraphy in the frequency bands 3700–3750 kHz, 7100–7150 kHz (7050–7075 kHz when the terrestrial station location is not within Region 2), 21,100–21,200 kHz, and 28,100–28,200 kHz, using only type A1 emission and using only the international Morse code.

2. Section 97.69 is revised to read as follows:

§ 97.69 Digital communications.

Subject to the special conditions contained in paragraphs (a), (b) and (c) of this section, an amateur radio communication may include digital codes which represent alphanumeric characters, analogue measurements or other information. These digitial codes may be used for such communications as (but not limited to) radio teleprinter, voice, facsimile, television, communications to control amateur radio stations, models and other objects, transference of computer programs or direct computer-to-computer communications, and communications in various types of data networks (including so-called "packet switching" systems); provided that such digital codes are not intended to obscure the meaning of, but are only to facilitate, the communications, and further provided that such operation is carried out in accordance with other regulations set forth in this part. (For purposes of this section, the sending speed (signaling rate), in baud, is defined as the reciprocal of the shortest (signaling) time interval (in seconds) that occurs during a transmission, where each time interval is the period between changes of transmitter state (including changes in emission amplitude, frequency, phase, or combination of these, as authorized).)

(a) Use of the International Telegraphic Alphabet No. 2 (Baudot code) is subject to the following requirements:

(1) Transmission shall consist of a single channel, five unit (start-stop) teleprinter code conforming to the International Telegraphic Alphabet No.

2 with respect to all letters and numerals (including the slant sign or fraction bar); however, in the "figures" positions not utilized for numerals, special signals may be employed for the remote control of receiving printers, or for other purposes indicated in this section.

(2) The sending speed shall not exceed 100 words per minute (75 baud).

(3) When frequency (or phase) shift keying (type F1 emission) is utilized, the deviation from the mark signal to the space signal, or from the space signal to the mark signal, shall be less than 900 hertz.

(4) When audio frequency shift keying (type A2 or F2 emissions) is utilized, the highest fundamental modulating frequency shall not exceed 3000 hertz, and the difference between the modulating audio frequency for the mark signal and that for the space signal shall be less than 900 hertz.

(b) Use of the American Standard Code for Information Interchange (ASCII) is subject to the following requirements:

(1) The code shall conform to the American Standard Code for Information Interchange as defined in American National Standards Institute (ANSI) Standard X3.4–1968.

(2) F1 emission shall be utilized on those frequencies between 3.5 and 29 MHz where its use is permitted; and the sending speed shall not exceed 300 baud.

(3) F1, F2 and A2 emissions may be utilized on those frequencies above 28 MHz where their use is permitted; and the sending speed shall not exceed the following:

(i) 1200 baud on frequencies between 28 and 50 MHz;

(ii) 19.6 kilobaud on frequencies between 50 and 220 MHz;

(iii) 56 kilobaud on frequencies above 220 MHz.

(4) A1 emission may be used for ASCII where F1 is permitted; and the sending speed shall not exceed that specified for other ASCII coded emissions on the same frequency.

(c) In addition to the above provisions, the use of any digital code is permitted on amateur frequencies above 50 MHz, except those on which only A1 emission is permitted, subject to the following requirements:

(1) Communications using such digital codes are authorized for domestic operation only (communications between points within areas where radio services are regulated by the U.S. Federal Communications Commission), except when special arrangements have been made between the United States and the administration of any other country concerned.

(2) The bandwidth of an emission from a station using such digital codes shall not exceed the following (where for this purpose the bandwidth is defined as the width of the frequency band, outside of which the mean power of any emission is attenuated by at least 26 decibels below the mean power of the total emission; a 3 kHz sampling bandwidth being used by the FCC in making this determination):

(i) 20 kHz on frequencies between 50 and 220 MHz;

(ii) 100 kHz on frequencies between 220 and 1215 MHz;

(iii) On frequencies above 1215 MHz any bandwidth may be used provided that the emission is in accordance with § 97.63(b) and § 97.73(c).

(3) A description of the digital code and the modulation technique shall be included in the station log during all periods of use and shall be provided to the Commission on request.

(4) When deemed necessary by an Engineer-in-Charge of a Commission field facility to assure compliance with the rules of this part, a station licensee shall:

(i) Cease the transmission of digital codes authorized under this paragraph.

(ii) Restrict the transmission of digital codes authorized under this paragraph to the extent instructed.

(iii) Maintain a record, convertible to the original information (voice, text, image, etc.), of all coded communications transmitted under authority of this paragraph.

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

[Eleventh Revised S.O. No. 1474, Amdt. No. 3]

Various Railroads Authorized To Use Tracks and/or Facilities of Chicago, Milwaukee, St. Paul & Pacific Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Amendment No. 3 To Eleventh Revised Service Order No. 1474.

SUMMARY: Pursuant to Section 122 of the Rock Island Railroad Transition and Employee Assistance Act, Pub. L. 96–254, this order authorizes various railroads to provide interim service over the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor (Richard B. Ogilvie), Trustee, and to use such tracks and facilities as are necessary for operations. This order permits carriers to continue to provide service to shippers which would otherwise be deprived of essential rail transportation.

EFFECTIVE: 11:59 p.m., September 30, 1982, and continuing in effect until 11:59 p.m., December 31, 1982, unless otherwise modified, amended or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT: M. F. Clemens, Jr., (202) 275–1559.

SUPPLEMENTARY INFORMATION:

Decided: September 23, 1982.

Upon further consideration of Eleventh Revised Service Order No. 1474 (47 FR 13529, 22963 and 32723), and good cause appearing therefor:

§ 1033.1474 [Amended]

It is ordered, that § 1033.1474 *Various railroads authorized to use tracks and/or facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, debtor (Richard B. Ogilvie, trustee),* Eleventh Revised Service Order No. 1474 is amended by substituting the following paragraph (n) for paragraph (n) thereof:

(n) *Expiration date.* The provisions of this order are extended for an additional ninety (90) days, and shall expire at 11:59 p.m., December 31, 1982, unless otherwise modified, amended or vacated by order of this Commission.

Effective date. This amendment shall become effective at 11.59 p.m., September 30, 1982.

(49 U.S.C. 10304–10305 and Sec. 122, Pub. L. 96–254)

This amendment shall be served upon the Association of American Railroads, Transportation Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

BILLING CODE 3410-EN-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 95

[Docket No. PRM-95-1]

Modification of Classification Guide for Safeguards Information

AGENCY: Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking submitted by General Atomic Company.

SUMMARY: The Nuclear Regulatory Commission is hereby denying a petition for rulemaking submitted by the General Atomic Company (GAC) in a letter to the Secretary of the Commission dated May 19, 1981. The petition requested that the Commission amend its regulation relating to the classification guidance provided by sub-topic 112 of Appendix A, "Classification Guide for Safeguards Information," to 10 CFR Part 95 to change the CONFIDENTIAL-National Security Information (CNSI) classification category to unclassified (U) or to delete sub-topic 112 from Appendix A.

FOR FURTHER INFORMATION CONTACT: Raymond J. Brady, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 427-4472.

SUPPLEMENTARY INFORMATION: On March 5, 1980, the Nuclear Regulatory Commission published, as a final rule, 10 CFR Part 95, "Security Facility Approval and Safeguarding of National Security Information and Restricted Data" (45 FR 14483). On August 4, 1981, the NRC published for comment a petition for rulemaking by the General Atomic Company (GAC) that requested a change to or deletion of subtopic 112 of Appendix A to Part 95 (46 FR 39610). No public comments were received on the GAC petition.

Appendix A to Part 95, which is the "NRC Classification Guide for Safeguards Information," provides security classification guidance for safeguarding information about certain nuclear material or facilities. Sub-topic 112 of Appendix A requires the classification of "Total quantities at any given time of SSNM by designated vault and vault-type storage areas." GAC in their petition requested that either the classification of sub-topic 112 type information be changed from classified CONFIDENTIAL-National Security Information (CNSI) to unclassified (U) or that sub-topic 112 be removed from Appendix A.

The NRC in reviewing and evaluating GAC's petition has concluded that sub-topic 112 of Appendix A provides for proper classification guidance to ensure that information of this type is protected to minimize or prevent acts of theft or diversion of formula quantities of SSNM, and information that could enhance the credibility or frequency of threats made against nuclear facilities. The NRC does not agree with the GAC contention that: (1) There is only a remote possibility that an adversary would base his or her action upon the availability of specific data about a vault's momentary contents; and (2) the general availability of unclassified information * * * makes the time dependent vault total a secondary factor in attack planning by would be adversaries." Specifically, since: (1) An adversary may base his or her actions on the vault's momentary contents, if the action contemplated was intended to enhance the credibility of a nuclear threat, and (2) a vault can always be expected to be a principal target for an adversary and knowing the quantity of material contained therein, may make it a more attractive target.

Incidents such as theft and threats can cause identifiable damage to the national security and therefore, information that could assist an adversary in planning such actions must be protected. Sub-topic 112, when standing alone, may appear unduly restrictive and unnecessary; however, the correlation of this sub-topic with sub-topics of Section 200 (e.g. 212, 221, 222, 224, 261, 262, 263 and 264), provide assurance that information related to the physical protection of formula quantities of SSNM that could cause damage to the national security is protected.

The NRC has expended a considerable amount of resources studying and evaluating this concern both prior to and after receipt of the GAC petition and after careful review and consideration has concluded that the classification guidance provided by sub-topic 112 shall not be deleted from Appendix A. The NRC bases this position on the fact that the information classified by subtopic 112 is information that could facilitate carrying out a successful: (1) Theft or diversion of formula quantities of nonself-protecting strategic special nuclear Material (SSNM), or (2) sabotage mission against any facility or activity involving formula quantities of nonself-protecting SSNM.

This denial is being issued by the Executive Director for Operations based on authority delegated to him by the Commission.

Dated at Bethesda, Maryland, this 26 day of August, 1982.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

[FR Doc. 82-26041 Filed 9-28-82; 8:45 am]

BILLING CODE 7590-01-M

DEPARTMENT OF ENERGY

10 CFR Part 599

[Docket No. ERA-R-80-41]

Withdrawal of Proposed Rule Concerning Standby Procedures for Emergency Purchases and Emergency Allocation of Natural Gas During a Declared Emergency

AGENCY: Energy Department (DOE).

ACTION: Withdrawal of proposed rule.

SUMMARY: The Department of Energy (DOE) gives notice that it is withdrawing the regulations it proposed on December 1, 1980 (45 FR 81011, December 8, 1980) to implement Section 302 and 303 of the Natural Gas Policy Act of 1978 and Section 607 of the Public Utility Regulatory Policies Act of 1978. The standby procedures would have addressed emergency natural gas purchases, emergency natural gas allocations, and emergency prohibitions on the burning installations. DOE has determined that the proposed regulations are unnecessary at this time and should be withdrawn.

FOR FURTHER INFORMATION CONTACT:

Lana Ekimoff, Department of Energy, Office of Energy Contingency Planning, Room GH-060, 1000 Independence Ave. SW., Washington, D.C. 20585, (202) 252-4000

Michael Skinker, Department of Energy Office of General Counsel, Room 6E-042, 1000 Independence Ave. SW., Washington, D.C. 20585, (202) 252-6667

SUPPLEMENTARY INFORMATION: Section 301 and 303 of the Natural Gas Policy Act of 1978 (NGPA, Pub. L. 95-621) provide that the President may authorize emergency purchases of natural gas and allocate certain natural gas supplies when he declares that a natural gas supply emergency exists. Section 607 of the Public Utility Regulatory Policies Act of 1978 (PURPS, Pub. L. 95-617) provides authority for the President to prohibit the burning of natural gas by an electric powerplant or major fuel-buring installation during such a declared natural gas supply emergency. The emergency authorities of Section 302 and 303 of the NGPA and Section 607 of the PURPA have been delegated by the President to the Secretary of Energy. The President, however, retains the sole authority to declare, extend, or terminate a natural gas supply emergency.

On December 1, 1980, DOE issued a Notice of Proposed Rulemaking Regarding Standby Procedures for Emergency Purchases and Emergency Allocation of Natural Gas During a Declared Emergency to implement NGPA Sections 302 and 303 and PURPA Section 607 (Docket No. ERA-R-80-41, 45 FR 81011, December 8, 1980). A public hearing was held on January 13, 1981, and written comments were due by February 6, 1981. The comments filed in this proceeding are available for inspection in the Public Reading Room of the Department of Energy, 1000 Independence Ave. SW., Washington, D.C. 20585.

Over the last several months the Department has reevaluated the need for finalizing these proposed regulations. Based on changes in the Federal emergency preparedness policy since the regulations were proposed and other reasons noted below, we have determined that these regulations are unnecessary at this time and the proposed should be withdrawn.

Sections 302 and 303 of the NGPA were designed, *inter alia,* to remove jurisidictional impediments to the purchase and transportation of natural gas between the interstate and intrastate markets during a declared natural gas supply emergency. Non-emergency mechanisms, however, are now in place to facilitiate the purchase and transportation of surplus gas between markets and, consequently, lessen the likelihood a natural gas supply emergency may occur. These non-emergency mechanisms have been implemented and are being administered by the Federal Energy Regulatory Commission under the authority of Sections 311 and 312 of the NGPA and the Natural Gas Act.

Another important consideration in our decision to withdraw the proposed regulations is the fact that DOE may exercise the NGPA and PURPA emergency purchase, allocation and prohibition authorities by order as well as by regulation. In this regard, during the declared natural gas emergency in the winter of 1976-1977 the Federal government effectively exercised similar emergency natural gas purchase authorities under the Emergency Natural Gas Act of 1977 by order rather than regulation. We believe that the statutory provisions of Section 302 and 303 of the NGPA and Section 607 of the PURPA are clear on their face and should provide ample notice to the public as to the scope of and basis for any orders which might be required during a future natural gas supply emergency. However, should it be determined in any future emergency that a rule would be of assistance to the industry and general public, such a regulation could be developed and issued on an expedited basis.

Therefore, for the reasons stated above, DOE believes that a regulation is not needed at this time and the proposed rule is hereby withdrawn.

Dated: September 23, 1982.

R. D. Furiga,

Deputy Assistant Secretary, Environmental Protection, Safety and Emergency Preparedness.

[FR Doc. 82-26678 Filed 9-28-82; 8:45 am]

BILLING CODE 6450-01-M

FARM CREDIT ADMINISTRATION

12 CFR Ch. VI

Loan Participations Between Federal Land Banks and Production Credit Associations

AGENCY: Farm Credit Administration.

ACTION: Notice of Intent.

SUMMARY: The Farm Credit Administration ("FCA") hereby publishes definitive guidelines relating to loan participations among Federal land banks ("FLBs") and production credit associations ("PCAs") of the Farm Credit System ("System") as specifically authorized by various provisions of the Farm Credit Act Amendments of 1980 (Pub. L. 96-592) ("1980 Amendments").

Due to the complexity of the issues involved, the FCA has deferred issuing regulations regarding the exercise of loan participation authorities by System institutions in order to allow sufficient study of the options available for implementation. A System task force was established in 1981 to identify loan participation opportunities provided by the 1980 Amendments. The task force issued its report in mid-1982. In view of the interest by System institutions in loan participations, the FCA has issued these definitive guidelines for the conduct of such activities by FLBs and PCAs.

It is anticipated that after an interim period during which System institutions gain experience with loan participations, the FCA will propose regulations relative to the exercise by System institutions of loan participation authorities conferred under the 1980 Amendments. Recommendations of the System task force and all public comments received on the guidelines will be evaluated and considered in connection with that rulemaking action.

DATE: Written comments must be received on or before November 29, 1982.

ADDRESSES: Comments or suggestions should be submitted in writing to Donald E. Wilkinson, Governor, Farm

Credit Administration, Washington, DC 20578. Copies of all communications received will be available for inspection by interested persons in the Office of Director, Congressional and Public Affairs Division, Office of Administration, Farm Credit Administration.

FOR FURTHER INFORMATION CONTACT: Larry H. Bacon, Deputy Governor, Office of Administration, 490 L'Enfant Plaza, SW., Washington, DC 20578, (202–755–2161).

SUPPLEMENTARY INFORMATION: Loan participations among FLBs and PCAs have the potential for improving the quality of credit services offered by System institutions. Such loan participations can be a tool for better accommodating the needs of young farmers and other credit worthy applicants/borrowers who require specialized loan financing and loan servicing arrangements.

In recognition of the usefulness of loan participations, the FCA hereby authorizes, pursuant to §§ 1.4(6) and (12), 2.12(13), and 4.18 of the Farm Credit Act of 1971, as amended ("Act"), loan participations between FLBs and PCAs subject to the conditions and guidelines set forth below. This authorization, unless otherwise amended, is effective for the interim period between the date of this notice of intent and issuance of final regulations regarding loan participations. It is anticipated that such final rules will be in place during 1983. This authorization does not extend to any other type of loan participation arrangements between System institutions that operate under different titles of the Act nor does it limit any previously authorized loan participation agreements.

General Guidelines

Only loan participation arrangements between FLBs and PCAs designed to accomplish at least one of the following goals are authorized by this memorandum: (1) To facilitate the sharing of credit expertise on specific loans; and (2) to provide loan servicing arrangements that are advantageous to FLBs or PCAs in accommodating borrowers who have special needs.

District boards desiring to implement a coordinated program consistent with the following guidelines shall effect such policy approvals and modify existing policies as necessary. These policies shall be submitted to FCA for approval prior to the implementation of the program in the district.

FLBs and PCAs entering into loan participation agreements authorized by these guidelines shall comply with the following guidelines. Federal intermediate credit banks ("FICBs") shall exercise supervisory authority over PCAs where indicated to ensure observance of these guidelines.

1. Any FLB or PCA shall have the option to accept or reject any loan participation.

2. PCAs shall enter into loan participation agreements only upon receiving prior approval of their supervising FICB. The FICB shall evaluate, in addition to the overall terms of each proposed loan participation, the capacity of the association to properly administer the loan in accordance with the loan participation agreement and any other factors relating to the ability of the PCA to carry out the terms of the agreement within the guidelines of this notice of intent.

3. FLBs and PCAs shall only enter into loan participation agreements on loans financing operations wholly located within the chartered territories of both participating institutions or on loans financing operations that both institutions can finance pursuant to FCA Regulation § 614.4070.

4. FLBs desiring to utilize differential interest rates to the borrower for the purpose of blending the FLB and PCA interest rates or for other reasons shall submit policies to FCA in accordance with FCA regulation § 614.4280. PCAs shall obtain approvals for differential interest rates to the borrower from the supervising FICB.

5. The amount of any loan retained or purchased by an individual bank or association shall be subject to any prior approval requirements for that bank or association and shall be in accordance with 12 CFR Part 614, Subpart J, of FCA Regulations.

6. No FLB or PCA shall have loan participations authorized by this memorandum that exceed in the aggregate 15 percent of its loan volume.

Loan Participation Agreement Guidelines

Borrower eligibility, membership, loan term, loan amount, loan security, and the requirement for the purchase of stock or participation certificates by the borrower shall be determined in accordance with statutory and regulatory provisions under which the institution that originates the loan operates. All other terms shall be as to the agreement of the participating institutions. Each agreement, as a whole, shall ensure an equitable financial and operational arrangement for the borrower and participating institutions.

All loan participation agreements shall include provisions that define the duties and responsibilities of both the originating and participant institutions consistent with good business practices. At a minimum, loan participation agreements shall:

1. Identify the particular loan or loans of the borrower to be covered by the agreement;
2. Provide for disbursement and repayment of loan funds;
3. Provide for sharing, dividing, or assigning collateral;
4. Provide a loan service plan;
5. Provide collection procedures;
6. Provide authorization and conditions for action in the event of borrower distress and default;
7. Provide for the sharing of loss;
8. Provide for capitalization requirements between participating institutions;
9. Set forth conditions for acceptance and termination of the agreement; and
10. Provide for arbitration of controversies and/or disagreements between parties arising under the agreement.

In addition, loan participation agreements shall contain any other applicable terms necessary to administer the loan and safeguard the interests of System institutions. Equity investments between institutions shall be in the form of participation certificates.

BILLING CODE 6705–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 216

[DoD Directive 1322.13]

Identification of Institutions of Higher Learning That Bar Recruiting Personnel From Their Premises

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed rule.

SUMMARY: This proposed rule updates the implementation of the provisions of section 806 of the DoD Authorization Act for 1973. This law provides that no funds appropriated for Department of Defense may be used at any institution of higher learning that bars recruiting personnel from their premises. This proposed rule establishes

responsibilities and provides specific guidance and procedures to all heads of DoD Components and DoD commanders for identifying institutions of higher learning that bar recruiting personnel from their premises and establishes reporting requirements.

DATE: Written comments must be received by November 29, 1982.

ADDRESS: Office of the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) (Military Personnel & Force Management) (Accession Policy), the Pentagon, Room 2B269, Washington, D.C. 20301.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald G. Liveris, 202-697-9269.

SUPPLEMENTARY INFORMATION: In FR Doc. 70-3899 appearing in the Federal Register on February 10, 1970 (41 FR 5821), the Office of the Secretary of Defense (OSD) published a final rule establishing DoD policies and procedures with respect to identifying institutions of higher learning that bar recruiting personnel from their premises. The OSD proposes to revise these policies to clarify the procedure for acting in such cases and to establish certain reporting requirements.

List of Subjects in 32 CFR Part 216

Armed Forces, Colleges and universities, Recruiting personnel.

Accordingly, it is proposed to revise Chapter 1, 32 CFR Part 216, to read as follows:

PART 216—IDENTIFICATION OF INSTITUTIONS OF HIGHER LEARNING THAT BAR RECRUITING PERSONNEL FROM THEIR PREMISES

Sec.

216.1 Reissuance and Purpose.
216.2 Applicability.
216.3 Policy.
216.4 Responsibilities.
216.5 Procedures.
216.6 Information Requirements.
Enclosure 1—Prototype Letter of Inquiry.

Authority: Pub. L. 92-436, 606(a), 1973.

§ 216.1 Reissuance and purpose.

This part is reissued, ——— and establishes procedures to identify and take action in accordance with Pub. L. No. 92-436 ——— with respect to institutions of higher learning that bar recruiting personnel from their premises.

§ 216.2 Applicability.

This part —— applies to the Office of the Secretary of Defense, the Military Departments, the Joint Chiefs of Staff, the Unified and Specified Commands, and the Defense Agencies (hereafter referred to as "DoD Components"). The term "Military Service," as used herein, refers to the Army, Navy, Air Force, and Marine Corps.

§ 216.3 Policy.

(a) Under Pub. L. No. 92-436, ——— funds appropriated for the Department of Defense may not be used at any institution of higher learning if the Secretary of Defense or his designee determines that recruiting personnel of any Military Service are barred by policy from the premises of the institution. If recruiting personnel are barred from the premises of a subordinate element of an institution by the policy of such subordinate element, and the policy does not effectively bar recruiting at other subordinate elements, the prohibition on use of funds applies only to the elements in which recruiting is effectively barred.

(b) A determination that military recruiting personnel are barred by policy from the premises of an institution will be made when military personnel cannot obtain permission to recruit on the premises of the institution, except when the institution:

(1) Excludes all employers from recruiting on the premises of the institution.

(2) Permits employers to recruit on the premises of the institution only in response to an expression of student interest, and the institution:

(i) Provides the Military Services with the same opportunities to inform the students of military recruiting activities as are available to other employers;

(ii) Certifies that an insufficient number of students have expressed an interest to warrant accommodating military recruiters, applying the same criteria that are applicable to other employers;

(iii) Does not base such action upon the policies or practices of the Department of Defense or any DoD Component;

(3) Has been unable to schedule military recruiting visits in the past academic year, but agrees to schedule military visits on the premises of the institution in the coming academic year; or

(4) Otherwise establishes reasonable restrictions on the time and place of recruiting activities that are generally applicable to all employers and are not based on the policies or practices of the Department of Defense or any DoD Component.

(c) Under Pub. L. No. 92-436, the ——— prohibition on use of funds may be waived if the Secretary of the Military Department certifies to the Congress in writing that a specific course of instruction is not available at any other institution of higher learning and furnishes to the Congress the reasons why such course of instruction is of vital importance to the security of the United States.

(d) Under Pub. L. No. 92-436, the ——— prohibition on use of research and development (R&D) funds may be waived if the Secretary of Defense, or his designee, determines that the expenditure is a continuation or a renewal of a previous program with the institution that is likely to make a significant contribution to the defense effort.

§ 216.4 Responsibilities.

(a) The *Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) (ASD(MRA&L))* shall:

(1) Determine whether recruiting personnel have been barred by policy from the premises of an institution of higher learning.

(2) Disseminate to DoD Components the names of institutions of higher learning that are subject to the prohibition on use of funds.

(b) The *Under Secretary of Defense for Research and Engineering (USD (R&E))* shall exercise the authority to waive the prohibition on use of R&D funds under § 216.3(d). ——— Such waivers shall be reported promptly to ASD (MRA&L).

(c) The *Secretaries of the Military Departments shall:*

(1) Submit semi-annual reports to the ASD(MRA&L) under § 216.6(a) ——— with respect to institutions of higher learning that bar recruiting personnel from the premises of the institution.

(2) Determine whether to waive the prohibition on use of funds under §216.3(c).

(3) Submit the semi-annual reports required from Heads of DoD Components under § 216.6(b).

(d) The *Heads of DoD Components* shall submit semi-annual reports on actions related to the prohibition on use of funds under § 216.6(b).

§ 216.5 Procedures.

(a) Recruiters will continue to observe the traditional policy of the Department of Defense to accommodate an institution's preferences as to times and places for scheduling on-campus recruiting.

(b) The procedures in this part —— are intended for use with respect to institutions of higher learning visited for recruiting purposes. It is not intended that a survey of institutions of higher

learning be undertaken, or that other contact be initiated, for purposes of this part. —— Initiation of action under this Part —— will be limited to experiences obtained as a result of attempts to schedule or conduct normal recruiting visits and on any further information related to such recruiting endeavors.

(c) The following procedures shall be used by the Military Departments to determine whether recruiting personnel are barred by policy from the premises of an institution of higher learning.

(1) An inquiry as to the policy of the institution with respect to military recruiting shall be initiated when an official of the institution informs the Military Service, verbally or in writing, that the policy of the institution is not to permit recruiting by the Military Service, or when repeated requests to schedule recruiting visits are unsuccessful. An inquiry need not be initiated when the Military Service concerned has otherwise determined that recruiting personnel are not barred by policy under § 216.3(b)(1) through (4).

(2) The inquiry will consist solely of official contact with officers of the institution who are responsible for recruiting or placement activities, or their superiors.

(3) As an initial step, the Military Service will obtain written confirmation of the refusal to permit recruiting by the Military Service. If written confirmation cannot be obtained, verbal policy statements attributed to an appropriate official of the institution shall be used.

(4) Based upon the initial inquiry, written clarification of the institution's present policy shall be sought by a letter of inquiry to the head of the institution from the headquarters level of the Recruiting Service (or a higher official if so designated by the Secretary concerned). The prototype letter of inquiry at Enclosure 1 should be followed to the maximum extent possible.

(5) Under procedures established by the Secretary concerned, a determination will be made as to whether military recruiting personnel are being barred by the policy of the institution from the premises of the institution. The determination will be based on the responses to the letter or inquiry and on such other evidence obtained in accordance with this part as may be appropriate, consistent with the guidance in § 216.3.

(6) If it is determined that one or more of the provisions of §216.3(b)(1) through (4), are applicable, the action shall be terminated.

(7) The Secretary concerned shall submit a report for each military service to the ASD(MRA&L) and the USD(R&E) each January 31st and June 30th.

(i) The report shall list each institution of higher learning that is recommended for inclusion on the list of institutions subject to the prohibition on use of funds. Full documentation, including the basis for the listing, shall be furnished for each institution named, including the institution's formal response to the letter of inquiry.

(ii) Repetitive listing of institutions subject to the prohibition at the time of the report is not required.

(iii) Each institution which has been granted a waiver by the Secretary concerned under § 216.3(c), shall be listed in a separate portion of the report. A copy of the transmittal to Congress shall be included.

(iv) The USD(R&E) shall inform the ASD(MRA&L) promptly when the waiver provisions are invoked for research and development funds under § 216.3(d), with respect to any institution listed on the Military Department's report. Negative reports from the USD(R&E) are not required.

(d) Not later than 30 days after receipt of the reports from the Military Departments, the ASD(MRA&L) shall provide each institution listed by the Military Department under paragraph (c)(7)(i) of this section, with the following information:

(1) The portions of the Military Department's report that pertain to the institution, including the supporting documentation.

(2) Notice that the prohibition on use of funds under Pub. L. No. 92–436 and this part will be invoked within 60 days of the date of the letter unless the institution provides sufficient information to enable the ASD(MRA&L) to determine that the institution will permit recruiting by the Military Services during the coming academic year or that the provisions of § 216.3(b)(1) through (4), are otherwise applicable. A reasonable extension of time, not to exceed 30 days, may be granted at the request of the institution.

(3) Notice that communications concerning the waiver provisions based upon the availability of a specific course of instruction (§ 216.3(c)) or expenditure of research and development funds (§ 216.3(d)) should be submitted to the ASD(MRA&L) for transmittal to the appropriate official.

(e) When the response of the institution has been received, or if no response is received by the suspense date, the ASD(MRA&L) shall determine whether the institution shall be prohibited from receiving funds as provided in § 216.3. The determination shall be transmitted promptly to the institution and to all DoD Components. If the USD(R&E) has invoked the waiver provisions with respect to research and development funds under § 216.3(d), that fact shall be noted. If the prohibition on use of funds extends only to subordinate elements of an institution, only those elements that are subject to the prohibition shall be listed.

(f) On a semi-annual basis, but not later than November 30th and April 30th of each year, the ASD(MRA&L) shall transmit to the heads of DoD Components a cumulative list of all institutions currently subject to the prohibition on use of funds under § 216.3.

(1) An institution may be removed from the list under the following circumstances:

(i) When the institution provides information to the ASD(MRA&L) to permit a determination that the institution is willing to schedule recruiting by the Military Services on the premises of the institution in the coming academic year, or that § 216.3(b)(1) through (4), are otherwise applicable.

(ii) When the Secretary of a Military Department invokes the waiver provisions of § 216.3(c).

(2) If the USD(R&E) invokes the waiver provisions of § 216.3(d), permit the use of research and development funds at an institution on the list, that fact will be noted, but the institution will not be removed from the list solely on that basis.

(3) An institution may be added to the list only in accordance with this section. If the Secretary of a Military Department proposes to withdraw a waiver previously granted under § 216.3(c), the Secretary shall notify the institution of that fact and shall initiate an inquiry under this section to determine whether the institution intends to continue barring military recruiters by policy from the premises of the institution. If it is determined that such a bar is in effect, the matter shall be processed by the Secretary under the Military Department and the ASD(MRA&L) under this section.

§ 216.6 Information requirements.

(a) The semi-annual reports from the Secretaries of the Military Departments as to recommendations of institutions for inclusion on the list of institutions prohibited from receiving funds shall be submitted on January 31 and June 30 of each year. The reporting requirement has been assigned Report Control Symbol DD–M(SA) 1386.

(b) On January 31 and June 30 of each year, the Heads of DoD Components shall submit a list of all actions in which

an institution listed by the ASD(MRA&L) under § 216.5 (e) and (f), has been subjected to a termination of funding or other disqualification from eligibility to receive funds on the basis of this Directive. The reporting requirements has been assigned Report Control Symbol DD————.

————.

September 24, 1982.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

Prototype Letter of Inquiry

Dr. John Doe.
President, ———— *University*
Washington, D.C.

Dear Mr. Doe: Section 606 of Pub. L. No. 92-436, the Department of Defense Authorization Act for 1973, prohibits use of DoD appropriations at any institution of higher learning which by policy bars military recruiting personnel from the premises of the institution. It further provides that the Secretaries of the Military Departments shall furnish the Secretary of Defense the names of any institutions of higher learning which the Secretaries determine on such dates are affected by the prohibitions contained in this section on barring recruiting personnel from the premises or property of any such institution.

Funds for tuition assistance, research, development, test and evaluation for the Armed Forces are included in this Act. The applicable section of Pub. L. No. 92-436 is attached for your information.

In order to enable the (Service) Recruiting Command to provide authoritative information for use in complying with the requirements of this law, I would appreciate clarification of the current policy of your institution in regard to on-campus military recruiting. (Recite information previously received concerning the institution's policy or intentions in regard to on-campus recruiting, recite record of unsuccessful efforts to schedule recruiting visits, recite other facts or points of departure, as appropriate.).

Specifically, I would appreciate answers to the following questions:

Is it the present policy of ———— University to bar military recruiting personnel from its premises or property?

Does ———— University intend to permit military recruiting on campus in the near future and is is now able to schedule a date for a recruiting visit?

What is the policy of ———— University with respect to the visits of civilian employers (public or private) to the campus for the purpose of recruiting college students?

In order to comply with the reporting requirements of the law, it will be necessary to receive the answers to these questions, together with any clarifying information that will be helpful, no later than —— days from the date of this letter.

I earnestly solicit your cooperation in this matter and trust it will be possible for the (Service) to schedule a recruiting visit in the near future at a mutually agreed upon time and place.

Sincerely,

[FR Doc. 82-26606 Filed 9-28-82; 8:45 am]

BILLING CODE 3810-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-3-FRL 2213-4]

Proposed Revision of the Pennsylvania State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This notice proposes the approval of alternative emission reduction plans (bubbles) for boilers at three sources in Pennsylvania. These bubbles allow for more economical operation of the boilers with no degradation of air quality. The Pennsylvania Department of Environmental Resources requested the approval of these bubbles in a letter of June 8, 1982.

DATE: Comments must be submitted on or before October 29, 1982.

ADDRESSES: Copies of the proposed SIP revision and the accompanying support documents are available for inspection during normal business hours at the following locations:

U.S. EPA, Air Programs and Energy Branch, 6th and Walnut Streets, Curtis Building, Philadelphia, PA 19106, ATTN: Gregory Ham (3AW11)

Pennsylvania Department of Environmental Resources, Bureau of Air Quality Control, 200 North 3rd Street, Harrisburg, PA 17120, ATTN: Gary L. Triplett

All comments on the proposed revision submitted on or before October 29, 1982 will be considered and should be sent to: Mr. Glenn Hanson, Chief, Pennsylvania Section (3AW11), Air & Waste Management Division, U.S. Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106.

FOR FURTHER INFORMATION CONTACT: Mr. Gregory D. Ham at the address listed for Mr. Glenn Hanson above, or at (215) 597-2745.

SUPPLEMENTARY INFORMATION: The proposed changes to the Pennsylvania State Implementation Plan (SIP) were submitted by Secretary Peter S. Duncan, DER, on June 8, 1982. A public hearing on these bubbles was held on June 17, 1982. DER and EPA are holding concurrent public comment periods on these bubbles. Provided that no significant changes are made or that no comments are submitted which would significantly affect the approvability of these bubbles, EPA is proposing to approve these when they are finalized by DER.

The bubbles involve several boilers at each of three plants in Pennsylvania. At each plant, one or two boilers will burn natural gas to offset higher emissions of sulfur dioxide from the remaining boilers. No net increases in emissions will occur at any plant. In addition, the emission points are located close together and the emissions increases will occur at sources with equal or higher effective plume heights. Therefore, no modeling was required for any of these bubbles. The following paragraphs discuss each bubble and the source-specific regulation for that bubble.

The bubble for Scott Paper Company in Chester, Pa., allows for the burning of higher sulfur fuel in two boilers while burning natural gas in the remaining two boilers. Compliance will be determined by averaging the emissions from all four boilers. The limitations are 0.53 lbs. $SO_2/10^6$ Btu heat input on an hourly average not to be exceeded, and 3.2 lbs. $SO_2/10^6$ Btu heat input as a maximum not to be exceeded at any time. These limits are in § 128.17 of Pennsylvania's Air Resources Regulations, which also prohibits the use of No. 6 commercial fuel oil with sulfur content in excess of 3.0% by weight. Previous regulations prohibitions use of No. 6 fuel oil in excess of 0.5% sulfur by weight.

Section 128.18 as proposed allows Arbogast & Bastian, Inc., of Allentown, Pa., to burn natural gas in one boiler while burning higher sulfur fuel in the two remaining boilers. This section sets an hourly average for all boilers not to exceed 1.75 lbs. $SO_2/10^6$ Btu heat input prior to August 1, 1982, and 1.57 lbs. $SO_2/10^6$ Btu heat input after August 1, 1982. Sulfur content in the No. 6 commercial fuel oil is limited to 2.5% by weight before August 1, 1982 and 2.25% after that date. Previous regulations limited sulfur content in No. 6 fuel oil to 2.0% before August 1, 1982 and 1.5% after the date.

The third bubble applies to J. H. Thompson, Inc., in Kennett Square, Pennsylvania. An hourly average of 1.0 lbs. $SO_2/10^6$ Btu heat input applies to all three boilers, with a maximum not to be exceeded at any time of 3.1 lbs. $SO_2/10^6$ Btu heat input. Natural gas will be burned in one boiler to offset higher sulfur fuel in the remaining two boilers.

The sulfur content of the No. 6 commercial fuel oil is limited to 3.0% by weight. These limits are set forth in

§ 128.19 of Pennsylvania's Air Resources Regulations. Previous regulations prohibited use of No. 6 fuel oil with greater than 1.0% sulfur by weight.

EPA has revised these proposed bubbles according to the proposed Emissions Trading Policy of April 7, 1982 (47 FR 15076), and is today proposing approval of these bubbles.

The public is invited to submit, to the address stated above, comments on whether the proposed changes should be approved as a SIP revision. The Administrator's decision to approve or disapprove the proposed revision will be based in part on the comments received.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

40 CFR Part 123

[W-4-FRL 2216-1]

Mississippi's Application to Administer National Pollutant Discharge Elimination System (NPDES) Program for Federal Facilities

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; notice of application.

SUMMARY: The State of Mississippi has submitted a request to the Environmental Protection Agency for approval to expand its National Pollutant Discharge Elimination System (NPDES) permit program to include Federal facilities. According to the State's proposal, the Federal facilities program would be transferred from EPA Administration to the State of Mississippi Department of Natural Resources, Bureau of Pollution Control. This notice provides for a comment period on Mississippi's request. Under EPA regulations the Administrator shall approve or disapprove this request after taking into consideration all comments received.

DATES: Comments must be received on or before October 29, 1982.

Interested persons may also request a public hearing on the State's request. If there is a significant public interest expressed in the comments, EPA will schedule such a hearing. In the event EPA determines to hold a public hearing, prior notice of the date, time and location of such hearing will be given. All requests for a public hearing on the request must be submitted on or before October 29, 1982.

ADDRESSES: Comments should be addressed to: U.S. EPA, Region IV Office, 345 Courtland Street, Atlanta, Georgia, 30365, Attention: Water Management Division.

FOR FURTHER INFORMATION CONTACT: Arthur G. Linton, U.S. EPA, Region IV Office, 345 Courtland Street, Atlanta, Georgia, 30365, (404) 881–3776.

SUPPLEMENTARY INFORMATION: On October 18, 1972, Congress passed the Federal Water Pollution Control Act Amendments of 1972, (33 U.S.C. 1251–1376, Supp. 1973; hereinafter "the Act"). This legislation established the NPDES permit program under which the Administrator of the United States Environmental Protection Agency (U.S. EPA) or an approved State may issue permits to municipal, industrial, and agricultural entities to control the discharge of pollutants into navigable water.

On May 1, 1974, when Mississippi's NPDES program was approved, the Act prohibited State regulation of Federal faciltities (33 U.S.C. 1323(a)), and EPA retained responsibility over these facilities. The 1977 amendments to the Act removed this bar to full State regulation of all potential sources of water pollution within its boundaries.

The Mississippi Department of Natural Resources, Bureau of Pollution Control, has requested authority to issue permits to Federal facilities and has submitted a signed statement from the Mississippi Attorney General that the Mississippi Department of Natural Resources, Bureau of Pollution Control, has the necessary authority.

The Administrator's decision to approve or disapprove the proposed expansion will be based on the comments received and on a determination of whether the proposed program expansion meets the requirements of the Clean Water Act and 40 CFR Part 123.

Proposed conditions of transfer:

1. The NPDES permits issued by the EPA to Federal facilities located in Mississippi may be reissued by the State prior to their current expiration date in accordance with the Mississippi Air and Water Pollution Control Act, as amended.

2. This transfer does not grant the permittee or any other party the right to contest or appeal any terms and conditions of the EPA-issued permits.

3. Terms and conditions of the existing permits remain in effect and they will not be affected by this transfer.

The Mississippi submission may be reviewed from 9:00 a.m. to 4:00 p.m. Monday through Friday, excluding holidays, by the public at the Mississippi Department of Natural Resources, Bureau of Pollution Control at 2380 Highway 80 West, Southport Mall, P.O. 10385, Jackson, MS 39209 and at the EPA office in Atlanta at the address appearing at the beginning of this Notice. Copies of the submittal may also be obtained (at a cost of 20 cents a page) at the EPA office in Atlanta by contacting Ms. Earline Hanson.

List of Subjects in 40 CFR Part 123

Hazardous materials, Indians—lands, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business information.

Please bring the foregoing to the attention of persons you know would be interested.

Dated: August 25, 1982.

Charles Jeter,

Regional Administrator, Region IV.

40 CFR Part 180

[OPP-300067; PH-FRL 2215-7]

Secondary Alkyl (C_{11}–C_{15}) Poly (Oxyethylene) Acetate, Sodium Salt; Proposed Exemptions From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The notice proposes that secondary alkyl (C_{11}–C_{15}) poly (oxyethylene) acetate, sodium salt be exempted from the requirement of a tolerance when used as inert ingredient in pesticide formulations. This proposed regulation was requested by Sandoz, Colors and Chemicals.

DATE: Written comments must be received on or before October 29, 1982.

ADDRESS: Written comments to: Process Coordination Branch (TS–767C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 716D, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Peter Gray (703–557–7700) at the above address.

SUPPLEMENTARY INFORMATION: At the request of the Sandoz, Colors and Chemicals the Administrator proposes to amend 40 CFR 180.1001 (c) and (e) by establishing exemptions from the requirement of a tolerance for secondary alkyl (C_{11}–C_{15}) poly (oxyethylene) acetate, sodium salt; the ethylene oxide content averages 5 moles.

Inert ingredients are all ingredients which are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as water; baits such as sugar, starches, and meat scraps; dust carriers such as talc and clay; fillers; wetting and spreading agents; propellants in aerosol dispensers; and emulsifiers. The term inert is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

Preambles to proposed rulemaking documents of this nature include the common or chemical name of the substance under consideration, the name and address of the firm making the request for the exemption, and toxicological and other scientific basis used in arriving at a conclusion of safety in support of the exemption.

Name of inert ingredient: Secondary alkyl (C_{11}–C_{15}) poly (oxyethylene) acetate, sodium salt; the ethylene oxide content averages 5 moles.

Name and address of requestor: Sandoz, Colors and Chemicals, Charlotte, North Carolina.

Basis for approval: There are numerous clearances under 180.1001(c) of very closely related surfactant. The most closely related surfactant that is cleared in paragraph (c) is "tridecyl poly (oxyethylene) acetate, sodium salt," and is a linear fatty acid adduct of polyoxyethylene.

The new moiety is the same except that the alkyl portion consists of secondary fatty acids and covers the range (C_{11}–C_{15}). Secondary and tertiary alcohols and acids make up portions of cleared surfactants such as sodium isobutylnaphthalene sulfonate and poly(oxyethylene) (2–50 moles) dinonyl phenol.

Overall, the Agency concludes that the toxicity of the subject surfactant will not be greater than that of related and previously exempted materials.

Based on the above information, and review of its use, it has been found that, when used in accordance with good agricultural practices, this ingredient is useful and does not pose a hazard to humans or the environment. It is concluded, therefore, that the proposed amendment to 40 CFR Part 180 will protect the public health, and it is proposed that the regulation be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains this inert ingredient, may request within 30 days after publication of this notice in the **Federal Register** that this rulemeking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating both the subject and the petition and document control number, "[OPP–300067]". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the Process Coordination Branch at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedures, Agricultural commodities, Pesticides and pests.

Dated: September 17, 1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, it is proposed that 40 CFR 180.1001 be amended by adding and alphabetically inserting the inert ingredient secondary alkyl (C_{11}–C_{15}) poly (oxyethylene) acetate, sodium salt to the tables in paragraphs (c) and (e) to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(c) * * *

Inert ingredients	Limits	Uses
* * * * * * *		
Secondary alkyl (C_{11}–C_{15}) poly (oxyethylene) acetate, sodium salt; the ethylene oxide content averages 5 moles.		Surfactant.
* * * * * * *		

(e) * * *

Inert ingredients	Limits	Uses
* * * * * * *		
Secondary alkyl (C_{11}–C_{15}) poly (oxyethylene) acetate, sodium salt; the ethylene oxide content averages 5 moles.		Surfactant.

40 CFR Part 180

[PP 0E2341/P242; PH–FRL 2214–8]

Ethoprop Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the pesticide ethoprop in or on the raw agricultural commodity mushrooms. The proposed amendment to establish a maximum permissible level for residues

of ethoprop in or on the commodity was submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before October 29, 1982.

ADDRESS: Written comments to: Donal R. Stubbs, Emergency Response Section, Registration Division (TS–767C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Donal Stubbs, (703–557–1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition number 0E2341 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Station of Pennsylvania.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the pesticide ethoprop (*O*-ethyl *S,S*-dipropyl phosphorodithioate) in or on the raw agricultural commodity mushrooms at 0.02 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance included: two 90-day feeding studies (rat and dog) with no-observed-effect levels (NOEL's) for cholinesterase inhibition of 0.3 ppm and 10.0 ppm, respectively; an acute inhalation study in the rat using technical ethoprop with an LC_{50} for 4 hours of exposure at 0.123 milligrams (mg)/liter; an acute delayed neurotoxicity study in adult hens with no signs of delayed neurotoxicity when dosed at levels above the acute oral LD_{50} (9.9 mg/kilogram (kg)).

The acceptable daily intake (ADI), based on the 90-day rat feeding study (NOEL of 0.015 mg/kg/day), and using a 200-fold safety factor, is calculated to be 0.000075 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.0045 mg/day. The current action will increase the TMRC by 0.0001 mg/day and will utilize an additional 0.2 percent of the ADI. The tolerance that will be established by this proposed rule is considered to pose a negligible incremental dietary risk since dietary exposure will not be significantly increased.

The nature of the residues is adequately understood and an adequate analytical method, gas-chromatography using a flame photometric detector, is available for enforcement purposes. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR Part 180 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, "[PP 0E2341/P242]". All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: September 16, 1982.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Therefore, it is proposed that 40 CFR 180.262 be revised by reformatting into alphabetical order and by adding and alphabetically inserting the raw agricultural commodity mushrooms to read as follows:

§ 180.262 Ethoprop; tolerances for residues.

Tolerances are established for residues of the nematocide and insecticide ethoprop (*O*-ethyl *S,S*-dipropyl phosphorodithioate) in or on the following raw agricultural commodities:

Commodities	Parts per million
Bananas	0.02 (N)
Beans, lima	0.02 (N)
Beans, lima, forage	0.02 (N)
Beans, snap	0.02 (N)
Beans, snap, forage	0.02 (N)
Cabbage	0.02 (N)
Corn, fodder	0.02 (N)

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

Office of Plans, Programs, and Financial Management

41 CFR Part 101–41

Facsimile Signature on Standard Form 1113

AGENCY: General Services Administration.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend the regulations to permit carriers to use facsimile signatures of its certifying officials on the "Payee's Certificate" of the Public Voucher for Transportation Charges, Standard Form (SF) 1113, without the requirement that such signatures be initialed by duly authorized persons. The intent of this proposal is to reduce the time and cost to the carriers and to facilitate carrier preparation of SF 1113.

DATE: Comments must be received by October 29, 1982.

ADDRESS: Written comments should be sent to General Services Administration (BWCPR), Chester A. Arthur Building, Washington, D.C. 20405.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Reports and Procedures Branch, Office of Transportation Audit (202–275–0664).

SUPPLEMENTARY INFORMATION: Based upon a carrier's inquiry to this office, GSA reviewed the current regulations that require an authorized person to initial a facsimile signature of SF 1113, (see FPMR 101–41.214–5(c) and 101–41.310–2(c)). The use of a facsimile signature in the certification space is adequate if authorized by the certifying official. It also assumes a personal examination and familiarization with the facts contained in the document. Accountability for certification therefore remains with the individual so designated in the signature block.

GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least cost to society.

List of Subjects in 41 CFR Part 101–41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Maritime carriers, Moving of household goods, Passenger services, Railroads, Transportation.

PART 101–41—TRANSPORTATION DOCUMENTATION AND AUDIT

It is proposed to amend 41 CFR Part 101–41 as follows:

Subpart 101–41.2 Passenger Transportation Services Furnished for the Account of the United States

1. Section 101–41.214–5(c) is revised as follows:

§ 101–41.214–5 Preparation of carrier billing form.

* * * * *

(c) The carrier shall complete the "Payee's Certificate" section of the voucher. Carriers may use a machine-typed name of the carrier's certifying official provided the machine-typed name is initialed by a duly authorized person, or carriers may use a facsimile signature of the carrier's certifying official, as authorized by that official. The carrier shall complete the tear-off portion of the SF 1113 and shall not substitute a memorandum copy (SF 1113–A) for the tear-off portion.

* * * * *

2. Section 101–41.310–2(c) is revised as follows:

§ 101–41.310–2 Preparation of carrier billing form.

* * * * *

(c) Carriers may use a machine-typed name of the carrier's certifying official in the "Payee's Certificate" section of the voucher provided the machine-typed name is initialed by a duly authorized person, or carriers may use a facsimile signature of the carrier's certifying official as authorized by that official.

* * * * *

(31 U.S.C. 244 and 40 U.S.C. 486(c)).

Dated: September 10, 1982.

Notices

Federal Register
Vol. 47, No. 189
Wednesday, September 29, 1982

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Notice of Meeting

Notice is hereby given in accordance with § 800.6(d)(3) of the regulations of the Advisory Council on Historic Preservation, "Protection of Historic and Cultural Properties" (36 CFR Part 800), that the Council will meet on October 19, 1982, to consider the proposed construction of a barge unloading/loading facility at Ohio River Mile 477.3 in Hamilton County, Ohio. It has been determined that this undertaking, for which the Corps of Engineers has issued a permit, will adversely affect Anderson's Ferry, a property included in the National Register of Historic Places.

Pursuant to § 800.6(d)(2) of the Council's regulations, the Chairman of the Council decided on September 20, 1982, that the Council should consider this project in accordance with Section 106 of the National Historic Preservation Act of 1966 (16 U.S.C. Sec. 470f, as amended).

The Council was established by the National Historic Preservation Act to advise the President and Congress on matters relating to historic preservation and to comment upon Federal, federally assisted, and federally licensed undertakings having an effect upon properties listed in or eligible for inclusion in the National Register of Historic Places. The Council's members are the Secretary of the Interior, the Architect of the Capitol, the Secretary of Agriculture, and the heads of four other Federal agencies appointed by the President, one Governor and one mayor appointed by the President, the President of the National Conference of State Historic Preservation Officers, the Chairman of the National Trust for Historic Preservation, and seven private citizens appointed by the President.

The Council will meet at 9 a.m. in the Board Room of the American Institute of Architects, 1735 New York Avenue, NW., Washington, D.C.

The Council will consider written and oral statements from concerned parties. Written statements should be submitted to the Executive Director of the Council by October 12, 1982. Persons wishing to make oral statements should notify the Executive Director by October 15, 1982. Additional information concerning the meeting or the submission of statements is available from the Executive Director, Advisory Council on Historic Preservation, Suite 430, 1522 K Street NW., Washington, D.C. 20005 (202–254–3967).

Dated: September 23, 1982.

Frank L. Suman,

Acting Executive Director.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

September 24, 1982 .

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listing should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Richard J. Schrimper, Statistical Clearance Officer (202) 447–6201

BILLING CODE 3410-01-M

Office of the Secretary

Section 22 Import Fees; Determination of Quarterly Import Fees On Sugar

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: Headnote 4(c) of Part 3 of the Appendix to the Tariff Schedules of the United States (TSUS) requires the Secretary of Agriculture to determine on a quarterly basis the amount of the fees which shall be imposed on imports of raw and refined sugar (TSUS items 956.05, 956.15, and 957.15) under the authority of Section 22 of the Agricultural Adjustment Act of 1033, as amended. This notice announces those determinations for the fourth calendar quarter of 1982.

EFFECTIVE DATE: October 1, 1982.

FOR FURTHER INFORMATION CONTACT: William F. Doering, Foreign Agricultural Service, Department of Agriculture, Washington, D.C. 20250 (202–447–6723).

SUPPLEMENTARY INFORMATION: By Presidential Proclamation No. 4940, dated May 5, 1982, Headnote 4 of Part 3 of the TSUS was amended to provide that quarterly adjusted fees shall be imposed on imports of raw and refined sugar (TSUS items 956.05, 956.15, and 957.15). Paragraph (c)(ii) of Headnote 4 provides that the quarterly adjusted fee for item 956.15 shall be the amount by which the average of the adjusted daily spot (domestic) price quotations for raw sugar for the 20 consecutive market days immediately preceding the 20th day of the month preceding the calendar quarter during which the fee shall be applicable (as reported by the New York Coffee, Sugar, and Cocoa Exchange), expressed in United States cents per pound, in bulk, is less than the market stabilization price. The market stabilization price for the fourth calendar quarter of 1982 is 20.73 cents per pound. However, whenever the average of the daily spot price quotations for 10 consecutive market days within any calendar quarter: (1) Exceeds the market stabilization price by more than one cent, the fee then in effect shall be decreased by one cent; or (2) is less than the market stabilization price by more than one cent, the fee then in effect shall be increased by one cent. Paragraph (c)(i) of Headnote 4 further provides that the quarterly adjusted fee for items 956.05 and 957.15 shall be the amount of the fee for item 956.15 plus one cent.

The average of the adjusted daily spot (domestic) price quotations for raw sugar for the applicable period prior to the fourth calendar quarter of 1982 has been calculated to be 21.0017 cents per pound. This results in a fee of 0.00 cent per pound for item 956.15, since the adjusted average spot price is greater than 20.73 cents. Accordingly, the fee for items 956.05 and 957.15 for the fourth calendar quarter of 1982 is 1.00 cent per pound.

Headnote 4(c) requires the Secretary of Agriculture to determine and announce the amount of the quarterly fees no later than the 25th day of the month preceding the calendar quarter during which the fees shall be applicable. The Secretary is also required to certify the amounts of such fees to the Secretary of the Treasury and file notice thereof with the **Federal Register** prior to the beginning of the calendar quarter during which the fees shall be applicable. This notice is therefore being issued in order to comply with the requirements of Headnote 4(c).

Notice

Notice is hereby given that, in accordance with the requirements of Headnote 4(c) of Part 3 of the Appendix to the Tariff Schedules of the United States, it is determined that the quarterly adjusted fees for raw and refined sugar (TSUS items 956.05, 956.15, and 957.15) for the fourth calendar quarter of 1982 shall be as follows:

Item	Fee (cent per pound)
956.05	1.00
956.15	0.00
957.15	1.00

The amounts of such fees have been certified to the Secretary of the Treasury in accordance with paragraph (c)(iv) of Headnote 4.

Signed at Washington, D.C. on September 24, 1982.

Richard E. Lyng,

Acting Secretary of Agriculture.

BILLING CODE 6335-01-M

West Virginia Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the West Virginia Advisory Committee to the Commission will convene at 1:00p and will end at 3:00p, on October 28, 1982, at 215 Professional Building, 1036 Quarrier Street, Conference Room (Human Rights Commission), Charleston, West Virginia 25301. The purpose of this meeting is to plan activities for the fiscal year.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Mr. Donald L. Pitts, 416 South Fayette, Beckley, West Virginia 25801, (304) 252–5309; or the Mid-Atlantic Regional Office, 2120 L Street, NW., Washington, DC 20036, (202) 254–6717.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, DC, September 23, 1982.

John I. Binkley,

Advisory Committee Management Officer.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-479-063]

Animal Glue and Inedible Gelatin from Yugoslavia; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration Commerce.

ACTION: Notice of final results of administrative review of antidumping finding.

SUMMARY: On June 30, 1982, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on animal glue and inedible gelatin from Yugoslavia. The review covered the one know exporter of this merchandise to the United States and the time period December 1, 1980 through November 30, 1981. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Interested parties were given an opportunity to submit oral or written comments on the preliminary results. We received no comments.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Betty H. Laxague or Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–3601).

SUPPLEMENTARY INFORMATION:

Background

On December 22, 1977, an antidumping finding with respect to animal glue and inedible gelatin from Yugoslavia was published in the **Federal Register** as Treasury Decision 78–4 (42 FR 64116–7). On June 30, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47–FR 28443–4) the preliminary results of its administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of animal glue and inedible gelatin, of which there are two principal types, hide glue and bone glue. Animal glue is an organic colloid of protein derivation. There is no significant difference between animal glue and inedible gelatin. Animal glues are odorless, dry, hard, hornlike material. They are used as general purpose adhesives in industries producing

abrasives, paper containers, book and magazine bindings, and leather goods. They are also used as sizing agents and as colloids in emulsions and cleaning compounds. Animal glue and inedible gelatin are currently classifiable under items 455.4000 and 455.4200 of the Tariff Schedules of the United States Annotated (TSUSA).

The review covers the only known exporter of Yugoslavian animal glue and inedible gelatin to the United States, Kemija-Impex, and the period December 1, 1980 through November 30, 1981.

Final Results of the Review

Interested parties were invited to comment on the preliminary results. The Department received no written comments or requests for disclosure or a hearing. Therefore, the final results of our review are the same as those presented in the preliminary results of review. There were no known shipments to the United States during the period and there are no known unliquidated entries.

As provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 9.7 percent, based on the margin on the firm's last known shipments, shall be required on all shipments of Yugoslavian animal glue and inedible gelatin entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review. The Department intends to conduct the next administrative review by the end of December 1983. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information in the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration

September 23, 1982.

BILLING CODE 3510-25-M

[A-583-023]

Clear Sheet Glass from Taiwan; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping finding.

SUMMARY: On March 1, 1982, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on clear sheet glass from Taiwan. The review covered three of the four known exporters of this merchandise to the United States and the period August 1, 1980 through July 31, 1981.

Interested parties were given an opportunity to submit oral or written comments on these preliminary results. At the request of the petitioner, we held a public hearing on March 26, 1982.

After analysis of the comments received, the Department has made no adjustments to the dumping margins published in the preliminary results.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Arthur N. DuBois or Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-3601).

SUPPLEMENTARY INFORMATION:

Background

On August 21, 1971, a dumping finding with respect to clear sheet glass from Taiwan was published in the **Federal Register** as Treasury Decision 71-226 (36 FR 16508). On March 1, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 8607) the preliminary results of its administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

The imports covered by the review are shipments of clear sheet glass, currently classifiable under items 542.3120 through 542.4835 of the Tariff Schedules of the United States Annotated (TSUSA). The review covers the three known Taiwanese exporters of clear sheet glass to the United States, Hsinchu Glass Works, Inc., Taiwan Glass Corporation, and Yotak Trading Company, Ltd., and the period August 1, 1980 through July 31, 1981. We will cover the only known third-country reseller, Israeli International Trade Company, Ltd., in a subsequent review.

Analysis of Comments Received

Interested parties were invited to comment on the preliminary results. The petitioner, PPG Industries, Inc. ("PPG"), requested a hearing which was conducted by the Department on March 26, 1982.

(1) *Comment:* PPG claimed that our acceptance without independent review, for use in assessment and establishing cash deposit rates, of Treasury's master list determinations of dumping margins violated the congressional intent that the antidumping laws be vigorously enforced.

Position: For the two firms which did not export during the period of review, we used their appraisement instructions for the most recent period in which they had shipments. It is our policy not to review the correctness of such master lists. As we stated at the hearing, "Where errors can be shown, or even potential error, we have re-evaluated Treasury calculations, but for us to go back and redo everything that Treasury had done would jeopardize our ability to administer the law effectively." This issue is currently being litigated in the Court of International Trade in the case of *PPG Industries, Inc.* v. *United States*, No. 81-9-01273. In this case, however, since PPG alleged discrepancies between Treasury's master list and the applicable response, we reviewed the petitioner's example against the response and master list and are satisfied that there are no discrepancies.

(2) *Comment:* PPG argued that we should further investigate the likely home market price in Taiwan to determine the best available information for foreign market value in the case of Yotak. PPG suggested that we either obtain the home market prices of the other Taiwanese manufacturers of the merchandise during this period or that we apply an inflation factor to the last known foreign market values for Yotak.

Position: Yotak Trading Company was non-responsive to our questionnaire prior to the preliminary review publication. Yotak has since responded, but the response was untimely and inadequate. We examined PPG's latter suggested approach and found no evidence that the margins would be higher than the 7% master list rate if actual price information was available. Since we had no information from Yotak, we compared Yotak's actual prices to the U.S. (as evidenced from Customs Form 6432) with the last known foreign market value for Yotak adjusted for inflation and found a margin less than 7%.

Therefore, we continue to adhere to our rule for non-responsive firms; that is, we used as best information available the higher of the most recent rates for other firms.

Final Results of the Review

After analysis of the comments received, the final results of our review

are the same as those presented in our preliminary results of review, and we determine that the following weighted-average margins exist:

Manufacturer and exporter	Time period	Margin (percent)
Hsinchu Glass Works, Inc.	Aug. 1, 1980 to July 31, 1981	[1]7.0
Taiwan Glass Corp.	Aug. 1, 1980 to July 31, 1981	[1]1.6
Yotek Trading Co., Ltd.	Aug. 1, 1980 to July 31, 1981	7.0

[1] No shipments during the period.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase dates during the time period involved. The Department will issue assessment instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the above margins for each firm shall be required on all shipments of Taiwanese clear sheet glass from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. For any shipment from a new exporter not covered in this administrative review, unrelated to any of the covered firms, a cash deposit shall be required at the highest rate for responding firms with shipments during the most recent period in which shipments occurred. These deposit requirements shall remain in effect until publication of the final results of the next administrative review. The Department intends to conduct the next administrative review by the end of August 1983. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary, Import Administration

September 22, 1982.

Impression Fabric of Man-Made Fiber from Japan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on impression fabric of man-made fiber from Japan. The review covers the four known exporters of this merchandise to the United States currently covered by the finding and varying time periods through April 30, 1981. The review indicates the existence of dumping margins in particular periods for certain exporters.

As a result of this review, the Department has preliminarily determined to assess dumping duties for one exporter equal to the calculated differences between United States price and foreign market value on each of its shipments during the period of review. The three other firms provided inadequate responses, and for these firms the Department has used the best information available. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Patricia McClenahan or Robert Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202–377–5255).

SUPPLEMENTARY INFORMATION:

Background

On April 22, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 17319) the final results of its first administrative review of the antidumping finding on impression fabric of man-made fiber from Japan (43 FR 22344, May 25, 1978) and announced its intent to conduct the next administrative review as soon as possible in 1982. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has not conducted that administrative review. The substantive provisions of the Antidumping Act of 1921 ("the 1921 Act") and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by the review are shipments of impression fabric of man-made fiber ("impression fabric"), currently classifiable under item numbers 338.5001, 338.5002, and 347.6020 of the Tariff Schedules of the United States Annotated (TSUSA). The review covers the four known exporters of impression fabric to the U.S. currently covered by the finding and varying time periods through April 30, 1981. Nissei Sangyo Co., Ltd. ("Sangyo") provided an adequate response. Three other firms, Nissei Co., Ltd. ("Nissei"), Mitsui and Co., Ltd. ("Mitsui"), and Marubeni Corporation ("Marubeni"), provided inadequate responses. For these non-responsive firms we used the best information available. The best information available for Nissei is its most recent rate, since it is higher than the rate for the responding firm in the current period. For Mitsui and Marubeni the best information available is the fair value rate, since it is higher than the rate for the responding firm in the current period.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act or section 203 of the 1921 Act, because the merchandise was sold to unrelated purchasers prior to its importation into the United States. Purchase price was based on the packed, delivered price from the Japanese firm's U.S. affiliate to unrelated purchasers in the United States. Where applicable, adjustments were made for U.S. duty, U.S. and foreign inland freight, shipping charges, ocean freight, and insurance. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act or section 205 of the 1921 Act. The foreign market value was based on the packed delivered price and was adjusted, where applicable, for inland freight, interest, discounts, and packing cost differences. We made adjustments for differences in technical service, warranty, and direct selling expenses, and for differences in the merchandise, in accordance with §§ 353.15 and 353.16 of the Commerce Regulations and §§ 153.10 and 153.11 of the Customs Regulations. Claims for differences in other selling expenses were not considered directly related to the sales in question and, therefore, were disallowed. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist:

Exporter	Time period	Margin (percent)
Nissei Sangyo Co., Ltd.	May 25, 1978 to Apr. 30, 1981	5.76
Nissei Company Ltd.	May 1, 1980 to Apr. 30, 1981	10.12
Mitsui & Co., Ltd.	Sept. 1, 1977 to Apr. 30, 1981	7.5
Marubeni Corp	May 25, 1978 to Apr. 30, 1981	7.5

Nichibo Co., Ltd. has consistently stated that all existing contracts and sales to its U.S. customers are of fabric of 100% pure silk. The Department has no information that the firm has ever shipped merchandise covered by this finding. The Department therefore preliminarily has decided not to include this company in this or future section 751 reviews unless it begins shipping Japanese impression fabric of man-made fiber to the United States.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administration protective order must be made no later than 5 days after the date of publication. The Department will publish, the final results of this administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase dates during the time periods involved. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue assessment instructions on each exporter directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the margins above shall be required on all shipments of impression fabric of man-made fiber from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

September 23, 1982.

Steel Reinforcing Bars from Canada; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on steel reinforcing bars from Canada. The review covers the only manufacturer covered by the finding, Western Canada Steel Limited, for the period January 1, 1980 through March 31, 1981, and the two other possible exporters of reinforcing bars made by Western Canada Steel for varying periods through March 31, 1981.

Two of the firms did not respond to the Department's questionnaire and the third firm's response was inadequate. The Department intends to use the best information available, which is the most recent rate for Western Canada Steel, for assessment and estimated antidumping duty deposits. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Al Jemmott or Robert Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-5255).

SUPPLEMENTARY INFORMATION:

Background

On February 4, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 5252-53) the final results of its first administrative review of the antidumping finding on steel reinforcing bars from Canada (29 FR 5341-42, April 21, 1964) and announced its intent to conduct the next administrative review by the end of April 1982. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review. The substantive provisions of the Antidumping Act of 1921 ("the 1921 Act") and the appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by the review are shipments of steel reinforcing bars, currently classifiable under items 606.7900 and 606.8100 of the Tariff Schedules of the United States Annotated (TSUSA), manufactured by Western Canada Steel Limited. The review covers the period January 1, 1980 through March 31, 1981 for Western Canada Steel Limited, and varying periods through March 31, 1981 for the two other possible exporters to the U.S. of reinforcing bars manufactured by Western Canada Steel, Russelsteel Limited and Rhodes Vaughn Reinforcing Limited. Two of the firms, Western Canada Steel and Rhodes Vaughn, did not respond to the Department's questionnaire and Russelsteel's response was inadequate. Therefore, the Department used the best information available, which is the rate determined for Western Canada Steel in our last administrative review.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the following margins exist:

Manufacturer and exporter	Time period	Margin (percent)
Western Canada Steel Ltd.	Jan. 1, 80 to Mar. 31, 1981	5.40
Western Canada Steel/Rhodes Vaughn Reinforcing Ltd.	Apr. 21, 64 to Mar. 31, 1981	5.40
Western Canada Steel/ Russelsteel Ltd.	Apr. 1, 77 to Mar 31, 1981	5.40

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made within 5 days of the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the Customs Service shall assess,

dumping duties on all appropriate entries with purchase dates during the time periods involved. The Department will issue assessment instructions on each exporter directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the margins stated above shall be required on all shipments of Canadian steel reinforcing bars manufactured by Western Canada Steel Limited entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

September 22, 1982.

BILLING CODE 3510-25-M

Numerically Controlled Machine Tool Technical Advisory Committee; Partially Closed Meeting

AGENCY: International Trade Administration, Commerce.

SUMMARY: The Numerically Controlled Machine Tool Technical Advisory Committee was initially established on January 3, 1973, and rechartered on September 18, 1981, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to numerically controlled machine tool or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States establishes or in which it participates including proposed revisions of any such controls.

TIME AND PLACE: October 26, 1982, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 5230, 14th Street and Constitution Ave., NW., Washington, D.C.

AGENDA:

General Session

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Approval of minutes of the June 30, 1982 meeting.

(4) Discussion of International Machine Tool Show—82.

(5) Discussion of robots.

(6) New Business.

Executive Session

(7) Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

PUBLIC PARTICIPATION: The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356. A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 5317, U.S. Department of Commerce, Telephone: 202–377–4217.

FOR FURTHER INFORMATION OR COPIES OF THE MINUTES CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S Department of Commerce, Washington, D.C. 20230, Telephone: 202–377–2583.

Dated: September 22, 1982.

John K. Boidock,

Director, Office of Export Administration.

[FR Doc. 82-26730 Filed 9-28-82; 8:45 am]

BILLING CODE 3510-25-M

Initiation of Antidumping Investigation; Steel Rails From France

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of antidumping investigation.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping investigation to determine whether steel rails from France are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether there is a reasonable indication that imports of steel rails from France are materially injuring, or are threatening to materially injure, a United States industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before October 18, 1982, and we will make ours on or before February 10, 1983.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: David L. Binder, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone (202) 377–2438.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982 we received a petition filed by counsel on behalf of CF&I Steel Corporation, a United States producer of steel rails. In compliance with the filing requirements of section 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports from France of steel rails are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act), and that these imports are materially injuring, or are threatening to materially injure, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for initiation of an antidumping investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on steel rails and have found that it meets these requirements.

Therefore, in accordance with section 732 of the Act, we are initiating an antidumping investigation to determine whether steel rails from France are being, or are likely to be, sold in the United States at less than fair value. If the investigation proceeds normally, we will make our preliminary determination by Feburary 10, 1983.

Scope of the Investigation

For purposes of this investigation, the term "Steel Rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms it will not disclose such information either publicly or under and administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from France are materially injuring, or are threatening to materially injure, a United States industry. If its determination is negative, this investigation will terminate; othewise, the investigation will proceed according to statutory procedures.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Initiation of Antidumping Investigation; Steel Rails From the Federal Republic of Germany

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of antidumping investigation.

SUMMARY: On the basis of a petition filed with the United States Department of Commerce, we are initiating an antidumping investigation to determine whether steel rails from the Federal Republic of Germany are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether there is a reasonable indication that imports of steel rails from the Federal Republic of Germany are materially injuring, or are threatening to materially injure, a United States industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before October 18, 1982, and we will make ours on or before February 10, 1983.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: David L. Binder, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone (202) 377-1779.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982, we received a petition filed by counsel on behalf of CF&I Steel Corporation, a United States producer of steel rails. In compliance with the filing requirements of section 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports from the Federal Republic of Germany of steel rails are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act) and that these imports are materially injuring, or are threatening to materially injure, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for initiation of an antidumping investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on steel rails and have found that it meets these requirements.

Therefore, in accordance with section 732 of the Act, we are initiating an antidumping investigation to determine whether steel rails from the Federal Republic of Germany are being, or are likely to be, sold in the United States at less than fair value. If the investigation proceeds normally, we will make our preliminary determination by February 10, 1983.

Scope of the Investigation

For purposes of this investigation, the term "steel rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from the Federal Republic of Germany are materially injuring, or are threatening to materially injure, a United States industry. If its determination is negative, this investigation will terminate; otherwise, the investigation will proceed according to statutory procedures.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

September 23, 1982.

BILLING CODE 3510-25-M

Initiation of Antidumping Investigation; Steel Rails From the United Kingdom

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of antidumping investigation.

SUMMARY: On the basis of a petition filed with the United States Department of Commerce, we are initiating an antidumping investigation to determine whether steel rails from the United Kingdom are being, or are likely to be, sold in the United States at less than fair

value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether there is a reasonable indication that imports of steel rails from the United Kingdom are materially injuring, or are threatening to materially injure, a United States industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before October 18, 1982, and we will make ours on or before February 10, 1983.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: David L. Binder, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone (202) 377–1779.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982, we received a petition filed by counsel on behalf of CF&I Steel Corporation, a United States producer of steel rails. In compliance with the filing requirements of section 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports from the United Kingdom of steel rails are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act) and that these imports are materially injuring, or are threatening to materially injure, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for initiation of an antidumping investigation and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on steel rails and have found that it meets these requirements.

Therefore, in accordance with section 732 of the Act, we are initiating an antidumping investigation to determine whether steel rails from the United Kingdom are being, or are likely to be, sold in the United States at less than fair value. If the investigation proceeds normally, we will make our preliminary determination by February 10, 1983.

Scope of the Investigation

For purposes of this investigation, the term "steel rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from the United Kingdom are materially injuring, or are threatening to materially injure, a United States industry. If its determination is negative, this investigation will terminate; otherwise, the investigation will proceed according to statutory procedures.

Judith Hippler Bello,

Deputy for Policy to the Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Initiation of Countervailing Duty Investigation; Steel Rails From the Federal Republic of Germany

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of countervailing duty investigation.

SUMMARY: On the basis of a petition filed with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers, manufacturers, or exporters in the Federal Republic of Germany of steel rails receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before October 18, 1982, and we will make ours on or before November 29, 1982.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, (202) 377–3003.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982 we received a petition from counsel for CF&I Steel Corporation on behalf of the U.S. industry producing steel rails. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that producers, manufacturers, or exporters in the Federal Republic of Germany of steel rails receive subsidies within the meaning of section 771(5) of the Tariff Act of 1930, as amended (19 U.S.C. 1677(5)) (the "Act") and that imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry.

The Federal Republic of Germany is a "country under the Agreement" within the meaning of section 701(b) of the Act; therefore, title VII of the Act applies to this investigation.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the petitioner supporting these allegatons. We have examined the petition on steel rails and we have found that the petition meets these requirements.

Therefore, in accordance with section 702(c) of the Act, we are initiating a countervailing duty investigation to determine whether manufacturers, producers or exporters in the Federal Republic of Germany of steel rails received benefits that constitute subsidies within the meaning of section 771(5) of the Act. If our investigation proceeds normally, we will make our preliminary determination by November 29, 1982.

Scope of the Investigation

The product covered by this investigation is steel rails. For purposes of this investigation, the term "steel

rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Allegations of Subsidies

The petition alleges that producers, manufacturers, or exporters in the Federal Republic of Germany receive the following benefits that constitute subsidies:

- Indirect subsidies to the rail industry through government aid for the purchase of steel rails by the government-owned railway.

The petition also alleges that producers, manufacturers, or exporters in the Federal Republic of Germany of steel rails benefit from the following European Communities subsidies:

- Indirect subsidies to the rail industry through the provision of infrastructure aid to the German railway for the purchase of steel rails.

Therefore, we will investigate both German government and European Communities programs, as applicable. We consider the allegation that the rail industry receives indirect subsidies from the purchase of rails by the government owned railroad to be a novel issue. Government procurement, without more, does not constitute a subsidy. The inclusion of this allegation does not imply that we consider this program to be a subsidy to rail producers. We will examine that issue during the course of the investigation.

Notification of ITC

Section 702(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from the Federal Republic of Germany are materially injuring, or threatening to materially injure, a U.S. industry. If its determinations are negative, this investigation will terminate; otherwise, it will proceed to conclusion.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Initiation of Countervailing Duty Investigation; Steel Rails From France

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: On the basis of a petition filed with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers, manufacturers, or exporters in France of steel rails receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before October 18, 1982, and we will make ours on or before November 29, 1982.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, (202) 377-3003.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982 we received a petition from counsel for CF&I Steel Corporation on behalf of the U.S. industry producing steel rails. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that producers, manufacturers, or exporters in France of steel rails receive subsidies within the meaning of section 771(5) of the Tariff Act of 1930, as amended (19 U.S.C. 1677(5)) (the "Act") and that imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry.

France is a "country under the Agreement" within the meaning of section 701(b) of the Act; therefore, title VII of the Act applies to this investigation.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the petitioner supporting these allegations. We have examined the petition on steel rails and we have found that the petition meets these requirements.

Therefore, in accordance with section 702(c) of the Act, we are initiating a countervailing duty investigation to determine whether manufacturers, producers or exporters in France of steel rails receive benefits that constitute subsidies within the meaning of section 771(5) of the Act. If our investigation proceeds normally, we will make our preliminary determination by November 29, 1982.

Scope of the Investigation

The product covered by this investigation is steel rails. For purposes of this investigation, the term "Steel Rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Allegations of Subsidies

The petition alleges that producers, manufacturers, or exporters in France receive the following benefits from the government of France that constitute subsidies:

- Preferential financing including equity infusions
- Certain labor-related aid
- Research and development aid
- Indirect subsidies to the rail producing industry through government aid for the purchase of steel rails by the government-owned railway

The petition also alleges that producers, manufacturers, or exporters in France of steel rails benefit from the following European Communities subsidies:

- European Coal and Steel Community and European Investment Bank loans, loan guarantees and interest rebates
- Indirect subsidies to the rail industry through the provision of infrastructure

aid to the French railway for the purchase of steel rails

Therefore, we will investigate both French government and European Communities programs, as applicable. We consider the allegation that the rail industry receives indirect subsidies from the purchase of rails by the government owned railroad to be a novel issue. Government procurement, without more, does not constitute a subsidy. The inclusion of this allegation does not imply that we consider this program to be a subsidy to rail producers. We will examine this issue during the course of the investigation.

Notification of ITC

Section 702(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from France are materially injuring, or threatening to materially injure, a U.S. industry. If its determinations are negative, this investigation will terminate; otherwise, it will proceed to conclusion.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

Initiation of Countervailing Duty Investigation; Steel Rails From the United Kingdom

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: On the basis of a petition filed with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers, manufacturers, or exporters in the United Kingdom of steel rails receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the U.S. International Trade Commission (ITC) of this action so that it may determine whether imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before October 18, 1982, and we will make ours on or before November 29, 1982.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, (202) 377-3003.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982 we received a petition from counsel for CF&I Steel Corporation on behalf of the U.S. industry producing steel rails. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that producers, manufacturers, or exporters in the United Kingdom of steel rails receive subsidies within the meaning of section 771(5) of the Tariff Act of 1930, as amended (19 U.S.C. 1677(5)) (the "Act") and that imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry.

The United Kingdom is a "country under the Agreement" within the meaning of section 701(b) of the Act; therefore, title VII of the Act applies to this investigation.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the petitioner supporting these allegations. We have examined the petition on steel rails and we have found that the petition meets these requirements.

Therefore, in accordance with section 702(c) of the Act, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in the United Kingdom of steel rails receive benefits that constitute subsidies within the meaning of section 771(5) of the Act. If our investigation proceeds normally, we will make our preliminary determination by November 29, 1982.

Scope of the Investigation

The product covered by this investigation is steel rails. For purposes of this investigation, the term "steel rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Allegations of Subsidies

The petition alleges that producers, manufacturers, or exporters in the United Kingdom receive the following benefits from the government of the United Kingdom that constitute subsidies:

- Public dividend capital and new capital
- National Loans Funds loans and loan conversions
- Regional development grants
- Iron & Steel Industry Training Board grants
- Preferential railroad transportation rates
- Indirect subsidies to the rail industry through the purchase of steel rails by the government owned railway.

The petition also alleges that producers, manufacturers, or exporters in the United Kingdom of steel rails benefit from the following European Communities subsidies:

- Industrial investment loans from the European Coal and Steel Community (ECSC)
- Loans from the European Investment Bank (EIB)
- Indirect subsidies to the rail industry through the provision of infrastructure aid to the British railway for the purchase of steel rails.

Therefore, we will investigate both British government and European Communities programs, as applicable. We consider the allegation that the rail industry receives indirect subsidies from the purchase of rails by the government-owned railroad to be a novel issue. Government procurement, without more, does not constitute a subsidy. The inclusion of this allegation does not imply that we consider this program to be a subsidy to rail producers. We will examine that issue during the course of the investigation.

Notification of ITC

Section 702(d) of the Act requires us to notify the ITC of this action and to

provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy (for Policy) to the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from the United Kingdom are materially injuring, or threatening to materially injure, a U.S. industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed to conclusion.

BILLING CODE 3510-25-M

Initiation of Countervailing Duty Investigation; Steel Rails From Luxembourg

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of Countervailing Duty Investigation.

SUMMARY: On the basis of a petition filed with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether producers, manufacturers, or exporters in Luxembourg of steel rails receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the U.S. Interntional Trade Commission (ITC) of this action so that it may determine whether imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry. If the investigation proceeds normally, the ITC, will make its preliminary determination on or before October 18, 1982, and we will make ours on or before November 29, 1982.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230, (202) 377-3003.

SUPPLEMENTARY INFORMATION:

Petition

On September 3, 1982 we received a petition from counsel for CF&I Steel Corporation on behalf of the U.S. industry producing steel rails. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that producers, manufacturers, or exporters in Luxembourg of steel rails receive subsidies within the meaning of section 771(5) of the Tariff Act of 1930, as amended (19 U.S.C. 1677(5)) (the "Act") and that imports of steel rails are materially injuring, or threatening to materially injure, a U.S. industry.

Luxembourg is a "country under the Agreement" within the meaning of section 701(b) of the Act; therefore, title VII of the Act applies to this investigation.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether a petition sets forth the allegations necessary for the initiation of a countervailing duty investigation and whether it contains information reasonably available to the petitioner supporting these allegations. We have examined the petition on steel rails and we have found that the petition meets these requirements.

Therefore, in accordance with section 702(c) of the Act, we are initiating a countervailing duty investigation to determine whether manufacturers, producers or exporters in Luxembourg of steel rails receive benefits that constitute subsidies within the meaning of section 771(5) of the Act. If our investigation proceeds normally, we will make our preliminary determination by November 29, 1982.

Scope of the Investigation

The product covered by this investigation is steel rails. For purposes of this investigation, the term "Steel Rails" covers hot-rolled carbon steel rails and hot-rolled alloy steel rails, whether or not punched, weighing not less than eight pounds per yard, with cross-sectional shapes intended for carrying wheel loads in railroad, railway and crane runway applications, as currently provided for in items 610.2010, 610.2020 and 610.2100 of the *Tariff Schedules of the United States Annotated.*

Allegations of Subsidies

The petition alleges that producers, manufacturers, or exporters in Luxembourg receive the following benefits from the government of Luxembourg that consititute subsidies:

- Capital grants
- Labor-related aid
- Indirect subsidies to the rail industry through government aid for the purchase of steel rails by the government owned railways

The petition also alleges that producers, manufacturers, or exporters of Luxembourg of steel rails benefit from the following European Communities subsidies:

- Interest rebates
- Indirect subsidies to the rail industry through the provision of infrastructure aid to the Luxembourg railway for the purchase of steel rails

Therefore, we will investigate both Luxembourg government and European Communities programs, as applicable. We consider the allegation that the rail industry receives indirect subsidies from the purchase of rails by the government owned railroad to be a novel issue. Government procurement, without more, does not constitute a subsidy. The inclusion of this allegation does not imply that we consider this program to be a subsidy to rail producers. We will examine that issue during the course of the investigation.

Notification of ITC

Section 702(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by October 18, 1982 whether there is a reasonable indication that imports of steel rails from Luxembourg are materially injuring, or threatening to materially injure, a U.S. industry. If its determinations are negative, this investigation will terminate; otherwise, it will proceed to conclusion.

BILLING CODE 3510-21-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Restraint Level for Certain Cotton Apparel Products from Macau

September 24, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing by the application of swing and carryforward, the level of restraint established for women's, girls', and infants' woven cotton blouses in Category 341 from 80,094 dozen to 90,507 dozen, produced or manufactured in Macau and exported during the agreement year which began on January 1, 1982.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 20, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5920), and May 13, 1982 (47 FR 20654)).

SUMMARY: The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, as amended, between the Governments of the United States and Portugal, concerning textile and apparel products produced or manufactured in Macau, provides, among other things, for percentage increases in certain specific ceilings during an agreement year (swing) and for the borrowing of yardage from the succeeding year's level (carryforward) with the amount used being deducted from the level in the succeeding year. Pursuant to the terms of the bilateral agreement, the level of restraint for Category 341 is being adjusted for the twelve-month period which began on January 1, 1982.

EFFECTIVE DATE: September 30, 1982.

FOR FURTHER INFORMATION CONTACT: Diana Bass, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202377-4212).

SUPPLEMENTARY INFORMATION: On December 14, 1981, there was published in the **Federal Register** (46 FR 60872) a letter dated December 9, 1981, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain specified categories of cotton, wool, and man-made fiber textile products, including Category 341, produced or manufactured in Macau, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1982 and extends through December 31, 1982. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the level of restraint previously established for cotton textile products in Category 341 to the designated amount.

Walter C. Lenahan,

Acting Chairman, Committee for the Implementation of Textile Agreements.

September 24, 1982.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: On December 9, 1981, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning on January 1, 1982 and extending through December 31, 1982 of cotton, wool, and man-made fiber textile products, produced or manufactured in Macau, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, as amended, Between the Governments of the United States and Portugal; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on September 30, 1982 and for the twelve-month period beginning on January 1, 1982 and extending through December 31, 1982, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 341, produced or manufactured in Macau, in excess of 90,507 dozen.[2]

The actions taken with respect to the Government of Portugal and with respect to imports of cotton textile products from Macau have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

Adjusting the Import Restraint Level for Certain Wool Apparel Products from Malaysia

September 24, 1982.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Adjusting the level of restraint established for wool sweaters in Category 445/446, produced or manufactured in Malaysia and exported during the agreement year which began on January 1, 1982 by the application of 1,489 dozen of carryforward and the reduction of 1,474 dozen of carryforward

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, as amended, between the Governments of the United States and Portugal, which provide, in part, that: (1) within the aggregate and applicable group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[2] The level of restraint has not been adjusted to reflect any imports after December 31, 1981.

used in 1981. The level will be increased to 22,506 dozen.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), August 12, 1980 (45 FR 53506), December 24, 1980 (45 FR 85142), May 5, 1981 (46 FR 25121), October 5, 1981 (46 FR 48963), October 27, 1981 (46 FR 52409), February 9, 1982 (47 FR 5926), and May 13, 1982 (47 FR 20654)).

SUMMARY: The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of May 17 and June 8, 1978, as amended, between the Governments of the United States and Malaysia, provides, among other things, for the borrowing of designated percentages of yardage from the succeeding year's level (carryforward) with the amount used being deducted from the level in the succeeding year. In accordance with the terms of the bilateral agreement, carryforward in the amount of 1,489 dozen is being applied to the level of restraint for wool textile products in Category 445/446, and 1,474 dozen in carryforward used in 1981 in being deducted, resulting in a net increase in the 1982 level to 22,506 dozen.

EFFECTIVE DATE: September 24, 1982.

FOR FURTHER INFORMATION CONTACT: Gordana Slijepcevic, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

SUPPLEMENTARY INFORMATION: On December 18, 1981, there was published in the **Federal Register** (46 FR 61690) a letter dated December 14, 1981 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain specified categories of cotton, wool, and man-made fiber textile products, including Category 445/446, produced or manufactured in Malaysia and exported to the United States during the twelve-month period which began on January 1, 1982 and extends through December 31, 1982. In accordance with the terms of the bilateral agreement, the United States Government is adjusting the level of restraint for wool textile products in Category 445/446 increasing it to 22,506 dozen during the agreement year which began on January 1, 1982. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the level to the designated amount.

Walter C. Lenahan,

Acting Chairman, Committee for the Implementation of Textile Agreements.

September 24, 1982

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 14, 1981 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in Malaysia.

Effective on September 24, 1982, paragraph 1 of the directive of December 14, 1981 is amended to include an adjusted level of restraint for wool textile products in Category 445/446 of 22,506 dozen.[1]

The action taken with respect to the Government of Malaysia and with respect to imports of wool textile products from Malaysia has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Intent To Prepare a Draft Environmental Impact Statement (DEIS) For a Proposed Flood Control Project on Sowashee Creek in Meridian, Mississippi

AGENCY: Army Corps of Engineers, DOD.

ACTION: Notice of Intent to Prepare a DEIS.

SUMMARY: 1. The proposed action is to provide flood damage reduction for the City of Meridian, Mississippi. This locale is currently undergoing rapid development in areas which include the flood plain areas of Sowashee Creek. The extensive flood damages which have been previously experienced indicate that a feasible flood control study could be developed for Sowashee Creek.

2. Alternatives: Several flood control alternatives are being developed for the Sowashee Creek area. The DEIS will include an evaluation of the environmental, social, economic, and engineering impacts associated with each alternative plan. The following alternatives are being considered:

a. Snagging and clearing in various reaches of Sowashee Creek.

b. Channel and overbank modification of various lengths of Sowashee Creek.

c. Flood retention structures.

d. Evacuation of the flood plain of Sowashee Creek.

e. Levee constructon and/or modification.

f. Flood proofing of structures within the flood plain of Sowashee Creek.

3. Scoping Process:

a. The scoping process as outlined by the Council on Environmental Quality in the November 29, 1978 **Federal Register**, National Environmental Policy Act Regulations, will be utilized to involve Federal, State, and local agencies, and other interested persons in the preparation of the DEIS. Identification of significant issues to be addressed in the DEIS will be determined through the scoping process. The views and concerns of agencies and individuals will be obtained through personal, telephone, and mail contracts as well as public workshops in lieu of a formal scoping meeting.

b. Coordination with the US Fish and Wildlife Service as required by the Fish and Wildlife Coordination Act and the Endangered Species Act is being undertaken. Coordination as required by other laws will also be conducted.

4. DEIS Preparation: It is estimated that the DEIS will be available to the public in February 1983.

5. Address: Questions about the proposed action can be answered by: Ms. Càrol Gorbics, US Army Engineer District, Mobile, ATTN: SAMPD–ES, PO Box 2288, Mobile, Alabama 36628.

Dated: September 20, 1982.

Patrick J. Kelly,

Colonel, CE District Engineer.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 82–09–NG]

Natural Gas Imports; Northern Natural Gas Co., Division of InterNorth, Inc., Application To Amend Authorization To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of petition to amend authorization to import natural gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of the receipt on July 16, 1982, of the application of Northern Natural Gas Company, Division of InterNorth, Inc., (Northern) to amend its existing ERA authorization to import Canadian natural gas purchased from Consolidated Natural Gas Limited (Consolidated) at a point near Emerson, Manitoba. Northern requests an increase in its authorized maximum daily volumes from 200,000 Mcf per day to 300,000 per day, less any volumes it imports under a related Federal Energy Regulatory Commission (FERC) authorization at Monchy, Saskatchewan. Northern does not request an increase in the currently authorized total annual volume of 73,000,000 Mcf per year or any other change to its existing authorization.

The petition is filed with ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–54. Protests or petitions to intervene are invited.

DATES: Protests or petitions to intervene are to be filed no later than 4:30 p.m. on October 14, 1982.

FOR FURTHER INFORMATION CONTACT:

P. J. Fleming (Natural Gas Branch, Oil and Gas Imports, Office of Fuels Programs), Economic Regulatory Administration, 12th & Pennsylvania Avenue, N.W., Room 6144, RG–631, Washington, D.C. 20461, 202–633–9296

Sue D. Sheriden (Office of General Counsel, Natural Gas and Mineral Leasing), Department of Energy, Forrestal Building, Room 6E–042, Washington, D.C. 20585, 202–252–6667

SUPPLEMENTARY INFORMATION: On August 29, 1980, the ERA issued DOE/ERA Opinion and Order No. 19 (ERA Docket No. 79–24–NG) authorizing Northern to import from Canada up to 200,000 Mcf of natural gas per day and up to 73,000,000 Mcf of natural gas per year through facilities near Emerson, Manitoba, for the period November 1, 1980, through October 1, 1981. For the period November 1, 1981, through October 31, 1987, Northern was authorized to import up to 200,000 Mcf per day and up to 73,000,000 Mcf per year at the point near Emerson, Manitoba, less any volumes Northern elects to import at Monchy, Saskatchewan under a separate order issued by the FERC on June 27, 1980 (Docket No. CP80–22), pursuant to the FERC's authority under DOE Delegation Order No. 0204–8 (42 FR 61491, December 5, 1977)). The pipeline facilities at Monchy are related to the Northern Border Pipeline Company (Northern Border) segment of the Alaska Natural Gas Transportation System (ANGTS).

Northern states that, because of a temporary supply surplus, it has reduced its takes of Canadian gas during the 1982 summer months and thus will likely be under its contract minimums for the current contract year. In order to enable it to take during the upcoming heating season the volumes for which deficiency payments have been made, Northern requests an increase in its maximum daily import authorization at Emerson from 200,000 Mcf per day to 300,000 Mcf per day, less any volumes it imports at Monchy. Northern does not request an increase in its currently authorized total annual volume of 73,000,000 Mcf per year. Northern states that these arrangements do not require any additional facilities.

Northern indicates that its supplier, Consolidated, has made a corresponding request of the National Energy Board of Canada to increase the daily volumes it is authorized to export on a best efforts basis at Emerson. Northern has also requested the FERC to increase its daily maximum authorization at Monchy from 100,000 Mcf to 200,000 Mcf per day (Docket No. CP80–22–004).

Northern asserts that the authorization requested is "in the public interest" since it will enable it to take, on a best efforts basis, increased volumes during the winter months. Thus, Northern states the increase in maximum daily volumes at Emerson will enable it to fulfill its minimum purchase obligation under the Consolidated contract in a manner which will best satisfy Northern's system requirements.

Other Information

Any person wishing to become a party to the proceeding, and thus to participate as a party in any conference or hearing which might be convened, must file a petition to intervene. In view of Northern's request that it be authorized to import the increased volumes during the 1982–83 winter heating season, the ERA is shortening the comment and intervention period to 15 days from the date this noticie is published. Any person may file a protest with respect to Northern's petition. The filing of a protest will not serve to make the protestant a party to the proceeding. Protests will be considered in determining the appropriate action to be taken on the petition.

All protests and petitions to intervene must meet the requirements that were specified by the regulations that were in effect on October 1, 1977, in 18 CFR 1.8 and 1.10. They should be filed with the Natural Gas Branch, Economic Regulatory Administration, Room 6144, RG–631, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461. All protests and petitions to intervene must be filed no later than 4:30 p.m. October 14, 1982.

A hearing will not be held unless a motion is made by a party or person seeking intervention and granted by the ERA, or if the ERA on its own motion believes that a hearing is necessary or required. A person filing a motion must demonstrate how a hearing will advance the proceedings. If a hearing is scheduled, the ERA will provide notice to all parties and persons whose petitions to intervene are pending.

A copy of Northern's petition is available for inspection and copying in the Natural Gas Branch Docket Room, located in Room 6144, 12th and Pennsylvania Avenue, N.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., on September 23, 1982.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 82-26670 Filed 9-28-82; 8:45 am]

BILLING CODE 6450-01-M

W. R. Hughey Operating Co.; Notice of Proposed Consent Order

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed Consent Order and opportunity for comment.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order with W. R. Hughey Operating Company (Hughey) and provides an opportunity for public comment on the terms and conditions of the proposed Consent Order.

DATE: Comments by: October 29, 1982.

ADDRESS: Send comments to: James O. Neet, Jr., Chief Counsel, Economic Regulatory Administration, Dallas Office, 1341 West Mockingbird, 201W, Dallas, Texas 75347.

FOR FURTHER INFORMATION CONTACT: James O. Neet, Jr., Chief Counsel, Economic Regulatory Administration, Dallas Office, 1341 West Mockingbird, 201W, Dallas, Texas 75247, 214/767–7536. Copies of the Consent Orders may be obtained free of charge by writing or calling this office.

SUPPLEMENTARY INFORMATION: On September 10, 1982, the ERA executed a proposed Consent Order with W. R. Hughey Operating Company of Tyler, Texas. Under 10 CFR § 205.199J(b), a proposed Consent Order which involves the sum of $500,000 or more, excluding interest and penalties, becomes effective no sooner than thirty days after publication of a notice in the **Federal Register** requesting comments concerning the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order or issue the Consent Order as signed.

I. The Consent Order

W. R. Hughey Operating Company, with its home office located in Tyler, Texas, is a firm engaged in the business of producing and selling crude oil, and subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211, 212 during the period covered by this Consent Order. To resolve certain potential civil liability arising out of the Mandatory Petroleum Price Regulations and related regulations, 10 C.F.R., Parts 205, 210, 211, 212, in connection with Hughey's transactions involving crude oil during the period September 1, 1973 through September 30, 1980 ("the period covered by this Consent Order"), the ERA and W. R. Hughey Operating Company entered into this Consent Order. The ERA had alleged that during the period covered by this Consent Order, the W. R. Hughey Operating Company produced and sold domestic crude oil at prices in excess of the applicable ceiling prices. Hughey denied these allegations, but determined that this Consent Order was an equitable resolution of these allegations which avoided the disruption of its orderly business functions and the expense and inconvenience of protracted and complex litigation.

II. Refunds and Civil Penalty

Disposition of Refunds

Under this Consent Order, W. R. Hughey Operating Company will pay the sum of $595,000 as follows: Hughey shall deliver a certified check for $145,000 thirty (30) days after the effective date of this Consent Order, and certified checks each in the amount of $150,000 no later than January 1, 1983; April 1, 1983; and July 1, 1983. These sums shall be deposited as miscellaneous receipts in the United States Treasury. Hughey shall pay interest on any past due installments at the rate of 18% per annum until paid.

B. Civil Penalty

In addition, W. R. Hughey Operating Company agrees to pay the sum of $5,000 in compromise of civil penalties relating to the above-described transactions during the period covered by this Consent Order.

III. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this Consent Order to the address given above. Comments should be identified on the outside of the envelope and on the documents submitted with the designation, "Comments on W. R. Hughey Operating Company Consent Order." The ERA will consider all comments it receives by 4:30 p.m., local time, on October 29, 1982. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Dallas, Texas on the 20th day of September, 1982.

Ben L. Lemos,

Director, Dallas Office, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. TA83-1-20-000]

Algonquin Gas Transmission Co.; Tariff Filing Under Purchased Feedstock Adjustment Clause

September 23, 1982.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on September 16, 1982, tendered for filing 17th Revised Sheet No. 10–A and Second Revised Sheet No. 20–H.2 pursuant to its Rate Schedule SNG–1 Purchased Feedstock Adjustment Clause ("PFAC"), as contained in its FERC Gas Tariff, First Revised Volume No. 1, reducing the applicable rate by 83.47¢ per MMBtu reflecting a lower cost of feedstock for the 1982–83 season. The adjustments are filed to be effective as of October 16, 1982.

Take notice that Algonquin Gas also requested permission to defer the filing of the post audit cost of service study due at this time within respect to the 1981–82 SNG delivery season. Algonquin Gas stated that such relief was granted

last year with respect to the 1980–81 post audit report, on the grounds that applicable rate-making principles were at issue in Algonquin Gas' rate case in Docket No. RP80–72, and that similar relief is appropriate for the 1981–82 report because Docket No. RP80–72 is pending before the Commission for decision at this time.

Algonquin Gas notes that a copy of this filing is being served upon all affected parties and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before October 4, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-700-000]

Bangor Hydro-Electric Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, Denying Motions for Summary Disposition, and Establishing Procedures

Issued: September 24, 1982.

On July 30, 1982, Bangor Hydro-Electric Company (Bangor Hydro) tendered for filing a wholesale rate increase applicable to five customers.[1] Based on a calendar 1981 test year, the proposed rates would increase jurisdictional revenues by approximately $199,300 (12.3%).[2] Bangor Hydro requests an effective date of October 1, 1982.

Notice of the instant filing was published in the **Federal Register** with comments due on or before August 27, 1982. A timely motion to intervene was filed jointly by Eastern Maine Electric Cooperative, Inc. (Eastern Maine) and the Lubec Water and Electric District (Lubec). In addition, a timely notice of intervention was filed by the Maine Public Utilities Commission.

The intervenors request a five-month suspension of Bangor Hydro's rates on the basis of various cost of service and rate of return issues.[3] In addition, they request that the Commission grant summary disposition with respect to two issues: (1) The inclusion of short-term debt in capital structure; and (2) inclusion of a late payment charge in the company's rate schedule.

On September 9, 1982, Bangor Hydro filed an answer to the motion of Eastern Maine and Lubec. While not opposing their motion to intervene, Bangor Hydro contends that the request for a five month suspension and the motions for summary disposition should be denied. Bangor Hydro disputes the intervenors' cost of service allegations. With respect to the motions for summary disposition, the company alleges that: (1) the short-term debt included in its capital structure is a revolving line of credit and that the Commission denied a motion for summary disposition under similar circumstances in *Gulf States Utilities Co.*, Docket No. ER82–375–000 (July 9, 1982); and (2) the company' proposed late payment charge is cost-justified.

Discussion

The timely notice of intervention filed by the Maine Public Service Commission is sufficient, pursuant to Rule 214(a)(2) of the Commission's Rules of Practice and Procedure (18 CFR § 385.214), to make it a party to this proceeding. Under Rule 214(c)(1), the joint motion of Eastern Maine and Lubec serves to make them parties to the proceeding, absent opposition within 15 days of their pleading.

With respect to the motions for summary disposition, we believe that the issues raise questions of law or fact most appropriately resolved following an evidentiary hearing. We shall therefore deny summary disposition as to both issues.

In view of the matters raised by Eastern Maine and Lubec and our preliminary review, we find that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. We shall therefore accept Bangor Hydro's rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82–23–000 (February 26, 1982), we noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not produce susbtantially excessive revenues, as defined in *West Texas*. Because our review suggests that the proposed increase may not yield excessive revenues, we shall suspend Bangor Hydro's proposed rates for one day, to become effective on October 2, 1982, subject to refund.

The Commission orders:

(A) Bangor Hydro's proposed rates, are hereby accepted for filing and suspended for 1 day, to become effective on October 2, 1982, subject to refund.

(B) The motions of Eastern Maine and Lubec for summary disposition are denied.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I], a public hearing shall be held concerning the justness and reasonableness of Bangor Hydro's rates.

(D) The Commission staff shall serve top sheets in this proceeding on or before October 12, 1982.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C 20426. The presiding administrative law judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-704-000]

Central Louisiana Electric Co.; Order Accepting for Filing and Suspending Rates, Denying Motion To Reject, Granting Motion for Summary Disposition, Noting Intervention, and Establishing Procedures

Issued: September 23, 1982.

On July 30, 1982, Central Louisiana Electric Company (CLECO) tendered for filing increased rates for transmission of power by CLECO to Cajun Electric Power Cooperative's (Cajun) member cooperatives.[1] The proposed rates would increase revenues by approximately $2,100,000 (55%) based on the calendar year 1982 test period. CLECO requests that its proposed rates become effective on September 28, 1982.

Notice of the filing was published in the **Federal Register** with comments due on or before August 27, 1982. Cajun filed a timely protest and motion to intervene. In addition, Cajun moves for rejection of the filing or the issuance of a deficiency letter. If the filing is not rejected, Cajun seeks a maximum suspension and summary disposition with respect to CLECO's inclusion in its cost of service of contributions to the Electric Power Research Institute (EPRI).

In support of its motion to reject the filing, Cajun states that CLECO has substantially understated the revenues to be received from Cajun under the proposed rates inasmuch as CLECO has not included revenues attributable to off-system transmission of "excess power" available to Cajun under unit power purchase commitments. Cajun asserts that failure to file the correct revenue data taints the accuracy of other statements and renders the Period I data so unreliable as to justify rejecting the filing. In addition, according to Cajun, the failure to properly reflect these revenues results in a substantial overstatement of the rate increase needed by CLECO to compensate for its transmission service to Cajun. In further support of its motion, Cajun states that CLECO's submittal fails to comply substantially with the Commission's regulations in that many of the statements filed by CLECO do not contain information required by section 35.13(h). As grounds for a five month suspension, Cajun contends that the rate proposed by CLECO is substantially excessive based on an overstated allocation of distribution costs to Cajun, an excessive rate of return on common equity, and imporper recognition of revenues associated with Cajun's "excess power" delivered outside of CLECO's system.

CLECO responded to Cajun's motion on September 13, 1982. The company denies Cajun's claim that its filing is deficient and states that Cajun's adjustments to CLECO's costs which purport to show that CLECO's rates should be suspended for five months are in error.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), Cajun's motion to intervene serves to make it a party to this proceeding absent opposition within 15 days of its pleading.

We agree with Cajun that summary disposition is warranted with respect to the EPRI issue. We have consistently found that such contributions should not be recovered through wholesale rates.[2] This matter has been resolved with sufficient clarity and in sufficiently generic terms to render further litigation inappropriate. While we shall grant summary disposition, we shall not require immediate refiling by CLECO in view of the relatively small revenue effect of this item. Furthermore, we shall deny Cajun's motion to reject the filing inasmuch as our review indicates that, in other respects, the submittal substantially complies with our regulations.[3]

Our preliminary review of the instant filing and Cajun's pleading indicates that the rates proposed by CLECO have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing and suspend their operation as ordered below.

In *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶ 61,189 (1982), we noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed increase may be unjust and unreasonable but may not generate substantially excessive revenues, as defined in *West Texas*. Contrary to Cajun's contentions, our examination suggests that the proposed transmission rates may not yield substantially excessive revenues. Accordingly, we shall suspend the rates for one day from sixty days after filing, to become effective on September 29, 1982, subject to refund.

As a final matter, the Commission notes that CLECO has utilized full tax normalization with respect to Accelerated Cost Recovery System (ACRS) property. According to our review, it appears that the instant filing reflects a normalization method of accounting for all post-1980 property additions, that CLECO's cost of service correctly reflects the effects of normalization, and that the submittal satisfies the requirements of the Economic Tax Recovery Act of 1981.

The Commission orders:

(A) The motion to reject CLECO's filing or to issue a deficiency letter is hereby denied.

(B) CLECO's cost of service inclusion of contributions to EPRI is summarily rejected. The company shall reflect this determination in its compliance cost of service at the conclusion of this proceeding.

(C) CLECO's proposed rates are hereby accepted for filing and suspended for one day to become effective, subject to refund, on September 29, 1982.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections

BILLING CODE 6717-01-M

[Docket Nos. TC82-61-000 & RM79-15]

Colorado Interstate Gas Co.; Proposed Changes in FERC Gas Tariff

September 24, 1982.

Take notice that Colorado Interstate Gas Company (CIG), on September 17, 1982, tendered for filing Third Revised Sheet No. 61H, superseding Second Revised Sheet No. 61H, to its FERC Gas Tariff, Original Volume No. 1. CIG states that the purpose of this filing is to comply with Order No. 145 issued in Docket No. RM79-15 by updating its index of Entitlements. An effective date of November 1, 1982, is requested for the revised tariff sheet.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 12, 1982, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10.) All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this Application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL82-16-000]

Commonwealth Edison Co.; Order Denying Petition for Emergency Relief, Instituting Investigation, Establishing Procedures, and Consolidating Dockets

Issued: September 23, 1982.

On May 10, 1982, six muncicipal customers [1] (Cities) of Commonwealth Edison Company (Commonwealth) filed a petition for emergency relief and request for investigation.[2] The Cities allege that Commonwealth is recovering excessive costs through its fuel adjustment clause based on imprudent fuel purchase practices associated with its Collins generating station. These contentions are based on comparisons between fuel costs for the Collins station and another oil-fired unit at Commonwealth's Ridgeland station. Cities also refer to a *Moody's 1981 Nationwide Survey* as demonstrating that fuel costs at the Collins station are above regional averages. No further data or testimony have been filed by the Cities in support of their allegations.

The Cities have cited an order of the Illinois Commerce Commission, issued April 21, 1982, in which the Illinois Commission instituted an investigation into Commonwealth's fuel procurement practices at its Collins plant and directed Commonwealth, in the interim, to hold its retail fuel adjustment charge constant at its level on April 21, 1982. In the instant proceeding, the Cities ask that this Commission also initiate an investigation into Commonwealth's fuel procurement policies and order Commonwealth not to increase its fuel adjustment charge to its wholesale customers beyond the amount of Commonwealth's fuel adjustment charge to its retail customers. Absent such relief, the Cities suggest that a price squeeze may result.

Commonwealth filed an answer to Cities' petition on June 9, 1982. In its answer, Commonwealth states that it believes its fuel procurement practices have at all times been reasonable and prudent. Commonwealth also contends that this Commission could order a freeze in Commonwealth's fuel clause charge only after a finding, based upon the results of a hearing, that the charge is unjust and unreasonable. In addition, Commonwealth urges that the relief sought by the Cities would be inequitable because Commonwealth's wholesale fuel adjustment clause, in contrast to its retail fuel adjustment clause, does not provide a matching mechanism for deferred recovery of prior undercollections of fuel expenses. Thus, Commonwealth contends that a freeze of its wholesale fuel clause charge would result in a permanent failure to recover wholesale fuel costs, regardless of whether any impropriety in Commonwealth's fuel procurement practices is ever established.

Commonwealth further asserts that any impropriety that may be established can be adequately redressed through refunds in Commonwealth's ongoing rate case in Docket No. ER82-146-000. In order to avoid unnecessary duplication, however, Commonwealth urges that the Commission defer action on the Cities' petition, pending completion of the ongoing investigation into Commonwealth's fuel procurement practices by the Illinois Commission.

Discussion

The Cities' petition for an order freezing Commonwealth's wholesale fuel adjustment charge must be denied. Their request necessarily raises the issue of whether Commonwealth's fuel procurement practices have been

---

[1] The Cities of Batavia, Geneva, Naperville, Rochelle, Rock Falls and St. Charles, Illinois.

[2] Notice of the petition was issued on May 20, 1982, with responses due by June 25, 1982. On May 25, 1982, the Village of Winnetka, Illinois filed an answer in support of the Cities' petition without raising any new issues.

prudent. This is a factual issue requiring a fully-developed record as a predicate for an informed Commission decision. Cities' petition does not present sufficient uncontroverted evidence for the Commission to act without further development of the record. Pending such a determination, we agree with Commonwealth that it would be inequitable, particularly on the basis of the limited information provided thus far, to compel the company to forego revenues which may later be found to have been appropriate. This is true notwithstanding the Cities' vague allegations with respect to price squeeze ramifications resulting from the State commission's treatment of fuel costs for retail purposes.

We note that all aspects of Commonwealth's presently effective rates, including revenues attributable to fuel adjustment charges, are currently open to investigation in Docket No. ER82-146-000. In addition, the refund protection available in that docket will adequately protect the interests of all affected customers, including the Cities. In view of the pendency of that proceeding, it appears unnecessary to establish a separate hearing for purposes of pursuing the issue of Commonwealth's fuel procurement practices. Therefore, we shall consolidate Docket Nos. ER82-146-000 and EL82-16-000 and expand the scope of the pending proceeding to include as an issue the question of Commonwealth's prudence in its fuel procurement policies for the Collins station as well as the question of the scope of appropriate relief.

Commonwealth's suggestion that this Commission defer action on the Cities' petition pending action by the Illinois Commerce Commission on its investigation will be rejected at this time. We recognize that overlapping issues of fact may be involved in the consideration of Commonwealth's fuel procurement practices for retail and wholesale ratemaking purposes. Nevertheless, we are not persuaded that it would necessarily be appropriate to defer action where an issue germane to Commonwealth's currently pending wholesale rate increase proposal has been legitimately raised. It is not, however, our intention to preclude the presiding judge from determining on the basis of additional information that deferral of this issue is appropriate and will not engender unnecessary delay. Neither do we desire to cause unnecessary duplication of effort or resources. Thus, we encourage the presiding judge to evaluate the possibility of minimizing such duplication by permitting complete discovery of materials already provided in the context of the State commission proceeding, incorporation of pertinent materials by reference, or other appropriate procedures.

The Commission orders:

(A) Cities' petition for emergency relief is hereby denied.

(B) Docket No. EL82-16-000 is hereby consolidated with Docket No. ER82-146-000 for purposes of hearing and decision and the scope of the pending hearing is expanded to include the issues addressed in this order.

(C) The administrative law judge designated to preside in Docket No. ER82-146-000 shall determine the most appropriate procedures for consideration of the matters presented in the consolidated proceeding.

(D) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26729 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-801-000]

Commonwealth Electric Co.; Filing

September 24, 1982.

Take notice that on September 17, 1982, Commonwealth Electric Company (Commonwealth) tendered for filing a proposed change in rate under Supplement No. 7 to its currently effective Rate Schedule FERC No. 34.

Commonwealth states that said change in rate under Supplement No. 7 ("23 KV Wheeling Rate") to Commonwealth's Rate Schedule FERC No. 34 has been computed according to the provisions of Section 6(b) of its Rate Schedule FERC No. 34. Commonwealth further states that such change is proposed to become effective January 1, 1981, thereby superseding the 23 KV Wheeling Rate in effect during calendar 1980.

Commonwealth requests an effective date of January 1, 1981, and therefore requests waiver of the Commision's notice requirements.

Copies of this filing have been served upon Boston Edison Company and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before October 12, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26781 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-802-000]

Commonwealth Electric Co.; Filing

September 24, 1982.

Take notice that on September 17, 1982, Commonwealth Electric Company (Commonwealth) tendered for filing a proposed change in rate under its currently effective Rate Schedule FERC No. 34.

Commonwealth states that said change in rate under Commonwealth's Rate schedule FERC No. 34 has been computed according to the provisions of Section 6(b) of its Rate Sechedule FERC No. 34. Commonwealth further states that such change is proposed to become effective January 1, 1982, thereby superseding the 23 KV Wheeling Rate in effect during calendar 1981.

Commonwealth requests an effective date of January 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have ben served upon the Boston Edison Company and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 12, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26702 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-683-000]

Connecticut Light and Power Co.; Order Accepting for Filing and Suspending Contract Revisions, Granting Waiver, Noting Interventions, and Establishing Procedures

Issued: September 23, 1982.

On July 26, 1982, Connecticut Light and Power Company (CL&P) tendered for filing revisions to 13 unit sales contracts [1] between CL&P and the Connecticut Municipal Electric Energy Cooperative (CMEEC).[2] The unit sales contracts are part of a restructured electric service relationship described in a Memorandum of Understanding dated September 15, 1980.[3] The unit contracts designate CMEEC's entitlements in capacity of various generating units of the Northeast Utilities Companies.

In the 1980 Memorandum of Understanding, the parties agreed that the amount of CMEEC's capacity entitlements would be adjusted, at the option of CMEEC, to recognize (1) increased loads experienced by Norwich as a result of a new Phelps Dodge factory, and (2) increased loads experienced by Jewett City as a result of the transfer of retail industrial customers from CP&L to Jewett City. The parties established a formula for calculating the adjustments which is set forth in Attachment B (sections C, D, and E) to the Memorandum of Understanding. The parties further agreed that final adjustments would be computed on or about May 1, 1982, and be made effective as of July 1, 1982.

CL&P states that the instant revisions provide solely for changes in the size of CMEEC's entitlements in the units, and do not affect the charges, terms, or conditions incorporated in the unit sales contracts. In order to implement the parties' agreement that the revisions would become effective as of July 1, 1982, CL&P requests waiver of the notice requirements.

Notice of the filing was published in the **Federal Register** with comments due on or before August 23, 1982. CMEEC filed a timely intervention and a protest.

In its pleading, CMEEC agrees that the adjustments proposed by CL&P should be made effective as of July 1, 1982, and supports CL&P's request for waiver of notice; however, CMEEC reserves its right to seek further adjustments to the amounts and allocation of its entitlements and appropriate compensation if it is successful.[4] CMEEC contends that CL&P has made two technical errors in calculating the adjustment to reflect the new Phelps Dodge plant.[5] First, CMEEC states that CL&P improperly calculated the Phelps Dodge factory peak load, so that the total amount of the adjustment is understated. Second, CMEEC asserts that CL&P improperly allocated additional capacity, so that CMEEC is allocated less additional capacity in nuclear and hydroelectric units than is appropriate under the unit contracts. CMEEC states that discussions between the parties in an effort to resolve their differences have reached an impasse. Therefore, CMEEC requests that the Commission initiate a hearing to resolve the dispute.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), CMEEC's timely intervention serves to make it a party to this proceeding absent opposition within fifteen days of its pleading.

Upon consideration of CL&P's filing and CMEEC's pleading, we find that the proper calculation of adjustments to CMEEC's capacity entitlements under the unit contracts presents questions of law and fact which should be determined on the basis of an evidentiary hearing. Accordingly, we are unable to conclude that the proposed contract revisions are just and reasonable and we find that they may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. We shall therefore accept the proposed revisions for filing and suspend their operation as ordered below.

The contractual amendments at issue relate only to the stated entitlements in unit capacity and do not seek to effect any direct rate change. Inasmuch as the Memorandum of Understanding anticipated a July 1, 1982 effective date for revised entitlements and CMEEC has expressed its concurrence in this effective date as well as in the waiver of notice, we find that good cause exists to grant the request for waiver of notice. Accordingly, we shall suspend CL&P's proposed contract revisions to become effective, subject to further adjustment, on July 1, 1982.

The Commission orders:

(A) CL&P's request for waiver of the notice requirements is hereby granted.

(B) CL&P's proposed contract revisions are hereby accepted for filing and are suspended to become effective on July 1, 1982, subject to further adjustment and other remedies which may be found to be appropriate under the Federal Power Act.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of CL&P's contract revisions and any appropriate remedies if capacity entitlements are further adjusted.

(D) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately thirty (30) days after the issuance of this order in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(E) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

---

[1] *See* Attachment A for rate schedule designations.

[2] CMEEC is a municipal joint action agency which is authorized to finance, acquire, and construct generating resources and to implement power supply contracts on behalf of its participants, the Cities of Groton and Norwich and the Borough of Jewett City. CMEEC originally entered into 12 contracts with CL&P and one contract with the Hartford Electric Light Company (HELCO). CL&P and HELCO, both subsidiaries, of Northeast Utilities, were merged on June 30, 1982. Thus, CL&P and CMEEC are the only remaining parties to the contracts.

[3] The Memorandum of Understanding was filed with the Commission on October 31, 1980, and accepted for filing by letter order of December 29, 1980, in Docket Nos. ER81-79-000 and ER81-80-000.

[4] CL&P has agreed that CMEEC's acceptance of the adjustments filed in this proceeding does not constitute agreement by CMEEC that the adjustments are final.

[5] CMEEC states that the parties agree on the adjustment to provide for increased retail loads to Jewett City.

Consumers Power Co.; Application

September 24, 1982.

Take notice that Consumers Power Company (Applicant) on September 13, 1982, filed an Application for authority to issue securities under Section 204 of the Federal Power Act. Consumers Power intends to enter into a Construction Financing Agreement with a special purpose corporation for the purpose of financing a Nuclear Training Center and other items of property. The Company proposes to enter into a Credit Agreement with the Toronto-Dominion Bank, Chicago Agency. Pursuant to the Credit Agreement, Toronto-Dominion will accept a note from the Company which in aggregate amount will not exceed $40,000,000. The commitment will be available to the Company until 364 days from the date of execution and delivery of the Construction Financing Agreement.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR § 385.211 or 385.214). All such petitions or protests should be filed on or before October 12, 1982. A copy of this filing is on file with the Commission and is available for public inspection.

Second Revised Sheet No. 248
Third Revised Sheet No. 252

Eastern Shore states that these tariff sheets, which are proposed to be effective September 1, 1982, reflect a change in the effective dates of Eastern Shore's semi-annual Purchased Gas Adjustment (PGA) and Demand Charge Adjustment (DCA) filing from the currently scheduled effective dates of March 1 and September 1 of each year to May 1 and November 1 of each year. Eastern Shore also requests authority to (1) "track" Transco's rates effective September 1, 1982 as proposed in their substitute tariff filing dated September 2, 1982 (Docket No. TA82-2-29-001) and (2) allow Eastern Shore's deferred account surcharge, demand charge unit adjustment and transportation surcharge that became effective on March 1, 1982 to remain in effect for an additional two months.

The Company states that copies of the filing are being mailed to each of its jurisdictional customers and Interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to be come a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-792-000]

Empire District Electric Co.; Filing

September 23, 1982.

Take notice that on September 10, 1982, the Empire District Electric Company (EDE) tendered for filing a proposed Agreement for Interchange of Power and Interconnected Operation between EDE and the Associated Electric Cooperative, Inc. (AEC).

EDE states that the proposed contract provides for interconnected operation between EDE and AEC which will be of mutual advantage to the parties by allowing them to purchase and sell or exchange electric power and energy from one system to the other.

EDE further states that this agreement shall replace the agreement entered into on the 19th of March, 1969 and all amendments thereto.

Significant changes are the addition of the Strafford and Wanda interconnections and addition of the RE, SE, SP and UP Schedules.

Copies of the filing were served upon the Missouri Public Service Commission and Associated Electric Cooperative, Inc.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 6, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make proptestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26730 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-793-000]

Florida Power & Light Co.; Filing

September 23, 1982.

Take notice that Florida Power & Light Company (FP&L) tendered for filing on September 13, 1982, the following tariff sheets as part of its FERC Electric Tariff, First Revised Volume No. 1 applicable to 8 municipal customers and 7 rural electric cooperatives: Sheet Nos. 5 and 5a, Sheet Nos. 6 and 6a, Sheet Nos. 7, 7a and 7b, Reserved for Future Use Sheet No. 8, Sheet Nos. 9 and 9a, and Reserved for Future Use Sheet No. 11.

FP&L also tendered for filing certain tariff sheets containing a revised cover sheet, revisions to the terms and conditions of service under the tariff and a revised index of customers and delivery points.

FP&L also tendered for filing Proposed Amendment No. 3 to the November 19, 1979 Agreement to Provide Specified Firm Power Electric Service between Florida Power & Light Company and Seminole Electric Cooperative, Inc.

FP&L also tendered for filing proposed Amendment No. 1 to the November 19, 1979 Agreement for Alterations to Delivery Points and Service Voltage for Delivery of Electric Power and Energy between FP&L and Lee County Electric Cooperative, Inc.

FP&L proposes to place the revised tariff sheets and amendments containing the first phase of a proposed rate increase into effect on November 12, 1982, sixty days after the date of filing. FP&L proposes that the second phase of the rate increase take effect on November 3, 1982, sixty-one days after filing.

FP&L states that the proposed rates would increase revenues from wholesale sales by approximately $36 million for the 12 month period ending December 31, 1983. The first phase of the proposed rates would increase revenues from wholesale sales by approximately $23.2 million over the same period.

According to FP&L appropriate portions of this filing have been served upon FP&L's wholesale customers and the Florida Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26717 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-701-000]

Florida Power Corp.; Order Accepting for Filing and Suspending Rates, Granting Summary Disposition in Part, Noting Interventions, and Establishing Hearing and Price Squeeze Procedures

Issued: September 24, 1982.

On July 30 1982, Florida Power Corporation (FPC) filed a proposed two-phase wholesale rate increase for full requirements, partial requirements, and transmission service.[1] The phase-one rates would increase revenues by approximately $11.1 million (5.6 percent) for the calendar year 1982 test period. The proposed phase-two rates would result in an additional increase in revenues of about $21.4 million, based on the inclusion of costs associated with the company's 640 MW coal-fired Crystal River No. 4 generating unit. FPC requests that the phase-one rates become effective on September 28, 1982. The company originally requested that the phase-two rates become effective upon the date of commercial operation of Crystal River Unit No. 4 although, as discussed below, FPC has since asked that the Commission defer both a filing date and an effective date for the phase-two rates. The company states that Unit No. 4 is expected to become operational on December 31, 1982.

Notice of FPC's filing was published in the **Federal Register**, with comments due on or before August 26, 1982. Timely motions to intervene have been filed by the Seminole Electric Cooperative, a group of FPC's municipal customers identifying themselves as Florida Cities,[2] and Reedy Creek Utilities Company. Reedy Creek has not raised any specific substantive issues.

The Florida Cities argue at length that FPC's attempt to file a phased increase should be rejected, that the two-phase increase should be viewed in its entirety, and that both phases should be suspended for five months. They further request summary disposition with respect to several matters asserting that the company's positions are unsupported, contrary to past experience, or otherwise inappropriate. In particular, the Florida Cities contend that: (1) FPC's proposed demand allocators deviate from historical experience without explanation, and that a minimal increase, if any, would be supportable based on an allocation using actual Period I demands; (2) FPC has improperly inflated rates by including cost of service "adjustments" to "correct" for the fact that this Commission or its predecessor have precluded rate base inclusion of CWIP or tax normalization in prior periods, contrary to retail regulatory practice; and (3) while Crystal River Unit No. 4 will be in service, at most, for the final month of the test period, FPC's phase-two rate base includes that unit on an annualized basis although other adjustments necessary for proper synchronization have not been made. In addition, the Florida Cities raise a number of specific cost of service and rate design issues, contend that the proposed transmission rates are excessive, allege price squeeze, and urge consideration of the price squeeze claim for suspension purposes.

Seminole, and its member systems served by FPC,[3] request rejection of the

---

[1] *See* Attachment A for rate schedule designations and affected customers.

[2] The Cities of Alachua, Bartow, Bushnell, Chattahoochee, Fort Meade, Leesburg, Mount Dora, Newberry, Ocala, Quincy, Williston, and the Sebring Utilities Commission seek to intervene with respect to the entire rate filing. The remaining Cities, Tallahassee, Lakeland, and Kissimmee, receive only transmission service and have intervened only for purposes of testing the validity of FPC's proposed transmission rate.

[3] The member systems include: Talquin Electric Cooperative, Tri-County Electric Cooperative, Suwannee Valley Electric Cooperative, Clay Electric Cooperative, Glades Electric Cooperative, Peace River Electric Cooperative, Withlacoochee River Electric Cooperative, Sumter Electric Cooperative, and Central Florida Electric Cooperative.

phase-two rate increase or a determination that the filing is deficient. Alternatively, they request a maximum suspension of both phases and the initiation of phased price squeeze proceedings. Seminole objects to FPC's annualization of Crystal River No. 4, contending that other offsetting cost of service adjustments are necessary and that the company's failure to observe the test year regulations warrants rejection of the phase-two rates or deferral of a filing date pending receipt of additional data. Seminole objects to FPC's stated capital structure, addresses the cost of capital issue (and the implications of rate of return and the tax allowance for suspension purposes), and challenges the weighted debt cost used by FPC for interest synchronization. In addition, Seminole raises issues concerning cash working capital, the absence of a load adjustment to the cost of service, spent nuclear fuel disposal costs, nuclear decommissioning costs, "inappropriately labeled" pollution control CWIP, purchased power expense and revenue credits, recovery of abandoned project costs, tax normalization, and the appropriate costs attributable to Crystal River No. 4.

On September 8, 1982, FPC responded to the interventions and protests. After having evaluated the pleadings and its submittal, FPC has acceded to several adjustments in response to the motions for summary disposition. Specifically, the company has agreed to modify its phase-one cost of service and rates to: (1) Eliminate Accumulated Deferred Investment Tax Credits (ADITC) from its capital structure; (2) amortize spent nuclear fuel disposal costs over a ten year period rather than five years;[4] (3) correct for an inadvertent failure to reflect a deduction for nuclear fuel in process in the tax calculation; and (4) correct for an error in calculating unfunded income tax liability. FPC states that the combined effect of these items is to reduce required revenues by $2,529,000; following issuance of the Commission's order in this docket, FPC has agreed to file reduced phase-one rates reflecting these adjustments. FPC, however, denies the remaining allegations of the intervenors with respect to the phase-one increase.

Concerning the phase-two rates, FPC states that it is in the process of reviewing its submittal to determine whether all necessary adjustments have been made to synchronize the annualization of Crystal River No. 4. In order to allow sufficient time for a thorough analysis, the company has asked that the Commission temporarily withhold both a filing date and an effective date for the phase-two increase. When the review is complete, FPC will make a supplemental filing (more than 60 days before the proposed effective date) and renew a request for an effective date. FPC indicates that this approach is preferable to outright rejection of the phase-two rates inasmuch as it will preserve the company's ability to utilize a 1982 test period for both wholesale and retail rate purposes.

[4] We note that the reasonableness of FPC's disposal cost estimates remains as an issue to be addressed at hearing.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the Florida Cities', Seminole's, and Reedy Creek's unopposed motions to intervene serve to make them parties to this proceeding.

In view of FPC's voluntary request to defer a filing date for its phase-two rate increase, we need not address the intervenors' motions with respect to rejection, suspension, or summary disposition insofar as applicable to that portion of FPC's submittal. To the extent appropriate, these requests may be renewed at such time as FPC tenders revised phase-two rates or a subsequent request to implement the originally filed rates.

As noted, FPC has agreed to modify four aspects of its phase-one cost of service and to submit appropriately reduced rates. This voluntary accession moots two requests for summary disposition but leaves a number of issues remaining. While FPC denies that summary disposition is warranted as to the inclusion in rate base of nuclear radwaste-related CWIP at its Crystal River Unit No. 3, we find that Commission precedent supports summary disposition. In our order of August 5, 1982, in *Pennsylvania Electric Company*, Docket No. ER82–593–000, we reiterated our position that nuclear radwaste systems must be excluded from rate base inasmuch as these systems do not qualify as pollution control CWIP within the scope of section 2.16(a) of the regulations.[5] Thus, in revising its rates to reflect the items which FPC has agreed to amend, the company shall also reflect summary disposition by excluding nuclear radwaste-related CWIP from rate base. Having considered the remaining requests for summary disposition, we conclude that they present questions of law or fact more appropriately resolved on the basis of an evidentiary hearing.

Consistent with FPC's request, we shall withhold a filing date for the phase-two increase and permit the company to make a supplemental filing at an appropriate time. With respect to the phase-one rates, our preliminary review of FPC's submittal and the pleadings indicates that the rates have not been shown to be just and reasonable, and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. We shall therefore accept FPC's phase-one rates for filing, as modified by summary disposition and voluntary accession, and we shall suspend those rates as ordered below.

In *West Texas Utilities Company*, Docket No. ER82–23–000 (February 26, 1982), we noted that rate filings would ordinarily be suspended for one day where our preliminary review indicates that the proposed rates may be unjust and unreasonable, but may not produce substantially excessive revenues, as defined in *West Texas*. Our preliminary examination of the phase-one rates suggests that they may not yield excessive revenues. Accordingly, we shall suspend FPC's phase-one rates for one day from sixty days after filing, to become effective on September 29, 1982, subject to refund.[6]

In accordance with the policy and procedures established in *Arkansas Power & Light Company*, Docket No. ER79–339 (August 6, 1979), we shall phase the price squeeze issue raised by the intervenors.

As a final matter, the Commission notes that FPC has utilized full tax normalization with respect to Accelerated Cost Recovery System (ACRS) property. According to our review, it appears that the instant filing reflects a normalization method of accounting for all post-1980 property additions, that FPC's cost of service correctly reflects the effects of normalization, and that FPC's submittal satisfies the requirements of the Economic Tax Recovery Act of 1981.

The Commission orders:

(A) A filing date for FPC's proposed phase-two rates is hereby deferred pending a supplemental filing by FPC. The motions to reject FPC's phase-two

[5] *See Jersey Central Power and Light Company*, Docket No. ER82–426–000, 19 FERC 61,208 (May 26, 1982). *See also Louisiana Power and Light Company*, Opinion No. 110, 14 FERC 61,075 (January 28, 1981).

[6] In response to the Florida Cities' suggestion that we consider the price squeeze allegations in our suspension determination, we note that we have stated consistently that, in the absence of extraordinary circumstances, unproved price squeeze claims will not serve as an independent factor in considering an appropriate suspension period. No such extraordinary circumstances are presented here.

rates or to find the filing deficient are denied without prejudice as moot.

(B) FPC's rate base inclusion of nuclear radwaste systems is summarily rejected. Within fifteen (15) days of the date of this order, the company shall file revised cost statements and rates reflecting this summary disposition as well as the four voluntary adjustments identified in the body of this order. In all other respects, the motions for summary disposition are hereby denied.

(C) FPC's proposed phase-one rate increase is hereby accepted for filing and suspended for one day from sixty days after filing, to become effective on September 29, 1982, subject to refund.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of FPC's rates.

(E) The Commission staff shall serve top sheets in this proceeding within ten (10) days of FPC's submittal in compliance with paragraph (B) above.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(G) The Commission hereby orders the initiation of price squeeze proceedings and further orders that this docket be phased so that the price squeeze proceedings begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding administrative law judge may order a departure from this schedule for good cause shown. The price squeeze claim shall be governed by section 2.17 of the Commission's regulations as it may be modified prior to the commencement of the price squeeze phase of the instant docket.

(H) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26785 Filed 9-28-82; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. ER82-798-000]

Florida Public Utilities Co.; Filing

September 23, 1982.

The filing Company submits the following:

Take notice that on September 16, 1982, Florida Public Utilities Company (FPU) tendered for filing proposed changes in its FERC Electric Tariff. FPU states that the proposed changes would increase revenues from jurisdictional sales and service by $71,224 annually, based on the 12-month period ending June 30, 1982.

FPU further states that the proposed tariff changes are applicable to its wholesale sales and service to the City of Blountstown, Florida, which is the company's only jurisdictional customer. The company states that it purchases power from Gulf Power Company at the latter's Altha Substation, part of which is used in its distribution operations in its Marianna, Florida division and part of which is resold at wholesale to Blountstown. FPU indicates that the purpose of its tariff changes is to pass through to Blountstown the effect on its purchases at the Altha Substation of Gulf Power Company's increase in rates, pending in Docket No. ER82-689-000.

FPU requests an effective date of October 1, 1982.

Copies of this filing were served upon the City of Blountstown and the Florida Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 395.211, 385.214). All such motions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26716 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-689-000]

Gulf Power Co.; Order Accepting for Filing and Suspending Rates, Denying Motion to Reject, Noting Interventions, and Establishing Hearing Procedures

Issued: September 24, 1982.

On July 27, 1982, Gulf Power Company (GPC) tendered for filing increased rates for firm power service to two distribution cooperative customers [1] and Florida Public Utilities Company (FPU).[2] The proposed rates would increase revenues by approximately $1.3 million (7.3%) during the calendar year 1983 test period. GPC requests an effective date of October 1, 1982.

Notice of the filing was published in the Federal Register with responses due on or before August 23, 1982. Alabama Electric Cooperative (AEC), on behalf of its member distribution cooperatives, filed a timely intervention as well as a protest and motion to reject or (to the extent not rejected) to suspend for five months. As grounds for rejection, AEC maintains that the company has failed to satisfy the filing requirements of section 35.13 of the Commission's regulations relating to cost data in support of the stated test period fuel stock balances.[3] In support of a maximum suspension, AEC raises a number of cost of service issues including excessive rate of return, improper demand/energy tilt in rate design, and failure to amortize regulatory expense for a period of time greater than one year. AEC further contends that the single rate schedule proposed by GPC for the cooperative customers and FPU unlawfully discriminates against the cooperative customers by requiring them to pay more than their properly allocated share of the cost of service.

FPU also filed a timely intervention. Although FPU raises no specific substantive issues in its pleading, it states that, as an affected customer, it has an interest in this proceeding which cannot be adequately represented by other parties.

Subsequently, GPC filed a timely response denying that rejection of the filing is warranted, addressing the substantive issues raised by the intervenors, and asserting that a one day suspension is appropriate. While GPC does not oppose the cooperative customers' or FPU's participation as intervenors in this proceeding, it does challenge the sufficiency of AEC's interests as a separate intervening party. On September 13, 1982, GPC filed a supplemental response which raises an additional argument in support of a one day suspension.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motions to intervene serve to make FPU and the cooperative customers parties to this proceeding. Notwithstanding GPC's opposition to AEC's separate participation as an intervening party, we find that AEC has stated sufficient grounds to warrant intervention as a representative of its cooperative members and a potential competitor of GPC. We further note that AEC has been granted intervenor status in a number of prior GPC rate cases. Accordingly, the Commission will grant AEC's motion to intervene.

Despite AEC's contentions, we find that GPC's submittal substantially complies with the Commission's filing regulations;[4] we shall therefore deny the request by AEC to reject GPC's submittal.

Our preliminary review of the instant filing and the pleadings indicates that the rates proposed by GPC have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend their operation as ordered below.

In *West Texas Utilities Company*, Docket No ER 82-23-000, 18 FERC ¶61,189 (February 26, 1982), we explained that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed rates may be unjust and unreasonable but may not generate substantially excessive revenues, as defined in *West Texas*. In the instant proceeding, however, our examination suggests that the proposed rates may produce substantially excessive revenues. Therefore, consistent with *West Texas*, we shall suspend GPC's proposed rates for five months to become effective, subject to refund, on March 1, 1983.

GPC has requested that the Commission issue an order approving the use of tax normalization with respect to Accelerated Cost Recovery System (ACRS) property in order to satisfy the requirements of the Economic Tax Recovery Act of 1981 (ERTA). According to our review, it appears that the instant filing reflects a normalization method of accounting for post-1980 property additions, that GPC's cost of service correctly reflects the effects of normalization, and that GPC's submittal meets the requirements of ERTA.

The Commission notes that GPC's cost of service indicates that the earned rate of return for service to the cooperative customers is significantly different from the earned rate of return for service to FPU. Nonetheless, the company has proposed that a single rate be applied to all three customers. We recognize that GPC has historically utilized a single rate for these customers. However, in view of the difference with respect to the earned rate of return, the reasonableness of continuing a single rate structure for firm power service is an issue which should be addressed at hearing.

The Commission orders: (A) AEC's motion to reject is hereby denied.

(B) GPC's submittal is hereby accepted for filing and suspended for five months from the proposed effective date, to become effective, subject to refund, on March 1, 1983.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I], a public hearing shall be held concerning the justness and reasonableness of GPC's rates.

(D) AEC's motion to intervene is hereby granted pursuant to the Commission's Rules of Practice and Procedure.

(E) The Commission staff shall serve top sheets in this proceeding on or before October 11, 1982.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding

---

[1] The affected cooperatives are Choctawhatchee Electric Cooperative and West Florida Electric Cooperative Association.

[2] *See* Attachment A for rate schedule designations.

[3] AEC contends that Statements BG, BH, and BI are seriously incomplete and fail to properly match Period II test year fuel revenues and fuel expenses. Also, with respect to Statement AL, AEC asserts that there is no indication of the number of days' supply represented by the fuel stock, or the data necessary to make this calculation.

[4] *See Municipal Light Boards of Reading and Wakefield, Massachusetts* v. *FPC*, 450 F.2d 1341 (D.C. Cir. 1971).

to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washigton, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commissions Rules of Practice and Procedure.

(G) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

[Docket No. ER82-600-000]

Kansas Power and Light Co.; Filing

September 24, 1982.

Take notice that on September 16, 1982, Kansas Power and Light Company (KPL) tendered for filing a newly executed renewal contract dated August 24, 1982 with the City of Seneca, Kansas for wholesale service to that community. KPL states that this contract permits the City of Seneca to receive service under rate schedule WSM-61 which succeeds their current rate schedule MWH-63 designated FERC No. 126. KPL further states that the proposed changes would increase revenues from sales by $348,655.20 based on the projected 12 month period ending October 31, 1983.

KPL requests an effective date of November 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon the City of Seneca and the State Corporation Commission of Kansas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 12, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RA82-30-000]

MGPC, Inc.; Filing of Petition

September 24, 1982.

Take notice that MGPC, Inc. on September 1, 1982, filed a Petition for Review under 42 U.S.C. 7194(b) from an order of the Secretary of Energy (Secretary).

Copies of the petition for review have been served on the Secretary and all participants in prior proceedings before the Secretary.

Any person who participated in the prior proceedings before the Secretary may be a participant in the proceeding before the Commission without filing a motion to intervene. However, any such person wishing to be a participant must file a notice of participation on or before October 8, 1982, with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Any other person who was denied the opportunity to participate in the prior proceedings before the Secretary or who is aggrieved or adversely affected by the contested order, and who wishes to be a participant in the Commission proceeding, must file a motion to intervene by October 8, 1982, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.214 and 385.1005(c)).

A notice of participation or motion to intervene filed with the Commission must also be served on the parties of record in this proceeding and on the Secretary of Energy through the Office of General Counsel, the Assistant General counsel for Regulatory Litigation, Department of Energy, Room 6H-025, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol St., NE., Washington, D.C. 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-47-000]

MIGC, Inc.; Purchased Gas Adjustment Clause

September 23, 1982.

Take notice that on September 16, 1982 MIGC, Inc. tendered for filing copies of Twenty-Fifth Revised Sheet No. 32 and Second Revised Sheet No. 32A to its FERC Gas Tariff Original Volume No. 1, as required under the Commission's Rules and Regulations under the Natural Gas Act.

MIGC's Twenty-Fifth Revised Sheet No. 32 and Second Revised Sheet No. 32-A provide for a Purchased Gas Adjustment rate increase of 47.12¢ per MMBtu, effective November 1, 1982, in order to: (1) Provide for a current gas cost adjustment to permit MIGC to reflect the higher cost of gas purchases which it is currently incurring (Table II), (2) provide for an adjustment to MIGC's Unrecovered Purchased Gas Cost Account as of July 31, 1981 and July 31, 1982 (Table III), (3) to recover a carrying surcharge as permitted under FERC Order No. 47 (Table VI) as set forth in MIGC's First Revised Sheet No. 31-A and (4) to set forth projected incremental pricing surcharges to become effective November 1, 1982 (Second Revised Sheet No. 32-A).

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before October 1, 1982. Protests will be considered to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for the public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-776-000]

Montana Power Co.; Filing

September 23, 1982.

Take notice that the Montana Power Company (Montana) on September 13, 1982, tendered for filing a Residential Purchase and Sale Agreement (Agreement) with the United States of America Department of Energy, acting by and through Bonneville Power Administration (BPA). Montana states that this Agreement provides for the sale of firm power by Montana to BPA at Montana's Average System Cost. In return, BPA is required to sell an equivalent amount of power back to Montana at a rate determined pursuant to Section 5(c) of the Pacific Northwest Electric Power Planning and Conservation Act.

Montana indicates that estimates of jurisidictional transactions and revenues that will occur under this Agreement cannot be determined due to variances which may occur as a result of weather conditions, changes in the number of customers and changes in the levels of usage by Montana's customers.

An effective date of August 27, 1982, is proposed and waiver of the Commission's requirements is therefore requested.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 6, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intevene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER82-775-000]

Montana Power Co.; Filing

September 23, 1982.

Take notice that Montana Power Company (Montana) on September 13, 1982, tendered for filing in accordance with the Commission's regulations a letter agreement between City of Tacoma (Tacoma) and Montana. Montana states that this letter agreement is for storage of energy in Montana's reservoirs with right of first refusal for Montana to acquire this energy if Tacoma elects not to have the storage energy returned.

Montana indicates that it will receive revenues from jurisdictional transactions under the proposed Letter Agreement.

Montana proposes an effective date of July 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 7, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-803-000]

New York State Electric & Gas Corp.; Filing

September 24, 1982.

Take notice that New York State Electric & Gas Corporation (NYSEG) on September 17, 1982, tendered for filing proposed changes in its FPC Rate Schedule 36 and FERC Rate Schedule 84 under which the Company supplies firm transmission wheeling service to the Power Authority of the State of New York (PASNY) for the benefit of Allegheny Electric Cooperative, Inc.; and American Municipal Power—Ohio, Inc., respectively. The proposed changes would increase revenues from contract service by $841,008 based on the 12 month period ending December 31, 1981.

NYSEG proposes an effective date of November 16, 1982.

The rate filed for by NYSEG is $2.28 per month per contract kilowatt. The proposed changes are necessary to cover all expenses associated with this transmission service and to provide NYSEG an adequate rate of return.

Copies of the filing were served upon PASNY, the Public Service Commission of the State of New York, Allegheny Electric Cooperative, Inc., American Municipal Power—Ohio, Inc. and the City of Cleveland, Ohio.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 12, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-799-000]

Niagara Mohawk Power Corp.; Filing

September 23, 1982.

Take notice that on September 16, 1982, Niagara Mohawk Power Corporation (Niagara) tendered for filing a rate schedule pursuant to a "Stipulation of Settlement" agreement between Niagara and the Town of Massena (Massena) dated July 29, 1982.

Niagara states that the "Stipulation of Settlement" agreement established Niagara's right to a rate that provides just and reasonable compensation for reserving additional transmission capacity to permit Massena's unrestricted use of each of two delivery points to meet its requirements.

Copies of this filing were served upon the Massena Electric Department, Public Service Commission of the State of New York and the Power Authority of the State of New York.

Any person desiring protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will

not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26721 Filed 9-28-82; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. ER82-677-000]

Oklahoma Gas & Electric Co., et al.; Order Accepting Letter Agreements for Filing, Granting Waiver of Notice Requirements, and Noting Interventions

Issued: September 23, 1982.

In the matter of Oklahoma Gas & Electric Company, Docket No. ER82-677-000; Middle South Services, Inc., Docket No. ER82-678-000; Middle South Services, Inc., Docket No. ER82-679-000; Oklahoma Gas & Electric Company, Docket No. ER82-680-000; Public Service Company of Oklahoma, Docket No. ER82-681-000; and Gulf States Utilities Company, Docket No. ER82-682-000.

On July 28, 1982, the South Central Electric Companies (SCEC) [1] tendered for filing in Docket Nos. ER82-677-000 through ER82-682-000 letter agreements which reflect a changed component in the formula used to derive facilities charges under the parties' existing diversity exchange agreements.[2] These agreements provide for pro rata payments by the SCEC members of fixed costs associated with jointly constructed and operated transmission facilities. Specifically, the facilities are used to implement an exchange of diversity capacity between the Tennessee Valley Authority (TVA) and the SCEC members. While allocation of diversity entitlements among the SCEC members has varied from year to year, the total available capacity has remained at 1,500 MW. However, the SCEC members assert that the capacity which TVA will make available pursuant to this exchange has now been reduced below 1,500 MW. Thus, the letter agreements filed in these dockets modify the allocation of charges among the SCEC members to reflect this reduction in TVA entitlements. The SCEC members note that the lower transmission facilities charges result in rate reductions and request waiver of the notice requirements so that the changes may be made effective as of November 15, 1981, the beginning of the current year for exchanges between TVA and the SCEC members.

Notices of these filings were published in the **Federal Register** with responses due on or before August 23, 1982. The City of Lafayette, Louisiana (Lafayette) filed a timely intervention in Docket No. ER82-682-000. Lafayette states that it is a transmission customer of two SCEC members involved in that docket, Gulf States Utilities Company (Gulf States) and Central Louisiana Electric Company (CLECO). According to Lafayette, the submittals may increase Gulf States' and CLECO's costs thereby precipitating an increase in their transmission rates to Lafayatte. Lafayette requests that, absent cost justification for the changes proposed by the instant filings or an opportunity to participate in the SCEC agreements, the proposed changes should be suspended and set for investigation.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), Lafayette's timely intervention serves to make it a party, absent opposition within fifteen days of its pleading.

We shall, however, deny Lafayette's requests to convene a hearing and to suspend the proposed changes in Docket No. ER82-682-000, because we find the arguments underlying these requests to be unpersuasive. Lafayette contends that the filing in that docket does not contain cost justification for the proposed changes. However, as stated in that rate filing, the changes proposed will result in a reduction in rates to CLECO and Gulf States.[3] Our review of the submittal confirms this; we find that the changes proposed in each of these dockets will result in a rate reduction. The proposed changes were properly submitted pursuant to § 35.13(a)(2)(ii) and paragraphs (b) and (c) of that section which do not require full cost justification. We therefore find that the filings are in substantial compliance with our regulations.[4]

Lafayette also states as a "preferred alternative" that its interests would be satisfied if it were allowed to participate in the underlying interchange agreements. However, the question of Lafayette's desired participation in such agreements is totally extraneous to the issues presented in the instant dockets. We perceive no justification for withholding approval of the proposed rate reductions based on Lafayette's desire to utilize these dockets as a vehicle for obtaining new services.

As noted previously, we have determined that the proposed changes will result in a reduction in rates. Based on our review, we conclude that acceptance of the submittals is in the public interest. We further find that good cause exists to grant the requested waivers of the notice requirements and to make the changes proposed in Docket Nos. ER82-677-000 through ER82-682-000 effective as of November 15, 1981.

The Commission orders: (A) Waiver of the notice requirements is hereby granted and the rate changes filed by the SCEC members in Docket Nos. ER82-677-000 through ER82-682-000 are hereby accepted for filing to become effective as of November 15, 1981, without suspension.

(B) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-1-28-000]

Panhandle Eastern Pipe Line Co.; Change in Tariff

September 23, 1982.

Take notice that on Sept. 16, 1982 Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing the following revised sheets to its FERC Gas Tariff, Original Volume No. 1:

Forty-Fourth Revised Sheet No. 3–A
Twenty-First Revised Sheet No. 3–B

An effective date of November 1, 1982 is proposed.

Panhandle states that these revised tariff sheets reflect a PGA Rate Adjustment calculated in accordance with Section 18 of the General Terms and Conditions which reflects an increase from its pipeline supplier, Trunkline Gas Company, which increase is being filed concurrently herewith. The proposed effective date of these revised tariff sheets is November 1, 1982. Panhandle states that the rate increase being filed by Trunkline reflects purchases by Trunkline from a new supplier, Trunkline LNG Company (LNG Company). LNG Company has advised Trunkline that its facilities are completed and will be capable of delivering gas in the near future, in advance of November 1, 1982, the proposed effective date of this instant PGA rate change, and that volumes of regasified LNG will be delivered to Trunkline before such effective date.

The deliveries by LNG Company to Trunkline will be pusuant to LNG Company's Rate Schedule PLNG–1 of its FERC Gas Tariff, Original Volume No. 1, which rate schedule was the subject of the Commission's order dated July 31, 1981 in LNG Company's Docket No. RP81–85–000. The Commission's order of July 31, 1981 accepted for filing, subject to refund, certain tariff sheets filed by LNG Company in that proceeding, and stated that they would become effective one day after the date of "initial delivery", which is the first day on which quantities of regasified LNG are delivered to Trunkline. LNG Company's importation of LNG from Algeria is pursuant to Commission authorization granted in Docket No. CP74–138, *et al.,* and the pricing of this supply is pursuant to the price provisions approved by the Commission in that proceeding, and does not reflect any revisions in such price clause.

Panhandle further states that it respectfully requests waiver of § 154.38(d)(4)(iv) of the Commission's regulations which limits the filing of PGA rate adjustments to semi-annually. As the Commission is aware Panhandle's normal PGA rate adjustments are effective on March 1 and September 1 of each year. Such waiver is appropriate because of the magnitude of the carrying costs involved if Panhandle were not allowed to reflect these additional costs in its rates, which costs are associated with the implementation of this important source of supply to its pipeline supplier, and the resulting further increase in rates to its customers because of the delay in implementing this "special" PGA rate adjustment. Without such waiver Panhandle estimates that its Deferred Purchased Gas Cost Account would increase substantially between the commencement of deliveries from LNG Company to Trunkline and its next scheduled PGA rate adjustment on March 1, 1983. This increase in the Deferred Account would generate substantial carrying charges which would ultimately be borne by its customers. These additional carrying charges can be avoided by implementing the PGA rate adjustment as proposed herein by Panhandle.

Panhandle states that supporting computation sheets are enclosed and copies of this letter and enclosures are being served on all jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before Oct. 1, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must filed a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26734 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-796-000]

Puget Sound Power & Light Co.; Filing

September 23, 1982.

Take notice that on September 13, 1982, Puget Sound Power & Light Company (Puget) tendered for filing an energy exchange agreement with Pacific Gas & Electric Company (PG&E).

Puget states that under the terms and conditions of the agreement, Puget and PG&E will exchange energy made available by Puget to PG&E from April through September for energy made available by PG&E to Puget from October through March.

Puget requests an effective date of May 1, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served upon the Pacific Gas & Electric Company.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-26722 Filed 9-28-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER82-448-000, etc.]

Puget Sound Power & Light Co., et al.; Order Accepting for Filing and Suspending Rates and Noting Interventions

Issued: September 23, 1982.

In the matter of Puget Sound Power & Light Company, Portland General Electric Company, Pacific Power & Light Company and Idaho Power Company, Docket Nos. ER82-448-000, ER82-462-000, ER82-471-000, ER82-473-000, ER82-533-000, ER82-539-000, ER82-549-000, ER82-568-000, ER82-578-000, ER82-618-000, ER82-662-000, ER82-661-000, ER82-671-000 and ER82-688-000.

Pursuant to § 35.13a(5)(i) of the Commission's regulations, Puget Sound Power & Light Company, Portland General Electric Company, Pacific Power & Light Company, and Idaho Power Company (the Companies) have filed Average System Cost (ASC) rates [1] in the above mentioned dockets. The ASC rates filed by the Companies reflect Bonneville Power Administration's (BPA) adjustments to certain initial ASC rate proposals which were accepted for filing prior to completion of BPA's review and report [2] and changes in ASC rates to reflect an approved increase in the utility's retail rates. In each of the instant submittals, the filing utility has contested certain aspects of BPA's ASC calculation. The contested issues generally reflect the use of the different functionalization procedures by the utilities and BPA under the ASC methodology. The controversy in the submittals centers on whether the appropriate functionalization procedure—or sufficient data to support that procedure—has been used for a specific cost category.

Notices of the filings were issued with an opportunity for comments, protests or interventions. In each docket a group of BPA's industrial customers (DSIs) and BPA filed petitions to intervene. The petitions raised no substantive issues, but requested that DSIs and BPA be made parties to any proceedings.

In addition, in Docket No. ER82-448-000, the Public Power Council (PPC) [3] filed a petition to intervene stating that its principal objection concerned Puget's intent to include the Washington Public Utility Tax in its ASC calculations.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the motions to intervene by the DSIs, BPA and Public Power Council serve to make them parties to this proceding because there has been no oppostion within 15 days of the intervenors' filing of pleadings.

We find that BPA's determinations are in substantial compliance with the ASC methodology established by the Interim Rules. The cost of service impact of each of the contested issues for an ASC determination is minimal.

We note that the ASC rates are interim in nature pending final action by the Commission in Docket No. RM81-41. Because the ASC rates are consistent with the Commission's November 24, 1981 order in Docket Nos. ER81-778-000, *et al.*, concerning other ASC rates filings, we shall accept the submittal for filing below to become effective, subject to refund or further adjustment, and subject to the outcome of the Commission's final order in Docket No. RM81-41. In accordance with the Interim Rule, the ASC rate would become effective on the date an exchange agreement was negotiated or on the date an increase in the utility's retail rates for the specific jurisdiction became effective.

In light of the fact that the objections concern interpretations of the functionalization procedures under the current ASC methodology and that the ASC methodology is interim in nature, we believe that it would be premature to consider arguments on the ASC methodology until a final rule is issued. Furthermore, we note that all parties had the opportunity to file comments on the proposed rule in Docket No. RM81-41. In addition, the ASC rates will be collected subject to refund pending approval of a final rule; therefore, the parties are protected should changes in the methodology be ordered. We shall accept the instant submittals for filing without prejudice to the parties' right to raise, after issuance of the final rule in Docket No. RM81-41, those issues which they believe have not been resolved by the final rule.

We also note that the Interim Rule procedures provide only for oral argument on contested issues if the Commission so decides. At the time the final rule is issued, the Commission can address the procedures for resolving disputed ASC rate determinations.

Until a final rule is approved in Docket No. RM81-41, the filings of ASC rate determinations shall be afforded the same treatment as in the instant dockets, *e.g.*, the ASC rates established by the BPA will be accepted for filing subject to the outcome of the final rule in Docket No. RM81-41. Such established rates, however, will be subject to refund or further adjustment.

Regarding Public Power Council's intervention, we note that Puget's transmittal letter stated that the company intended to contest BPA's exclusion of the Washington Public Utility Tax from the ASC determination; however, no further comments were filed by Puget. Staff also notes that comments concerning the appropriate treatment of the Washington Public Utility Tax were filed by the parties in response to the notice issued in Docket No. RM81-41.

The Commission orders:

(A) The Companies' ASC rates are hereby accepted for filing and suspended to become effective, as shown on Attachment A, subject to refund or further adjustment. The ASC rates are also subject to the outcome of the Commission's final order in Docket No. RM81-41.

(B) The acceptance for filing shall be without prejudice to the parties' right to raise, after issuance of the final rule in Docket No. RM81-41, those issues which they believe have not been resolved by the final rule.

(C) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

[1] See Attachment A for rate schedule designations.

[2] By order dated November 24, 1981, in Docket Nos. ER81-778-000, *et al.*, the Commission waived that portion of the Interim Rule that would require the concurrent filing of a utility's ASC rate proposal, BPA's report and any required adjustment; accepted for filing the initial ASC rate proposals of several utilities; and suspended the rates to become effective October 1, 1981, subject to refund or other adjustment and subject to the Commission's final rule on the ASC methodology in Docket No. RM81-41. Such action was taken because BPA had not completed its review of the ASC rate proposals prior to the commencement of exchanges between BPA and the utilities.

[3] The Public Power Council represents 110 consumer-owned utility systems in Idaho, Oregon, Washington, Montana, Nevada, Utah, California and Wyoming.

Attachment A.—Rate Schedule Designations

The BPA determined ASC rates in the indicated dockets are designated as supplements to the Filing Utility/Bonneville Power Administration Service Agreement under the Pacific Northwest Electric Power Planning and Conservation Act FERC Electric Tariff, Original Volume No. 1 as indicated below:

Docket No.	Filing utility	Jurisdiction	Supp No.—suppp. No. 3	Supersedes supp. No. to supp. No. 3	Effective date

[Docket No. ER82-794-000]

Sierra Pacific Power Co.; Filing

September 23, 1982.

Take notice that on September 7, 1982, Sierra Pacific Power Company (Sierra Pacific) tendered for filing its first energy charge revision to reflect increases in Sierra's purchased power fixed costs associated with Utah Power and Light Company (Utah) purchases.

Sierra Pacific states that on August 11, 1982 Utah increased its demand charge applicable to Sierra's purchases to $17.81/KW compared to $9.89/KW included in the present base purchased power cost of $.00912 per KWHR applicable to Sierra's present resale rates R-1 and R.2. This results in an increase of $.00346 per KWH, which increases the present energy charge of $0.02993 per KWH to $0.03339 per KWH.

Sierra Pacific requests an effective date of August 11, 1982.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Sierra Pacific Power Co.; Refund Compliance Report

September 24, 1982.

Take notice that on September 14, 1982, Sierra Pacific Power Company filed a refund compliance report pursuant to the Commission's order issued on August 2, 1982.

Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before October 13, 1982. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER82-795-000]

Southern California Edison Co.; Filing

September 23, 1982.

Take notice that on September 13, 1982, Southern California Edison Company (Edison) tendered for filing as an initial rate schedule, an Agreement dated August 19, 1982, with Imperial Irrigation District (IID). The Agreement is entitled "Salton Sea Geothermal Project Power Purchase and Sales Agreement between Imperial Irrigation District and Southern California Edison Company".

Edison states that the Agreement, in relevant part, sets forth the terms and conditions under which Edison will deliver to IID, and IID will pay Edison for energy generated by Edison's Salton Sea Geothermal Project which is excess to the Project's requirements until such time as the parties find other arrangements for disposition of the Net Energy generated by the Project.

Edison requests an effective date of July 20, 1982, and therefore requests waiver of the Commission's notice requirement.

Copies of this filing were served upon the Public Utilities Commission of the State of California and Imperial Irrigation District.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 8, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF82-204-000]

Texaco U.S.A., Application for Commission Certification of Qualifying Status of a Cogeneration Facility

September 24, 1982.

On August 19, 1982, Texaco U.S. 1111 Rusk Street, Houston, Texas 77002, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The topping-cycle cogeneration facility is being constructed at a petroleum refinery in Wilmington, California. The primary energy source of the facility is refinery gas. The electric power production capacity of the facility is 60 megawatts. Approximately 276,000 lbs./hr of 225 psig, 450° steam will be

produced in waste heat recovery boilers. Installation of the facility began in May 1981. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-1-30-000]

Trunkline Gas Co.; Change in Tariff

September 23, 1982.

Take notice that on September 16, 1982 Trunkline Gas Company (Trunkline) tendered for filing Forty-First Revised Sheet No. 3-A to its FERC Gas Tariff, Original Volume No. 1. Trunkline submits that these revised tariff sheets reflect a PGA Rate Adjustment in accordance with Section 18 of the General Terms and Conditions of its FERC Gas Tariff, Original Volume No. 1 and Section 154.38 of the Federal Energy Regulatory Commission's (Commission) regulations. Trunkline states that this PGA Rate Adjustment reflects purchases from a new supplier, Trunkline LNG Company (LNG Company). An effective date of November 1, 1982 is proposed.

LNG Company has advised Trunkline that its facilities are completed and will be capable of delivering gas in the near future, in advance of November 1, 1982, the proposed effective date of the instant PGA rate change, and that volumes of regasified LNG will be delivered to Trunkline before such effective date.

The deliveries by LNG Company to Trunkline will be pursuant to LNG Company's Rate Schedule PLNG-1 of its FERC Gas Tariff, Original Volume No. 1, which rate schedule was the subject of the Commission's order dated July 31, 1981 in LNG Company's Docket No. RP81-85-000. The Commission's order of July 31, 1981 accepted for filing, subject to refund, certain tariff sheets filed by LNG Company in that proceeding, and stated that they would become effective one day after the date of "initial delivery", which is the first day on which quantities of regasified LNG are delivered to Trunkline.

It should be emphasized that LNG Company's importation of LNG from Algeria is pursuant to Commission authorization granted in Docket No. CP74-138 *et al.*, and the pricing of this supply is pursuant to the price provisions approved by the Commission in that proceeding, and does not reflect any revision in such price clause.

Trunkline respectfully requests waiver of § 154.38(d)(4)(iv) of the Commission's regulations, which limits the filing of PGA rate adjustments to semi-annually. As the Commission is aware Trunkline's normal PGA rate adjustments are effective on March 1 and September 1 of each year. Such waiver is appropriate because of the magnitude of the carrying costs involved in the implementation of the new source of supply. If Trunkline were not allowed to reflect these additional costs in its rates, on November 1, as requested, by implementing this "special" PGA rate adjustment not only would there be a severe hardship upon Trunkline in providing the funds for the new supply for an extended period, but also there would be unnecessary burdens on the jurisdictional customer resulting from carrying charges on the deferred account. Without such waiver Trunkline's Deferred Purchased Gas Cost Account would increase by a substantial amount between the commencement of delivery from LNG Company and its next scheduled PGA rate adjustment on March 1, 1983. This increase in the Deferred Account would generate additional carrying charges which would ultimately be borne by its customers. These additional carrying charges can be avoided by implementing the PGA rate adjustment as proposed herein by Trunkline.

Trunkline states that copies of its filing have been served on all jurisdictional customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before Oct. 1, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF82-213-000]

Wehran Energy Corp.—Holtsville; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

September 24, 1982.

On September 2, 1982, Wehran Energy Corp., 666 East Main Street, Middletown, New York 10940, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The biomass small power production facility will be located at the Holtsville Landfill, in Brookhaven, New York. The electric power production capacity of the facility will be 500 kilowatts. The primary energy source to the facility will be biomass in the form of biomethane gas obtained from a sanitary landfill. The facility will not use any natural gas, oil or coal. There are no other small power production facilities owned by the Applicant within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to

intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER82-708-000]

West Texas Utilities Co.; Order Accepting for Filing and Suspending Rates, Denying Motions for Rejection or Summary Disposition, Noting Interventions, and Initiating Hearing, Price Squeeze and CWIP Procedures

Issued: September 24, 1982.

On August 2, 1982, West Texas Utilities Company (WTU) tendered for filing a two-phase rate for service to Texas-New Mexico Power Company (TNP), two partial requirements customers, and fifteen customers served under its Electric Tariff.[1] The Step A rates would provide for an increase in revenues of approximately $1.6 million (2.3%) for the calendar year 1983 test period. The Step B rates would further increase revenues by about $480,000. Although proposing effective dates of October 1, 1982, and October 2, 1982, for the Step A and B rates, respectively, in accordance with the terms of a settlement in *West Texas Utilities Company*, Docket No. ER82-29-000, WTU requests that the rates be suspended to become effective on January 1, 1983. In the event that the Step B rates are allowed to become effective on January 1, 1983, the Step A rates are to be deemed withdrawn.

In addition, WTU has filed alternative rates reflecting the inclusion in rate base of construction work in progress. WTU seeks an evidentiary hearing pursuant to § 2.16 of the Commission's regulations in order to prospectively implement the CWIP-based rates.[2] WTU also asks that the hearing in this docket include as an issue to be litigated the company's request for waiver of section 35.14 of the Commission's regulations so as to allow WTU to collect through its fuel adjustment clause all amounts paid for purchases of power and energy from cogenerators and small power producers.

Notice of WTU's filing was published in the **Federal Register** with responses due on or before August 30, 1982. TNP filed a timely motion to intervene and a request for a declaratory ruling. TNP objects to WTU's rolled-in transmission allocation and seeks a Commission ruling that the rates for service to TNP should reflect an appropriate credit for transmission expenses incurred by TNP for WTU's benefit.

WTU's Cooperative and Municipal Wholesale Customers (Customers) also filed a timely protest and intervention.[3] In addition to raising a number of cost of service issues and seeking maximum suspension of both the Step A and Step B rates, the Customers seek rejection of WTU's phased rate increase and

[1] *See* Attachment A for customers and rate schedule designations.

[2] The alternative rates represent an increase in test period revenues of approximately $4.2 million or 5.8%.

[3] Under Rule 215 of the Commission's Rules of Practice and Procedure, the Customers filed an amendment to their protest and intervention to include one section which had been omitted inadvertently.

rejection of the request to include CWIP in rate base. As to WTU's request for CWIP relief, the Customers ask in the alternative that the matter not be set for hearing until the Commission adopts a final rule in its pending CWIP rulemaking proceeding. The Customers also ask that price squeeze procedures be initiated.

WTU filed a timely answer to TNP's motion to intervene and request for a declaratory ruling. WTU does not oppose intervention but asks that TNP's request for a declaratory ruling be denied and that the issue, instead, be considered at hearing.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure, the timely motions to intervene serve to make TNP and the Customers parties to this proceeding absent opposition within 15 days of their respective motions.

We note that the Customers have objected to WTU's efforts to phase the instant rate increase. Here, WTU has submitted both rates concurrently and, consistent with prior orders permitting such phasing, we shall deny the Customers' motion to reject WTU's filing. [4]

We shall also deny the Customers' motion to reject WTU's CWIP application. In a number of recent cases in which applications to include CWIP in rate base would otherwise be summarily dismissed on the basis of current standards, we have instead, phased consideration of the CWIP issue to follow our pending rulemaking in Docket No. RM81-38-000, in order to preserve the *status quo ante*. [5] In view of WTU's request to place its proposed CWIP-based rates into effect prospectively only after a hearing under section 2.16 of the regulations, we conclude that this approach is appropriate in the instant case as well.

The remaining issues, including WTU's requested waiver of the Commission's fuel adjustment clause regulations and TNP's requested credit for certain transmission expenses, present questions of law or fact which should be resolved on the basis of an evidentiary hearing. At this time, we decline to entertain TNP's request for a declaratory ruling.

Our preliminary review of the instant filing and pleadings indicates that the rates proposed by WTU have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the Step A and B rates for filing and suspend their operation as ordered below.

In *West Texas Utilities Company*, Docket No. ER82-23-000 (February 26, 1982) we explained that where our preliminary examination indicates that proposed rates may be unjust and unreasonable, but may not be substantially excessive, as defined in *West Texas*, we would generally impose a nominal suspension. In the instant proceeding, our examination suggests that the Step A rate increase may not yield excessive revenues. In accordance with the terms of WTU's settlement agreement in Docket No ER82-23-000 and its request with respect to suspension of the Step A rates in this docket, we shall therefore suspend the Step A rates to become effective, subject to refund, on January 1, 1983. As to the Step B rate increase, however, our examination indicates that these rates may produce substantially excessive revenues. Accordingly, consistent with *West Texas*, we shall suspend the proposed Step B rates for five months, to become effective on March 2, 1983, subject to refund.

In addition, in accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, Docket No. ER79-339 (August 6, 1979), we shall phase the price squeeze issue raised by the Customers.

The Commission orders:

(A) The Customers' motions for rejection or summary disposition are hereby denied as discussed in the body of this order.

(B) WTU's proposed Step A rates are hereby accepted for filing and suspended to become effective, subject to refund, on January 1, 1983. WTU's proposed Step B rates are hereby accepted for filing and suspended for five months from sixty days after filing, to become effective, subject to refund, on March 2, 1983.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of WTU's rates.

(D) The Commission staff shall serve top sheets in this proceeding on or before October 11, 1982.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of topsheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Such conference shall be held for purposes of establishing a procedural schedule. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(F) The hearing on the inclusion of CWIP in rate base shall be phased as discussed in the body of this order to follow final Commission action in Docket No. RM81-38-000.

(G) The Commission hereby orders initiation of price squeeze proceedings and further orders that this case be phased so that the price squeeze proceedings begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding administrative law judge may order a departure from this schedule for good cause. The price squeeze claim shall be governed by § 2.17 of the Commission's regulations as it may be modified prior to the commencement of the price squeeze phase of the instant proceeding.

(H) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment A—West Texas Utilities Company, Docket No. ER82-708-000; Rate Schedule Designation

Designation and Description

(1) Fifth Revised Sheet Nos. 4 through 7 under FERC Electric Tariff Original Volume No. 1 (Supersedes Fourth Revised sheet Nos. 4 through 7)—Tariff Customers (Step I, TR-1 Rates Excluding Full-CWIP)

[Docket No. ER82-807-000]

Western Massachusetts Electric Co.; Filing

September 24, 1982.

Take notice that on September 20, 1982, the Western Massachusetts Electric Company (WMECO) tendered for filing a proposed Purchase Agreement with Respect to Doreen and Woodland Road Gas Turbine Units (Purchase Agreement) dated April 11, 1982 between WMECO and Vermont Electric Generation and Transmission Cooperative, Inc. (VEG&T).

WMECO states that the Purchase Agreement provides for a sale to VEG&T of a specific percentage of capacity and associated energy from two gas turbine generating units during the period from April 11, 1982 to August 31, 1982.

WMECO further states that the Capacity Charge for the proposed service was determined on a cost of service basis at the time that the sale was made and was determined in accordance with Appendix C and Exhibits thereto of the Purchase Agreement. The Variable Maintenance Charge is derived from historical costs and the Additional Maintenance Charge is twice the Variable Maintenance Charge, based on manufacturer's recommendations.

WMECO requests an effective date of April 11, 1982, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon VEG&T.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before October 13, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. ER82-797-000]

Wisconsin Power and Light Co.; Filing

September 23, 1982.

Take notice that on September 14, 1982, Wisconsin Power and Light Company (WPL) tendered for filing amendments to its existing wholesale power contract dated August 16, 1982 between the City of Wisconsin Dells ("Municipality") and WPL. WPL states that this filing is for the purpose of modifying the current agreement between the parties to add an additional delivery point for energy and power to the Municipality. The current contract was previously designated FERC Rate Schedule 125 by the Commission.

WPL requests an effective date of August 16, 1982 and respectfully prays that a waiver of Commission notice requirements be granted. WPL states that a copy of the amendments and the filing have been provided to the Municipality and the Public Service Commission of Wisconsin.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before October 7, 1982. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

Office of the Secretary

[Docket No. EP-40-82-1]

Energy Emergency Preparedness

AGENCY: Office of Environmental Protection, Safety, and Emergency Preparedness, DOE.

ACTION: Notice of inquiry and request for public comments.

SUMMARY: On August 3, 1982, the President signed into law the Energy Emergency Preparedness Act of 1982 (EEPA, the Act) (Pub. L. 97-229) (42 U.S.C. 6202-6245). The Act, among other provisions, adopts a series of amendments to certain available legal authorities related to the International Energy Program, the Strategic Petroleum Reserve, and other energy emergency preparedness programs. It further prescribes a variety of actions, study efforts, and reports to be pursued in implementing specified energy emergency planning and preparedness efforts. The Department of Energy invites interested persons and organizations to submit written comments and other material to the Department for its consideration in complying with the requirements of the EEPA.

DATES: Seven (7) copies of written comments and other materials should be submitted to DOE by 5:00 p.m. on the following dates to ensure their consideration:

1. *November 5, 1982:* EEPA, to be cited at 42 U.S.C. 6234 note, 6245 note (SPR Drawdown Plan and Report), other general comments;
2. *December 3, 1982:* EEPA, to be cited at 42 U.S.C. 6262 (Comprehensive Energy Emergency Response Procedures); and to be cited at 42 U.S.C. 6245 note (Regional Reserve Report, Strategic Alcohol Fuel Reserve Report);
3. *January 28, 1983:* EEPA, to be cited at 42 U.S.C. 6245 note (Petroleum Supply Interruption Impact Analysis).

ADDRESSES: Comments should be addressed to William A. Vaughan, Assistant Secretary for Environmental Protection, Safety, and Emergency Preparedness, Department of Energy, Forrestal Building, Room 4G-064, (Mail

Stop EP-1), 1000 Independence Avenue, S.W., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:
Ronald L. Winkler, U.S. Department of Energy, Deputy Assistant Secretary for Energy Emergencies, Forrestal Building, Room 3G-072 (Mail Stop EP-40), 1000 Independence Avenue, S.W., Washington, D.C. 20585; (202) 252-2443.

SUPPLEMENTARY INFORMATION:

I. Summary of EEPA Requirements

Section 2, International Energy Program Amendments. Section 2 amends section 252 of the Energy Policy and Conservation Act (EPCA) (42 U.S.C. 6272(j)) to extend from August 1, 1982, to December 31, 1983, the limited antitrust defense for U.S. oil company participation in the International Energy Program (IEP). Section 2 also imposes limits on the use of EPCA section 252, as well as EPCA section 251, which provides authority to mandate certain actions by United States companies in order to fulfill U.S. obligations under the IEP. As amended, EPCA section 251 essentially prohibits the Federal Government from ordering U.S. oil companies to participate in any oil sharing activities prior to activation of the IEP emergency sharing system. The amended EPCA section 252 effectively provides that the limited antitrust defense would not apply to any actions taken by U.S. oil companies in response to so-called "subcrisis" supply disruptions—disruptions that are less than the 7 percent shortfall necessary to activate the IEP emergency sharing system.

Section 3, Energy Emergency Preparedness. This section of the Act amends Title II of the EPCA by adding a new section 272(a) which requires that the President submit to the Congress by November 15, 1982, a memorandum of law prepared by the Attorney General, in consultation with the Secretary of Energy, describing the nature and extent of the authorities available to the President under existing law to respond to severe energy supply interruptions or other substantial reductions in the amount of petroleum products available to the United States. Included among the subjects to be covered are:

—U.S. activities in support of the IEP, including the National Emergency Sharing Organization, emergency sharing systems, and the supply right project;
—U.S. activities being pursued with respect to energy emergency preparedness obligations under the North Atlantic Treaty Organization;
—Development and use of the Strategic Petroleum Reserve (SPR);
—Government incentives to encourage private petroleum product stocks;
—Reactivation of the Executive Manpower Reserves: Emergency Electric Power Reserve, Emergency Petroleum and Gas Reserve, and the Emergency Solid Fuels Reserve;
—Energy emergency response management in coordination with State and local governments;
—Emergency public information activities.

In each of the above areas, the memorandum of law must distinguish among (1) situations involving limited or general war, international tensions that threaten national security, and other Presidentially-declared emergencies; (2) events resulting in activation of the IEP; and (3) less severe events or situations.

A new EPCA section 272(b) requires the President to submit to the Congress by December 31, 1982, comprehensive energy emergency response procedures describing the various options the President would consider to implement the authorities described in the memorandum of law noted above to respond to severe energy supply disruptions.

Finally, section 3 adds a new section 272(c) to the EPCA which states that the new amendments to the EPCA neither confer additional authority upon the President, nor limit his authority under any provision of law, in responding to energy supply emergencies. Additionally, this subsection states that the new EPCA amendments do not in any fashion preempt State laws or programs already in effect or which would become effective after enactment of the EEPA.

Section 4, Strategic Petroleum Reserve (SPR) Amendments. Section 4 of the Act, amending section 160(c) of the EPCA and related provisions, deals with the fill and drawdown of the SPR. It establishes 300,000 barrels per day as the minimum required average annual rate of fill for the SPR until the quantity of crude oil stored is at least 500 million barrels, to the extent funds are available, unless the President transmits to Congress his finding, for good cause, that compliance with this rate would not be in the national interest. In that case, the minimum required fill rate would be 220,000 barrels per day, subject to the availability of appropriations. A new section 160(c)(1)(D) of the EPCA would provide that if funds are available in a fiscal year to achieve a higher than 220,000 barrel per day average annual fill rate, then the minimum required fill rate must be "the highest practicable fill rate achievable." Interim facilities (e.g., steel tanks or floating storage) could be used to store oil in excess of that for which permanent SPR facilities are available. Up to 10 percent of amounts obligated each fiscal year could be used for interim storage facilities that year, or carried over to the next fiscal year.

After the 500 million barrel SPR storage level has been reached, the EEPA requires the President to seek to undertake such petroleum acquisition, transportation, and injection activities as will assure that the SPR is filled at a rate of 300,000 barrels per day until it reaches a storage level of 750 million barrels.

Section 4(c) of the EEPA requires that the President transmit to the Congress by December 1, 1982, a new Strategic Petroleum Reserve "Drawdown" (i.e., Distribution) Plan. The current SPR Distribution Plan became effective November 15, 1979, following Congressional review. The Plan would take effect on the date it is transmitted to the Congress, without Congressional review.

Section 5, Continuation of Petroleum Product Information Collection. This section amends Part A, Title V, of the EPCA to require the Administrator of DOE's Energy Information Administration to collect petroleum product information on a State-by-State basis. This includes the collection of such information on the pricing, supply, and distribution of petroleum products by product category at the wholesale and retail levels, as was being collected on September 1, 1981, by the Energy Information Administration.

Section 6, Reports to Congress on Petroleum Supply Interruptions. This section requires the submission to the Congress of a number of reports related to emergency preparedness programs and policies.

Section 6(a) of the EEPA requires the Secretary of Energy to submit within one year of the enactment of EEPA, an analysis of the impact on the domestic economy and on consumers in the United States of reliance on market allocation and pricing during any substantial reduction in the amount of petroleum products available to the United States. The analysis must include an assessment of equity and efficiency considerations; distinguish between the impacts on various categories of business and on households of different income levels; specify the nature and administration of monetary and fiscal policies that would be followed (including emergency tax cuts, emergency block grants, and emergency supplements to income maintenance programs); and describe the likely impact on the distribution of petroleum

products of State and local laws and regulations (including emergency authorities) affecting the distribution of petroleum products. The analysis also must include projections of the effects on the price of motor gasoline, home heating oil, and diesel fuel, and on Federal tax revenues, Federal royalty receipts, and State and local tax revenues.

Section 6(b) requires the President to submit by December 1, 1982, a Strategic Petroleum Reserve (SPR) Drawdown and Distribution Report to accompany the SPR Drawdown Plan required under section 4.

Section 6(c) requires submission to Congress by December 31, 1982, of an analysis of the economic benefits and costs of establishing Regional Petroleum Reserves. The analysis is to include an assessment of the ability to transport petroleum products to refiners, distributors, and end users; the comparative costs of creating Regional Petroleum Reserves as compared to the costs of continuing current plans for the Strategic Petroleum reserve; and a list of potential sites for the Regional Petroleum Reserves.

Finally, section 6(d) requires the Secretary of Energy, in consultation with the Secretary of Agriculture, to transmit to the Congress by December 31, 1982, a study of the potential for establishing a Strategic Alcohol Fuel Reserve.

II. Written Comment Procedures

You are invited to participate in the development of the Department of Energy's response to the EEPA requirements by submitting views, reports, analyses or other materials to the Department. Comments should be submitted to the address indicated in the **"ADDRESSES"** section of this notice and should be identified on the outside envelope and on documents submitted with the designation "Energy Emergency Preparedness, Docket No. EP–40–82–1." Seven (7) copies, if possible, should be submitted. All comments received will be available for public inspection in the DOE Reading Room, Room 1E–190, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, between 8:00 a.m. and 4:00 p.m., Monday through Friday. Comments should be received by the **"DATES"** section of this notice in, order to ensure consideration.

Pursuant to the provisions of 10 CFR 1004.11, if you are submitting material which you believe to be confidential and exempt by law from public disclosure, you should submit one complete copy of the document, and six copies from which the material claimed to be confidential has been deleted. DOE reserves the right to determine the confidential status of the material and to treat it according to that determination.

Issued in Washington, D.C., September 27, 1982.

James B. Edwards,

Secretary of Energy.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPP–31058; pH–FRL 2216–6]

Certain Companies; Applications To Register Pesticide Products Involving a Changed Use Pattern

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register or amend registration of pecticide products involving a changed use pattern pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comments by October 29, 1982.

ADDRESS: Written comments, identified by the document control number [OPP–31058] and the file or registration number, should be submitted to the manager (PM) cited at the address below: Product Manager (PM), Registration Division (TS–767C, Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: The product manager at the telephone number cited.

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register, or amend registration of, pesticide products involving changed use pattern pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of applications does not imply a decision by the Agency on the applications.

Applications Received

1. File Symbol: 7969–EUP–RI. Applicant: BASF Wyandotte Corp., 100 Cherry Hill Road, Parsippany, NJ 07054. Product name: Campogran B Seed Treatment Fungicide. Fungicide. Active ingredient: *N*-cyclohexyl-*N*-methoxy-2,5-dimethyl-3-furancarboxamide 50.9%. Proposed classification/Use: None proposed. To include in its presently registered use the use as a seed treatment for cottonseed. Type registration: Conditional. (Product Manager (PM) 21-Henry Jacoby, (703–557–1900)).

2. File Symbol: 39398–RU. Applicant: Sumitomo Chemical Co., Ltd. c/o Dr. Eugene J. Gerberg, 1330 Dillion Heights Ave., Baltimore, MD 21228. Product name: Sumithion NP EC. Insecticide. Active ingredients: *O,O*-dimethyl *O*-(3-methyl-4-nitrophenyl) phosphorothioate 50% and 1-(cyclohexane-1,2-dicarboximido)methyl 2,2-dimethyl-3-(2-methylpropenyl)cyclopropanecarboxylate 5%. Proposed classification/Use: General. To include in its presently registered non-aquatic use the aquatic use in drainage where mosquitoes breed. Type registration: Conditional. (PM 16-William Miller, (703–557–2600)).

3. EPA Registration No.: 10182–38. Applicant: ICI Americas, Inc., Wilmington, DE 19897. Product name: Talon-G. Rodenticide. Active ingredient: 3-[3-(4'-bromo-[1,1'-biphenyl]-4-yl)-1,2,3,4-tetrahydro-l-naphalenyl]-4-hydroxy-2*H*-benzopyran-2-one 0.005%. Proposed classification/Use: General. To include in its presently registerd use for control of mice and rats the use on ground squirrels in and around buildings. (PM 16-William Miller, (703–557–2600)).

Notice of approval or denial of an application to register, or amend registration of, a persticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decesion may be made available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the sepcified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the product manager's office to insure that the file is available on the date of intended visit.

(Sec. 3(c)(4) of the FIFRA, as amended)

Dated: September 21, 1982.

Certain Companies; Applications To Register Pesticide Products Containing New Active Ingredients

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of applications to register pesticide products containing active ingredients not included in any previously registered pesticide products pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATE: Comments by October 29, 1982.

ADDRESS: Written comments, identified by the document control number [OPP-30221] and the file or registration number, should be submitted to the product manager (PM) cited at the address below: Registration Division (TS-767C, Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: The product manager at the telephone number cited.

SUPPLEMENTARY INFORMATION: EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered pesticide products pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

Applications Received

1. File Symbol: 47159-R. Applicant: Ralph R. Grams, MD, 2025 NW 24th St., Gainesville, FL 32605. Product name: Compound X. Anti-foulant. Active ingredients: 4S-(4 alpha, 4a alpha, 5a alpha, 6 beta, 12a alpha)]-4-(dimethylamino)-1,4,4a,5,5a,6,11,12,-octahydro-3,6,10,12,12a,-pentahydroxy-6-methyl-1,11-dioxo-2-naphthacenecarboxamide 50%. Proposed classification/Use: For general use as an additive to oil-based paint to deter attachment of barnacles on vessels. (Product Manager (PM) 23—Richard Mountfort, (703-557-1830)).

2. File Symbol: 42943-I. Applicant: Sherex Chemical Co., Inc., 577 Frantz Road., PO Box 646, Dublin, OH 43017. Product name: Arosurf MSF. Insecticide. Active ingredients: Poly(oxy-1,2-ethanediyl), alpha-isooctadecyl-w-hydroxy 100%. Proposed classification/Use: For general use for control of mosquito larvae and pupae. (PM 16-William Miller, (703-557-2600)).

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file telephone the product manager's office to ensure that the file is available on the date of intended visit.

Certain Pesticide Products; Intent To Cancel Registrations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice lists the name of firms requesting voluntary cancellation of registration of their pesticide products in compliance with section 6(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended. Production of these products after the effective date of cancellation will be considered a violation of the Act unless continued registration is requested.

EFFECTIVE DATE: October 29, 1982.

ADDRESS: Written comments to: Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-401, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Lela Sykes, Process Coordination Branch (TS-767C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 706, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7406).

SUPPLEMENTARY INFORMATION: EPA has been advised by the following firms of their intent to voluntarily cancel registration of their pesticide products.

Registration No.	Product name	Registrant	Date registered
279-2190	Tedion 1.0 Bidrin 1.0 EC	FMC Corporation, 2000 Market St., Philadelphia, PA 19103	Mar. 1, 1965.
401-3	Common Sense Rat and Mouse Bait	Mrs. Betty Fernbach, Common Sense Mfg. Co. Inc., 721 Lafayette Ave., Buffalo, NY 14222.	July 1, 1969.
401-4	Common Sense Residual Spray	do	July 16, 1970.
401-5	Common Sense Fog or Spray	do	May 22, 1970.
401-6	Common Sense Rat Preparation #2	do	Feb. 25, 1970.
401-10	Common Sense Drione 79700 Insecticide	do	June 24, 1970.
401-12	Common Sense Household Insect Spray Conc	do	July 17, 1970.
477-266	Famrite 0-20-20 with Boron Fertilizer with Simazine	Central Chemical Corp., 49 North Jonathan St., Hagerstown, MD 21740	Nov. 2, 1971.
539-191	Sears Termite Killer and Control	Sears, Roebuck and Company, Sears Tower, Chicago, IL 60684	Mar. 29, 1965.
2568-19	Regatta Yacht Paint Vinyltex 57 White Antifouling	John-Baltimore Copper Paint Co., 840 Key Highway, Baltimore, MD 21230.	July 6, 1964.
2568-21	Regatta Yacht Paint Vinyltex 52 Green Antifouling	do	July 6, 1964.
2568-33	Regatta Yacht Paint Vinyltex 56 Golden Yellow Antifouling	do	Aug. 13, 1965
2568-38	Regatta Yacht Paint Vinyltex 60 Black Antifouling	do	July 28, 1972.
2568-50	Regatta 3021 Baltoguard Red	do	May 13, 1974.
2568-51	Regatta 3022 Baltoguard Blue	do	May 13, 1974.

Registration No.	Product name	Registrant	Date registered
2586-52	Regatta 3023 Bakoguard Green Antifouling	do	May 13, 1974.
11655-2	Sampson Penta Wood—Treat	Sampson Paint Mfg. Co., Inc., P.O. Box 6625, Richmond, VA 23230	Mar. 19, 1974.
11655-3	20 Percent Copper Naphthenate Solution	do	July 17, 1975.

The Agency has agreed that such cancellation shall be effective October 29, 1982 unless within this time the registrant, or other interested person with the concurrence of the registrant, requests that the registration be continued in effect. The registrants were notified by certified mail of this section.

The Agency has determined that the sale and distribution of these products produced on or before the effective date of cancellation may legally continue in commerce until the supply is exhausted, or for 1 year after the effective date of cancellation, whichever is earlier, provided that the use of these products is consistent with the label and labeling registered with EPA. Furthermore, the sale and use of existing stocks have been determined to be consistent with the purposes of FIFRA as amended. Production of these products as pecticide formulations after the effective date of cancellation will be considered to be a violation of the Act.

Requests that the registration of these products be continued, may be submitted in triplicate to the Process Coordination Branch, Registration Division (TS–767), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Comments may be filed regarding this notice. Written comments should bear a notation indicating the document control number "[OPP–66095]" and the specific registration number. Any comments filed regarding this notice will be available for public inspection in the Document Control Office, Room E–107, at the above address from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 6(a)(1) of FIFRA as amended 86 Stat. 973 89 Stat. (751, 7 U.S.C. 136))

BILLING CODE 6560–50–M

[PF–291; PH–FRL 2217–3]

Certain Companies; Pesticide, Food, and Feed Additive Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide, food, and feed additive petitions relating to establishment of tolerances for residues of certain pesticide chemicals in or on certain raw agricultural commodities, and food and feed items.

ADDRESS: Written comments to the Product Manager cited in each petition at the address given below:

Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the agency. The comments are to be identified by the document control number "[PF–291]" and the specific petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, food, and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain raw agricultural commodities, food and feed items in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

FAP 1H5309. Interregional Research Project No. 4, New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903. Proposes amending 21 CFR 193.140 by establishing a regulation permitting residues of the insecticide 2,2-dichlorovinyl dimethyl phosphate in or on the processed agricultural commodity dried figs at 0.5 part per million (ppm), resulting from application to the growing crop. (Donald R. Stubbs, 703–557–1192).

FAP 8H5181. Interregional Research Project No. 4. Proposes amending 21 CFR 561.289 by establishing a regulation permitting residues of the defoliant, desiccant, and herbicide paraquat (1,1'-dimethyl-4,4'-bipyridinium ion) derived from application of either the bis(methyl sulfate) or the dichloride salt (both calculated as the cation) in or on spearmint hay at 3.0 ppm when present therein as a result of the application to growing peppermint and spearmint. (Donald R. Stubbs, 703–557–1192).

PP 7E1941. ICI Americas Inc., Concord Pike and New Murphy Road, Wilmington, DE 19897. Proposes amending 40 CFR Part 180 by establishing tolerances for the residues of the fungicide 5-butyl-2-(ethylamino)-4-hydroxy-6-methylpyrimidine in or on the raw agricultural commodity cantaloupe melons at 0.1 ppm. Proposed analytical method for determining residues is gas chromatography using a nitrogen detector. (PM 21, Henry Jacoby, 703–557–1900).

PP 2F2732. Ciba-Geigy Corporation, P.O. Box 18300, Greensboro, NC 27419. Proposes amending 40 CFR Part 180 by establishing tolerances for the combined residues of the fungicide metalaxyl [*N*-(2,6-dimethylphenyl)-N-(methoxyacetyl) alanine methyl ester] and its metabolites containing the 2,6-dimethylaniline moiety, each expressed as metalaxyl in or on the raw agricultural commodity squash at 1.0 ppm. Proposed analytical method for determining residues is gas chromatography with an alkali flame ionization detector. (PM 21, Henry Jacoby, 703–557–1900).

FAP 2H5359. Stauffer Chemical Company, 1200 S. 47th St., Richmond, CA 94804. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the insecticide *O*-ethyl *S*-phenyl ethylphosphonodithioate including its oxygen analog *S*-ethyl *S*-phenyl ethylphosphonothioate on the commodity potato waste (peels) at 3.0 ppm. (PM 16, William Miller, 703–557–2600).

PP 2F2716. Stauffer Chemical Company. Proposes amending 40 CFR 180.221 by increasing the established tolerances for the combined residues of the insecticide *O*-ethyl *S*-phenyl ethylphosphonothioate including its oxygen analog *S*-ethyl *S*-phenyl ethylphosphonodithioate in or on the raw agricultural commodity potatoes from 0.1 ppm to 0.2 ppm. The present 0.1 ppm on root crop vegetables would thus be revised to read root crop vegetables (except potatoes). Proposed analytical method for determining residues is gas-liquid chromatography using a phosphorous-specific detector. (PM 16 William Miller, 703–557–2600).

PP 2E2736. Merck and Company, P.O. Box 2000, Rahway, NJ 07065. Proposes amending 40 CFR 180.242 by establishing tolerances for the residues of the fungicide thiabendazole (2-(4-thiazolyl) benzimidazole) in or on the raw agricultural commodities cantaloupes, at 12.0 ppm, strawberries, at 5.0 ppm, and tomatoes at 0.5 ppm. Proposes analytical method for determining residues is by spectrophotofluorometrical analysis. (PM 21, Henry Jacoby, 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136)); (Sec. 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348)))

[A-8-FRL 2216-8]

Preliminary Approval of Use of Nonguideline Air Quality Model in Specific Pending PSD Permit Actions in North Dakota

AGENCY: Environmental Protection Agency.

ACTION: Notice of intent to approve North Dakota's request to use a Nonguideline air quality model in evaluating four specific pending PSD permit applications.

SUMMARY: This notice announces EPA's preliminary determination that a Nonguideline medium-range (50–200 Kilometers) computer dispersion model (MESOPUFF) is appropriate for use by the State of North Dakota in evaluating the air quality impacts of four specific sources proposed for construction under the Prevention of Significant Deterioration provisions of the Clean Air Act. Although the State has provided substantial opportunities for public comment on this Nonguideline model and EPA is not required to provide additional opportunity for comment, EPA has decided, as a matter of policy, to invite additional comment prior to making a final determination.

DATE: Comments due October 29, 1982.

ADDRESSES: Written comments should be addressed (preferably in duplicate) to:

Robert R. DeSpain, Chief, Air Programs Branch, Environmental Protection Agency, 1860 Lincoln Street, Denver, Colorado 80295

Copies of the materials submitted by the State are available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday at the following offices:

Environmental Protection Agency, Region VIII, Air Programs Branch, 1860 Lincoln Street, Denver, Colorado 80295

Environmental Protection Agency, Public Information Reference Unit, Waterside Mall, 401 M Street, S.W., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: Bill Bernardo, Air Programs Branch, Environmental Protection Agency, 1860 Lincoln Street, Denver, Colorado 80295, (303) 837–6131

SUPPLEMENTARY INFORMATION:

Background

The State of North Dakota has adopted regulations for the Prevention of Significant Deterioration of Air Quality (PSD) in accordance with Part C of the Clean Air Act (Act) 42 U.S.C. 7471–7479. North Dakota's PSD permitting program has been approved by EPA and the State Department of Health (Department) has responsibility for acting on PSD permit applications for new major stationary sources and major modification wishing to construct in the State. *See* 40 CFR 52.1829. Although the Department has authority to issue PSD permits, EPA retains the authority and responsibility for approving air quality models used in evaluating PSD permit applications 42 U.S.C. 7475(e)(3)(D) and 7620.

In accordance with Sections 165(e)(3)(D) and 320 of the Act, EPA has specified models to be used in conducting air quality impact analyses for PSD sources. *See* "Guideline on Air Quality Models" (OAQPS 1.2–080, EPA, Office of Air Quality Planning and Standards, Research Triangle Park, N.C. 27711, April 1978). If a Guideline model is inappropriate for use in a specific PSD permit action, the Act authorizes modification or substitution of another model. In cases where a State has assumed responsibility for the PSD program, any Nonguideline model must be subject to public comment in accordance with the public participation procedures of the approved State regulations. In addition, written approval of the EPA Administrator must be obtained for any such change. 40 CFR 51.24(l)(1) (iii) and (iv). EPA makes case-by-case decisions regarding Nonguideline model approval and normally issues a decision based on the State permit proceedings record.

The Department has requested EPA approval of a Nonguideline model which has been used to evaluate air quality impacts of four sources proposed for construction and subject to the PSD requirements, including Amoco Production Company, Basin Electric Power Cooperative, The Nokota Company, and Warren Petroleum Company. EPA is today announcing its preliminary determination that the Nonguideline model is appropriate for use by the Department in evaluating the pending PSD applications.

A brief chronology of events leading to this proposed approval of the use of a Nonguideline air quality model in North Dakota follows. The Department, having been delegated the authority to process PSD permit applications in 1977, began evaluating the air quality impacts of proposed new sources and modifications using dispersion models recommended in EPA's "Guideline on Air Quality Models". The principal Guideline model used to predict cummulative multiple source impacts from sources scattered over the State was the RAM-rural (RAMR) Guassian model. RAMR was the best model in the Guideline for use when considering large source-receptor distances even though the EPA stated a maximum useful range for reliable predictions of this model, and all Guassian steady state models, of not greater than 50 km.

In 1978, the Department used RAMR to predict that the 24-hour SO_2 Class I increment at the Theodore Roosevelt National Park (TRNP) South Unit has been consumed by new or modified sources east of the TRNP. New and potential PSD permit applicants, many of whom were farther than 50 km from TRNP, were faced with not receiving permits or demonstrating that emissions from their facility together with emissions from the other already permitted sources would not exceed the PSD increments. Thus, applicants, along with the Department, began searching for and evaluating Nonguideline medium-scale (about 50 to 200 km) transport and dispersion models, of which there are none recommended in the Guideline. These efforts resulted in a total of seven separate medium range (meso-scale) models being proposed for use by potential PSD permit applicants and the Department. Models were received by the Department about the same time that the corresponding PSD permit applications were received from the proposed facilities.

In 1979, the Department began an evaluation of the models following procedures mentioned in the PSD regulation and the Guideline on Air Quality Models. The evaluation consisted primarily of sensitivity studies and use of the "Workbook for Comparison of Air Quality Models", EPA–450/2–78–028b. Results and conclusions from these analyses are contained in "The Selection of a

Computer Modeling Procedure for the Simulation of Mesoscale Ground Level Air Quality Concentrations," North Dakota State Department of Health, June 1981. The Department's completed evaluation of the proposed mesoscale dispersion models was distributed for public comment in July 1981. A public hearing held jointly by EPA, Region VIII and the Department to receive oral and written comment on procedures proposed for use by the Department was convened on September 1–3, 1981. After substantial debate on all of the models and careful consideration of comments received, several suggested changes to the preferred models were made and the Department determined that both the MESOPUFF and Regional Transport Model (RTM) computer dispersion models were most appropriate for use in North Dakota where source receptor distances are greater than 50 km.

Description of Model

MESOPUFF is a dispersion model that tracks a puff of effluent from the source to a downwind receptor. It uses various mechanisms to estimate the decay rate of SO_2. However, MESOPUFF will not determine the products (e.g., acidity, particles) of that decay.

When compared against Gaussian models of the conventional type and the other models proposed for use in North Dakota, MESOPUFF was found to be one of the two most appropriate models. MESOPUFF was found to be appropriate because it operates with a complete meteorological processor, its output more closely corresponds to the plume behavior of EPA recommended models, it received the best ranking in the workbook comparison, it is readily available, and an unbiased third party review by Stanford Research Institute International stated MESOPUFF is the most scientifically sound model for use in North Dakota's situation.

RTM has not been used by the Department to make regulatory decisions because computer programming of changes recommended during the hearing process has not yet been completed.

EPA's Preliminary Determination

At the 1981 State public hearing, EPA stated that it did not intend to make any general determination regarding the appropriateness of any Nonguideline models for use by the State in any PSD permit decision. Rather, EPA indicated that Section 165(e)(3)(D) of the Act authorizes case-by-case approval of Nonguideline models in response to requests related to specific PSD permit actions. On August 27, 1982, the Department requested EPA approval for use of the MESOPUFF model in evaluating the air quality impacts from four proposed PSD sources. The Department has issued public notices of its proposal to grant the pending PSD permit requests and has scheduled public hearings for September 29 through October 6, 1982.

EPA is soliciting public comment on its preliminary determination to approve the Department's request to use the Nonguideline MESOPUFF model in evaluating the air quality impact of the four proposed sources (i.e., Amoco Production Company, Basin Electric Power Cooperative, The Nokota Company, and Warren Petroleum Company) under the PSD provisions of the Act. EPA believes that the Guideline models are not appropriate for use in estimating medium-range transport of pollutants from the proposed sources and, for the same reasons cited by the Department, EPA believes the MESOPUFF model is appropriate for use in evaluating the impacts of the specific proposed sources.

EPA is not required by the Act nor applicable regulations to provide this additional opportunity for public comments in addition to that provided by the State prior to making case-by-case decisions regarding approval of Nonguideline models. In cases, such as here, where the State has been delegated PSD permitting authority, the requirement in Section 165(e)(3)(D) of the Act is satisfied if the State provides for public comment and a hearing on any Nonguideline model in accordance with the applicable State regulations regarding public participation in PSD permit action. See 40 CFR 51.24(l)(1)(iii).

Nonetheless, EPA has decided to invite public comments on its preliminary determination to approve this Nonguideline model for use in evaluating the four pending PSD permit requests. The Nonguideline MESOPUFF model, as modified by the Department for use in determinations such as these, represents a rather innovative approach to modeling medium-range transport of pollutants. In addition, because of the predicted impact of these proposed sources on Class I areas,[1] there has been considerable public interest in the Department's proposed permit decisions and the modeling approach. Therefore, EPA believes it is advisable to provide this opportunity for public comment. Any comments received related to the appropriateness of this Nonguideline model for use in evaluating the air quality impacts of these four, specific, proposed sources will be considered by EPA prior to making a final determination regarding approval of this model for use in each pending PSD permit action. EPA will, of course, also consider any comments or other information received during the scheduled State proceedings on these PSD permit applications.

Any final approval issued by EPA will be limited to use of the Nonguideline model in the specific PSD permit action(s) at issue. EPA's preliminary determination, and any final determination, that this Nonguideline model is appropriate for use in evaluating the air quality impacts of these four proposed sources should in no way be construed as a determination by EPA that this model is appropriate for use in othe regulatory contexts or in any subsequent PSD permit decisions made by the Department. EPA intends to continue to make case-by-case decisions regarding use of this or any Nonguideline model.

This notice is exempt from the requirements of Executive Order 12291.

(Secs. 165 and 301(a)(1) of the Clean Air Act (42 U.S.C. 7475 and 7601(a)(1)))

Dated: September 10, 1982.

Robert C. Dupray,

Acting Regional Administrator.

[FR Doc. 82-26689 Filed 9-28-82; 8:45 am]

BILLING CODE 6560-50-M

[1] The model predicts that the Class I SO_2 increments at Theodore Roosevelt National Park and Lostwood National Wildlife Refuge are currently being exceeded and that exceedances will continue if these sources are constructed. Under Section 164(d)(2)(C) of the Act, these new sources may only be permitted if there will be no adverse impact on air quality related values in the affected Class I areas. The PSD applicants have requested a certification of no adverse impact from the Federal Land Manager. See 47 FR 30222 and 47 FR 37907.

FEDERAL COMMUNICATIONS COMMISSION

[BC Docket No. 82–635, File No. BPCT–820108KE et al.]

Madison Independent Television, Inc. et al.; Designating Applications for Consolidated Hearing on Stated Issues

Adopted: September 7, 1982.

Released: September 10, 1982.

In re applications of Madison Independent Television, Inc., Madison, Wisconsin, BC Docket No. 82–635, File No. BPCT–820108KE; Center City Broadcasting, Inc., Madison, Wisconsin, BC Docket No. 82–636, File No. BPCT–820312KG; Channel 47, Inc., Madison, Wisconsin, BC Docket No. 82–637, File No. BPCT–820315KF; tvUSA/Madison, Ltd., Madison, Wisconsin, BC Docket

No. 82-638, File No. BPCT-820315KH; Madison Family Television, Ltd., Madison, Wisconsin, BC Docket No. 82-639, File No. BPCT-820315KL; for construction permit for a new television station.

By the Chief, Broadcast Bureau:

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it: (a) The above-captioned mutually exclusive applications of Madison Independent Television, Inc. (Madison Independent), Center City Broadcating, Inc. (CCB), Channel 47, Inc. (Channel 47), tvUSA/Madison, Ltd. (tvUSA), and Madison Family Television, Ltd., (Madison Family), for a new commercial television station to operate on Channel 47, Madison, Wisconsin; (b) a petition to deny filed by CCB against Channel 47; [1] and (c) related pleadings.

2. Since we have not received determinations from the Federal Aviation Administration that Madison Independent's, CCB's, and Channel 47's proposed tower heights and locations would not constitute a hazard to air navigation, an issue regarding this matter will be specified.

3. Madison Independent proposes to operate from a tower 746 feet above ground. Section 1.1305(a)(2) of the Rules considers a tower in excess of 300 feet above ground to be a major action within the meaning of the National Environmental Policy Act, and § 1.1311 requires the submission of an environmental narrative statement from applicants proposing such major actions. The narrative statement included in Madison Independent's application does not fully address the matters set forth in § 1.1311, e.g., extensive surface feature changes resulting from construction, a complete description of facilities site, communications with local authorities and possible local controversy. Consequently, Madison Independent will be required to submit a complete environmental narrative statement to the Administrative Law Judge within 30 days of the mailing of this Order.

4. TvUSA proposes to operate from a tower 1,072 feet above ground. The tower location proposed by tvUSA is located near four existing television towers ranging in distance from 1.1 to 2.4 miles from the proposed tvUSA site. In its application, tvUSA contends that its proposed tower location is within a "de facto" antenna farm. As a result, tvUSA believes the construction of its tower to be a minor action within the meaning of the National Environmental Policy Act and has not submitted a complete environmental narrative with its application. The tower location proposed by tvUSA does not comply with the Commission's policy regarding "de facto" antenna farms. Accordingly, tvUSA will be required to submit a complete environmental narrative statement to the Administrative Law Judge within 30 days of the mailing of this Order.

[1] Such a petition is, in essence, a pre-designation petition to specify issues. Since such petitions are no longer permitted, they will be dismissed. *Processing of Contested Broadcasting Applications*, 72 FCC 2d 202 (1979). In any event, the petition to deny was, in effect, mooted by a petition for leave to amend filed by Channel 47 which satisfied the questions raised in CCB's petition to deny.

Conclusion and Order

5. The applicants are qualified to construct and operate as proposed. Since the proposals are mutually exclusive, however, they must be designated for hearing in a consolidated proceeding on the issues specified below.

6. Accordingly, it is ordered, That the petition to deny filed by Center City Broadcasting, Inc., is dismissed.

7. It is further ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine, with respect to Madison Independent Television, Inc., Center City Broadcasting, Inc., and Channel 47, Inc., whether there is a reasonable possibility that the tower height and location proposed by each would constitute a hazard to air navigation.

2. To determine which of the proposals would, on a comparative basis, best serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

8. It is further ordered, That the Federal Aviation Administration is made a party respondent to this proceeding with respect to issue 1.

9. It is further ordered, That Madison Independent TV, Inc. and tvUSA/Madison, Ltd., shall submit an environmental narrative statement fully addressing the matters set out in § 1.1311 of the Commission's Rules, as supplements to their applications to the Administrative Law Judge, within 30 days of the mailing of this Order.

10. It is further ordered, That to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issue specified in this Order.

11. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 82-26691 Filed 9-28-82; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket No. 82-641, File No. BPH-810603AG et al.]

Radio Jonesboro, Inc. et. al.; Designating Applications for Consolidated Hearing on Stated Issues

Adopted: September 7, 1982.

Released: September 16, 1982.

In re applications of Radio Jonesboro, Inc., Jonesboro, Arkansas, Req: 100.1 MHz Channel 261A, 3 kW (H&V), 225 feet, BC Docket No. 82-641, File No. BPH-810603AG; Becmar Communications, Inc., Jonesboro, Arkansas, Req: 100.1 MHz, Channel 261A, 3 kW (H&V), 300 feet, BC Docket No. 82-642, Filed No. BPH-810624AD; MSB Communications Corp., Jonesboro, Arkansas, Req: 100.1 MHz, Channel 261A, 3 kW (H&V), 300 feet, BC Docket No. 82-643, File No. BPH-811027AC; Larry A. Wood, Jonesboro, Arkansas, Req: 100.1 MHz, Channel 261A, 3 kW (H&V), 300 feet, BC Docket No. 82-644, File No. BPH-811027AE; Whispering Sounds, Inc., Jonesboro, Arkansas, Req: 100.1 MHz, Channel 261A, 3 kW (H&V), 300 feet, BC Docket No. 82-645, File No. BPH-811028AL; Wesley Godfrey, Jr & A.T. Moore d/b/a CLB of Arkansas, Jonesboro, Arkansas, Req: 100.1 MHz, Channel 261A, 3 kW (H&V), 300 feet, BC Docket No. 82-646, File No. BPH-811028AM; Hearing Designation Order.

By the Chief, Broadcast Bureau:

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by Radio Jonesboro, Inc., Becmar Communications, Inc. (hereafter

Becmar), MSB Communications Corporation, Larry A. Wood, Whispering Sounds, Inc., and Wesley Godfrey, Jr. and A.T. Moore d/b/a CLB of Arkansas (hereafter CLB) for a new FM broadcast station at Jonesboro, Arkansas.

2. The material submitted in the application does not demonstrate Becmar's financial qualifications. Although the financial standards are unchanged, the Commission has changed the application form to require only certification as to financial qualifications. Accordingly, the applicant will be given 30 days from the date of mailing of this order to review its financial proposal in light of Commission requirements, to make any changes that may be necessary, and, if appropriate, to submit a certification to the Administrative Law Judge in the manner called for in revised Section III, Form 301, as to its financial qualifications. If the applicant cannot make the required certification, it shall so advise the Administrative Law Judge who shall then specify an appropriate issue. *Minority Broadcasters of East St. Louis, Inc.*, BC Docket No. 82-378.

3. Applicants for new broadcast stations are required by § 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. We have no evidence that Becmar or CLB published the required notice. To remedy this deficiency, they must publish local notice, if they have not already done so, and so inform the presiding Administrative Law Judge.

4. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue for the purpose of determining whether a comparative preference should accrue to any of the applicants.

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

6. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applicants are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

2. To determine which of the proposals would, on a comparative basis, best serve the public interest.

3. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

7. It is further ordered, That Becmar Communications, Inc. shall submit a financial certification in the form required by Section III, F.C.C. Form 301, or advise the Administrative Law Judge that the certification cannot be made, as may be appropriate.

8. It is further ordered, That Becmar Communications, Inc. and Wesley Godfrey, Jr. and A. T. Moore d/b/a CLB of Arkansas shall inform the presiding Administrative Law Judge as to whether they have complied with the public notice requirements of § 73.3580(f) of the Commission's Rules.

9. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

10. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Larry D. Eads,

Chief, Broadcast Facilities Division, Broadcast Bureau.

Appendix

11. The Commission has not yet received Federal Aviation Administration clearance for the antenna tower proposed by the below listed applicant. Accordingly, it is further ordered, That the following issue is specified:

1. To determine whether there is a reasonable possibility that a hazard to air navigation would occur as a result of the tower height and location proposed by CLB.

12. It is further Ordered, That the Federal Aviation Administration is made a party to the proceeding with respect to the air hazard issue only.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group Definitions and Rules Subcommittee Meetings

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of meetings of the Telecommunications Industry Advisory Group (TIAG) Definitions and Rules Subcommittee scheduled to meet on Tuesday, October 12, 1982, and Tuesday, October 26, 1982. Both meetings will be open to the public. The October 12th meeting will be held at 9:30 a.m. in the offices of MCI Telecommunications Corporation (1st Floor Meeting Room) at 1133 19th Street, NW., Washington, D.C. The agenda is as follows:

I. General Administrative Matters.
II. Review of Minutes of Previous Meeting.
III. Discussion of Individual Assignments.
IV. Other Business.
V. Presentation of Oral Statements.
VI. Adjournment.

The October 26th meeting will be held at 9:30 a.m. in Suite 1735 at the Ernst & Whinney offices located at 1201 Pacific Avenue, Tacoma, Washington. The agenda is as follows:

I. General Administrative Matters.
II. Review of Minutes of Previous Meeting.
III. Discussion of Individual Assignments.
IV. Other Business.
V. Presentation of Oral Statements.
VI. Adjournment.

With prior approval of Subcommittee Chairman John Utzinger, oral statements, while not favored or encouraged may be allowed if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Utzinger (203/965-2830) at least five days prior to the meeting date.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group Expense Accounts Subcommittee Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub.

L. 92–463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group's (TIAG) Expense Accounts Subcommittee scheduled to meet on Wednesday, October 13, 1982. The meeting will be held at 9:30 a.m. in Conference Room B, (10th Floor) of the AT&T offices located at 1120 20th Street, NW., Washington, D.C. and will be open to the public. The agenda is as follows:

I. General Administrative Matters.
II. Discussion of Expense Subcommittee Directions.
III. Discussion of Assignments.
IV. Other Business.
V. Presentation of Oral Statements.
VI. Adjournment.

With prior approval of Subcommittee Chairman John Howes, oral statements, while not favored or encouraged, may be allowed at the meeting if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Howes (212/393–4029) at least five days prior to the meeting date.

Federal Communications Commission.

[CC Docket No. 82–647; File No. 22806–CD–P–(1)–82 etc.]

Westside Communications of Tampa, Inc. and Howard A. Maddox, Inc., d.b.a. Constant Communication; Order Designating Applications for Hearing

Adopted September 15, 1982; Related September 20, 1982.

In re applications of Westside Communications of Tampa, Inc., CC Docket No. 82–647, File No. 22806–CD–P–(1)–82, For a construction permit to add a new location to operate on frequency 158.70 MHz for Station KLF659 in the Domestic Public Land Mobile Radio Service (DPLMRS) at Wauchula, Florida; Howard A Maddox, Inc., d.b.a. Constant Communications CC Docket No. 82–648, File No. 21839–CD–P–(1)–81, For a construction permit for a new station to operate on frequency 158.70 MHz in the DFLMRS at Sebring, Florida, and CC Docket No. 82–649, File No. 23392–CD–P–(02)–62; For a construction permit for a new base station to operate on frequency 158.70 MHz at Wauchula, Florida, and a control station of frequency 72.9 MHz in the DPLMRS AT Sebring, Florida; Designating applications for consolidated hearing on stated issues.

1. Presently before the Chief, Mobile Services Division, pursuant to delegated authority, are the captioned applications of Westside Communications of Tampa, Inc. (Westside) and Howard A. Maddox, Inc., d.b.a. Constant Communications (CC). Westside proposes to add another location for Station KLF659 to operate on frequency 158.70 at Wauchula, Florida. CC proposes to build new stations to operate on frequency 158.70 MHz at Sebring and Wauchula, Florida. CC also proposes to build a control station at Sebring, Florida, to operate on frequency 72.9 MHz.

2. The proposal of Westside and CC to use frequency 158.70 MHz in the same geographical area are electrically mutually exclusive; therefore, a comparative hearing will be held to determine which applicant would better serve the public interest. The CC proposal to construct a control station on frequency 72.9 MHz is not mutually exclusive with any other pending application.

3. We find both applicants to be legally, technically, and otherwise qualified to construct and operate the proposed facilities.

4. Accordingly, it is ordered, pursuant to Section 309 of the Communications Act of 1934, as amended, that the application of Westside Communications of Tampa, Inc., File No. 22806–CD–P–(1)–82 and the application of Howard A. Maddox, Inc., d.b.a. Constant Communications, File Nos. 21839–CD–P–(1)–81 and 23392–CD–P–(02)–82 to operate on frequency 158.70 MHz are designated for hearing in a consolidated proceeding upon the following issues:

(a) to determine on a comparative basis, the nature and extent of service proposed by each applicant, including the rates, charges, maintenance, personnel, practices, classifications, regulations, and facilities pertaining thereto;

(b) to determine on a comparative basis, the areas and populations that each applicant will serve within the prospective interference-free area within the 43 dBu contours,[1] based upon the standards set forth in Section 22.504(a) of the Commission's Rules,[2] and to determine and compare the relative demand for the proposed services in said areas; and

(c) to determine, in light of the evidence adduced pursuant to the foregoing issues, what disposition of the referenced applications would best serve the public interest, conveience, and necessity.

5. It is further Ordered, that the hearing shall be held at a time and place and before an Administrative Law Judge to be specified in a subsequent Order.

6. It is further ordered, that the Chief, Common Carrier Bureau, is made a party to the proceeding.

7. It is further ordered, that the applicants shall file written notices of appearances under § 1.221 of the Commission's Rules within 20 days of the release date of this Order.

8. The Secretary shall cause a copy of this order to be published in the **Federal Register.**

William F. Adler,

Chief, Mobile Services Division, Common Carrier Bureau.

[FR Doc. 82–26662 Filed 9–28–82; 8:45 am]

BILLING CODE 6712–01–M

[1] For the purposes of this proceeding, the interference-free area is defined as the area within the 43 dBu contour as calculated from § 22.504, in which the ratio of desired-to-undesired signal is equal to or greater than R in FCC Report No. R–6404, equation B.

[2] Section 22.504(a) of the Commission's Rules and Regulations describes a field strength contour of 43 decibels above one microvolt per meter as the limits of the reliable service area for base stations engaged in one-way communications service on frequencies in the 150 MHz band. Propagation data set forth in § 22.504(b) are the proper bases for establishing the location of service contours F(50,50) for the facilities involved in this proceeding. (The applicants should consult with the Bureau counsel with the goal of reaching joint technical exhibits.)

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10327; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the **Federal Register** in which this notice appears. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed

agreement. Comments shall discuss with particularly allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No.: T–3685–1.

Filing party: Mr. Richard L. Landes, Deputy City Attorney, Office of the City Attorney of Long Beach, Harbor Administration Building, P.O. Box 570, Long Beach, California 90801.

Summary: Agreement No. T–3685–1 between the City of Long Beach (Port) and Maersk Line Pacific, Ltd. (Maersk), modifies the basic agreement which provides for the nonexclusive preferential assignment to Maersk of premises at Berths 228–229, Pier G, Long Beach, California, to be used by Maersk for the operation of a marine terminal. Agreement No. T–3685–1 provides for improvements at the premises, primarily the adding of reefer outlets. As compensation, Maersk shall pay to Port for use of the improvements, 126 monthly payments as provided for in the agreement. The agreement shall become effective upon Commission approval, or on January 1, 1983, whichever is later.

Agreement No.: T–4069.

Filing party: Mr. Milton A. Mowat, Manager, Traffic and Regulatory Affairs, Port of Portland, Box 3529, Portland, Oregon 97208.

Summary: Agreement No. T–4069, between the Port of Portland (Port) and Orgeon Terminal Company (OTC), provides that OTC will operate the Port's container freight station at Terminal 6 for a term of 3 years. Port will pay OTC a management fee of $2,000.00 per month and other costs/charges as specified under the labor union contracts which are involved in this arrangement.

Agreement No.: T–4070.

Filing party: Samuel B. Nemirow, Esquire, Hill, Betts & Nash, 1220 Nineteenth Street, N.W., Suite 302, Washington, D.C. 20036.

Summary: Agreement No. T–4070 between the San Francisco Port Commission (Port) and Crescent Wharf and Warehouse Company (Crescent) provides that Crescent will perform terminal operating and cargo solicitation services within Piers 94 and 96 at the Port of San Francisco. The facility will include 4-container gantry cranes and 1-heavy-lift barge crane. Crescent will promote the use of the facility. As compensation the Port shall pay to Crescent 25 percent of the Tariff Revenue collected by the Port in the preceding month during the term of the agreement. If the Tariff Revenue in any year exceeds 3-million dollars, the Port shall also pay to Crecent 25 percent of the excess. The term of the agreement starts the first day of the month following approval by the Commission and shall run for a period of 5 years, with an extension option of an additional 5-year period.

Agreement No.: 8090–23.

Filing party: Robert A Hazel, Esquire, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 8090–23 amends Article 20 of the basic agreement of the Mediterranean North Pacific Coast Freight Conference for the purpose of incorporating general arbitration procedures to cover disputes which do not fall within the jurisdiction of the Enforcement Authority.

Agreement No.: 8260–23.

Filing party: Robert A. Hazel, Esquire, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 8260–23 amends the Mediterranean/U.S.A. Great Lakes Westbound Freight Conference by adding a new Article 14 to the basic agreement which requires (1) each member to deposit with the Secretary a bank guarantee in the amount of $10,000 (U.S.) as security for the fulfillment of obligations under the Agreement, and (2) a vote of four-fifths of the members entitled to vote to alter the amount of such guarantee.

Agreement No.: 9938–4.

Filing party: Neal M. Mayer, Esq., Hoppel, Mayer & Coleman, 1000 Connecticut Avenue, N.W., Washington, D.C. 20036.

Summary: Agreement No. 9938–4 amends the basic agreement between Companhia de Navegacao Lloyd Brasileiro and Companhia de Navegacao Maritima Netumar, which authorizes the parties to divide the Brazilian flag portion of any pooling agreements that may exist in the trade between ports of the River Plate and Belem, Brazil, and ports on the East Coast of the United and Canada, and, optionally, Great Lakes ports. The purpose of the amendment is to extend the December 31, 1982 expiration date of the agreement to December 31, 1986.

Agreement No.: 10159–11.

Filing party: Dominick J. Manfredi, Chairman, American West African Freight Conference, 50 Broadway, New York, New York 10004.

Summary: Agreement No. 10159–11 modifies the Lagos/Apapa Berth Services Rationalization Agreement, which permits the member lines to rationalize their berth services at Lagos/Apapa, Nigeria. The purpose of the modification is to increase the amount of the security deposit, strengthen procedures for collection of assessments and to permit the adoption of amendments to the Agreement upon a vote of unanimity less one.

Agreement No.: 10436–1.

Filing party: David F. Anderson, Associate General Counsel, Matson Navigation Company, P.O. Box 3033, San Francisco, California 94119.

Summary: Agreement No. 10436–1 amends the basic transshipment agreement between United States Lines, Inc. and Matson Navigation Company, Inc. to add Panama as a destination for eastbound shipments from Honolulu, Hawaii.

Agreement No.: 10459.

Filing party: John M. Ridlon, Esquire, Sea-Land Industries, Inc., P.O. Box 800, Iselin, N.J. 08830.

Summary: Agreement No. 10459, between Sea-Land Service, Inc. (Sea-Land) and American President Lines, Ltd. (APL), proposes a joint feeder vessel service between Taiwan and the Philippines, in connection with each party's individual transpacific linehaul services. APL will dedicate a vessel for this feeder service that will be modified to suit the needs of both parties, with Sea-Land paying the costs for modifying and subsequent retrofitting. The parties will agree on the scheduling of the feeder vessel, and each will be entitled to 50 percent of its capacity. Sea-Land will pay APL a daily rental per container space, plus 50 percent of certain expenses. The agreement proposes a 5-year term.

By Order of the Federal Maritime Commission.

Dated: September 24, 1982.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

September 23, 1982.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act (44 U.S.C. Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibilities under the act also considers comments on the forms and recordkeeping requirements that will affect the public. Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. OMB's usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

List of Forms Under Review

Immediately following the submission of a request by the Federal Reserve for OMB approval of a reporting or recordkeeping requirement, a description of the report is published in the **Federal Register**. This information contains the name and telephone number of the Federal Reserve Board clearance officer (from whom a copy of the form and supporting documents is available). The entries are grouped by type of submission—i.e., new forms, revisions, extensions (burden change), extensions (no change), and reinstatements.

Copies of the proposed forms and supporting documents may be obtained from the Federal Reserve Board clearance officer whose name, address, and telephone number appears below. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-3829)

OMB Reviewer—Richard Sheppard—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202-395-6880).

Request for Implementation of a Temporary Survey To Be Conducted on Two Occasions

1. Report title: Report of Loans to, and Deposits of, U.S. Nonbank Residents at the Non-U.S. Offices of Foreign Banks with U.S. Offices.
Agency form number: FR 3022
Frequency: Twice
Reporters: U.S. branches and agencies of foreign bank families
SIC Code: 605
Small businesses are not affected.
General description of report: approximately 384 responses; approximately 3,840 hours needed to complete the form; average response time of 10 hours; respondent's obligation to reply is voluntary (12 U.S.C. §§ 248(a) and 353 *et seq.*); a pledge of confidentiality is promised; cost to the Federal Government is approximately $7,500; cost to the public is approximately $76,800; 2 forms submitted for approval; the report is not being reviewed under Section 3504(h) of Pub. L. 96-511.

These data will provide an indication of the volume of transactions between U.S. nonbank residents and the non-U.S offices of foreign banks with U.S. offices. This information will be used by the Federal Reserve in interpreting U.S. monetary and credit aggregates.

Board of Governors of the Federal Reserve System, September 23, 1982.

Dolores S. Smith,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D-82-662]

San Francisco, Calif.; Designation

AGENCY: Housing and Urban Development Department.

ACTION: Designation of Acting Regional Administrator and Acting Deputy Regional Administrator; Order of Succession.

SUMMARY: The Regional Administrator, Region IX, is updating the designation of officials who may serve as Acting Regional Administrator and Acting Deputy Regional Administrator for the San Francisco Regional Office, Region IX, during the absence, disability or vacancy in the position of the Regional Administrator and Deputy Regional Administrator.

EFFECTIVE DATE: September 29, 1982.

FOR FURTHER INFORMATION CONTACT: Beverly G. Agee, Regional Counsel, Department of Housing and Urban Development, Region IX, 450 Golden Gate Avenue, Box 36003, San Francisco, California 94102.

Designation of Acting Regional Administrator, Region IX, San Francisco

The officers appointed to the following listed positions in Region IX (San Francisco) are hereby designated to serve as Acting Regional Administrator, Region IX, San Francisco, during the absence, disability or vacancy in the position of the Regional Administrator with all the powers, functions, and duties redelegated or assigned to the Regional Administrator: *Provided,*

That no officer is authorized to serve as Acting Regional Administrator unless all other officers whose title precede his or hers in this designation are unable to act by reason of absence, disability or vacancy in said listed position:

1. Deputy Regional Administrator.
2. Director, Office of Regional Community Planning & Development.
3. Director, Office of Regional Housing.
4. Director, Office of Regional Administration.

Designation of Acting Deputy Regional Administrator, Region IX, San Francisco

The officers appointed to the following listed positions in Region IX (San Francisco) are hereby designated to serve as Acting Deputy Regional Administrator, Region IX, San Francisco, during the absence, disability or vacancy in the position of the Deputy Regional Administrator with all the powers, functions, and duties redelegated or assigned to the Deputy Regional Administrator: *Provided,* That no officer is authorized to serve as Acting Deputy Regional Administrator unless all other officers whose titles precede his or hers in this designation are unable to act by reason of absence,

disability or vacancy in said position. *Provided, further,* That in the absence, disability or vacancy in the position of both the Regional Administrator and Deputy Regional Administrator, if any of the officers listed below are serving as Deputy Regional Administrator by virtue of the designation published concurrently herewith, the next officer in the order listed below shall serve as Acting Deputy Regional Administrator:

1. Director, Office of Regional Community Planning & Development.
2. Director, Office of Regional Housing.
3. Director, Office of Regional Administration.

These designations supersede and cancel the designation of Acting Regional Administrator and Acting Deputy Regional Administrator published on August 18, 1980 (45 FR 54870–71) and effective on June 20, 1980, and any supplemental designations, published or unpublished, that may be in effect prior to the date of this document.

(Delegation effective May 4, 1962, 27 FR 4319; Interim Order II, 31 FR 815, January 21, 1966)

Bill J. Sloan,

Regional Administrator, Region IX, San Francisco.

BILLING CODE 4210-01-M

Office of the Secretary

[Docket No. N-82-1170]

Submission of Proposed Information Collections to OMB

AGENCY: Housing and Urban Development Department.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposals by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S.Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposals should be sent to the OMB Desk Oficer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Application for HUD-Insured Mortgages—Verification of Employment, Verification of Deposit
Office: Housing
Form No.: HUD–92900, HUD–92004F, HUD–92004G
Frequency of submission: On Occasion
Affected Public: Individuals or Households Seeking Mortgage Loans
Estimated burden hours: 220,000
Status: Extension
Contact: John Coonts, HUD, (202) 755–6720; Robert Neal, OMB, (202) 395–6880

(Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d))

Dated: September 20, 1962.

Notice of Submission of Proposed Information Collection to OMB

Proposal: Survey of Market Absorption of New Apartment Buildings
Office: Policy Development and Research
Form No.: None
Frequency of submission: Monthly
Affected public: Builders, Managers or Landlords of Residential Apartments
Estimated burden hours: 3,640
Status: Revision
Contact: Connie Casey, HUD, (202) 755–5060; Robert Neal, OMB, (202) 395–6880

(Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d))

Dated: September 20, 1962.

Judith L. Tardy,

Assistant Secretary for Administration.

[FR Doc. 82-26609 Filed 9-28-82; 8:45 am]

BILLING CODE 4210-01-M

Office of Environment and Energy

[Docket No. NI-102]

Intended Environmental Impact Statement, Puerto Rico

The Department of Housing and Urban Development's Caribbean Area Office, gives notice that an Environmental Impact Statement (EIS) is intended to be prepared for the following project as described in the appendix to this Notice: El Coqui Community, San Juan, Puerto Rico. This notice is required by the Council on Environmental Quality under its rules (40 CFR Part 1500).

Interested individuals, governmental agencies, and private organizations are invited to submit information and comments concerning the project to the specific person or address indicated in the appropriate part of the appendix.

Particularly solicited is information on reports or other environmental studies planned or completed in the project area, issues and data which the EIS should consider, recommended mitigating measures and alternatives, and major issues associated with the proposed project. Federal agencies having jurisdiction by law, special expertise or other special interests should report their interests and indicate their readiness to aid the EIS effort as a "cooperating agency."

Each Notice shall be effective for one year. If one year after the publication of a Notice in the **Federal Register** a Draft EIS has not been filed on a project, then the Notice for that project shall be cancelled. If a Draft EIS is expected more than one year after the publication of the Notice in the **Federal Register**, then a new and updated Notice of Intent will be published.

Issued at Washington, D.C., September 23, 1982.

Francis G. Haas,

Deputy Director, Office of Environment and Energy.

Appendix

EIS on the El Coqui Community

The Department of Housing and Urban Development's Caribbean Area Office intends to prepare an Environmental Impact Statement on the project described below and solicits information and comments for consideration in the EIS.

Description

The Coqui Project is located on the Cupey Ward, Municipality of San Juan. It is located on State Road No. 176, at km. 4.6. The site is one of the largest tracts of undeveloped land neighboring the highly populated metropolitan area. It represents one of the few areas for growth of San Juan and it falls in the center of the areas classified "Transition Zone" in a 1982 land use plan prepared by the Puerto Rico Planning Board, and approved on March 31, 1982.

The site comprises 377 cuerdas (366,1492 acres) and is characterized by rolling hills with elevations ranging from 40 meters (148 feet) to 130 meters (425 feet) above mean sea level. The project is bounded by the North with Los Guanos Creek, by the South with State Road PR-176 and Las Curias Creek, by the East with State Road PR-176 and a few private farms, and by the West with the Piedras River.

The proposed development consists of 3,500 units and two small supporting commercial facilities utilizing a total of approximately 262 cuerdas. The proposed land use will consist of different types of housing, consisting of condominium clustered garden apartments and row-houses constituting a medium density residential and some areas for single family houses with two small supporting commercial areas. The medium density parcels consist of approximately 143.5 cuerdas divided in tracts of land averaging approximately from 5 to 25 cuerdas, each tract with a proposed density of approximately twenty (20) units per cuerda for a total of 3,140 units. The low density area consists of 90 cuerdas divided in four (4) major tracts of land averaging approximately 20 cuerdas each with a proposed development density of approximately 4 units per cuerda for a total of 360 units.

Need

The Caribbean Area Office determined to prepare an EIS due to the large-scale nature of the project. Estimated date for completion of the Draft EIS is December 15, 1982. A copy of the Draft will be published in Spanish and will be available for inspection at the Caribbean Area Office.

Alternative

Alternatives to be considered are: accept project as proposed, consider changes to size and design and no project.

Scoping

The Caribbean Area Office plans to hold a scoping meeting with concerned Federal Agencies, local agencies and the general public. Responses to this Notice will be used to help determine significant environmental issues, identify agencies, groups, and individuals that will participate in the EIS process. The scoping meeting will be held: 10:00 a.m., October 19, 1982, Room 415-A, Degetau Federal Building, Hato Rey, Puerto Rico.

Comments: All interested parties comments should address the environmental impacts of the proposed project and all such comments will be considered when preparing the Draft and shall become part of the project's environmental file.

These comments should be mailed or delivered to HUD at the following address on or before November 19, 1982. Jose R. Febres-Silva, Area Manager, U.S. Department of Housing and Urban Development, U.S. Courthouse and Federal Building, Carlos Chardon Avenue, Room 428, Hato Rey, Puerto Rico 00918.

BILLING CODE 4210-29-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F-14941-A]

Alaska Native Claims Selection

On November 19, 1974, Stony River Ltd., for the Native village of Stony River, filed selection application F-14941-A, as amended, under the provisions of Section 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1611 (1976) (ANCSA), for the surface estate of certain lands in the vicinity of Stony River.

On April 25, 1977, in accordance with the Title 10, Chapter 05, Secs. 396 and 399 of the Alaska Business Corporation Act, and as authorized by 43 U.S.C. 1627, Georgetown Incorporated, a domestic corporation, merged with Aniak Limited, Chuathbaluk Company, Kipchaughpuk Limited, Lower Kalskag Incorporated, Napamute Limited, Red Devil Incorporated, Sleetmute Limited, Stony River Ltd., and Upper Kalskag Incorporated, all domestic corporations, into Georgetown Incorporated, which consolidated individual village interests into one single constituent corporation whose name was changed to The Kuskokwim Corporation. The surviving corporation, The Kuskokwim Corporation, is entitled to all rights, privileges, and benefits of the Alaska Native Claims Settlement Act.

As to the lands described below, selection application F-14941-A, as amended, is properly filed, and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, aggregating approximately 64,849 acres, is considered proper for acquisition by The Kuskokwim Corporation (for the village of Stony River) and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA.

Containing approximately 640 acres.
Aggregating approximately 64,849 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. The following named water bodies, together with any unnamed water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F–14941–EE:

Kuskokwim River
Stony River
Swift River
Tatlawiksuk River
Moose Creek
Stony River Cutoff

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for one or more of the following reasons: Lands are no longer under Federal jurisdiction; lands are under applications pending further adjudication; lands are pending a determination under Sec. 3(e) of ANCSA; or lands were previously rejected by decision. Lands within U.S. Surveys which are excluded are described separately in this decision if they are available for conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(f); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–14941–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25-Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (ATV's) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

One Acre Site—The uses allowed for a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 5 C4) A one (1) acre site easement upland of the ordinary high water mark in Sec. 18, T. 20 N., R. 39 W., Seward Meridian, on the left bank of the Kuskokwim River. The uses allowed are those listed above for a one (1) acre site easement.

b. (EIN 5a C4) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 5 C4 on the Kuskokwim River in Sec. 18, T. 20 N., R. 39 W., Seward Meridian, southeasterly to public land. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

c. (EIN 7 C4) A one (1) acre site easement upland of the ordinary high water mark in Sec. 17, T. 21 N., R. 38 W., Seward Meridian, on the right bank of the Kuskokwim River at the mouth of an unnamed stream. The uses allowed are those listed above for a one (1) acre site easement.

d. (EIN 7a C4) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 7 C4 located in Sec. 17, T. 21 N., R. 38 W., Seward Meridian, westerly to public land. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official supplemental plat of survey confirming the boundary description and acreage of the unsurveyed lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958, 48 U.S.C. Ch. 2, Sec. 6(g)), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b)(2) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(c), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

The Kuskokwim Corporation (for the village of Stony River) is entitled to conveyance of 69,120 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 64,849 acres. The remaining entitlement of approximately 4,271 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate of the lands described above shall be issued to Calista Corporation when the surface estate is conveyed to the Kuskokwim Corporation (for the village

of Stony River), and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop or remove mineral materials from the subsurface estate in lands within the boundaries of the Native Village shall be subject to the consent of The Kuskokwim Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Tundra Drums.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96-487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 510 L Street, Suite 100, Anchorage, Alaska 99501.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

The Kuskokwim Corporation, 429 D Street, Suite 307, Anchorage, Alaska 99501.

Calista Corportion, 516 Denali Street, Anchorage, Alaska 99501.

State of Alaska, Department of Natural Resources, Division of Research and Development, Pouch 7-005, Anchorage, Alaska 99510.

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[F-19328-A, F-19328-B]

Alaska Native Claims Selection

On December 3, 1974, and December 9, 1974, Evansville, Inc., for the Native village of Evansville (Bettles Field), filed selection applications F-19328-A and F-19328-B, respectively, under the provisions of Sec. 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976)) (ANCSA), as amended, for the surface estate of certain lands in the vicinity of Evansville.

The Native village of Evansville was not listed in Sec. 11(b)(1) of ANCSA. However, on July 20, 1972, Public Land Order 5242 withdrew T. 24 N., Rs. 19 and 20 W.; T. 25 N., Rs. 16 through 19 W.; and T. 26 N., Rs. 17 through 19 W., Fairbanks Meridian, pending determination of eligibility.

On July 23, 1973, the village filed an application for determination of eligibility as an unlisted village, naming T. 24 N., R. 18 W., Fairbanks Meridian, as the location of the village. This filing constitutes a withdrawal for the remaining lands in the vicinity of Evansville pursuant to Departmental regulation 43 CFR 2651.2.

On November 25, 1974, a Certificate of Eligibility was issued certifying the Native village of Bettles Field (Evansville) eligible for land benefits pursuant to Sec. 11(b)(3) of ANCSA.

As to the lands described below, the applications are properly filed and meet the requirements of ANCSA, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, aggregating approximately 65,208 acres, is considered proper for acquisition by Evansville, Inc., and is hereby approved for conveyance pursuant to sec. 14(a) of ANCSA.

Fairbanks Meridian, Alaska (Surveyed)

R. 24 N., R. 17 W.
Secs. 25 to 36, inclusive.
Containing 7,595.04 acres.

T. 25 N., R. 17 W.
Secs. 1 to 5, inclusive;
Sec. 7, excluding Native allotment F-16325;
Secs. 8, 9, 10, and 16;
Secs. 17 and 18, excluding Native allotment F-16325;
Secs. 19, 20, 29, and 30.
Containing approximately 9,469 acres.

T. 24 N., R. 18 W.
Secs. 1 to 6 inclusive;
Secs. 7 and 8, excluding Quitclaim Deed dated June 1, 1966;
Secs. 9 to 16, inclusive;
Sec. 17, excluding Alaska Native Claims Settlement Act Sec. 3(e) application F-80210, and Quitclaim Deed dated June 1, 1966;
Sec. 18, excluding Alaska Native Claims Settlement Act Sec. 3(e) applications F-80211 and F-80210, and Quitclaim Deed dated June 1, 1966;
Sec. 19, excluding Alaska Native Claims Settlement Act Sec. 3(e) application F-80211;
Secs. 20 to 36, inclusive.
Containing approximately 21,533 acres.

T. 25 N., R. 18 W.
Secs. 12, 13, and 19;
Secs. 23 to 26, inclusive;
Sec. 27, excluding Native allotment F-17746 Parcel A;
Secs. 30 to 33, inclusive;
Sec. 34, excluding Native allotment F-17746 Parcel A;
Secs. 35 and 36.
Containing approximately 6,946 acres.

T. 24 N., R. 19 W.
Secs. 1 to 4, inclusive;
Secs. 9 to 15, inclusive;
Sec. 16, excluding Native allotments F-17648 and F-14352;
Sec. 17, excluding Native allotment F-14352;
Secs. 18 and 19;
Secs. 20 and 21, excluding Native allotment F-14352;
Secs. 22 and 23;
Sec. 24, excluding Alaska Native Claims Settlement Act Sec. 3(e) application F-80211;
Secs. 28 to 33, inclusive.
Containing approximately 15,105 acres.

T. 23 N., R. 20 W.
Secs. 1 and 12.
Containing 1,280 acres.

T. 24 N., R. 20 W.
Secs. 13 and 24.
Containing 1,280 acres.
Aggregating approximately 65,208 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the

ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F–19328–EE.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reasons: Lands are no longer under Federal jurisdiction, land are under applications pending further adjudication, or lands are pending a determination under Sec. 3(e) of ANCSA. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States.

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(f)), as amended; and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), as amended, the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–19328–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail —The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (ATV's) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail —The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snow-mobile, two- and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, and four-wheel drive vehicles.

One Acre Site —The uses allowed for a site easement are: vehicle parking (e.g., aircraft, boats, ATV's snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 1 C3, C5, D9, L) An easement fifty (50) feet in width for an existing access trail from Evansville in Sec. 8, T. 24 N., R. 18 W., Fairbanks Meridian, northwesterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement, except vehicles over 3,000 lbs. gross vehicle weight will be limited to winter use only.

b. (EIN 2 C1, C5, D9) An easement twenty-five (25) feet in width for an existing and proposed access trail from Evansville in Sec. 8, T. 24 N., R. 18 W., Fairbanks Meridian, southwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. Vehicle use will be limited to winter only.

c. (EIN 4 C3, C5, L) An easement fifty (50) feet in width for an existing access trail from Evansville in Sec. 8, T. 24 N., R. 18 W., Fairbanks Meridian, southeasterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

d. (EIN 6 C3, C5, L) An easement twenty-five (25) feet in width for a proposed access trail from Sec. 36, T. 24 N., R. 19 W., Fairanks Meridian, southeasterly to public lands in Sec. 6, T. 23 N., R. 18 W., Fairbanks Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

e. (EIN 19 C5, D9) A one (1) acre site easement upland of the ordinary high water mark in Sec. 10, T. 24 N., R. 19 W., Fairbanks Meridian, at the confluence of the John River and Koyukuk River, on the right bank of the Koyukuk River and the right bank of the John River. The uses allowed are those listed above for a one (1) acre site.

f. (EIN 37 C5) An easement twenty-five (25) feet in width for a proposed access trail from trail EIN 4 C3, C5, L in Sec. 29, T. 24 N., R. 17 W., Fairbanks Meridian, southwesterly to public lands. The uses allowed are those lister above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official supplemental plat of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(c)), as amended, that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

A special use permit, YF–5–82, was issued to U.S. Geological Survey by U.S. Fish and Wildlife Service authorizing the use of helicopters within the Kanuti National Wildlife Refuge. As this permit expires October 1, 1982, this conveyance document will not be made subject to the permit.

Evansville, Inc., is entitled to conveyance of 69,120 acres of land selected pursuant to Sec. 12(a) of ANCSA, as amended. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 65,208 acres. The remaining entitlement of approximately 3,912 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate shall be issued to Doyon, Limited, when the surface estate is conveyed to Evansville, Inc., and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop, or remove mineral materials from the subsurface estate in lands within the boundaries of the Native village of Evansville shall be subject to the consent of Evansville, Inc.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Tundra Times.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43, Code of Federal Regulations (CFR), Part 4,

Subpart E, as revised. However, pursuant to Public Law 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Evansville, Inc., Evansville, Alaska 99725
Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701
State of Alaska, Department of Natural Resources, Division of Research and Development, Pouch 7–005, Anchorage, Alaska 99510

BILLING CODE 4310-84-M

[F–14863–A, F–14863–B]

Alaska Native Claims Selection

On October 1, 1974, and December 16, 1974, Hee-yea-lingde Corporation filed selection applications F–14863–A and F–14863–B, respectively, under the provisions of Sec. 12 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976)) (ANSCA), as amended, for the surface estate of certain lands in the vicinity of Grayling.

As to the lands described below, the applications are properly filed and meet the requirements of ANSCA, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, aggregating approximately 84,112 acres, is considered proper for acquisition by Hee-yea-lingde Corporation, and is hereby approved for conveyance pursuant to Sec. 14(a) of ANSCA.

U.S. Survey No. 4258, Alaska, situated on the right bank of the Yukon River approximately one mile south of Grayling, Alaska.
Containing 40.21 acres.

Kateel River Meridian, Alaska (Surveyed)

T. 29 S., R. 6 W.
Sec. 2.
Containing 562.16 acres.
T. 29 S., R. 7 W.
Secs. 3 to 6, inclusive.
Containing 2,249.38 acres.

Seward Meridian, Alaska (Surveyed)

T. 34 N., R. 55 W.
Sec. 31.
Containing 595.43 acres.
T. 33 N., R. 56 W.
Secs. 1 to 5, inclusive;
Sec. 6, excluding Native allotments F–15478 Parcel B, F–027928, Parcel B, F–15476 Parcel D, and F–14996 Parcel B;
Secs. 13, 14, and 15;
Sec. 16, excluding Native allotment F–13004;
Secs. 21 to 28, inclusive;
Secs. 32 to 36, inclusive.
Containing approximately 14,184 acres.
T. 34 N., R. 56 W.
Sec. 31, excluding Native allotment F–15478 Parcel B;
Secs. 32 to 36, inclusive.
Containing approximately 2,868 acres.
T. 32 N., R. 57 W.
Secs. 1 to 36, inclusive.
Containing approximately 21,701 acres.
T. 33 N., R. 57 W.
Sec. 1, excluding Native allotment F–14996 Parcel B;
Secs. 2 to 7, inclusive;
Sec. 8, excluding Native allotment F–13862;
Secs. 9 to 21, inclusive;
Secs. 22 and 23, excluding U.S. Survey No. 6588 and Native allotments, F–548 and F–385 Parcel B;
Secs. 24 and 25;
Sec. 26, excluding U.S. Survey No. 6588 and native allotments F–548 and F–385 Parcel A;
Sec. 27, excluding U.S. Survey No. 5384, U.S. Survey No. 6588, U.S. Survey No. 4226, and Native allotments F–548, F–027929 Parcel B, and F–385 Parcel A;
Sec. 28, excluding Native allotments F–14996 Parcel A and F–13863 Parcel B;
Secs. 29 to 33, inclusive;
Sec. 34, excluding U.S. Survey No. 4226, U.S. Survey No. 4268 (Alaska Native Claims Settlement Act Sec. 3(e) application AA–18103), and Native allotments F–030465 and F–15279 Parcel B;
Secs. 35 and 36.
Containing approximately 20,466 acres.
T. 34 N., R. 57 W.
Secs. 34, 35, and 36.
Containing 1,821.12 acres.
T. 32 N., R. 58 W.
Sec. 1, excluding U.S. Survey No. 4122, U.S. Survey No. 4258, U.S. Survey No. 4226, and Native allotments F–15279 Parcel B and F–030465;
Secs. 2 to 34, inclusive;
Secs. 35 and 36, excluding U.S. Survey No. 6609 (Native allotment F–15789 Parcel B).
Containing approximately 19,825 acres.
Aggregating approximately 84,072 acres.
Total aggregated acreage, approximately 84,112 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F–14863–EE.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reasons: Lands are no longer under Federal jurisdiction; lands are under applications pending further adjudication; or lands are pending a determination under Sec. 3(e) of ANCSA. Lands within U.S. Surveys which are excluded are described separately in this decision if they are available for conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above

shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(f)), as amended; and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), as amended, the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–14863–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

a. (EIN 8 D1) An easement, twenty-five (25) feet in width, for an existing access trail from Grayling in Sec. 34, T. 33 N., R. 57 W., and Sec. 1, T. 32 N., R. 58 W., Seward Meridian, southeasterly to public land. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. The season of use will be limited to winter.

b. (EIN 34a C5) An easement, twenty-five (25) feet in width, for a proposed access trail from H Street at the north townsite boundary of Grayling in Sec. 27, T. 33 N., R. 57 W., Seward Meridian, westerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official supplemental plat of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement,and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Airport Lease, F–998, located in U.S. Survey No. 4258, within T. 32 N., R. 58 W., Seward Meridian, Alaska, issued to the State of Alaska, Division of Aviation, under the provisions of the act of May 24, 1928 (49 U.S.C. 211–214), as amended; and

4. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(c)), as amended, that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

Hee-yea-lingde Corporation is entitled to conveyance of 92,160 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 84,112 acres. The remaining entitlement of approximately 8,048 acres will be conveyed at a later date.

Pursuant of Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate shall be issued to Doyon, Limited when the surface estate is conveyed to Hee-yea-lingde Corporation, and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop, or remove mineral materials from the subsurface estate in lands within the boundaries of the Native village of Grayling shall be subject to the consent of Hee-yea-lingde Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Tundra Times.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office; Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 20 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 702 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Hee-yea-lingde Corporation, Grayling, Alaska 99590

Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[F–14897–A, F–14897–B, and F–14897–C]

Alaska Native Claims Selection

On October 8, 1974, and December 4, 1974, Seth-de-ya-ah Corporation filed selection applications F–14897–A, F–14897–B, and F–14897–C, all as amended, under the provision of Sec. 12 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611) (1976) (ANCSA) as amended for the surface estate of certain lands in the vicinity of Minto.

As to the lands described below, the village selection applications, as amended, are properly filed and meet

the requirements of ANCSA, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, as amended, aggregating approximately 108,398 acres, is considered proper for acquisition by Seth-de-ya-ah Corporation and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA.

U.S. Survey No. 4450B, Alaska, located on the north shore of an unnamed lake on Minto Flats approximately 21 miles north of Minto, Alaska, that portion lying within protracted Sec. 8, T. 4 N., R. 8 W., Fairbanks Meridian.

Containing approximately 20 acres.

U.S. Survey No. 4451A, Alaska, located on the left bank of the Tolovana River approximately 12 miles northwest of Minto, Alaska, that portion lying within protracted Secs. 26 and 27, T. 3 N., R. 9 W., Fairbanks Meridian.

Containing approximately 76 acres.

U.S. Survey No. 5606, Alaska, located on the north shore of an island in an unnamed lake at the northern limits of Minto Flats approximately 21 miles north of Minto, Alaska.

Containing 0.29 acres.

Aggregating approximately 96 acres.

Fairbanks Meridian, Alaska (Surveyed)

T. 3 N., R. 7 W.

Those portions of Tract A more particularly described as (protracted):
Secs. 4 to 7, inclusive;
Secs. 8 and 9, excluding Native allotment F-027064;
Sec. 17, excluding Native allotments F-17168 Parcel A and F-027064;
Sec. 18;
Sec. 19, excluding U.S. Survey No. 4137A (Native allotment F-027069 Parcel 1) and Native allotment F-027119 Parcel D;
Sec. 20, excluding U.S. Survey No. 4137A (Native allotment F-027069 Parcel 1) and Native allotment F-16277 Parcel B.

Containing approximately 5,853 acres.

T. 3 N., R. 8 W.

Those portions of surveyed township more particularly described as (protracted):
Sec. 2;
Sec. 3, excluding Native allotment F-15471 Parcel A;
Sec. 4;
Secs. 11, 12, 13, and 24.

Containing approximately 4,300 acres.

T. 4 N., R. 8 W.

Those portions of Tract A more particularly described as (protracted):
Sec. 7;
Sec. 8, excluding U.S. Survey No. 4450B and U.S. Survey No. 5606;
Sec. 9;
Sec. 10, excluding U.S. Survey No. 4455C;
Secs. 17 to 21, inclusive;
Secs. 28, 29, and 32;
Secs. 33 and 34, excluding Native allotment F-15471 Parcel A.

Containing approximately 7,363 acres.

T. 3 N., R. 9 W.

Those portions of Tract A more particularly described as (protracted):
Sec. 2, excluding U.S. Survey No. 4460A (Native allotment F-034705 Tract 1);
Sec. 3, excluding Native allotment F-18786;
Sec. 4, excluding Native allotments F-027062 Parcel C, F-027122 Parcel D, and F-18786;
Secs. 5 and 6;
Sec. 7, excluding Native allotment F-13524;
Sec. 8;
Sec. 9, excluding U.S. Survey No. 4467B (Native allotment F-034712 Parcel B);
Sec. 10;
Sec. 11, excluding U.S. Survey No. 4220B (Native allotment F-027062 Parcel B) and U.S. Survey No. 4449A;
Sec. 12, excluding U.S. Survey No. 4220B (Native allotment F-027062 Parcel B);
Sec. 13, excluding U.S. Survey No. 4220B (Native allotment F-027062 Parcel B) and U.S. Survey No. 4455B;
Sec. 14, excluding U.S. Survey No. 4220B (Native allotment F-027062 Parcel B), U.S. Survey No. 4455B, U.S. Survey No. 4449A, and U.S. Survey No. 4449B;
Secs. 15 to 20, inclusive;
Sec. 21, excluding U.S. Survey No. 4462A (Native allotment F-034707 Tract 1);
Sec. 22, excluding U.S. Survey No. 4454 (Native allotment F-034696 Parcel 1) and U.S. Survey No. 4462A (Native allotment F-034707 Tract 1);
Sec. 23, excluding U.S. Survey No. 4454 (Native allotment F-034696 Parcel 1);
Sec. 24;
Sec. 26, excluding U.S. Survey No. 4451A;
Sec. 27, excluding U.S. Survey No. 4451A, U.S. Survey No. 4454 (Native allotment F-034696 Parcel 1), and U.S. Survey No. 4462A (Native allotment F-034707 Tract 1);
Sec. 28, excluding U.S. Survey No. 4462A (Native allotment F-034707 Tract 1);
Sec. 29;
Sec. 30, excluding U.S. Survey No. 4453C and U.S. Survey No. 4457B (Native allotment F-034702 Tract 2);
Secs. 31 and 32.

Containing approximately 17,458 acres.

T. 4 N., R. 9 W.

Tract A, excluding:
U.S. Survey No. 4220A (Native allotment F-027062 Parcel 1), U.S. Survey No. 4444A (Native allotment F-027061 Parcel A), U.S. Survey No. 4455D, U.S. Survey No. 4469, U.S. Survey No. 5014, and Native allotments F-034697 Parcel D, F-034714 Parcel A and Tract 2, F-14538, F-16317 and F-18786.

Containing approximately 20,035 acres.

T. 5 N., R. 9 W.

Those portions of surveyed township more particularly described as (protracted):
Secs. 19 and 30

Containing approximately 1,272 acres.

T. 3 N., R. 10 W.

Those portions of Tract A more particularly described as (protracted):
Sec. 11, excluding U.S. Survey No. 4462B (Native allotment F-034707 Parcel 2);
Sec. 12, excluding U.S. Survey No. 4184, U.S. Survey No. 4462B (Native allotment F-034707 Parcel 2), and Native allotments F-13524 and F-027066;
Secs. 13 and 14.

Containing approximately 2,315 acres.

T. 4 N., R. 10 W.

Those portions of surveyed township more particularly described as (protracted):
Sec. 2;
Secs. 11 to 14, inclusive;
Sec. 24.

Containing approximately 3,840 acres.

Fairbanks Meridian, Alaska (Unsurveyed)

T. 6 N., R. 7 W.
Secs. 1 to 4, inclusive;
Secs. 9 to 16, inclusive;
Sec. 17, excluding those lands within Material Site right-of-way F-025506;
Secs. 18 to 24, inclusive;
Secs. 27, 28, and 29;
Sec. 30, excluding those lands within Material Site right-of-way F-025509;
Secs. 31 to 34, inclusive.

Containing approximately 17,836 acres.

T. 6 N., R. 9 W.
Secs. 1 to 36, inclusive.

Containing approximately 22,926 acres.

T. 5 N., R. 10 W.
Sec. 25;
Sec. 26, excluding those lands within Material Site right-of-way F-025521;
Secs. 31 and 32, excluding those lands within Material Site right-of-way F-025524;
Sec. 33, excluding those lands within Material Site right-of-way F-025522;
Sec. 34;
Sec. 35, excluding those lands within Material Site right-of-way F-025521;
Sec. 36.

Containing approximately 5,104 acres.

Aggregating approximately 108,302 acres.

Total aggregated acreage, approximately 108,398 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F-14897-ER.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be non-navigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reasons: Lands are no longer under Federal jurisdiction, lands are under

applications pending further adjudication, or lands are within material site rights-of-way that have not had a validity determination made on them. Lands within U.S. Surveys which are excluded are described separately in this decision if they are available for conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(f)), as amended; and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), as amended, the following public easements, referenced by easement identification number (EIN) on the easement map attached to this document, a copy of which will be found in case file F–14897–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, and four-wheel drive vehicles.

60 Foot Road—The uses allowed on a sixty (60) foot wide road easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

One Acre Site—The uses allowed for a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 21 D1, L) An easement sixty (60) feet in width for an existing road from the Elliott Highway beginning in Sec. 6, T. 5 N., R. 8 W., Fairbanks Meridian, northerly, then westerly to public land and resources. The uses allowed are those listed for a sixty (60) foot wide road easement.

b. (EIN 21a C4, C5, E) An easement fifty (50) feet in width for a proposed access trail from road easement EIN 21 D1, L in Sec. 1, T. 6 N., R. 9 W., Fairbanks Meridian, northerly to public land and resources. The uses allowed are those listed for a fifty (50) foot wide trail easement.

c. (EIN 21f C4) A one (1) acre site easement adjacent to road easement EIN 21 D1, L in Sec. 1, T. 6 N., R. 9 W., Fairbanks Meridian. The uses allowed are those listed for a one (1) acre site.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat, or supplemental plat, of survey confirming the boundary description and acreage of lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6 (g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613(c)), as amended, that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section;

4. Airport lease, F–21416, located in protracted Secs. 22, 27, and 28, T. 4 N., R. 9 W., Fairbanks Meridian, issued to the State of Alaska, Department of Transportation and Public Facilities, under the provisions of the act of May 24, 1928, as amended (49 U.S.C. 211–214);

5. A right-of-way, F–19404, located in protracted Secs. 18, 19, 20, 21, 27, and 28, T. 4 N., R. 9 W., Fairbanks Meridian; protracted Secs. 2, 11, 13, and 14, T. 4 N., R. 10 W., Fairbanks Meridian; and Secs. 35 and 36, T. 5 N., R. 10 W., Fairbanks Meridian, for a Federal Aid Highway. Act of August 27, 1958 (23 U.S.C. 317); and

6. Any right-of-way interest in the Elliott Highway (FAS Route No. 680) transferred to the State of Alaska by the quitclaim deed dated June 30, 1959, executed by the Secretary of Commerce under the authority of the Alaska Omnibus Act, Public Law 86–70 (73 Stat. 141) as to Secs. 2, 9, 10, 11, 16, 17, 19, 20, and 30, T. 6 N., R. 7 W.; protracted Sec. 19, T. 5 N., R. 9 W. and Secs. 25, 26, 31, 32, 33, 34, and 35, T. 5 N., R. 10 W., Fairbanks Meridian.

School site lease, F–24226, as amended, located within U.S. Survey No. 4469, U.S. Survey No. 4455D, and protracted Secs. 22 and 27, T. 4 N., R. 9 W., Fairbanks Meridian, Alaska, was granted to the State of Alaska, pursuant to and subject to the terms and conditions of Sec. 302 of the Federal Land Policy and Management Act of 1976, Pub. L. 94–579 of October 21, 1976 (90 Stat. 2743) and the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. Sec. 1622(i)). According to the terms of the lease, it is to terminate upon conveyance of title of said lands out of United States ownership. That portion of the lease outside of U.S. Survey No. 4469 and U.S. Survey No. 4455D will terminate upon conveyance of those lands approved for conveyance in this decision.

Seth-de-ya-ah Corporation is entitled to conveyance of 115,200 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 108,398 acres. The remaining entitlement of approximately 6,802 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate shall be issued to Doyon, Limited when the surface estate is conveyed to Seth-de-ya-ah Corporation, and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop, or remove mineral materials from the subsurface estate in lands within the boundaries of the Native village of Minto shall be subject to the consent of Seth-de-ya-ah Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Fairbanks Daily News-Miner.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land

Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

State of Alaska, Department of Natural Resources, Division of Research and Development, Pouch 7–005, Anchorage, Alaska 99510
Seth-de-ya-ah Corporation, P.O. Box 849, Fairbanks, Alaska 99701

Alaska Native Claims Selection

On November 18, 1974, Georgetown Incorporated, for the Native village of Georgetown, filed selection application F–14880–A, as amended, under the provisions of Sec. 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1611 (1976) (ANCSA), for the surface estate of certain lands in the vicinity of Georgetown.

On April 25, 1977, in accordance with Title 10, Chapter 05, Secs. 396 and 399 of the Alaska Business Corporation Act, and as authorized by 43 U.S.C. 1627, Georgetown Incorporated, a domestic corporation, merged with Aniak Limited, Chuathbaluk Company, Kipchaughpuk Limited, Lower Kalskag Incorporated, Napamute Limited, Red Devil Incorporated, Sleetmute Limited, Stony River Ltd., amd Upper Kalskag Incorporated, all domestic corporations, into Georgetown Incorporated, which consolidated individual village interests into one single constituent corporation whose name was changed to The Kuskokwim Corporation. The surviving corporation, The Kuskokwim Corporation, is entitled to all rights, privileges, and benefits of the Alaska Native Claims Settlement Act.

As to the lands described below, selection application F–14880–A, as amended, is properly filed and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, aggregating approximately 62,128 acres, is considered proper for acquisition by The Kuskokwim Corporation (for the village of Georgetown) and is hereby approved for conveyance pursuant to Sec. 14(a) of ANSA:

Seward Meridian, Alaska (Surveyed)

T. 22 N., R. 44 W.,
Secs. 5, 6 and 7;
Sec. 18, excluding Native allotment F–18017;
Sec. 19.
Containing approximately 3,048 acres.
T. 23 N., R. 44 W.,
Sec. 31.
Containing approximately 617 acres.
T. 22 N., R. 45 W.,
Secs. 1 to 12, inclusive;
Sec. 13, excluding Native allotment F–18017;
Sec. 14, excluding Native allotment F–991 Parcel B;
Secs. 15 to 22, inclusive;
Sec. 23, excluding Native allotment F–991 Parcel B;
Sec. 24.
Containing approximately 15,123 acres.
T. 23 N., R. 45 W.,
Secs. 20 and 21;
Secs. 28 to 33, inclusive.
Containing approximately 5,073 acres.
T. 20 N., R. 46 W.,
Secs. 2, 3 and 4;
Secs. 7 to 10, inclusive;
Sec. 11, excluding Native allotment F–13973 Parcel B;
Secs. 12, 13 and 14;
Secs. 17, 19 and 20;
Sec. 24.
Containing approximately 8,575 acres.
T. 21 N., R. 46 W.,
Secs. 1, 2 and 3;
Secs. 5 to 20, inclusive;
Sec. 21, excluding Native allotment F–9876;
Sec. 22, excluding Native allotment F–14566 Parcel A;
Secs. 23 to 36, inclusive.
Containing approximately 20,770 acres.
T. 22 N., R. 46 W.,
Secs. 1;
Secs. 12 to 16, inclusive;
Secs. 31, 32 and 34.
Containing approximately 5,662 acres.
T. 23 N., R. 46 W.,
Sec. 36.
Containing approximately 640 acres.
T. 21 N., R. 47 W.,
Secs. 23 to 27, inclusive.
Containing approximately 2,620 acres.
Aggregating approximately 62,128 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. The following named water bodies, together with any unnamed water bodies, are identified on the attached navigability maps, the original of which will be found in easement case file F–14880–EE.

Kuskokwim River
George River
East Fork George River

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for one or more of the following reasons: Lands are no longer under Federal jurisdiction; lands are under applications pending further adjudication; lands are pending a determination under Sec. 3(e) of ANCSA; or lands were previously rejected by decision.

Lands within U.S. Surveys which are excluded are described separately in this decision if they are available for

conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(f); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–14880–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (ATVs) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, small and large all terrain vehicles, track vehicles and four-wheel drive vehicles.

One Acre Site—The uses allowed on a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATVs, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 3 C3) An easement fifty (50) feet in width for an existing access trail from public land in Sec. 25, T. 22 N., R. 45 W., Seward Meridian, northwesterly along the South Fork George River, thence northeasterly paralleling the East Fork George River to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

b. (EIN 4 D1) A one (1) acre site easement upland of the ordinary high water mark in Sec. 26, T. 21 N., R. 46 W., Seward Meridian, on the right bank of the Kuskokwim River at the mouth of California Creek. The uses allowed are those listed above for a one (1) acre site easement.

c. (EIN 4a D1) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 4 in Sec. 26, T. 21 N., R. 46 W., Seward Meridian, northeasterly, paralleling the left bank of California Creek to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

d. (EIN 7 C4) A one (1) acre site easement upland of the ordinary high water mark in Sec. 10, T. 20 N., R. 46 W., Seward Meridian, on the left bank of the Kuskokwim River. The uses allowed are those listed above for a one (1) acre site easement.

e. (EIN 7a C4) An easement fifty (50) feet in width for a proposed access trail from site EIN 7 C4 in Sec. 10, T. 20 N., R. 46 W., Seward Meridian, southwesterly to public land. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

f. (EIN 10 C4) Rangel BillA one (1) acre site easement, upland of the ordinary high water mark, in Sec. 20, T. 21 N., R. 46 W., Seward Meridian, on the right bank of the Kuskokwim River at the mouth of Steamboat Creek. The uses allowed are those listed above for a one (1) acre site easement.

g. (EIN 10a C4) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 10 C4 located in Sec. 20, T. 21 N., R. 46 W., Seward Meridian, on the Kuskokwim River, northwesterly, paralleling Steamboat Creek to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

h. (EIN 11 C4) A one (1) acre site easement upland of the ordinary high water mark, in Sec. 1, T. 22 N., R. 46 W., Seward Meridian, on the right bank of the George River. The uses allowed are those listed above for a one (1) acre site easement.

i. (EIN 11a C4) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 11 in Sec. 1, T. 22 N., R. 46 W., Seward Meridian, northwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official supplemental plat of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by anly lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958, 48 U.S.C. Ch. 2, Sec. 6(g)), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b)(2) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(c), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

The Kuskokwim Corporation (for the village of Georgetown) is entitled to conveyance of 69,120 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 62,128 acres. The remaining entitlement of approximately 6,992 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate of the lands described above shall be issued to Calista Corporation when the surface estate is conveyed to The Kuskokwim Corporation (for the village of Georgetown), and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop or remove mineral materials from the subsurface estate in lands within the boundaries of the Native Village shall be subject to the consent of The Kuskokwim Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in The Tundra Drums.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances, (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 510 L Street, Suite 100, Anchorage, Alaska 99501.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If the appeal is taken, the parties to be served with a copy of the notice of appeal are:

The Kuskokwim Corporation, 429 D Street, Suite 307, Anchorage, Alaska 99501

Calista Corporation, 516 Denali Street, Anchorage, Alaska 99501

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[F-19155-13]

Alaska Native Claims Selection

On April 2, 1975, Doyon, Limited, filed selection application F-19155-13, as amended, under the provisions of Sec. 12(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611(c) (1976)) (ANCSA), as amended, for the surface and subsurface estates of certain lands withdrawn pursuant to Sec. 11(a) for the Native village of Evansville.

As to the lands described below, the application, as amended, is properly filed and meets the requirements of ANCSA, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface and subsurface estates of the following described lands, selected pursuant to Sec. 12(c) of ANCSA, as amended, aggregating approximately 100,875 acres, are considered proper for acquisition by Doyon, Limited, and are hereby approved for conveyance pursuant to Sec. 14(e) of ANCSA.

Fairbanks Meridian, Alaska (Surveyed)

T. 26 N., R. 16 W.
Secs. 1 to 36, inclusive.
Containing approximately 21,979 acres.

T. 26 N., R. 17 W.
Secs. 1 to 25, inclusive;
Secs. 26 and 27, excluding Native allotment F-14353;
Secs. 28 to 33, inclusive;
Secs. 34 and 35, excluding Native allotment F-14355;
Sec. 36.
Containing approximately 22,528 acres.

T. 25 N., R. 17 W.
Sec. 6;
Secs. 11 to 15, inclusive;
Secs. 21 to 28, inclusive;
Secs. 31 to 36, inclusive;
Containing 12,706.40 acres.

T. 22 N., R. 18 W.
Secs. 1 to 36, inclusive.
Containing approximately 22,665 acres.

T. 26 N., R. 18 W.
Secs. 1 to 36, inclusive.
Containing approximately 22,658 acres.

T. 23 N., R. 19 W.
Secs. 1 to 18, inclusive;
Sec. 19, excluding Native allotment F-17950;
Secs. 20 to 36, inclusive.
Containing approximately 21,750 acres.

T. 25 N., R. 19 W.
Secs. 1 to 23, inclusive;
Sec. 24, excluding Native allotment F-17746 Parcel B;
Secs. 25 to 36 inclusive.
Containing approximately 22,091 acres.

T. 22 N., R. 20 W.
Secs. 1 to 36, inclusive.
Containing 22,919.28 acres.

T. 24 N., R. 20 W.
Secs. 1 to 12, inclusive;
Secs. 14 to 23, inclusive;
Secs. 25 to 36, inclusive.
Containing 21,478.24 acres.
Aggregating approximately 100,875 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identifed on the attached navigability maps, the original of which will be found in easement case file F-21779-13.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be non-navigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for the following reason: Lands are under applications pending further adjudication. These exclusions do not constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface and subsurface estates of the lands described above shall contain the following reservation to the United States:

Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616 (b)), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-21779-13, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (ATV's) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

50 Foot Trail—The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, and four-wheel drive vehicles.

One Acre Site—The uses allowed for a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

a. (EIN 1 C3, C5, D3, L) An easement fifty (50) feet in width for an existing access trail from Evansville in Sec. 8, T. 24 N., R. 16 W., Fairbanks Meridian, northwesterly to public lands. The uses

allowed are those listed above for a fifty (50) foot wide trail easement, except vehicles over 3,000 lbs. gross vehicle weight will be limited to winter use only.

b. (EIN 2 C1, C5, D9) An easement twenty-five (25) feet in width for an existing and proposed access trail from Evansville in Sec. 8, T. 24 N., R. 18 W., Fairbanks Meridian, southwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement. Vehicle use will be limited to winter only.

c. (EIN 4 C3, C5, L) An easement fifty (5) feet in width for an existing access trail from Evansville in Sec. 8, T. 24 N., R. 18 W., Fairbanks Meridian, southeasterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

d. (EIN 9 L) An easement twenty-five (25) feet in width for a proposed access trail from site easement EIN 9a C4 on the John River in Sec. 34, T. 25 N., R. 19 W., Fairbanks Meridian, southerly to isolated public land in Secs. 5, 6, 7, and 8, T. 24 N., R. 19 W., Fairbanks Meridian; thence northwesterly to isolated public land in T. 25 N., R. 20 W., Fairbanks Meridian. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

e. (EIN 9a C4) An easement for a one (1) acre site easement upland of the ordinary high water mark in Sec. 34, T. 25 N., R. 19 W., Fairbanks Meridian, on the right bank of the John River. The uses allowed are those listed above for a one (1) acre site easement.

f. (EIN 22 C5) An easement twenty-five (25) feet in width for a proposed access trail from public lands in Sec. 6, T. 22 N., R. 19 W., Fairbanks Meridian, northwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

g. (EIN 23 C5) An easement twenty-five (25) feet in width for a proposed access trail from public lands in Sec. 1, T. 22 N., R. 19 W., Fairbanks Meridian, northeasterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

h. (EIN 34 C5) An easement fifty (50) feet in width for a proposed access trail from trail EIN 1 C3, C5, D9, L in Sec. 6, T. 25 N., R. 18 W., Fairbanks Meridian, northwesterly to public lands. The uses allowed are those listed above for a fifty (50) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official supplemental plat of survey confirming the boundary description and acreage of the lands hereinabove granted; and

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law.

A special use permit, YF–5–82, was issued to U.S. Geological Survey by the U.S. Fish and Wildlife Service authorizing the use of helicopters within the Kanuti National Wildlife Refuge. As this permit expires October 1, 1982, this conveyance document will not be made subject to the permit.

To date, approximately 4,230,348 acres of land, selected pursuant to Sec. 12(c) of ANCSA, as amended, have been approved for conveyance to Doyon, Limited.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Tundra Times.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Mangement, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the requlations governing such appeals. Further information on the manner of and requirement for filing an appeal may be obtained from the Bureau Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

State of Alaska, Department of Natural Resources, Division of Research and Development, Pouch 7–005, Anchorage, Alaska 99510

Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310–84–M

[F–14888–A]

Alaska Native Claims Selection

On November 18, 1974, Lower Kalskag, Incorporated, for the Native village of Lower Kalskag, filed selection application F–14888–A, as amended, under the provisions of Sec. 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1611 (1976) (ANCSA), for the surface estate of certain lands in the vicinity of Lower Kalskag, Alaska.

Lower Kalskag, Incorporated in application F–14888–A excluded several bodies of water. Because certain of those water bodies have been determined to be nonnavigable, they are considered to be public lands withdrawn by Sec. 11(a)(1) of ANCSA and available for selection by the village pursuant to Sec. 12(a) of ANCSA. Section 12(a) and 43 CFR 2651.4 (b) and (c) provide that a village corporation must, to the extent necessary to obtain its entitlement, select all available lands

within the township or townships within which the village is located, and that additional lands selection shall be compact and *in Whole Sections*. The regulations also provide that the area selected will not be considered to be reasonably compact if it excludes other lands available for selection within its exterior boundaries. For these reasons, the water bodies which were improperly excluded in application F–14888–A are considered selected by Lower Kalskag, Incorporated.

On April 25, 1977, in accordance with Title 10, Chapter 05, Secs. 396 and 399 of the Alaska Business Corporation Act, and as authorized by 43 U.S.C. 1627, Georgetown Inc., a domestic corporation, merged with Aniak Limited, Chuathbaluk Company, Kipchaughpuk Limited, Lower Kalskag Incorporated, Napamute Limited, Red Devil Incorporated, Sleetmute Limited, Stony River Ltd., and Upper Kalskag, Incorporated, all domestic corporations, into Georgetown Incorporated, which consolidated individual village interests into one single constituent corporation whose name was changed to The Kuskokwim Corporation. The surviving corporation, The Kuskokwim Corporation, is entitled to all rights, privileges, and benefits of the Alaska Native Claims Settlement Act.

As to the lands described below, selection application F–14888–A, as amended, is properly filed and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA, aggregating approximately 84,596 acres, is considered proper for acquisition by The Kuskokwim Corporation (for the village of Lower Kalskag), and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA:

Seward Meridian, Alaska (Surveyed)

T. 14 N., R. 61 W.
Secs. 1 and 2;
Sec. 11, excluding Native allotments F–15679 and F–15680;
Sec. 12, excluding Native allotment F–15680;
Secs. 13 and 14;
Sec. 23, excluding Native allotment F–17303 Parcel A;

T. 16 N., R. 60 W.
Sec. 31, excluding Native allotment F–15652;
Secs. 32, 33, and 34, inclusive.
Containing approximately 2,397 acres.
Aggregating approximately 84,596 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. The following named water bodies, together with any unnamed water bodies, are identified on the attached navigability maps, the original of which will be found in case file F–14888–EE.

The Kuskikwim River
Mud Creek
Whitefish Lake
Israthorak Creek

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for one or more of the following reasons: Lands are no longer under Federal jurisdiction; lands are under applications pending further adjudication; lands are pending a determination under Sec. 3(e) of ANCSA; or lands were previously rejected by decision. Lands within U.S. Surveys which are excluded are described separately in this decision if they are available for conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so states.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 6113(f); and

Pursuant to Sec. 17(b) of the Alaska Native Claims Setlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b), the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–14888–EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

(EIN 7 D9) An easement twenty-five (25) in width for an existing access trail from the village of Aniak southwesterly to the village of Tuluksak. The uses allowed are those listed for a twenty-five (25) foot wide trail easement. The season of use will be limited to winter.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat, or supplemental plat, of survey confirming the boundary description and acreage of the lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958, 48 U.S.C. Ch. 2, Sec. 6(g)), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b)(2) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as in now provided for under existing law; and

3. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(c), that the grantee hereunder convey those portions, if any, of the lands herinabove granted, as are prescribed in said section.

The Kuskokwim Corporation (for the village of Lower Kalskag) is entitled to conveyance of 92,160 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is approximately 84,596 acres. The remaining entitlement of approximately 7,564 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate of the lands described above shall be issued to Calista Corporation when the surface estate is conveyed to The Kuskokwim Corporation, (for the village of Lower Kalskag), and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop or remove mineral materials from the subsurface estate in lands within the boundaries of the Native Village shall be subject to the consent of The Kuskokwim Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in The Tundra Drums

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage,Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 510 L Street, Suite 100, Anchorage, Alaska 99501.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

The Kuskokwim Corporation, 429 D Street, Room 307, Anchorage, Alaska 99501

Calista Corporation, 516 Denali Street, Anchorage, Alaska 99501

State of Alaska, Department of Natural Resources, Division of Research and Development, Pouch 7–005, Anchorage, Alaska 99510

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[F-14926-A]

Alaska Native Claims Selection

On November 18, 1974, the Chuathbaluk Company, for the Native village of Russian Mission (Kuskokwim), filed selection application F-14926-A, as amended, under the provisions of Sec. 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1611 (1976) (ANCSA), for the surface estate of certain lands in the vicinity of Russian Mission.

On April 25, 1977, in accordance with Title 10, Chapter 05, Secs. 396 and 399 of the Alaska Business Corporation Act, and as authorized by 43 U.S.C. 1627, Georgetown, Incorporated, a domestic corporation, merged with Aniak Limited, Chuathbaluk Company, Kipchaughpuk Limited, Lower Kalskag Incorporated, Napamute Limited, Red Devil Incorporated, Sleetmute Limited, Stony River Ltd., and Upper Kalskag Incorporated, all domestic corporations, into Georgetown Incorporated, and formed a new corporation which consolidated individual village interests into one single constituent corporation whose name was changed to The Kuskokwim Corporation. The surviving corporation, The Kuskokwim Corporation, is entitled to all rights, privileges, and benefits of the Alaska Native Claims Settlement Act.

As to the lands described below, selection application F-14926-A, as amended, is properly filed and meets the requirements of the Alaska Native Claims Settlement Act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, selected pursuant to Sec. 12(a) of ANCSA aggregating approximately 81,656 acres, is considered proper for acquisition by The Kuskokwim Corporation (for the village of Russian Mission), and is hereby approved for conveyance pursuant to Sec. 14(a) of ANCSA.

Seward Meridian, Alaska (Unsurveyed)

T. 18 N., R. 53 W.
Secs. 5, 8, 17 and 19;
Secs. 20, 30 and 31.
Containing approximately 4,440 acres.

T. 19 N., R. 53 W.
Secs. 21, 28, 32 and 33.
Containing approximately 2,560 acres.

T. 17 N., R. 54 W.

Secs. 6, 7, 18 and 19;
Secs. 30, 31, 34 and 35.
Containing approximately 4,960 acres.

T. 17 N., R. 56 W.
Sec. 1, excluding Native allotment F-16089;
Sec. 2, excluding Native allotment F-18203;
Secs. 11 and 12.
Containing approximately 1,745 acres.

T. 18 N., R. 56 W.
Sec. 24, 25 and 26;
Sec. 35, excluding Native allotment F-18203;
Sec. 36.
Containing approximately 3,120 acres.
Aggregating approximately 81,656 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce.

The following named water bodies, together with any unnamed water bodies, are identified on the attached navigability maps, the original of which will be found in case file F-14926-EE:

Kuskokwim River
Owhat River
Doestock Creek

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded for one or more of the following reasons: Lands are no longer under Federal jurisdiction; lands are under applications pending further adjudication; lands are pending a determination under Sec. 3(e) of ANCSA; or lands were previously rejected by decision. Lands within U.S. surveys which are excluded are described separately in this decision if they are available for conveyance. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. The subsurface estate therein, and all rights, privileges, immunities and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(f); and

2. Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b), the following public easements referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F-14926-EE, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation.

The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

One Acre Site—The uses allowed on a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading or unloading shall be limited to 24 hours.

a. (EIN 2b C4, C5) An easement twenty-five (25) feet in width for a

proposed access trail from public land in Sec. 8, T. 18 N., R. 55 W., Seward Meridian, westerly to public land in Sec. 12, T. 18 N., R. 56 W., Seward Meridian. The uses allowed are those listed for a twenty-five (25) foot wide trail easement.

b. (EIN 10 C4, C5) An easement twenty-five (25) feet in width for a proposed access trail from public land in Sec. 29, T. 18 N., R. 53 W., Seward Meridian, northwesterly along Suter Creek to public land in Sec. 18, T. 18 N., R. 53 W., Seward Meridian. The uses allowed are those listed for a twenty-five (25) foot wide trail easement.

c. (EIN 11 C4 C5) A one (1) acre site easement upland of the ordinary high water mark in the NW¼, Sec. 16, T. 17 N., R. 54 W., Seward Meridian, on the left bank of the Kuskokwim River. The uses allowed are those listed for a one (1) acre site easement.

d. (EIN 11a C4, C5) An easement twenty-five (25) feet in width for a proposed access trail from site EIN 11 C4, C5 in the NW¼, Sec. 16, T. 17 N., R. 54 W., Seward Meridian, southeasterly to public land. The uses allowed are those listed for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat of survey confirming the boundary description and acreage of the unsurveyed lands hereinabove granted;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958, 48 U.S.C. Ch. 2, Sec. 6(g)), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1616(b)(2) (ANCSA), any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law;

3. Airport lease, AA–8094 Tracts I and II, containing approximately 107 acres, located in Secs. 3, 4 and 10, T. 17 N., R. 55 W., Seward Meridian, Alaska, issued to the State of Alaska, Department of Transportation and Public Facilities, under the provisions of the Act of May 24, 1928 (45 Stat. 728–729; 49 U.S.C. 211–214); and

4. Requirements of Sec. 14(c) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(c), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section.

The Kuskokwim Corporation (for the village of Russian Mission) is entitled to conveyance of 92,160 acres of land selected pursuant to Sec. 12(a) of ANCSA. Together with the lands herein approved, the total acreage conveyed or approved for conveyance is 81,656 acres. The remaining entitlement of approximately 10,504 acres will be conveyed at a later date.

Pursuant to Sec. 14(f) of ANCSA and Departmental regulation 43 CFR 2652.4, conveyance of the subsurface estate of the lands described above shall be issued to Calista Corporation when the surface estate is conveyed to The Kuskokwim Corporation (for the village of Russian Mission), and shall be subject to the same conditions as the surface conveyance, except for those provisions under Sec. 14(c) of ANCSA; also the right to explore, develop or remove mineral materials from the subsurface estate in lands within the boundaries of the Native village shall be subject to the consent of The Kuskokwim Corporation.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in The Tundra Drums.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final adminstrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

The Kuskokwim Corporation, 429 D Street, Suite 307, Anchorage, Alaska 99501

Calista Corporation, 416 Denali Street, Anchorage, Alaska 99501

State of Alaska, Department of Natural Resources, Division of Research and Development, Pouch 7–005, Anchorage, Alaska 99510

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310–84–M

[F–19155–4]

Alaska Native Claims Selection

On April 2, 1975, Doyon, Limited, filed selection application F–19155–4, as amended, under the provisions of sec. 12(c) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611(c) (1976)) (ANCSA), as amended, for the surface and subsurface estates of certain lands withdrawn pursuant to Sec. 11(a)(1) for the Native village of Birch Creek. The application excluded the following water bodies as being navigable:

Chloya Lake in Secs. 12, 13, and 24, T. 16 N., R. 8 E., Fairbanks Meridian;

Hat Lie Lake in Secs. 14, 15, 22, 23, 26, and 27 T. 16 N., R. 10 E., Fairbanks Meridian;

Unnamed lakes in Secs. 18, 19, 29, and 30, T. 16 N., R. 10 E., Fairbanks Meridian.

As these are considered nonnavigable and as Sec. 12(c)(3) of ANCSA and Departmental regulation 43 CFR

2652.3(c) require the region to select all available lands within the townships, the beds of these water bodies are considered selected.

As to the lands described below, the application, as amended, is properly filed and meets the requirements of ANCSA, as amended, and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leadings to acquisition of title.

In view of the foregoing, the surface and subsurface estates of the following described lands, selected pursuant to Sec. 12(c) of ANCSA, as amended, aggregrating approximately 201,748 acres, are considered proper for acquisition by Doyon, Limited, and are hereby approved for conveyance pursuant to Sec. 14(e) of ANCSA, as amended:

Fairbanks Meridian, Alaska (Unsurveyed)

Secs. 1 to 28, inclusive;
Sec. 29, excluding Native allotment F–15500 Parcel B;
Secs. 30 to 36, inclusive.
Containing approximately 22,701 acres.
Aggregating approximately 201,748 acres.

Excluded from the above-described lands herein approved for conveyance are the submerged lands, up to the ordinary high water mark, beneath all water bodies determined by the Bureau of Land Management to be navigable because they have been or could be used in connection with travel, trade and commerce. Those water bodies are identified on the attached navigability maps, the original of which will be found in easement case file F–21779–4.

All other water bodies not depicted as navigable on the attached maps within the lands to be conveyed were reviewed. Based on existing evidence, they were determined to be nonnavigable.

The lands excluded in the above description are not being approved for conveyance at this time and have been excluded because they are under applications pending further adjudication. These exclusions *do not* constitute a rejection of the selection application, unless specifically so stated.

The conveyance issued for the surface and subsurface estates of the lands described above shall contain the following reservation to the United States:

Pursuant to Sec. 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)), as amended, the following public easements, referenced by easement identification number (EIN) on the easement maps attached to this document, copies of which will be found in case file F–21779–4, are reserved to the United States. All easements are subject to applicable Federal, State, or Municipal corporation regulation. The following is a listing of uses allowed for each type of easement. Any uses which are not specifically listed are prohibited.

25 Foot Trail—The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsleds, animals, snowmobiles, two- and three-wheel vehicles, and small all-terrain vehicles (ATV's) (less than 3,000 lbs. Gross Vehicle Weight (GVW)).

One Acre Site—The uses allowed for a one (1) acre site easement are: vehicle parking (e.g., aircraft, boats, ATV's snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading or unloading shall be limited to 24 hours.

a. (EIN 4 C5, M) A one (1) acre site easement upland of the ordinary high water mark on the right bank of Lower Mouth Birch Creek, in Sec. 12, T. 17 N., R. 7 E., Fairbanks Meridian. The uses allowed are those listed above for a one (1) acre site.

b. (EIN 8 C5) A one (1) acre site easement upland of the ordinary high water mark on the right bank of Upper Mouth Birch Creek, in Secs. 4 and 5, T. 18 N., R. 8 E., Fairbanks Meridian. The uses allowed are those listed above for a one (1) acre site.

c. (EIN 14 C5, M) A one (1) acre site easement upland of the ordinary high water mark on the right bank of Beaver Creek, in Sec. 24, T. 17 N., R. 7 E., Fairbanks Meridian. The uses allowed are those listed above for a one (1) acre site.

d. (EIN 21 M) An easement for an existing access trail twenty-five (25) feet in width from the north townsite boundary of Birch Creek in Secs. 27 and 28, T. 17 N., R. 9 E., Fairbanks Meridian, northerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

e. (EIN 22 C5) An easement for a proposed access trail twenty-five (25) feet in width from trail EIN 3 C3, C5, D1, D9 in Sec. 35, T. 19 N., R. 10 E.,

Fairbanks Meridian, easterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

f. (EIN 34 E) An easement for a proposed access trail twenty-five (25) feet in width from public lands in Sec. 1, T. 15 N., R. 10 E., Fairbanks Meridian, northeasterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

g. (EIN 35 E) An easement for a proposed access trail twenty-five (25) feet in width from public lands in Sec. 6, T. 18 N., R. 9 E., Fairbanks Meridian, northwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

h. (EIN 36 E) An easement for a proposed access trail twenty-five (25) feet in width from public lands in Sec. 31, T. 18 N., R. 9 E., Fairbanks Meridian, southwesterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

i. (EIN 37 E) An easement for a proposed access trail twenty-five (25) feet in width from public lands in Sec. 1, T. 17 N., R. 10 E., Fairbanks Meridian, northeasterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

j. (EIN 38 C5) An easement for a proposed access trail twenty-five (25) feet in width from site EIN 4 C5, M on the right bank of Lower Mouth Birch Creek in Sec. 12, T. 17 N., R. 7 E., Fairbanks Meridian, northerly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

k. (EIN 39 E) An easement for a proposed access trail twenty-five (25) feet in width from public lands in Sec. 36, T. 18 N., R. 11 E., Fairbanks Meridian, southeasterly to public lands. The uses allowed are those listed above for a twenty-five (25) foot wide trail easement.

The grant of the above-described lands shall be subject to:

1. Issuance of a patent after approval and filing by the Bureau of Land Management of the official plat of survey confirming the boundary description and acreage of the lands hereinabove granted; and

2. Valid exisiting rights therein, if any, including but not limited to those created by any lease (including a lease issued under Sec. 6(g) of the Alaska Statehood Act of July 7, 1958 (48 U.S.C. Ch. 2, Sec. 6(g))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him. Further, pursuant to Sec. 17(b)(2) of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1616(b)(2)) (ANCSA), as amended, any valid existing right recognized by ANCSA shall continue to have whatever right of access as is now provided for under existing law.

To date, approximately 4,432,096 acres of land, selected pursuant to Sec. 12(c) of ANCSA, as amended, have been approved for conveyance to Doyon, Limited.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks, in the Tundra Times.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the attached regulations in Title 43 Code of Federal Regulations (CFR), Part 4, Subpart E as revised. However, pursuant to Pub. L. 96–487, this decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of this decision shall have 30 days from receipt of this decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, and parties who failed or refused to sign the return receipt shall have until October 29, 1982 to file an appeal.

Any party known or unknown who is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Managment, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeals. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the party to be served with a copy of the notice of appeal is:

Doyon, Limited, Land Department,
Doyon Building, 201 First Avenue,
Fairbanks, Alaska 99701

Ann Johnson,

Chief, Branch of ANCSA Adjudication.

Susanville District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 94–579 (FLPMA) that a meeting of the Susanville District Grazing Advisory Board will be held on November 9 and 10, 1982.

The meeting will begin at 9:00 a.m. at the Ravendale Fire Station of the Bureau of Land Management, Ravendale, California. The meeting will include a 2-day tour of the Cal-Neva Planning Unit with an evening meeting which will include the following items:

1. Accounting of Wild Hourse Adoption Fee Money
2. Wilderness Update
3. BLM/FS Boundary Adjustment
4. Challis Stewardship Meeting
5. Public Lands Council Meeting
6. Unauthorized Grazing Use
7. Secret Witness Program
8. Privatation Report
9. Massacre Mtn/High Rock Allotment Update.

The evening meeting is open to the public. Interested persons may make oral statements to the Board between 6:00 p.m. and 7:00 p.m. on November 9th, or file a written statement for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, P.O. Box 1090, Susanville, California 96130–1090, by November 1, 1982. Depending upon the number of persons wishing to make oral statements, a per person list limit may be established.

Summary minutes of the Board Meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Dated: September 21, 1982.

Ben F. Collins,

Acting District Manager.

BILLING CODE 4310-84-M

[ES 30660, Survey Group 167]

Florida; Filing of Plat of Survey

1. On January 28, 1981, the plat representing the dependent resurvey of a portion of the subdivisional lines designed to restore the corners in their true original locations; a reestablishment of a portion of the record meander line; an extension survey to include lands omitted from the original survey in Sections 15, 22 and 27; and the survey of the meanders of a portion of East Bay, Pine Island and Little Pine Island, T. 5 S., R. 12 W., Tallahassee Meridian, Florida, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on December 28, 1982.

The lots shown below describe the lands omitted from the original survey.

Tallahassee Meridian, Florida

T. 5 S., R. 12 W.,
Sec. 15, Lot 1;
Sec. 22, Lots 5, 6, 7, 8, 9, 10, 11, and 12;
Sec. 27, Lots 8 and 9.

2. The character of the lands described above is similar in all respects to that of the adjacent surveyed and patented lands. The terrain in the area of the omitted lands is nearly level, ranging from 1 to 10 feet above sea level. The drainage in this area is fair to poor depending upon the elevation of the land. Timber consists of slash pine, cabbage palmetto, live oak, yaupon, cedar, and bay. Undergrowth consists of Spanish bayonet, sea myrtle, cabbage palmetto, scrub oak, and vines, with native grasses in the open areas. Many old stumps were found on the omitted lands. The soil is primarily sand and sandy loam with a mixture of shell.

3. The lands described above were found to be over 50 percent upland in character with the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are, therefore, held to be public land.

4. All inquiries relating to these lands should be sent to the Chief, Division of Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 (90 days from date of publication).

Jeff O. Holdren,

Chief, Division of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Intent To Prepare an Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement.

SUMMARY: The Department of the Interior, Bureau of Land Management, Ukiah District Office, California, is giving notice that a joint environmental impact statement and environmental impact report will be prepared by Engineering-Science of Berkeley, California, for the Homestake Mining Company's McLaughlin Gold Mine Project.

FOR FURTHER INFORMATION CONTACT: William L. Larramendy, Clear Lake Resource Area Manager, Bureau of Land Management, Ukiah District Office, P.O. Box 940, 555 Leslie Street, Ukiah, California 954832, telephone (707) 462-3873.

SUPPLEMENTARY INFORMATION: In accordance with 43 CFR Part 3809, Homestake Mining Company submitted a Plan of Operations on September 1, 1982, for a gold mine on private and public lands near Knoxville, California. The plan involves an open pit mine, milling facility, tailings pond, waste rock disposal area, slurry pipelines, utility corridors, and roadways.

It has been determined that an environmental impact statement is necessary to comply with the National Environmental Policy Act (NEPA) and that an environmental impact report is necessary to comply with the California Environmental Quality Act (CEQA). The counties of Lake, Napa, and Yolo and the Bureau of Land Management have selected Engineering-Science of Berkeley to prepare the joint EIS/EIR for the McLaughlin Project. Napa County is the lead agency for CEQA and the BLM is the lead for NEPA.

Approximately 20 regulatory agencies have been notified of the project and have participated in the analysis of the baseline data prepared by D'Appolonia Consulting Engineers, Inc. Some of the more critical issues that have been identified are water quality degradation, impacts to public services, and impacts to existing uses of the land. Additional scoping meetings will be held to further identify issues and alternatives to the various facets of the project. Dates and times of the meetings will be published in local newspapers and sent to interested individuals. Those with comments or those who want to be placed on a mailing list should contact the Ukiah District Office, the planning departments of the various counties, or Project Coordinator James Goodfellow, 1195 Third Street, Room 210, Napa, California 94558, telephone (707) 253-4416.

Dated: September 21, 1982.

Van W. Manning,

District Manager.

82-173	E½SW¼SE¼SW¼, W½SE¼SE¼SW¼	10.0
Total acres		227.99

Parcel numbers coincide with the last two digits of Bureau assigned serial numbers N–36739 through N–36773; Parcel 82–1(39) is N–367(39), Parcel 82–173 is N–36773.

These parcels, situated in the sourthern portion of the Las Vegas Valley, have potential for urban-suburban, commercial and industrial development.

Transfer of the land from Federal ownership will facilitate local land use planning and enhance its compatibility with adjoining private land uses. At least 212.68 acres of the land herein described will be offered for sale initially at a public auction to be held on November 16, 1982 in Las Vegas. The parcels not sold at the auction will be available at a later date for purchase "over-the-counter" on a first come-first served basis at the Bureau of Land Management's Las Vegas District Office, 4765 Vegas Drive, Las Vegas, Nevada. Prior to issuance of patent, the purchaser will also have an opportunity to buy the locatable and saleable mineral interests in accordance with 43 CFR 2720.

General terms and conditions of the sale are:

1. The land will be sold subject to all valid existing rights such as power transmission and telephone line easements and federally issued oil and gas leases.

2. The land will be sold subject to reservations for streets, roads and public utilities, both existing and proposed, in accordance with Clark County plans.

3. All land that is sold will be subject to applicable Clark County ordinances.

The land will be offered at an auction utilizing oral bidding procedures. The highest oral bid will establish the purchaser. Adjoining landowners have no preference rights. Specific information regarding the time and site of the auction, and bidding procedures will be published in a sale brochure and made available to the public at least three weeks prior to the sale. Both methods of sale will require a non-refundable deposit of at least 20 percent of the purchase price at the time of the sale. The remainder shall be due within 30 days of the sale. Personal or certified checks, money orders, and cash are acceptable forms of payment. Only U.S. citizens and legally chartered U.S. corporations are eligible to purchase these lands.

For period of 45 days from the date this notice is published in the Federal Register, interested person may submit comments regarding this sale to the State Director (N–943), P.O. Box 12000, Reno, NV 89520.

William J. Malencik,

Chief, Division of Operations.

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf, Chevron U.S.A. Inc.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development and Production Plan.

SUMMARY: Notice is hereby given that Chevron U.S.A. Inc. has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS–G 1192, Block 41, South Marsh Island Area, Offshore Louisiana.

The purpose fo this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Minerals Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing pactices and procedures under which the Minerals Management Service makes information contained in Development and Production Plan available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised §250.34 of Title 30 of the Code of Federal Regulations.

Dated: September 22, 1982.

John L. Rankin,

Acting Minerals Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-01-M

National Park Service

Shenandoah National Park; General Management Plan Availability of Draft Development Concept Plan and Notice of Meeting

AGENCY: Shenandoah National Park, National Park Service, Interior.

ACTION: Notice of availability of Draft General Management Plan Development

Concept Plan and Notice of Public Review Period and Public Meetings.

SUMMARY: The Draft General Management Plan/Development Concept Plan for this national park in Virginia is now available for public review. The draft plan outlines a program for land protection, natural and cultural resource protection, visitor use and interpretation, general development for the next 10 to 15 years and administration of the park.

The Public Review Period is from October 15 to December 20, 1982. Copies of the Draft Plan/Development Concept Plan or its Summary may be obtained at park headquarters, Shenandoah National Park, Route 211, Luray, Virginia 22835; at Virginia State Library, Richmond, Virginia; at the county clerk's office at Warren, Albemarle, Rockingham, Madison, Greene, Page, Augusta, Rappahannock and Nelson counties; at the city clerk's office at Charlottesville, Staunton and Waynesboro, Virginia; at public libraries in Warren, Albemarle, Rockingham, Madison, Greene, Page, Augusta and Rappahannock counties; at the Mid-Atlantic Regional Office, 143 S. Third Street, Philadelphia, Pennsylvania 19106; and at the National Park Service Public Affairs Office, Room 3045, Main Interior Building, Washington, D.C. 20240.

Eight public meetings will be held to discuss plan recommendations and to receive public comment. Members of the NPS planning team and park staff will be available at each meeting to answer questions and discuss mutual concerns relating to the plan. The public meeting dates and location are:

Dates	Times	Open house locations
Monday, Nov. 8, 1982	3:30 to 5 p.m., 7 to 9 p.m.	Warren County, Samuels Public Library, Front Royal, Va.

BILLING CODE 4310–70–M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications; Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349,* 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register.** Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.241. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.241(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: September 23, 1982.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

MC–F–14750, filed September 2, 1982. INTERSTATE MOTOR FREIGHT

SYSTEM (110 Ionia Avenue, N.W., P.O. Box 2389, Grand Rapids, MI)—CONTINUANCE IN CONTROL—INTERSTATE SYSTEM STEEL DIVISION, INC. (P.O. Box 412, Murrysville, PA 15668). Representative: Michael P. Zell, 110 Ionia Avenue, N.W., Suite 7000, Grand Rapids, MI. Interstate Motor seeks authority to continue in control of Interstate System upon institution by the latter of operations in interstate or foreign commerce as a motor carrier. Interstate System was granted authority under MC–160439 to transport *lumber and wood products, chemicals and related products, plastic products, clay, concrete, glass or stone products, metal products, machinery,* and *snow vehicles,* between points in the United States (except AK and HI).

BILLING CODE 7035-01-M

[Volume No. 298]

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: September 22, 1982.

The following restriction removal applications, filed after December 28, 1980, are governed by 49 CFR 1137. Part 1137 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1137.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Canadian Carrier Applicants

In the event an application to transport property, filed by a Canadian domiciled motor carrier, is unopposed, it will be reopened on the Commission's own motion for receipt of additional evidence and further consideration in light of the record developed in Ex Parte No. MC–157, *Investigation Into Canadian Law and Policy Regarding Applications of American Motor Carriers For Canadian Operating Authority.*

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Restriction Removal Board, Members Shaffer, Williams, and Higgins.

Agatha L. Mergenovich,

Secretary.

MC 78177 (Sub-5)X, filed September 16, 1982. Applicant: O'BRIEN MOVERS, INC., 155 Highland Ave., Watertown, MA 02172. Representative: Robert G. Parks, 20 Walnut St., Suite 101, Wellesley Hills, MA 02181. Sub 4: (1) Broaden household goods to "household goods, furniture and fixtures"; and (2) change Malden, MA and points within 10 miles of Malden to Essex, Middlesex, Norfolk and Suffolk Counties, MA.

MC 135046 (Sub-27)X, filed July 30, 1982, previously noticed in the **Federal Register** of September 14, 1982, and republished as follows: Applicant: ARLINGTON J. WILLIAMS, INC., 1398 S. DuPont Hwy., Smyrna, DE 19977. Representative: James H. Sweeney, P.O. Box 9023, Lester, PA 19113. As is pertinent here, applicant seeks to remove restrictions (1) in its Sub-No. 12 certificate to broaden the territorial description from Mechanicsburg, PA, to Beaver and Cumberland Counties, PA, and (2) in its Permit No. MC–113024 (Sub-Nos. 29, 66, and 150) to broaden the territorial descriptions to between points in the United States (except AK and HI), under continuing contract(s) with a named shipper. The purpose of this republication is to reflect applicant's original requests and to request comments from interested parties.

MC 139405 (Sub-3)X, filed September 2, 1982. Applicant: FRITZ MENSINGER, d.b.a. MENSINGER TRUCKING, 1430 Powers, Lewiston, ID 83501. Representative: Timothy R. Stivers, P.O.B. 1576, Boise, ID 83701. Lead and Sub-2 certificates (acquired in MC–FC–77463): (A) broaden to "food and related products" from bananas and/or exempt agricultural commodities, moving in mixed loads with bananas, both Subs; (B) remove the restriction limiting service to the transportation of shipments destined to named facilities, lead; (C) substitute "all ports of entry on the United States-Canada boundary line in Washington" in lieu of ports of entry near Northport, WA, lead; (D) broaden to (1) county-wide authority: Los Angeles and Orange Counties, CA (Long Beach and Wilmington); Missoula and Flathead Counties, MT (Missoula and Kalispell); Umatilla County, OR (Pendleton); and Nez Perce County, ID (Lewiston), Sub 2; and (2) radial authority, both Subs.

MC 144468 (Sub-1)X, filed September 13, 1982. Applicant: KEVIN A. SMITH, d.b.a., AUTO TRANSPORT, 141 Sperry Rd., Bethany, CT 06525. Representative: Milo J. Altschuler, P.O. Box 903, Seymour, CT 06483. Broaden to "Transportation Equipment" from antique and classic automobiles, in truckaway service.

MC 145179 (Sub-8)X, filed September 20, 1982. Applicant: J & J CONTRACT CARRIER, INC., 60 South State St. Indianapolis, IN. Representative: Donald W. Smith, P.O. Box 40248, Indianapolis, IN 46240. Sub-5 permit; (1) broaden salt, in packages to "food and related products", and (2) expand territorial authority to between points in the United States, under continuing contract(s) with named shippers.

MC 147514 (Sub-4)X, filed September 13, 1982. Applicant: L. E. MATCHETT TRUCKING, LTD., 503 47th Street East, Saskatoon, Saskatchewan, Canada S7K 5B5. Representative: Thomas J. Van Osdel, 15 Broadway, Suite 502, Fargo, ND 58102. Sub 2F certificate: broaden from (1) dry fertilizer and fertilizer ingredients, in bulk, to "chemicals and related products" and (2) animal feed, poultry feed and animal and poultry feed ingredients, in bulk, to "food and related products and farm products".

[FR Doc. 82-26682 Filed 9-28-82; 8:45 am]

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority; Decisions

The following applications, filed on or after February 9, 1981, are governed by Special Rule of the Commission's Rules of Practice, see 49 CFR 1100.251. Special Rule 251 was published in the **Federal Register** on December 31, 1980, at 45 FR 86771. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80100.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.252. Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations. A copy of any application, including all supporting evidence, can be obtained from

applicant's representative upon request and payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated a public need for the proposed operations and that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Please direct status inquiries about the following to Team 1, (202) 275–7992.
